Foreword

I am delighted to learn that Bangladesh Bureau of Statistics (BBS) has successfully completed the 'District Statistics 2011' under Medium-Term Budget Framework (MTBF). The initiative of publishing 'District Statistics 2011' has been undertaken considering the importance of district and upazila level data in the process of determining policy, strategy and decision-making. The basic aim of the activity is to publish the various priority statistical information and data relating to all the districts of Bangladesh. The data are collected from various upazilas belonging to a particular district.

The Government has been preparing and implementing various short, medium and long term plans and programs of development in all sectors of the country in order to realize the goals of Vision 2021. For any pragmatic approach in formulating and evaluating development plans and programs reliable statistics are indispensable. BBS has been performing the major responsibility of supplying comprehensive and accurate statistics at the national level.

The present government, in line with its commitment to decentralize administration, has declared upazila as the focal point of administration regenerating upazila parishad through participatory elections. However, upazila level official statistics are still very inadequate. It is praiseworthy that BBS has undertaken timely program of publishing 'District Statistics 2011' where data representing socio-economic characteristics of upazilas of all districts will be available. I am confident that this publication will be of invaluable help to the planners, administrators, researchers, field level officers as well as other users. Various government, non-government and international organizations closely related to policy formulation and implementation may also find this publication useful.

I sincerely thank Mr. Golam Mostafa Kamal, Director General, BBS for bringing out the publication of 'District Statistics 2011'. I hope that in future 'District Statistics' will be published in much more improved form to make it more effective and informative.

Preface

The 'District Statistics 2011' is mainly a compilation work of Bangladesh Bureau of Statistics (BBS). The decentralization policy of government has enhanced demand for timely, qualitative and comprehensive statistical data both for administrative and development requirements. The major regular publications of Bangladesh Bureau of Statistics like Statistical Pocketbook of Bangladesh, Statistical Yearbook of Bangladesh and Agricultural Yearbook of Bangladesh provide aggregate data mainly at the national and regional level. Data for smaller administrative unit like upazila often remains absent in such publications. The 'District Statistics 2011' emphasises to provide upazila level data.

The 'District Statistics 2011' provides both structural and flow-type information of almost all of the priority sectors of our national economy depending on data availability both from published and unpublished sources.

The publication of 'District Statistics 2011' would have not been feasible without the wholehearted co-operation of the various government, semi-government, autonomous, non-government offices and other organizations. In particular, the district and upazila level officials extended their total support and supplied all data. I like to express my sincere thanks to them and hope such co-operation will continue in future.

I am obliged and grateful to Mr. Md. Nojibur Rahman, Secretary, Statistics and Informatics Division (SID) for his enormous support and advice to prepare and to finalize this important publication. My sincere thanks also go to all officers of SID for their wholehearted support and sincere co-operation towards accomplishing this document.

I acknowledge the contributions of Mr. Md. Mizanur Rahman, Deputy Director General, BBS and Mr. Ghose Subobrata, Director, FA & MIS, BBS during development of the Document.

The regional and upazila statistics officers of BBS actively participated in preparation of the report. I thank them all. Finally, I thank Mr. Iftekhairul Karim, Focal Point Officer and Mr. Nasir Uddin Ahmmmed, Deputy Director & Ex.Focal Point Officer as well as staff members of Bangladesh Bureau of Statistics for their untiring efforts in making the 'District Statistics 2011' a success. Through user's interaction and feedback, we hope to improve the coverage and quality of information contained in this edition. Any suggestion for improvement of the publication will be highly appreciated.

Kaptai Lake: Kaptai Lake is a wonderful spot for boating and cruising. Parjatan and private tour operators offer a number of cruises by mechanical boats. One can go to various scenic spots in Shuvalong, Barkal, Longadu, Mainimukh and other areas by boat from Rangamati. The district is also known to all for having a hydraulic Power Plant at Kaptai and Terrestrial Earth Satellite at Betbunia, Kawkhli.

Indigenous Museum: The only Indigenous Cultural Museum in the Chittagong Hill Tracts region was established at Rangamati town in 1978 and run by the Tribal Cultural Institute. It preserves valuable objects and articles of different tribes depicting their socio-economic, cultural and historical tradition. These include typical indigenous dresses, ornaments, arms and ammunitions, coins, statues made of wood, bronze and other metals, musical instruments, ivory products, handicrafts, paintings on tribal life etc.

Main Crops: Cashew nut, Paddy, jute, potato, cotton, corn mustard seed etc. are main crops of this district.

Main Fruits: Banana, pineapple, Mango, water melon, jackfruit, litchi, black berry etc. are main fruits of this district.

Newspapers: The daily Banabhumi, Gairika, Giripath, Parbatya Barta, etc are locally published newspapers of this district.

Economic Situation: The economy of Rangamati is predominantly agricultural. Out of total 108,263 holdings of the district, 74.10% holdings are farms that produce varieties of crops namely local and HYV rice, wheat, vegetable, cash crops and others. Rangamati district is famous for jackfruits and pineapples, which is abundantly grown in the district. The other important fruits are banana, guava, olive, papaya etc. Fish of special varieties ruhi, katal & chital abound in this district. All these varieties of fish are caught from lake. Besides crops, livestock, forestry and fishery are the main sources of household income. The district is very rich in forest resources.

The status of non-farming activities in the district is rather low. The following table-1 shows the number of establishments and their distribution by major industries provides some evidence of non-agricultural activities in Rangamati district.

Flora and Fauna

Flora: The general aspect of the topography of the district of Rangamati is a mass of hills, rivers and cliffs covered with bamboo brakes, tall trees and creeper jungles. The valleys are covered with thick virgin forests interspersed with small water courses and swamps of all sizes and descriptions.

The district has two big reserve forests such as Kasalong and raing khang reserve forests and few smaller ones like Sitapahar, Barkal and Kaptai reserve forests. The major and the most important part of Kaptai reserve forest has been devoured by the Kaptai hydro-electric project. This has changed the pattern of vegetation over a considerable area of Rangamati district. Moreover, jhuming or shifting cultivation, an age-long practice of tribal people has systematically destroyed many areas of virgin forest of the district.

The composition of the existing forests of the district can be classified broadly into four categories. These are: (i) Evergreen forests consisting of tropical wet-evergreen and tropical mixed evergreen, (ii) Deciduous forests comprising tropical moist deciduous riverine and open deciduous, (iii) Bamboo brakes and (iv) Sa.

Both types under evergreen category consist of three stories. In the wet-evergreen type the tallest trees form a tom canopy at about 100ft. chundul (*Tetrameles nudiflora*), telsur (*Hopea odorata*), narikeli (*Cocos nucifera*)etc. The second storey is formed by trees such as pitraj (*Aphanamixls*

polystachia), nageswar (*Mesua nagassarium*), toon (*Toona ciliata*) and others. The third storey consists of such growth as kamini (*Murraya paniculata*), horina (*Vitex peduncularis*) and wild banana (*Musa sapientum*) etc.

In the mixed-evergreen type, the highest canopy is nearly 150ft. up and formed by civit (*Swintonia floribunda*), garjan (*Dipterocarpus turbinatus*), chundul, narikeli and other trees. The second storey has Tali (*Dichopsis polyantha*), koirjam (*Eugenia cymosa*), kamdeb (*Callophylum polyanthum*), chapalish (*Artocarpus chapalish*) and other medium sized trees. The third storey consists of smaller trees like sutagula (*Machilus bombacyns*), Jiyal (*Jatropha gossypifolia*), hargoza (*Dillenia pentagyna*), haritaki (*Terminalia chebula*), gamar (*Gmelina arborea*) Jarual (*Legerstroemia speciosa*) and chhatim (*alstonia scholarsis*).

The main trees in the tropical moist deciduous riverine type of forests are kadam (*Anthocephalus cadamba*), banderholla (*Duabanga sonneratoides*), shimul (*Bombax ceiba*) etc. In the open deciduous type of forests, the main trees are Cahmpa (*Michelia champaca*), chikrasi (*Chukrassia tabularis*), karai (*Albizzia procera*), hargoza, Banderholla and Toon.

The bamboo brakes occupy large areas. They spread only where the forest cover has been removed by overcutting or buring. The common species of bamboo are muli (*Melconna bambusoides*), mitenga (*Bambusa tulda*), orah (*Dendrocalamus longispathus*), dalu (*Tenisotachyum dullua*) etc. In the moister localities, there are small cane brakes. The main types of cane available here are gallak (*Calamas flagellum*), kerak (*Calamas talifolium*), jaitber (*Calamas viminalis*) and bandari (*Calamas tenuis*).

There is profusion of creepers, climber, lianas and epiphytes consisting of ferns, mosses and orchids in these forests.

The large patches of Savannah consist either of shon grass (*Imperata arundinances*), khagra (*Saccharum spontaneum*), sun grass (*imperata cylindrica*) etc.

Various exotic plants of high commercial value have been intorduced in the district. These are teak (*Tectona grandis*), mahogony (*Swientenia macrophylla*) rubber, acacia, pine (*Pinus longifolia*), etc.

The agricultural crops that are usually grown in the district include local aus, HYV rice, wheat, maize, vergetables, pulses, oilseeds, potato, tobacco, cotton, spices etc. Some horticultural crops like banana, pine apple (*Ananas comosus*) and cashewnut are also grown. The village homesteads are surrounded with a wide variety of trees, shrubs and thickets. Trees like haritaki (*Terminalia chebula*), kat badam (*Terminalia catappa*), arjuna (*Terminalia arjuna*), sheora (*Streblus asper*), teak (*Tectona grandis*), mahogony (*Swientenia macrophylla*)etc. are found along the roadside.

Concepts and Definitions

1. Population and Housing Census 2011

The population and housing census is the unique source of reliable and comprehensive data about the size of the population of the country, major socio-economic and socio-demographic characteristics.

It is the total process of collecting, compiling, evaluating, analyzing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country. The essential features of a population census are individual enumeration, universality within a defined territory, simultaneity and defined periodicity.

The population and housing census provides information on the geographic and administrative distribution of the population and household in addition to the demographic and socioeconomic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that political leaders, election officials, planners, national organizations including NGOs and civil society, regional and international organizations can use the data in decision-making.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban area and union/mauza/village in rural area). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance, employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The planners, researchers and policy makers as well as development partners and community administrators will find this report as a valuable reference for use in advising plans and programs for advancing welfare and well-being of the common people, in particular and the community in general.

Household

Persons, either related or unrelated, living together and taking food from the same kitchen constitute a household. A single person living and eating alone forms one-person household.

Literacy

It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over.

Community

It refers to the following five lower geographic, administrative or revenue units:

- i) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having union parishad institution.
- ii) **Mauza :** Mauza is the lowest administrative unit having a separate jurisdiction list number (J.L. No.) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.
- iii) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- iv) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- v) **Mahalla:** Lowest urban geographic unit having identifiable boundaries.

Urban Area

It corresponds with area developed around a central place having such amenities as metalled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agricultural occupations.

i) **City Corporation:** It includes city corporation area declared by the Ministry of Local Government.

ii) **Paurashava/Municipality Area:** It includes paurashavas incorporated and administered by local government under Paurashava Ordinance, 1977.

2. Agriculture Census year and reference period

The census year extends over twelve consecutive months having for different census items the different reference periods or days of data collections. Some items have a year or week reference period. Some others have a specific reference day. The different census items by their reference periods or days are shown below:

Agriculture holding

An agriculture holding is a techno-economic unit of agricultural production under single management comprising all livestock kept and all land used wholly or partly for agricultural production purposes without regard to title, legal form or size. Single management may be exercised by either an individual holder or jointly by two or more individuals or holders or by a judicial person such as a corporation, co-operative or government agency. A holding may consist of one or more parcels (fragments of land) located in one or more areas or mauzas or in more than one administrative unit or division provided that all separate parcels of fragments form parts of same technical unit under operational control of same management.

The definition covers practically all holdings/households engaged in agricultural production of both crops and livestock. Some agriculture holdings may have no significant agricultural land, e.g. holdings keeping livestock, poultry and hatcheries for which land is not an indispensable input for production.

Farm holding

A farm holding is defined as being an agricultural production unit having cultivated land equal to or more than 0.05 acres. Farm holdings are classified into following three broad groups:

(a) **small:** Farm holdings having minimum cultivated land 0.05 acre but operated land more than this minimum but upto 2.49 acres.

(b) **medium:** Farm holdings having operated land in between 2.50 to 7.49 acres.

(c) **large:** Farm holdings having operated land 7.50 acres and above.

Small cultivated land 0.04 acre or less is generally used for kitchen garden growing mainly vegetables. Often seeds of white gourd, water gourd, pumpkin and other strains are sown on households; but these creepers spread out around house roofs and other structures. As such, the minimum cultivated land considered for qualifying to be a farm holding is 0.05 acres.

Non-farm holdings

A non-farm holding is defined as being the one which has neither cultivated nor operated land or has cultivated land less than 0.05 acre.

Tenancy

Owner holdings are those having and operating their owned land and who may or may not be leasing out land.

Tenant holdings are those having no owned land but operating land taken from others on share cropping basis or on other terms.

Owner-cum-tenant holdings are those having owned land and who may or may not be leasing out their own land to others and who may be taking land from others on share cropping basis or on other terms.

Agriculture work

Agriculture work signifies all activities of holder and his/her labour force doing planning, management, and operation of a holding. It includes land preparation, sowing, weeding, harvesting, feeding and tending livestock & poultry, kitchen gardening, supervising agricultural workers, keeping farm records & accounts, preparing agriculture products for marketing (including packaging), repairing farm equipment, constructing farm buildings & fences, and engaging in land reclamation and improvement and other related activities. It excludes home and other family domestic chores.

Area under pond

The pond area remains under water almost through out the year. Normally, households use pond water for various domestic and sometimes agriculture purposes. Ponds are also generally used for fish culture.

In the census the pond area data were collected separately for both single ownership and joint ownership of households.

Area under permanent crops

It is the land area planted to crops which remain standing for a long period of time and do not need to be replanted after a seasonal harvest. Mango, jackfruit, coconut, guava, lemon, and other fruit varieties are all permanent crops.

Current fallow

It is land brought into cultivation but left out uncultivated in census year for fertility regaining and improvement or for other reasons.

Net cultivated area

This is land area actually cropped during the census year regardless of number of crops grown plus current fallow. It includes areas under temporary and permanent crops and also current fallow.

Permanent fallow

It is land not available for cultivation due to coming into residence and commercial & other uses. Play ground, graveyard, wild shrubs and jungles, marshy land, and the like fall in this category.

Irrigated area

This is area of total land brought under irrigation coverage for growing crops with irrigations done through mechanical or manual means. Irrigated area classifications fall into two categories: (1) surface water irrigation with main water sources being rivers, canals, beels, ponds, and other water bodies; and (2) underground water irrigation with water lifted by shallow tube-wells, deep tube-wells, and country traditional devices. The irrigation equipments are run by electricity, diesel or petrol, or manual labour.

Temporary crops gross area

Areas aggregated for all temporary crops grown in the census year have made **temporary crops gross area** greater than **temporary crops net area** since the latter has within it the same land cropped more than once in different seasons of a year.

Intensity of cropping

It is percentage of temporary crops gross area in comparison with temporary crops net area. It is expressed as follows:

$$\text{Intensity of cropping} = \frac{\text{Temporary crops gross area}}{\text{Temporary crops net area}} \times 100$$

Cereals

Main cereals are rice and then wheat. Other cereals are jab, barley, cheena, maize, kaun, bajra and joar.

Pulses

Main and common pulses are gram, mung, lentil, arhar, gari kalai, khesari and pea.

Oil seeds

Main oil seeds are rape and mustard, sesamum, linseed, groundnut, soybean, sunflower and castor.

Vegetables

Farmers grow both summer and winter vegetables. Main vegetables are potato, brinjal, raddish, arum, lady's finger, cauliflower, cabbage, bean, tomato, patal, gourd, cucumber, pumpkin, knoll-kal-turnip, dhundal, barbati, khirai, chichinga, carrot, kakrol and sak.

Cash crop

Main cash crops are jute, mesta, sunhemp, cotton, sugarcane and tobacco.

Spices

The main spices include turmeric, ginger, chillies, onion, garlic, coriander, black cumin and ani seed.

Fuel crops

Dhaincha and other smaller plants used as cooking-fuel.
