6. Experience in External Quality Assessment/External Peer Review of academic program (starting with the latest)

I served as an Expert Evaluator for REPRISE, established by the Italian Ministry of Education, Universities, and Research (MIUR), to award research grants. In 2018, I also evaluated grant applications for the Faculty of Computing at Universiti Malaysia Pahang. Additionally, I served on the Technical Program Committee (TPC) for numerous conferences, including GlobeCom, InfoCom, ICC, ICCIT, and others. These roles involved assessing the quality, feasibility, and impact of research proposals.

7. Other experience that best illustrates your capability as a QA Professional (Starting with the latest)

The following experiences best illustrate my capability as a Quality Assurance (QA) professional:

As Director of the Institutional Quality Assurance Cell (IQAC) at Green University of Bangladesh (GUB), I oversee the implementation of quality assurance policies to enhance academic and administrative standards. This role involves coordinating with the Bangladesh Accreditation Council (BAC), ensuring compliance with national QA guidelines, and leading initiatives for institutional accreditation and continuous quality improvement (CQI).

In my capacity as Dean of the Faculty of Science and Engineering, I manage academic programs, faculty development, and curriculum quality. My responsibilities include aligning programs with Outcome-Based Education (OBE) principles, meeting accreditation standards, and contributing to global ranking criteria, such as QS and THE Impact Rankings, to elevate GUB's international standing.

Previously, as Chairperson of the Department of Computer Science and Engineering, I managed academic and administrative operations, including curriculum development, faculty recruitment, and preparation for program accreditation. I played a pivotal role in aligning departmental programs with Board of Accreditation for Engineering and Technical Education (BAETE) standards and OBE frameworks.

At University Malaysia Pahang, I coordinated curriculum development for courses such as Cryptography (BCN3223) and Network Programming (BCN3033). I also spearheaded the "Global Classroom" initiative for Data Communication & Networking, integrating innovative teaching methods and international collaboration to enhance learning outcomes. Additionally, I developed lab manuals and video lectures to ensure consistent teaching quality.

As Organizing Chair for the Scopus-indexed International Conferences on Sustainable Technologies for Industry (STI) from 2021 to 2023, I ensured rigorous quality control in peer review and event management. I secured significant funding, including Tk. 200,000 for STI 2022 and Tk. 300,000 for STI 2021, to support high academic standards.

These experiences highlight my leadership in quality assurance, curriculum development, accreditation processes, and academic event management, demonstrating practical applications of QA expertise in higher education.
