Message

Education constitutes a fundamental pillar of national development, serving as a critical driver for the formation of skilled human capital. Its multidimensional impact extends across social, cultural, economic, and political spheres, thereby reinforcing the structural foundations of a nation. In alignment with Sustainable Development Goal 4 (SDG 4), the provision of inclusive and quality education is indispensable for fostering a sustainable and equitable society, as well as for advancing the broader objectives of the 2030 Agenda for Sustainable Development.

I am pleased to acknowledge the successful completion of the Online Annual Educational Institution Survey 2025, conducted by the Bangladesh Bureau of Educational Information and Statistics (BANBEIS). The comprehensive report generated from this survey, encompassing key educational indicators and relevant statistical insights, is expected to significantly contribute to evidence-based policymaking and strategic planning. It will play a pivotal role in facilitating the expansion and enhancement of high-quality technical and vocational education across the country.

In recent years, Bangladesh has witnessed a notable increase in enrollment in technical and vocational education, largely attributable to the establishment of numerous institutions in this sector. The findings of the 2025 Education Survey underscore substantial progress in improving access, quality, and outcomes in technical and vocational education. Consequently, the report assumes particular importance in shaping a positive public perception of this sector and in encouraging greater student participation in technical and vocational disciplines.

I extend my sincere appreciation and commendation to all individuals and institutions whose dedicated efforts ensured the successful execution of the survey and the timely publication of this insightful report. This accomplishment represents a significant milestone in the ongoing pursuit of excellence in education and its contribution to national development.

Preface

It is with great pleasure that I present the **'Bangladesh Education Statistics 2025'** report, an authoritative compendium produced by the Bangladesh Bureau of Educational Information and Statistics (BANBEIS). As the nation's responsible agency for collection, analysis, and dissemination of educational data, the BANBEIS remains committed to supporting evidence-based policy and fostering transparency in Bangladesh's education sector.

This edition arrives at a pivotal moment. Bangladesh has made substantial progress in expanding access to education, achieving near-universal enrolment at the secondary level and notable strides toward gender parity across all tiers of education. However, significant challenges persist. The quality of education, particularly in foundational skills and learning outcomes, remains an area requiring urgent attention.

I take this opportunity to mention that budgetary allocations for education have not kept pace with national targets, with education spending as a share of GDP remaining below international recommendations and national aspirations. The sector continues to grapple with the adverse impact of the COVID-19 pandemic, which exposes and exacerbates disparities in access to digital learning resources and highlighted the need for resilient, inclusive education systems.

This report provides comprehensive and reliable data, offering insights into enrolment, completion rates, gender parity, and resource allocation across all levels of education. I am confident that such data will play significant role for the policymakers, researchers, and stakeholders as they jointly strive to achieve Sustainable Development Goal 4: ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all.

The BANBEIS is steadfast in its mission to uphold the highest standard of data integrity and utility, reinforcing its role as a cornerstone of educational planning and development in Bangladesh. It is my conviction that the **'Bangladesh Education Statistics 2025'** will serve as a valuable resource in shaping the future of education in our country.

I would like to express my gratitude to the officers & staff of the BANBEIS, who have contributed to preparing this valuable report. I sincerely acknowledge the contribution of all the heads of institutions as survey respondents. I would also like to take the opportunity to extend my sincere thanks to all the field officers including the DEO, the USEO, the AP, and the others, who have enriched this publication with their valuable inputs. Special thanks to the BBS, the DPE & the UGC for their cooperation to prepare this report.

We have tried our best to ensure an error-free publication, still it might have some minor errors. Any pragmatic suggestion and recommendation would be highly appreciated and necessary measures would be taken in the future publication.

Concepts and Definitions

Enrolment :

Enrolment is defined as the number of individuals officially registered in a given educational programme, or stage or module thereof, regardless of age.

Class size :

The actual number of students assigned to a specific classroom.

Teacher Student Ratio (TSR) :

Proportion of teachers relative to the number of students, calculated by dividing total students by total teachers.

Example: Suppose a school has 500 students and 20 teachers.

$$\text{TSR} = \frac{\text{Total Number of Students}}{\text{Total Number of Teachers}}$$
$$= \frac{500}{20}$$
$$= 25$$

The TSR is 25:1, meaning there are 25 students for every one teacher.

Urban Area :

Refer to the area covered by Municipalities, Upazila Head Quarters, District Head Quarters and City Corporations in the country.

City Corporation :

City Corporation is a local government body responsible for administering and managing a large city. It provides urban services such as waste management, road maintenance, street lighting, public health, water supply coordination, and urban planning.

Rural Area :

Rural refers to areas located outside towns and cities, usually characterized by villages, low population density, agricultural activities, and limited urban facilities.

Gender Parity Index (GPI) :

Gender Parity index is a socioeconomic indicator that measures the relative access to education (or other development indicators) between females and males. It is widely used by UNESCO Institute for Statistics (UIS), World Bank, BANBEIS (Bangladesh), and others to track gender equality in education.

The GPI is the ratio of the female value to the male value of a given education indicator (e.g., enrolment ratio, literacy rate, or completion rate).

- **GPI = 1** indicates perfect gender parity.
- **GPI < 1** indicates disparity in favor of males (girls/women have lower access).
- **GPI > 1** indicates disparity in favor of females.

Gross Enrolment Ratio (GER) :

Gross enrolment ratio is widely used to show the general level of participation in a given level of education. Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.

Number of pupils (or students) enrolled in a given level of education regardless of age expressed as percentage of the population of the age group which officially corresponds to the given level of education.

$$GER_{n,t} = \frac{E_{n,t}}{P^{a}_{n,t}}$$

where:

$GER_{n,t}$ = gross enrolment ratio at level n of education in academic year t

$E_{n,t}$ = Enrolment at the level n of education in academic year t

$P^{a}_{n,t}$ = Population in age group a which officially corresponds to the level n of education in academic year t

A high GER generally indicates a high degree of participation, whether the pupils belong to the official age group or not. A GER value approaching or exceeding 100% indicates that a country is, in principle, able to accommodate all of its school-age population, but it does not indicate the proportion already enrolled. The achievement of a GER of 100% is therefore a necessary but not sufficient condition for enrolling all eligible children in school.

When the GER exceeds 90% for a particular level of education, the aggregate number of places for pupils is approaching the number required for universal access of the official age group. However, this is a meaningful interpretation only if one can expect the under-aged and over-aged enrolments to decline in the future to free places for pupils from the expected age group.

Net Enrolment Rate (NER) :

Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population. To show the extent of coverage in a given level of education of children and youths belonging to the official age group corresponding to the given level of education.

Number of pupils (or students) enrolled who are of the official age group for a given level of education expressed as percentage of the population for the same age group.

$$NER_{n,t} = \frac{E^{a}_{n,t}}{P^{a}_{n,t}}$$

where:

$NER_{n,t}$ = Net enrolment rate at level n of education in academic year t

$E^{a}_{n,t}$ = Enrolment of the population of the official age group a for level n of education in academic year t

$P^{a}_{n,t}$ = Population in age group a which officially corresponds to the level n of education in academic year t

A high NER denotes a high degree of coverage for the official school-age population. The theoretical maximum value is 100%. Increasing trends can be considered as reflecting improving coverage at the specified level of education. When the NER is compared with the GER, the difference between the two highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100%, then the complement, i.e. the difference with 100%, provides a measure of the proportion of children not enrolled at the specified level of education. However, since some of these children/youth could be enrolled at other levels of education, this difference should in no way be considered as indicating the percentage of students not enrolled. To measure universal primary education, for example, adjusted primary NER is calculated on the basis of the percentage of children in the official primary school age range who are enrolled in either primary or secondary education. A more precise complementary indicator is the age-specific enrolment ratio (ASER) which shows the participation in education of the population of each particular age, regardless of the level of education.

School age Population :

Number of persons at the age defined in a country's regulations or laws to attend a given grade or level of education in that country. This number is determined based on the official entrance age and duration of the specific grade or level of education. (Source: UIS)

Repeater :

Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.

Repetition Rate :

Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.

To measure the rate at which pupils from a cohort repeat a grade, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analyzing and projecting pupil flows from grade to grade within the educational cycle.

Number of repeaters in a given grade in school year t+1 expressed as percentage of the number of pupils from the same cohort enrolled in the same grade in the previous school year t.

$$RR_i^t = \frac{R_i^{t+1}}{E_i^t}$$

Where:

RR_i^t = Repetition rate at grade i in school ye ar t

R_i^{t+1} = Number of pupils repeating grade i, in school year t+1

E_i^t = Number of pupils enrolled in grade i, in school year t

Repetition rate ideally should approach zero percent. High repetition rate reveals problems in the internal efficiency of the educational system and possibly reflect a poor level of instruction. When compared across grades, the patterns can indicate specific grades for which there is higher repetition, hence requiring more in depth study of causes and possible remedies.

Dropout Rate :

In educational statistics, the dropout rate measures the proportion of students enrolled in a specific grade during one school year who leave the education system and do not return or enroll in the subsequent school year.

The reconstructed cohort method is a standard UNESCO-approved method used to evaluate educational efficiency. It models the flow of a fictional cohort of 1,000 students through an education cycle using aggregate enrollment data for two consecutive years.

Using this method, the dropout rate for any specific grade is calculated as a residual, meaning it comprises all students who were enrolled in a grade but were not promoted and did not repeat the following year.

The formula for the grade-specific dropout rate is:

$$D_{i,j} = 100 - (P_{i,j} + R_{i,j})$$

Where:

$D_{i,j}$ = Dropout Rate at grade i in school year y

$P_{i,j}$= Promotion Rate (percentage of students promoted to the next grade)

$R_{i,j}$ = Repetition Rate (percentage of students repeating the same grade)

Transition Rate :

The Transition Rate (TR) in education measures the percentage of students progressing from one level of schooling to the next (e.g., primary to secondary school). It helps policymakers evaluate student retention, school system efficiency, and potential drop-out point.

The TR evaluates whether students continue their schooling after completing a specific cycle.

$$\text{Transition Rate} = \frac{\text{Total number of new entrants enrolled in the first grade of the next level of schooling in year (t+1)}}{\text{Number of students who successfully completed the previous level of schooling in year t}} \times 100$$

Number of new entrants to the first grade of an education level in a given year, expressed as a percentage of the number of students who were enrolled in the final grade of the previous education level in the previous year and who do not repeat that grade the following year.

Student Per Institution (SPI) :

The average number of students enrolled in each educational institution. It is calculated by dividing the total number of students by the total number of institutions.
Example:
If a district has 50 schools and a total of 2,500 students,
Then, Student per Institution = 2,500 ÷ 50 = 50
So, on average, there are 50 Students Per Institution

Teacher Per Institution (TPI) :

The average number of teachers in each educational institution. It is calculated by dividing the total number of teachers by the total number of institutions.
Example:
If there are 60 teachers in 10 institutions, then:
Teacher per Institution = 60 ÷ 10 = 6
So, on average, there are 6 Teachers Per Institution.

Trained Teacher :

A teacher who has completed formal professional training in education or teaching methods and is qualified to teach in a institution.

E9-countries :

E9 Countries refer to the nine most populous developing countries that were part of the Education for All (EFA) initiative to improve education access and literacy.
The E9 countries are: Bangladesh, Brazil, China, Egypt, India, Indonesia, Mexico, Nigeria, Pakistan.

Executive Summary

Introduction:

The education system of Bangladesh is comprised of mix of heterogeneous providers. A variety of schools operate within the country; government run schools, privately run schools and madrasah, English medium schools (British Curriculum), schools run by NGOs and kindergarten schools. Primary education spans grade 1-5; Junior secondary grades 6-8, secondary grade 9-10, higher secondary grade 11-12 and tertiary education grades 13 and above. It is noted that the government is going to implement primary education comprising from grade I-VIII.

Bangladesh has a centralized Education system administered by the Ministry of Education (MOE) with two divisions viz, Secondary and Higher Education Division (SHED) & Technical and Madrasah Education Division (TMED) and the Ministry of Primary and Mass Education (MOPME). The MOPME and DPE are responsible for planning and management of primary, mass and pre-primary education. The MOE, DSHE and DTE are responsible for post-primary education. The MOE and UGC look after the overall management of tertiary education.

Education is the pivotal tool of the development of any country. Given this view the incumbent government has been giving top most importance to the expansion of education. For the past decade Bangladesh has been investing more to achieve the education Millennium Development Goals (MDGs). Besides reducing poverty, Bangladesh has made spectacular success in improving access to education. The gross enrolment ratio in primary education in 2024 has reached 106.37% and net enrolment rate 94.55%. The gross enrolment ratio in secondary education in 2025 reached 70.22% while net enrolment rate 65.10%. Bangladesh has achieved gender parity for educational access in both primary and secondary education (well in advance of their 2015 MDGs). Now disparity in favor of girls' student both primary and secondary level. The number of out of school children has been continuously decreasing both in absolute and relative term. Bangladesh education system is large, catering to over 38.91 million students (2024), involving many stakeholders (for example there are 14 types of providers in primary education, 11 examination broads at the secondary levels, about 94.17% secondary education institutions are privately managed).

For the planning and development of the education sector, the ministries need a complete quality database. With a view to up-dating the database, BANBEIS regularly conducts post-primary education surveys. The base-line survey was conducted in 2008 after that the annual survey was conducted in 2009, 2010, 2011, 2012, 2013, 2014 ,2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024 and 2025. The purpose of Bangladesh Education Survey is

to provide up-dated educational information and key performance indicators to the policy makers and other stakeholders. The scope of Annual Survey 2025 was very broad. All the educational institutions imparting post-primary education were covered.

The present report based on Educational Survey 2025 data do not fully address issues such as management, governance, equity and non-teaching staff. The socio-demographic characteristics of students and teachers were not considered. One limitation of the survey is the difficulty in obtaining data from English medium schools, Medical Colleges and Universities. The Annual Education Survey 2025 has used 10 type questionnaires, one for each types of institution. The questionnaires were presented to the Stakeholders Consultation Workshop and took feedback and incorporated it before finalization. The questionnaires were also pretested before finalization.

Questionnaires were up-loaded to Website viz; www.banbeis.gov.bd to fill up and sent it to BANBEIS server through On-line. The data collection started on 20.10.2024 and continued up to 21.11.2024. Editing was done at the field (USEO office) and head office to ensure quality of data. Besides, Post Enumeration Check (PEC) was done for School, College and Madrasahs to minimize errors. It was found that the main survey data were reliable and valid. According to the Annual Survey 2025, there were 45891 Post Primary Educational institutions in the country. Among them 37571 are unique Institutions holding EIIN, besides 3850 Institutions are attached technical and vocational to other Institution. This number was 44573 in the year 2024.

Annual Primary School Census (APSC) 2024 was conducted by The Directorate of Primary Education (DPE) and the data shown in this report about primary education as secondary sources.

Bangladesh primary education (Pre-primary to Grade V) system is very large, catering to 20.18 million students in 2024 through 25 types of providers. Among them the government primary schools alone covered 10.61 million (52.8%) students. The total number of girl students was 10329086 (51.2%). The GPI 1.04 i.e., parity exists. In 2024 total teachers (GPS only) were 383624 with female teachers were 65.9% of all teachers. Variation was observed between types of primary education institutions (Table 2.3).

Pre-primary education enrolment (Table-2.2) was 3496423 among them 1766892 (50.5%) were girls. Drop-out was prevalent in every grade, the rate was higher in grade Four 7.9 (Table 2.23).

Gross Intake Rate (GIR) and Net Intake Rate (NIR) was 104.71% and 93.31% respectively (Table 2.8). A small difference was observed between boys and girls. The overall GER begins at 107.70% in 2010, peaks at 114.23% in 2018, and decreases to 106.37% in

2024. GER of girls (110.75%) was higher than that of boys. NER in primary education was 94.8% in 2010 and 94.55% in 2024 (Table 2.9). The growth was spectacular and confirms continuous increase of access of school age children to education.

Drop-out rates have been continuously decreasing from 39.80% in 2010 to 16.25% in 2024 (Table 2.16). Survival rates have shown a continuous growth trend from boys 65.90% and girls 68.60% in 2010 to boys 81.23% and girls 86.83% in 2024 (Table 2.17).

Now the present context of the world every country is surviving to achieve SDGs. Bangladesh is also committed to achieve SDGs by inspiring its wonderful success in Millennium Development Goals

Education is the very much influential target of SDGs which is also the key instrument of development. To ensure inclusive and equitable quality education and promote lifelong learning opportunities for all, Goal 4 has been adopted aiming to attain 10 Global Targets. There are 12 Global Indicators as well as 31 Thematic Indicators for the monitoring of quality education. Bangladesh has made remarkable progress in improving access to education at all levels. It also gradually moving forward to achieve the Sustainable Development Goal 4.

Goal: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Introduction, Objectives and Survey Methodology

Chapter: One
Introduction, Objectives and Survey Methodology

Introduction

Education plays key role in the development of any country. It is world-wide recognized that a rapid improvement of education is end result for accelerating economic, social and human development. The overall development can be achieved through proper and well-planned education system catering to the diverse needs of the nation.

Considering the importance of education in building the nation all the governments in Bangladesh regardless of their political character, affiliation and ideological learnings appeared to have assigned a high priority to the expansion of access, equity and quality of education at all levels. The present government also has taken different steps for the development of the education system with the firm impression to build digital Bangladesh.

In order to achieve the goal of vision 2041, effective education planning and management are very much essential. Updated, reliable and accurate data set is indispensable for the coherent educational planning, development and management of educational system in Bangladesh. The MOE is responsible for the planning and development of education sector. It is also responsible for the effective and efficient management of the educational institutions of the country. To this end the MOE entrusted the BANBEIS with the responsibility of providing valuable and authentic information. The MOE asked the BANBEIS to follow scientific methods to establish facts and figures for taking appropriate decisions.

With a view to providing accurate and up-dated data set for planning, development and management of the education institutions as well as monitoring the progress (changes) of the sector and sub-sectors, the BANBEIS starting from 2008 regularly conducted a survey of all educational institutions involved in offering post-primary education. For primary education the BANBEIS uses the data set regularly collected by the DPE through Annual Primary School Census.

It is intended to collect through the education surveys all relevant data from all educational institutions for knowing the parameters of important variables such as access, equity, quality, continuation, drop-out, transition in relation to student's participation, teaching and other facility available in the respective institutions. The target population is enormously large. The number of variables in each subsector is also big. The tasks involved are therefore gigantic and it not properly executed, there are changes of non-sampling errors. The BANBEIS has been developing quality assurance measures to minimize the non-sampling errors.

The last education Census in the name of National Educational Survey (NES) was conducted in 2008. Changes are continuously taking place. The number of institutions in each subsector, their enrolment, and teachers involved, facility is continuously changing. Many changes took places in the education sector. There have been spectacular increases in the number of institutions, enrolment and teachers all over the country. It is necessary to know whether equity and quality have been and maintained, whether girls are enjoying the fruits of expansion or disadvantaged tribes or social groups remain included as before. The

existing database needs to be up-dated to meet the present day challenged facing the education sector. It is urgently felt the need for strengthening database at the BANBEIS. The BANBEIS has been conducting the survey regularly since 2008. The surveys 2009-2024 were conducted and the reports up to 2024 were published. The present report consisting statistical tables along with analysis in some cases.

Aims and objectives of educational survey 2025

The aims of the survey 2025 are;

a. To collect up to date quality data for 2025 from all post primary education institutions to build a strong database and add the information of new institutions and delete the information of abolished institutions from the database.

b. To develop skill of the BANBEIS professional in respect of conducting the surveys, monitoring, evaluation and research.

c. To increase information awareness of teachers and administrators working in education with the data collected through the surveys and to simultaneously make both the data providers and users aware of the importance of facts and figures.

d. To impart training to the teachers and administrators working in education for developing skill in filling up the questionnaires and also use of facts and figures.

Specific objectives of the survey 2025

The specific objectives of the Survey 2025 are;

I. To update existing database for post-primary education.

II. To publish Bangladesh education statistics 2025.

III. To increase information awareness among all stake holders (teachers, managers, administrator, researchers and other users of information)

IV. To make all information available to help Policy Makers, Education Managers and Education Researchers.

V. To evolve methodology for assessing the efficiency of educational institution.

Scope of the educational institution survey 2025

All the educational institutions imparting post primary education constitutes the population of this Survey. Every institution was the unit of measurement. Every upazila/thana was considered as enumeration area. Special attention has been accorded to cover all post-primary education institutions.

Survey Methodology

Appropriate methods and techniques were employed to conduct the survey. The following approaches were followed:

1. Pre-survey activity

The following important activities were undertaken to ensure the effective and efficient implementation of the survey:

a. In order to know what data were to be collected, BANBEIS conducted consultation workshops/ seminars/meetings with the users and providers of data and shared their views. After getting

feedback from workshop questionnaires were finalized;

b. After finalizing questionnaires, a on-line data entry software was developed and uploaded to BANBEIS website for data provide;

2. Questionnaires: Drafting and finalization

A total of ten questionnaires were developed for survey 2025 In view of the types and levels of education the following questionnaires were used for annual education survey 2025.

(1) Unified Q-1 for school (2) Unified Q-2 for madrasah (3) Unified Q-3 for colleges (4) Unified Q-4 for school and colleges (5) Q-5 for Technical and vocational (6) Q-6 for professional Education and (7) Q-7 for Teachers Training colleges (8) Q-8 for Universities (Public, Private & International) and (9) Q-10 for English medium schools.

These Questionnaires were sent to relevant offices for their opinions. Their comments were incorporated in these Questionnaires. The revised questionnaires were duly pre-tested. The valuable comments/observations obtained during pre-tests were considered during finalization of Questionnaires.

3. Data collection, supervision, and monitoring

BANBEIS has introduced e-survey for online data collection directly from the education institutions. After completing data entry and updating by the Institutions, it has been verified by the USEOs/assigned officers and submitted data in the central database of BANBEIS. Online data collection started on 20 October 2025 and continued up to 21 November 2025. The whole activities were supervised and monitored by field officials of BANBEIS and the Ministry of Education.

4. Data quality control

BANBEIS took all measures to ensure the quality of data. The following steps were undertaken to ensure quality.

i. Post Enumeration Check (PEC)
ii. Computerized data cleaning

4.1 Post Enumeration Check (PEC)

Post Enumeration Check (PEC) is a statistical practice to measure the extent of error incurred in the survey and thus adjust the data collected through 2025 survey. According to survey plan BANBEIS conducted post enumeration check to ensure quality and consistency of data. The PEC was carried out on a sample basis. The PEC covered school, college and madrasah. Detail's description is shown in the annexure.

4.2 Computerized data cleaning

Data cleaning was done by using statistical package software like SPSS and STATA.

5. Data processing

In Data Processing Microsoft SQL Server is used. Data Storing, Data Mining, Data Query related work done by the Microsoft SQL Server, SQL Server Management Studio is used for Data Migration from Oracle to SQL Server, Microsoft PowerBI for PC and Microsoft Report Builder for PC is used to generate verious report and procedure excel formated report. Data early was done by each Institute. The online Survey from developed under the IEIMS project using Java and React JS and other related tools. A comprehensive cleaning process was made using Statistical tool STATA was use for Data cleaning.

6. Reporting

The initial job was to develop a tabulation plan. This was followed by generation of dummy tables. The dummy tables formed the basic statement of the report. Finally, the dummy tables were linked to datasets in the database and the data tables were created. The data tables were then edited to give the present view. So the reporting flow was as follows:

Tabulation plan ►dummy tables ►database ►data tables ►statistical tables ►report.

7. Limitations

The Annual Education Survey 2025 covers 10 types of institutions located all over Bangladesh. Record keeping of most institutions was found weak and unsystematic. So, data insert by the Heads of institution was inadequate in some cases. Some Universities, Medical colleges and English medium schools did not comply with BANBEIS request. A number of universities did not submit their data properly in the BANBEIS survey, so their data is estimated based on available data and estimated data of medical and other institutions were used while preparing this report.

Post Enumeration Check (PEC) Report 2025

Statistics Division, BANBEIS, Dhaka, Bangladesh

Introduction

For the effective and efficient management and monitoring the progress of Education sector BANBEIS regularly conducts an Annual Education Institution Survey (AEIS) of Post-Primary Education levels. The AEIS collects data from all Post-Primary Educational Institutions in 2025. In 2025, there were 19211 Secondary Schools, 1556 School & Colleges, 3380 Colleges and 9296 Madrasahs. AEIS data of 2025 gives a total view of Schools and Madrasahs. Among other the AEIS collects data for knowing the parameters on important variables such as enrolment, attendance, dropout, pass-rate, teachers, and training facility available at the institution level. The target population in respect of each variable is enormously big. If data collection is not properly done, there the chance of non-sampling error increases. These errors effect the reliability and validity of the estimates. To improve reliability and validity of the survey data BANBEIS regularly conducts validation sample Survey. The PEC is a standard practice designed to know the extent of errors present in the AEIS data.

The PEC 2025 was designed to assess primarily the quality of AEIS data in relation to some important variables such as enrolment, repetition etc.

1.2. Objectives of PEC 2025 data

The objectives are:

- To assess the quality of 2025 AEIS data
- To assess the level of accuracy of selected indicators
- To make necessary corrections of data of indicators through correction factor

1.3. Scope of Work

To achieve the objectives of the PEC 2025 it is necessary to collect relevant data through a nationally representative sample of Schools and Madrasahs. For every sample school collected data for each variable will be established. This data set will be compared with AEIS data set to assess the level of accuracy of data set. The validation is expected to identify main factors for incorrect recording and making AEIS data accurate.

1.4 Sample Size for the PEC 2025

Let n is the sample size for the PEC sample survey. We have two sets of data for the same indicator, say enrolment of a class.

x_{1c} x_{2c}.....x_{nc} are n AEIS data x_{1s}, x_{2s}, ... x_{ns} are n PEC data. x_{ic} is correct if x_{ic}, = x_{is} otherwise x_{ic} has content error.

For determining r, the Sample size, we consider the variable enrolment, the most important variable.

In case the ith institutions is free from error then $x_{1c} = x_{1s}$

If all Schools are free from errors $\sum (X1c) = \sum (X1s)$ or

$\bar{x}_{1c} = \bar{x}_{1s}$, $\bar{X}_c = \bar{X}_s$, Where $\bar{X}_s$ and $\bar{X}_c$ are population mean

If P is the percentage of AEIS Schools with no error, Q= 1-P, n= Sample size then the Standard formula for n is

$$n = \frac{(1.96)^2 pq}{d^2} \times deff$$

$\cong$768 for p=q=0.5, d=0.05 deff = 2

Thus a random Sample of 953 Institutions (Schools, School & Colleges, Colleges and Madrasahs) would provide estimates at 5% level of significance with 95% confidence level.

1.5 Selection of Schools, School & Colleges, Colleges and Madrasahs

Random Sampling is used to select Sample Schools (526), School & Colleges (57), Colleges (70), Madrasahs (245) and Technical and Vocational Educational Institutions (55).

Data Analysis, Findings and Conclusions

2.1 Analysis plan

The AEIS data are available for all school, College and Madrasah. The BANBEIS provided data for the schools, College and madrasah collected through PEC. The data set for sample Schools is: x_{1c}, x_{2c} ……. x_{nc}. The data collected through PEC are; x_{1s}, x_{2s}, ……., x_{ns}. For ith institution the survey observation is x_{ic} and the survey observation is x_{is}.

The difference x_{ic}-x_{is} is the error for the ith school.

$e_i=x_{1c}-x_{1s}$

=0 when $x_{1c}=x_{1s}$, positive if $x_{ic}-x_{1s}>0$, negative if $x_{1c}-x_{1s<}$ o.

The survey data are free from errors if e_1, e_2, ... e_N are all zero for all i. i.e

$(X_{1c}-X_{1s})$ is zero for all i=1, 2....N.

2.2 Total and average errors in the Sample.

$e_i= x_{1c}-x_{1s}$, i =1, 2, ...n

$\sum_1^n ei = \sum_1^n(x1c - x1s) = n\bar{x}c - n\bar{x}s$ = for the sample

Average errors per School in the Sample

2.3 Total errors in the population $\bar{x}c - \bar{x}s = \bar{e}$

$N\bar{e}=N(\bar{x}c - \bar{x}s) \cong N\overline{(xc - \bar{x}s)}$

2.4 Correction Factor

$\overline{X}c$ is the population mean for the survey data

$\overline{X}s$ is the population mean for the validation set

$\overline{X}s$ is the true mean of X_1, X_2, ..., X_N

We propose and estimate of $\overline{X}s$ as follows.

Estimate $\overline{X}s = \frac{\overline{X}s}{\overline{X}c}\overline{X}c = \overline{X}c$ (Correction factor= 1.00)

Where $\frac{\overline{X}s}{\overline{X}c}$ = correction factor.

A, if CF=$\frac{\overline{X}s}{\overline{X}c}$ =1, Survey estimate needs no Correction

CF > 1, Survey data provide under Estimate of the true value

CF < 1, Survey data provide over estimate of the true value

2.5 Significance of the difference between and

Our null hypotheses h_0: $\overline{X}c = \overline{X}s$

(a) If |t|> 1.96, the difference is significant the hypothesis is rejected, correction of survey mean is recommended

(b) If|t|< 1.96, the survey estimate may be taken as true value, no adjustment is required.

The t values against the respective grades confirm that the differences are statistically insignificant. That is, there is no significant difference between the AEIS and PEC values. Correction is not required (Table1 and Table 2).

2.7 Conclusion and Recommendation

For the indicators on enrolment, the relative difference between AEIS average and PEC average is found minimum. So, correction to the AEIS data is not required.

The overall quality of AEIS 2025 data is good and up to the mark. To improve further, training of data management at the institution as well as central levels should be given more emphasis.
