Foreword

I am delighted to learn that Bangladesh Bureau of Statistics (BBS) has successfully completed the 'District Statistics 2011' under Medium-Term Budget Framework (MTBF). The initiative of publishing 'District Statistics 2011' has been undertaken considering the importance of district and upazila level data in the process of determining policy, strategy and decision-making. The basic aim of the activity is to publish the various priority statistical information and data relating to all the districts of Bangladesh. The data are collected from various upazilas belonging to a particular district.

The Government has been preparing and implementing various short, medium and long term plans and programs of development in all sectors of the country in order to realize the goals of Vision 2021. For any pragmatic approach in formulating and evaluating development plans and programs reliable statistics are indispensable. BBS has been performing the major responsibility of supplying comprehensive and accurate statistics at the national level.

The present government, in line with its commitment to decentralize administration, has declared upazila as the focal point of administration regenerating upazila parishad through participatory elections. However, upazila level official statistics are still very inadequate. It is praiseworthy that BBS has undertaken timely program of publishing 'District Statistics 2011' where data representing socio-economic characteristics of upazilas of all districts will be available. I am confident that this publication will be of invaluable help to the planners, administrators, researchers, field level officers as well as other users. Various government, non-government and international organizations closely related to policy formulation and implementation may also find this publication useful.

I sincerely thank Mr. Golam Mostafa Kamal, Director General, BBS for bringing out the publication of 'District Statistics 2011'. I hope that in future 'District Statistics' will be published in much more improved form to make it more effective and informative.

Preface

The 'District Statistics 2011' is mainly a compilation work of Bangladesh Bureau of Statistics (BBS). The decentralization policy of government has enhanced demand for timely, qualitative and comprehensive statistical data both for administrative and development requirements. The major regular publications of Bangladesh Bureau of Statistics like Statistical Pocketbook of Bangladesh, Statistical Yearbook of Bangladesh and Agricultural Yearbook of Bangladesh provide aggregate data mainly at the national and regional level. Data for smaller administrative unit like upazila often remains absent in such publications. The 'District Statistics 2011' emphasises to provide upazila level data.

The 'District Statistics 2011' provides both structural and flow-type information of almost all of the priority sectors of our national economy depending on data availability both from published and unpublished sources.

The publication of 'District Statistics 2011' would have not been feasible without the wholehearted co-operation of the various government, semi-government, autonomous, non-government offices and other organizations. In particular, the district and upazila level officials extended their total support and supplied all data. I like to express my sincere thanks to them and hope such co-operation will continue in future.

I am obliged and grateful to Mr. Md. Nojibur Rahman, Secretary, Statistics and Informatics Division (SID) for his enormous support and advice to prepare and to finalize this important publication. My sincere thanks also go to all officers of SID for their wholehearted support and sincere co-operation towards accomplishing this document.

I acknowledge the contributions of Mr. Md. Mizanur Rahman, Deputy Director General, BBS and Mr. Ghose Subobrata, Director, FA & MIS, BBS during development of the Document.

The regional and upazila statistics officers of BBS actively participated in preparation of the report. I thank them all. Finally, I thank Mr. Iftekharul Karim, Focal Point Officer and Mr. Nasir Uddin Ahmed, Deputy Director & Ex. Focal Point Officer as well as staff members of Bangladesh Bureau of Statistics for their untiring efforts in making the 'District Statistics 2011' a success. Through user's interaction and feedback, we hope to improve the coverage and quality of information contained in this edition. Any suggestion for improvement of the publication will be highly appreciated.

Some errors or unwilling mistakes may remain there in spite of our full hearted endeavor to make it an error free publication. It will be highly appreciated if any user kindly communicates any shortcomings of the report.

CHAPTER 1

Introduction

District at a Glance

Background: Bagerhat, the sanctuary of Hazrat Khan Jahan Ali, was formerly a part of Khilafatabad Pargana. It is situated at the fringe of the Bay of Bengal with the plentiful boundaries of Sundarbans. It became a Police Station under Khulna sub-division of Jessore zila in 1842. Bagerhat was raised into a sub-division under the same zila in 1863 with the recommendation of the then Deputy Magistrate poet Bankim Chandra Chattapadhyay. Flora and Fauna

Bagerhat district lies on the south western part of the country and falls under the Gangetic plain with fertile land is very rich in respect of flora and fauna. More than one third of the district southern part is covered by thick forest of mangroves, canes creepers and other trees thriving on muddy saline trees which is the most valuable and beautiful of all the trees in the forest. The district faces flood during the monsoon almost regularly. Its impact is however very much felt in the flora and fauna of the district.

Flora: The eastern boundary of the forest in the district extends upto the boundary line of Bagerhat district while the western one extends beyond the western boundary line of the district. The southern boundary of the forest is the Bay of Bengal and the northern boundary is the Sundarbans. The most important of the forest trees is the sundari (*Heritiera minor*). The colour of this wood is reddish which is very soothing to the eye. Because of its durability it has a great demand. It can tolerate saline water but attains full height on the bank of sweet water rivers like ‘Sela’ and ‘Passur (*Xylocarpus malaccensis*)’ and are available in large quantity. Its timber is very durable and has great demand for posts and planks. The amur (*Amoore cucullata*) and dhundhul (*Xylocarpus granatum*) have a similarity with “pasur” but they are of inferior quality and as used sometimes for making house posts. small amoore trees are used for making “hookka” (*Local smoking pipes*) stems .One of the largest of the sundarban trees is “ bain(*Avicennia officinalis*) tree. Generally it attains 60 feet in height with large girth. The wood used for planking and as fuel. The flowers of the tree

are small yellow and sweet smelling and afford a distinctive quality of honey. Other important trees are garjan (*Dipterocarpus turbinatus*), goran (*Ceriops roxburghiana*) and kankra (*Brogucra gyomosniza*). There is a great possibility of utilizing them for tanning purposes. Of them only kankra attains sufficient size and has some value as timber. The gewa (*Excecaria agallocha*) tree thrives in the most saline areas near the sea. Its wood is white hard and produces good timber. It is very much suitable for making match sticks and boxes and paper pulp. The most striking tree is keora (*Sonneratia apetala*). Deer are specially fond of its leaves and fruits. They flock under its branches to eat its fruits and browse its leaves off as high as they can reach producing a uniform abrupt line along the grove where the foliage has been bitten off. The Singra tree supplies best fire wood. The karanj (*Pongamia glabra*) tree is large in size grows on high river banks.

The hental (*Rhoinix paludosa*) and the golpatta (*Nipa fruticans*) are found in muddy areas everywhere. The hental (*Rhoinix paludosa*) resembles a dwarf date-palm (*Phoenix sylvestris*) and rafters are made from it. The golpatta is regarded as one of the most important products and its leaves are used for thatching houses.

Except for the sundarbans the flora of the district is similar to those in the adjoining districts. Innumerable indigenons weeds grow in the beel area. Several types of palms and bamboo clumps grow almost all the villages. Mango and Jack fruits supply the commonest timber and are used for making doors, windows, boxes, etc.

Fauna

Mammals: Bagerhat district has a rich diversity of land invertebrate mammals, amphibians, birds, reptiles and fresh water animals, spider, multipedes and innumerable insects. Leeches, earth worm slugs, snails, silk moths and silk worm are commonly found in the district.

The Sundarban is rich in wild animals. The Royal Bengal Tiger (*Panthera tigris*) is famous for its large size, strength and colourful stripped body is the lord of the Sundarbans. The most important of other fauna of the forest is spotted or chitra deer. Flocks of deer are found in moonlit night grazing eating keora fruit dropped by monkeys. Monkeys literally rule over the trees. Several kinds of serpents including poisonous cobra, karait, rajshap and non-poisonous python, dhora, grass snake are seen everywhere creeping in the grass and from tree to tree and place to place. It is said that there were plenty of rhinoceros in the Sundarbans but now they are hardly seen. Animals which are common all over the district are jackal, wild hog, porcupine civet cat, wild cat, tree cat, etc.

Carnivorous animals include fox (*Vulpes bengalensis*), dog, boar (*Sus scrofa*), pig, etc. domestic cow (*Bos pourus*), goat (*Catra lircus*), sheep, buffalo (*Bubalus bubalis*) and horses are quite common in the district. Bats (*Rousettus leschenaulti*), shrews, squirrels, rats (*Bandicota bengalensis*), mice, cats and wild cats (*Felis chaus*) are also found in the district.

(*Cuculus microplerus*), king fisher (*Alcedo atthis*), bulbuli (*Picnonontus cafer*), parrot (*Psillacula krameri*), tailorbird and lark.

Raptoral birds including king vulture (*Torgos calvus*), lanner falcon or baj (*Falco biarmicus*), gochila (*Circus aeruginosus*), Cheel (*Milvus migrans*), several species of stork. Some migratory birds like greenleg ghoose (*Anser anser*), rajhans (*Anser indicus*), pitail (*Anas acuta*), etc. are also seen during winter season.

Some of the commonly available fishes are ruhi or salmon (*Labeo rohita*), mrigel (*Cirrhinus mrigala*), kala boush (*Labeo calbasu*), katla or carp (*Catla catla*), etc. shing (*Heteropneustes fossilis*) and magur or cat fish (*Clarias batrachus*) are also found in large quantity in beels and khals. Many other species of river and fresh water fishes are also found in the district. Of these the principal varieties are koral/vetki or sea bass (*Lates calcarifer*), tapashi (*Polynemus paradiseus*), dhain, chital (*Notopterus chitala*), ghona, airh (*Mystus aor*), bagar (*Bagarius bagarius*), pangas (*Pangasius pangasius*), boal or sheat fish (*Wallago attu*), rita (*Mystus aor*), bain or eel (*Mastacembelus armas*) chapila (*Gudusia chapra*), bhagna (*Labeo boga*), nandail (*Labeo nandina*) bacha (*Eutropichthys vacha*), poa (*Pama pama*), golsa (*Mystus bleekeri*), tengra (*Mystus vittatus*), chanda (*Mene muculata*), rupchanda (*Pomadasys chinensis*), kachki, bele (*Glossogobius giuris*), bheda, batashai, gausa, kakila, foli (*Notopterus notopopterus*), tatkeni (*Crosscheilus latius*), pabda or butter fish (*Ompok bimaculatus*), chela (*Chela Cachius*), gangchela, gazar fish (*Channa marulius*), koi (*Anabas testudineus*), kholisha (*Calisus fasciatus*), puti (*Barbus punti*), malandi, banshpata (*Danio devario*), tengra (*Mystus vittatus*), kakra (*Scylla serrata*), shrimps and prawn are found in the district. However, some of these varieties, specially those which inhabit in marshes and tank, are dwindling due to over catching and other reasons such as use of insecticides and pesticides for crop production, etc.

Exotic fishes like grass carp (*Ctenopharyngodon idella*), silver carp (*Hypophthalmichthys molitrix*), tilapia (*Oreochromis mossambicus*), nilotica (*Oreochromis niloticus*), etc. have been introduced for commercial pisciculture in ponds and tanks. Bagerhat district is renowned for its shrimp culture in gher.

Reptiles and amphibians: Crocodiles and sharks swarm in the river beds, butterflies, moth, bees and wasps fly from flowers to flowers especially in the spring together honey. The reptiles include different species of snakes, lizard (*Hemidactylus prooki*) and tortoise (*Kachuga tecta*). Guinshap (*Varanus salvator*), python (*Python molurus*), cobra (*Naja naja*) and other varieties of poisonous snakes are found almost all over the district. Concepts and Definitions

1. Population and Housing Census 2011

The population and housing census is the unique source of reliable and comprehensive data about the size of the population of the country, major socio-economic and socio-demographic characteristics.

It is the total process of collecting, compiling, evaluating, analyzing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country. The essential features of a population census are individual enumeration, universality within a defined territory, simultaneity and defined periodicity.

The population and housing census provides information on the geographic and administrative distribution of the population and household in addition to the demographic and socioeconomic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that political leaders, election officials, planners, national organizations including NGOs and civil society, regional and international organizations can use the data in decision-making.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban area and union/mauza/village in rural area). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance, employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The planners, researchers and policy makers as well as development partners and community administrators will find this report as a valuable reference for use in advising plans and programs for advancing welfare and well-being of the common people, in particular and the community in general.

Household

Persons, either related or unrelated, living together and taking food from the same kitchen constitute a household. A single person living and eating alone forms one-person household.

Literacy

It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over.

Community

It refers to the following five lower geographic, administrative or revenue units:

- i) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having union parishad institution.
- ii) **Mauza:** Mauza is the lowest administrative unit having a separate jurisdiction list number (J.L. No.) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.

- iii) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- iv) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- v) **Mahalla:** Lowest urban geographic unit having identifiable boundaries.

Urban Area

It corresponds with area developed around a central place having such amenities as metalled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agricultural occupations.

- i) **City Corporation:** It includes city corporation area declared by the Ministry of Local Government.
- ii) **Paurashava/Municipality Area:** It includes paurashavas incorporated and administered by local government under Paurashava Ordinance, 1977.

2. Agriculture Census year and reference period

The census year extends over twelve consecutive months having for different census items the different reference periods or days of data collections. Some items have a year or week reference period. Some others have a specific reference day.

The census year covered twelve months from 1 Baishak to 30 Choitra, 1414 Bangla Shal (BS). The year was the reference period for such census items as operated land use, crops, agriculture employment, livestock & poultry deaths and agriculture loan. A single reference day was used for items like holdings, farm size, land tenure, farm population, livestock & poultry inventories and agriculture implements.

The different census items by their reference periods or days are shown below:

Agriculture holding

An agriculture holding is a techno-economic unit of agricultural production under single management comprising all livestock kept and all land used wholly or partly for agricultural production purposes without regard to title, legal form or size. Single management may be exercised by either an individual holder or jointly by two or more individuals or holders or by a judicial person such as a corporation, co-operative or government agency. A holding may consist of one or more parcels (fragments of land) located in one or more areas or mauzas or in more than one administrative unit or division provided that all separate parcels of fragments form parts of same technical unit under operational control of same management.

The definition covers practically all holdings/households engaged in agricultural production of both crops and livestock. Some agriculture holdings may have no significant agricultural land, e.g. holdings keeping livestock, poultry and hatcheries for which land is not an indispensable input for production.

Farm holding

A farm holding is defined as being an agricultural production unit having cultivated land equal to or more than 0.05 acres. Farm holdings are classified into following three broad groups:

- (a) **small:** Farm holdings having minimum cultivated land 0.05 acre but operated land more than this minimum but upto 2.49 acres.
- (b) **medium:** Farm holdings having operated land in between 2.50 to 7.49 acres.
- (c) **large:** Farm holdings having operated land 7.50 acres and above.

Small cultivated land 0.04 acre or less is generally used for kitchen garden growing mainly vegetables. Often seeds of white gourd, water gourd, pumpkin and other strains are sown on households; but these creepers spread out around house roofs and other structures. As such, the minimum cultivated land considered for qualifying to be a farm holding is 0.05 acres.

Non-farm holdings

A non-farm holding is defined as being the one which has neither cultivated nor operated land or has cultivated land less than 0.05 acre.

Tenancy

Owner holdings are those having and operating their owned land and who may or may not be leasing out land.

Tenant holdings are those having no owned land but operating land taken from others on share cropping basis or on other terms.

Owner-cum-tenant holdings are those having owned land and who may or may not be leasing out their own land to others and who may be taking land from others on share cropping basis or on other terms.

Agriculture work

Agriculture work signifies all activities of holder and his/her labour force doing planning, management, and operation of a holding. It includes land preparation, sowing, weeding, harvesting, feeding and tending livestock & poultry, kitchen gardening, supervising agricultural workers, keeping farm records & accounts, preparing agriculture products for marketing (including packaging), repairing farm equipment, constructing farm buildings & fences, and engaging in land reclamation and improvement and other related activities. It excludes home and other family domestic chores.

Area under pond

The pond area remains under water almost through out the year. Normally, households use pond water for various domestic and sometimes agriculture purposes. Ponds are also generally used for fish culture.

In the census the pond area data were collected separately for both single ownership and joint ownership of households.

Area under temporary crops

It is the land area planted to crops having growing cycle or length of life less than one year. These are the temporary crops such as paddy, wheat, jute, cotton, tobacco, sugarcane, pulses, oil seeds, potato, vegetables and other seasonal crops. A list of temporary crops for which data were collected separately was given in back page of “Tally Sheet”. The minimum area recorded for a temporary crop was 0.01 acre. Area under temporary crops and temporary-crops net area are equivalents.

Area under permanent crops

It is the land area planted to crops which remain standing for a long period of time and do not need to be replanted after a seasonal harvest. Mango, jackfruit, coconut, guava, lemon, and other fruit varieties are all permanent crops.

Current fallow

It is land brought into cultivation but left out uncultivated in census year for fertility regaining and improvement or for other reasons.

Net cultivated area

This is land area actually cropped during the census year regardless of number of crops grown plus current fallow. It includes areas under temporary and permanent crops and also current fallow.

Permanent fallow

It is land not available for cultivation due to coming into residence and commercial & other uses. Play ground, graveyard, wild shrubs and jungles, marshy land, and the like fall in this category.

Irrigated area

This is area of total land brought under irrigation coverage for growing crops with irrigations done through mechanical or manual means. Irrigated area classifications fall into two categories: (1) surface water irrigation with main water sources being rivers, canals, beels, ponds, and other water bodies; and (2) underground water irrigation with water lifted by shallow tube-wells, deep tube-wells, and country traditional devices. The irrigation equipments are run by electricity, diesel or petrol, or manual labour.

Cattle and Buffalo

Cattle and buffalo heads owned by households on day of enumeration were counted.

Goats and Sheep

Goats and sheep owned by households on day of enumeration were counted.

Fowls, Ducks and Pigeons

Fowls, ducks and pigeons owned by households on day of enumeration were counted.

Temporary crops gross area

Areas aggregated for all temporary crops grown in the census year have made **temporary crops gross area** greater than **temporary crops net area** since the latter has within it the same land cropped more than once in different seasons of a year.

Intensity of cropping

It is percentage of temporary crops gross area in comparison with temporary crops net area. It is expressed as follows:

$$\text{Intensity of cropping} = \frac{\text{Temporary crops gross area}}{\text{Temporary crops net area}} \times 100$$

Cereals

Main cereals are rice and then wheat. Other cereals are jab, barley, cheena, maize, kaun, bajra and joar.

Pulses

Main and common pulses are gram, mung, lentil, arhar, gari kalai, khesari and pea.

Oil seeds

Main oil seeds are rape and mustard, sesamum, linseed, groundnut, soybean, sunflower and castor.

Vegetables

Farmers grow both summer and winter vegetables. Main vegetables are potato, brinjal, raddish, arum, lady's finger, cauliflower, cabbage, bean, tomato, patal, gourd, cucumber, pumpkin, knoll-kal-turnip, dhundal, barbati, khirai, chichinga, carrot, kakrol and sak.

Cash crop

Main cash crops are jute, mesta, sunhemp, cotton, sugarcane and tobacco.

Spices

The main spices include turmeric, ginger, chillies, onion, garlic, corriander, black cumin and ani seed.

Fuel crops

Dhaincha and other smaller plants used as cooking-fuel are included in the group.
