## MESSAGE

It is my immense pleasure to mention that Bangladesh Bureau of Statistics (BBS) successfully conducted the nationwide Economic Census during 31 March to 31 May 2013, and the final results were published on 31 December 2015. Now the district reports are publishing. The district reports of Economic Census provide various economic, industry and business information in different dimension down to Union levels for the users.

The present government has given the utmost importance to quality and timely release of statistical data. In view of this, the Statistics Act 2013 has been enacted in the National Parliament and National Strategy for the Development of Statistics (NSDS) has also been approved by the Cabinet.

I hope that the report will be the key source of data for policy makers, planners, business communities, civil society members, media and development partners in formulating policies, defining the strategies and undertaking development programmes in different levels for the development of the country.

My heartiest thanks to all concerned of SID and BBS for bringing out this report. I would like to thank persons both within and outside the government who contributed to the smooth implementation of the census programme and made it a success.

## FOREWORD

It is my pleasure to know that, after conducting the third Economic Census during 31 March-31 May 2013 with the whole financial support of the Government of Bangladesh (GoB), the final results were published on 31 December 2015, and the district reports are going to be released now. It is important to note that this economic census is the first full count census covering non-agriculture sectors of the economy throughout the country at a time.

This district report provides information on number of establishments, types and activities classified by major industries at sub-national level. In particular, it provides information on employment generation, businesses, labour force participation, private sector composition and small area information from district to union. I believe that the data presented in this report will help policy makers, planners, researchers, administrators, development partners and other agencies for evidence-based policy formulation particularly for the development at the grass-root level.

I extend my deep appreciation to Mr. Mohammad Abdul Wazed, Director General of Bangladesh Bureau of Statistics, and Mr. Md. Dilder Hossain, Project Director, the Project Management Team (PMT) and other officials of BBS for their sincere efforts for publishing the report. I do appreciate the valuable contribution and analytical inputs from the distinguished Members of the Steering Committee and the Technical Committee in finalising this district report in time. Thanks are due to the Members of the Report Review Committee of SID and Editors' Forum of BBS for reviewing and providing feedback to finalise the report. Finally, I offer our deepest gratitude to our esteemed citizens who extended all-out cooperation for the smooth conduct of the census.

Suggestions and comments on the report are most welcome as BBS has been striving for excellence.

## **PREFACE**

The third decennial Economic Census was successfully conducted by Bangladesh Bureau of Statistics (BBS) during 31 March- 31 May 2013. It was a major statistical undertaking of the BBS that involves massive operations both at national and sub-national levels. The main objective of the census was to know the structural changes happened over the last decade. The final results of the census were published on 31 December 2015 through a dissemination seminar and now the district reports are being published.

The Economic Census 2013 was different in many reasons from the earlier ones. Listing operation of all households and establishments prior to main census was carried out in order to identify the economic units appropriately. Data entry was made at the field level using Union Information and Service Center (UISC); at the same time, the data were sent to BBS headquarters through internet. Wide-range of media coverage as well as active engagement of the stakeholders contributed notably to make the census successful. To validate the census data in regard to quality and coverage, Post Enumeration Check (PEC) was conducted by an Independent Organisation, BIDS. All these efforts notably contributed to have the quality data. I believe that the data given in this district report will add significant values to enrich the local level research, planning and policy formulation.

I gratefully acknowledge the contribution of Mr. K M Mozammel Hoq, Secretary, Statistics and Informatics Division (SID) for his overall guidance and encouragement in bringing out this report. My sincere thanks to the members of census team particularly to Mr. Md. Dilder Hossain, Project Director, Mr. Shazadur Rahman, Data Processing Consultant and other members of the project team who worked hard with utmost sincerity in bringing out this report. Special thanks are also due to distinguished members of the Census Technical Committee for their contribution in the analytical improvement of the report.

Suggestions and comments on the report for further improvement will be highly appreciated.

## CHAPTER I

### Introduction

#### 1.1 Background

An Economic Census is the complete enumeration of the full set of economic units belonging to a given population or universe at a particular time with respect to well defined characteristics. Literally, it is the whole process of collecting, compiling, processing, analysing and publishing economic data related to all economic units of a country. It is a well-structured undertaking which provides timely, reliable, accurate and detailed data on the size and distribution of economic units of different categories. The economic census is a primary source of benchmark statistics which provides major facts about the structure and functioning of the national economy as well as brings out the nature of structural changes taken place in both the formal and informal business sectors in between two economic censuses. It also provides important data for the framework of GDP, input & output measures, production & price indices and other statistical areas, which are used to measure the short-term changes in the economy.

The history of Economic Census is very recent in comparison to the Population Census. In many countries, Population Census is the oldest census undertaking followed by Agriculture Census and Economic Census respectively. As the national economy has been growing with the rapid expansion of non-farm economic activities in the countries, the importance of Economic Census or Business Census has also been emerged as an essential undertaking to provide vital information on business and industries. Data collected from establishments generally help policy makers monitor economic activity, pursue programmes for employment generation, assess private sector requirements and provide assistance to business and industries at regional as well as national levels.

Government's persistent pro-people and business-friendly policies for economic development of the country have resulted in rapid economic growth in Bangladesh over the last two decades. By this time, Bangladesh has made tremendous development in science & technology as well as business & industry. A number of new economic activities like Shipbuilding, Software Development, Event Management, Security Services and Mobile Banking Services etc. have widely been taking place. Agro-based economy of Bangladesh has rapidly been transforming to a mixed one creating considerable income and employment opportunities. Currently, Service Sector dominates the economy contributing 49.30 percent to GDP while the Industry and the Agriculture Sectors contribute about 32 percent and 18.70 percent respectively. To measure the changing pattern of Bangladesh economy, Bangladesh Bureau of Statistics (BBS) has been conducting Economic Census since 1986 and the current one is the third of its series.

The first Economic Census titled '*Census on Non-farm Economic Activities and Disabled Persons*' was conducted during 27-29 December 1986 throughout the country. According to the decision of the Government, disability was included in this census as a focused issue together with the non-farm economic activities. It covered both establishments and households having economic activities. Agricultural households were kept outside the purview of this economic census.

The Second Economic Census of the country was held in two phases: the first phase during 27-31 May 2001 in the urban areas and the second during 20-26 April 2003 in the rural areas. It covered all non-farm economic activities of both urban and rural areas. Three types of economic units such as permanent establishments, temporary establishments and premise-based household economic activities were covered in that census.

The third Economic Census was conducted during 31 March to 31 May 2013 across the country under the Project of 'Economic Census 2013' with the full financing of the Government of Bangladesh (GoB). Data collection was carried out in two phases: the first phase during 15-24 April 2013 in 37 districts and the second phase during 15-24 May 2013 in 27 districts. One of the key features of this census was *listing operation* i.e. all units of the country irrespective of establishments or households, permanent or temporary, were enlisted prior to the main census. After that, only the economic units, except crop agriculture, were separated from the lists and subsequently enumerated in the main census. It is mention worthy that this step helped reduce the census burden considerably in terms of operation and management. It also contributed to ensure optimum use of public resources.

## 1.2 Objectives

The main objective of the Economic Census was to observe the nature of the structural changes taken place in the economy over the last decade, and to provide comprehensive statistical information for policy makers, planners, researchers, business communities and others for policy making, economic, social & business planning, and for other uses.

The other objectives were:

1. To generate statistics on types of activities, persons engaged (working proprietors and partners, full-time and part-time employees, family workers classified by sex), year of establishment of the non-agricultural economic unit by type of ownership and so on;
2. To make sampling frame available for planning and designing comprehensive surveys on non-agricultural economic activities in between two economic censuses;
3. To facilitate determination of the relative contribution of non-agricultural sector to the economy;
4. To provide benchmark data for rebasing and updating the national accounts aggregates and other economic measures of the country;
5. To prepare an up-to-date directory of industries and business enterprises for urban and rural areas according to the Bangladesh Standard Industrial Classification (BSIC-2009) which was prepared following the International Standard Industrial Classification (ISIC)-Rev.4;
6. To observe economic activities performed by the households; and
7. To provide disaggregated statistics on various economic activities down to Mauza level.

### 1.3 Scope and Coverage of the Census

#### 1.3.1. Scope

All non-farm economic activities according to BSIC-2009 (See Chapter II), *except Section-T (Activities of households as employers; undifferentiated goods- and services- producing activities of households for own use) and Section-U (Activities of extraterritorial organisations and bodies,* were included in the scope of Economic Census 2013. Section-T was excluded considering that activities under this section have been conventionally covered partly by the Agriculture Census and partly by the Labour Force Survey, and to avoid the duplication. Section-U was not included in the scope of the census as the activities under this section are not reasonably taken into account to the national accounts aggregates globally; traditionally this section was kept outside of the scopes of earlier two economic censuses, i.e. Economic Census 2001 & 03 and Economic Census 1986.

Hence, all government and non-government establishments engaged in such activities mentioned above for profit-making or for serving the community irrespective of their nature such as permanent, temporary or household were considered in the scope of this Census. It is mention worthy that, in addition to the economic activities carried out in the households, activities operated outside the household such as hawking, operating own rickshaw/push cart/van/easy bike/other transports, street vending etc. were included within the purview of the household based economic activities whereas these activities were included as temporary establishments in the census of 2001 & 03.

Thus, the scope and coverage of the Economic Census 2013 are different from that of 1986 and 2001 & 03. Therefore, the findings of the Economic Census 2013 would not be fully comparable to that of earlier censuses particularly for the temporary economic units and household based economic units.

#### 1.3.2 Coverage:

Geographically, the Census has covered the entire area of the country except territorial enclaves. All establishments and economic households located both in urban and rural areas were completely enumerated in the census. It may be noted that the scope, coverage, concepts & definitions and questionnaire of the census were vetted by the Technical Committee.

### 1.4 Census Planning and Operation

#### 1.4.1 Census Process

A systematic and comprehensive census work-plan was prepared delineating detailed activities with the specific timeline, and was furnished in the Development Project Proposal (DPP) of the project with the view to ensuring a smooth census operation. The plan contained a brief description of all census activities from the beginning to the ending of the process including the pilot census. All operational procedures relating to the design of questionnaire, methodologies, data collection plan, training

programme and procedures, field control, manpower requirements, job descriptions of the supervisory census personnel, census publicity, and distribution of census materials, data processing & analysis and publication plans were also illustrated in the work plan. A calendar of census activities with detailed time frame was also prepared and census operation was accomplished following the census calendar.

#### **1.4.2 Listing of Establishments and Households**

A complete list of all establishments and households of the country was prepared before the main enumeration. Both economic and non-economic establishments and households irrespective of their nature, that is, temporary or permanent were enlisted. Only basic information such as name, address, nature of household and establishment, total persons engaged (TPE) by sex etc. of the units were collected during listing operation in order to identify whether the unit is engaged in any non-agricultural economic activity. From this list, economic units were separated and included in the main census for data collection, and the rest were kept outside the purview of the census. The whole process was termed as *First Zonal Operation*.

#### **1.4.3 Zonal Operation**

Two zonal operations were carried out in order to complete the preparatory work of the main census. Under the *First Zonal Operation*, listing of all units, mapping & geo-code updating and formation of Enumeration Area (EA) were accomplished. Recruitment of interviewers and supervisors, further checking of geo-code, formation of various census committees were done under the *Second Zonal Operation*.

#### **1.4.4 Pilot Census**

Pilot census is the dress-rehearsal of the main census. It is the method of testing the efficiency of census preparation. It helps in understanding whether there has been any deficiency in any stage of census preparation. To examine the preparatory work of the main census, a *Pilot Census* was carried out during 8-14 February 2013 in two areas: at *Ward No. 15* of *Sylhet City Corporation* and at *Vayna Union* of *Sujanagar Upazila* under *Pabna District*. The Pilot Census covered the issues of testing the appropriateness of the questionnaire including respondents' burden, field operation with supervision, data processing, tabulation and data analysis. After the pilot census, necessary changes were made in the process of preparation to ensure smooth census operation.

#### **1.4.5 Mapping & Geo-Coding**

A hierarchical geographical coding system in respect of administrative units was developed by BBS in order to identify the units uniquely from the highest to the lowest tier. BBS has also developed the digital maps of all *Mauzas*, the smallest administrative unit of the country. These maps were used as the base map in the preparation of enumeration area (EA) maps and supervisor's map in the census. Geo-codes were updated, and maps of EAs as well as supervisors were prepared during zonal operations prior to the main census to demarcate enumeration areas properly. This process also helped in establishing a strong control on checking the coverage error of the census.

#### 1.4.6 Manuals and Control Forms

Manual is the tool to conceptualize the questionnaire as well as operationalize the field work of the census. Two manuals - *the Field Manual for operational control* and *the Training Manual for the Interviewers* - were prepared before the final enumeration. Legal aspect of the census, composition and duties & responsibilities of various census committees, interviewers, supervisors, census co-ordinators, method of training, mode of publicity, distribution and recollection process of census materials etc. were explained in the Field Manual. Definitions and concepts of various terms, the method of data collection, meaning of each question of the census questionnaire, process of filling up the tally sheets were narrated in the Training Manual for the Interviewers. In addition, some control forms were prepared and supplied to the field to regulate the census activities as well as to have a quick summary of the census data by administrative tier.

#### 1.4.7 Publicity & Campaign

Publicity & campaign is considered as a significant part of any census. Usually, people or respondents show reluctance in providing any data to the interviewers as all of them are not aware enough of the usefulness of statistical information. Hence, media campaign can contribute immensely to motivate the respondents to respond to the census questionnaire with the accurate information. It facilitates easier access of the interviewers to the respondents. Overall campaign, including use of print and electronic media, added a new dimension to Economic Census 2013. The following steps were taken in connection with the campaign of Economic Census 2013:

1. *Horse Carts Rally* was arranged during the main census. It is notable that this idea was very effective in creating awareness of people and was highly appreciated by the mass people.
2. Regular advertisements inspiring the target group for participation in census were published in a number of daily newspapers.
3. Special supplement on the beginning day of main census operation was published in a number of newspapers.
4. The events of countdown, celebrity calls, *puthi path* (*manuscript of verse recited in a special melody*) phone-in-programmes, theme songs, local songs, jingles, folk songs were frequently aired by the *Bangladesh Betar* (Radio).
5. Bangladesh Television and some of the private TV Channels were engaged to telecast talk show, jingle, theme songs, tribal songs, TV-scrolling and phone-in-programmes etc.
6. Bill boards were displayed in different parts of the city corporations.
7. Interpersonal communication campaign such as special discussions, press conferences at national and local levels, exchange of views with various trade and industrial associations, meeting with government and non-government officials, civil society, media personnel from national level to grassroots levels were carried out.
8. Messages were sent to the mobile phone subscribers to inform them about the census.
9. Posters, stickers, banners etc. were displayed in numerous places across the country.
10. Leaflets, brochures, souvenirs like Mug, T-shirt and Crest engraving census information were distributed to the target groups as well as the mass people. It is notable that huge number of leaflet was distributed door to door through the newspapers' vendors inserting them into the newspapers.

#### 1.4.8 Training and Data Collection

Training and data collection are the most fundamental components of a census. A comprehensive training was imparted to the census personnel to make them efficient in their respective jobs. The whole country, 64 districts including city corporations, were divided into 86 areas and named as *Census Districts* during first zonal operation. The Census Districts were further segmented into small areas to ensure intensive supervision and monitoring so that quality data collection could be ensured. The 86 Census Districts were divided into 2,073 zones on the basis of the listing operation to make sure that the census could be managed properly and enumerated accurately. The zones were divided into 67,847 Enumeration Areas (EA), - each consisting of around 150 economic units irrespective of household or establishment. An interviewer was appointed for each EA and a supervisor was designated for supervising the work of a group of 6 to 7 interviewers. To carry out the final data collection, a total of 67,036 Interviewers (Data Collectors), 12,175 Supervisors, 2,073 Zonal Officers and 86 District Census Coordinators (DCCs) were appointed. Interviewers and Supervisors were hired from the local educated unemployed youths while the Zonal Officers and DCCs were assigned from BBS Officials.

To ensure quality control of data collection, four-tier supervision circles were created. Supervisors were assigned for overseeing the activities of Interviewers, Zonal officer for Supervisors and DCCs for Zonal Officers. Several independent teams comprising of the senior officials of BBS and SID were assigned for supervising and monitoring the overall activities of the census to achieve quality results. Moreover, extra measures were taken to ensure the quality of census engaging some of the high officials temporarily such as Deputy Secretaries and Joint Secretaries from the Ministry of Public Administration.

In order to have quality data and to train the census personnel on some essential techniques of census operation including questionnaire, two-day long training programme was conducted. DCCs (Master Trainers) were trained by the Core Training Team (CTT) of the Census in the Headquarters of BBS, Zonal Officers by DCCs at district Headquarters and Supervisors & Interviewers by Zonal Officers at Upazila/Union level. The verbatim training manuals containing detailed instructions on the techniques of filling up the questionnaire and of other field operations were provided to all trainees to ensure uniform training across the country. Besides, hands-on-exercise on the technique of data collection was demonstrated at the field at all levels of training.

After the training, enumeration was done in two phases - *first phase* during 15-24 April 2013 in 37 districts and *second phase* during 15-24 May 2013 in 27 districts. To ensure a smooth operation, a central *Census Control Room* was set up at the Headquarters of BBS that was kept functioning round the clock. In addition, Control Rooms were also established at different levels such as at regional, district, Upazila offices and union *parishads* to meet up any emergency instantly. After the completion of enumeration, census books were preserved at Upazila Statistical Offices with a view to editing and coding at local level. Only *Tally Sheets* – the summary sheet of a census book having information on a few key questions - were brought to Headquarters for preparing the preliminary report.

## 1.5 Data Editing and Coding

Coding refers to putting a numeric number following statistical classification. It is used to group and organise information meaningfully and systematically into standard format that is useful for determining similarity of ideas, events, objects or persons. In Economic Census 2013, Bangladesh Standard Industrial Classification (BSIC) 2009, prepared by the BBS following International Standard Industrial Classification (ISIC) Rev.4, was used to codify the economic units by their activities. Besides, Bangladesh Central Product Classification (BCPC) 2012 – also developed by the BBS based on Central Product Classification (CPC) Rev.2 – was used in coding the product and the service produced by the economic units. The coding was done at the field offices of BBS by the hired coders from the local unemployed and educated youths, but the activity was intensively supervised in different tier by the staff of BBS. To make the coders and the supervisors conceptualized the coding of economic activity, five-day long training was conducted at all district Headquarters. The coding and editing activities were strongly supervised by the supervising officers who received four-day long training at the Headquarters of BBS, and acted as the master trainers at field level training. *Coding Books* - short form of BSIC in Bengali and BCPC - were supplied to all coders, supervisors as well as master trainers to ensure unique coding.

It is important to mention that the filled-in questionnaires were also edited i.e. each questionnaire of the book was thoroughly verified manually before coding at the field offices of BBS to make them flawless to the extent possible. The editing activity was accomplished following the same procedure as coding.

## 1.6 Data Entry and Processing

After the completion of editing and coding, the data was made entry in the computers at the Union Information and Service Centres (UISCs) throughout the country in order to complete the activity within the shortest possible time. Besides, data of various city corporations like Dhaka, Chittagong, Rajshahi, Khulna, Barisal, Rangpur, Sylhet and Gazipur were captured at the Headquarters of BBS. Data made entry at UISCs were automatically transferred to, and stored at the central server installed specially for the Census at the Headquarters of BBS. Eventually, the data were uploaded, processed and analysed at the Headquarters and a number of statistical tables were generated.

One of the outstanding features of the Economic Census 2013 was that the data entry was completed within a very short time, *in three months*, as it had been carried out at the field level at a time across the country as well as at the Headquarters. An '*Online System*' was developed by a consulting firm named *Information Solutions Ltd. (ISL)*, which has been hired to do the job, creating the opportunity of making data entry across the country at a time both in online and in offline. Therefore, data entry was done in both ways: *online and offline*. The firm was engaged not only for developing the system but also for providing necessary supports until the preparation of final results.

### **1.7 Post Enumeration Check (PEC)**

One of the most significant and indispensable part of any census is to conduct Post Enumeration Check (PEC) to validate the census data. Census data collection is often prone to diverse non-sampling errors due to its size. PEC, conducted independently soon after the census data collection, is one of the standard methods of calculating that errors. The PEC results are used for correcting the errors of the census. PEC refers to re-enumeration of the economic units of some specific Enumeration Areas (EAs) of the census selecting through an appropriate sampling method.

PEC is defined as the full recount of all the economic units of a representative sample of a census population followed by matching each unit enumerated in the PEC with the information obtained from the census enumeration. Therefore, it estimates the extent of coverage as well as content errors occurred in the census enumeration.

It is worthwhile mentioning that coverage error is the error come out due to over-count or under-count of the economic units owing to omitting or double-counting of the units. However, content error refers to the flaw in the characteristics of economic units reported during census enumeration.

Coverage errors are of three types: i) Omissions, ii) Duplications, and iii) Erroneous Inclusions. However, content errors may take place if information of the units such as type of unit, type of activity, total persons employed etc., is wrongly recorded.

Bangladesh Institute of Development Studies (BIDS), an autonomous professional body, carried out the PEC being chosen by BBS in view of keeping the independence between the PEC and the Census. BIDS was selected considering their past experience on conducting the PEC of Population and Housing Census 2011 successfully, and their Expression of Interest as well.

The sampling design prepared by BIDS involved drawing a sample of 300 Enumeration Areas (EAs) following two stage sampling procedure. In the first stage, the overall economy was divided into three strata, namely City Corporations, Municipalities and Rural areas. Based on the share of these three strata in the total number of economic units in the census, a total of 300 unions/wards were selected from these strata. In the second stage, one EA was selected from each sample union/ward. All economic units belonging to the sample union/ward were completely enumerated under the PEC. Economic units are the basic units of investigation in both Census and PEC. On the basis of the pre-census listing results, EAs were created to have about 150 economic units per EA. With 300 sample EAs, the total size of the sample economic units, thus, becomes nearly 45000, which was considered large enough for getting reliable estimates of coverage and content error.

According to the usual feature of a PEC, a short questionnaire was prepared consisting of 14 out of the 27 questions of the census questionnaire so as to reflect the content errors of the census properly. Data of the PEC were collected during 6-10 October, 2013 and just before the data collection, rigorous training was imparted to the PEC personnel.

The PEC findings reveal that the Net Under-Count is 0.84% which is 0.70% in rural, 1.34% in municipality and 0.99% in city corporation. Adjusting the data of the Economic Census 2013 using the PEC findings, the core estimates of Madaripur district become as follows:

## 1.8 Limitations

This report has the following limitations:

- i. Data on some particular agricultural firm-based activities such as dairy, poultry, hatchery, fishery etc. were collected during the main census operation; the results were also published in the preliminary report; but these are not included in the final report in order to keep all censuses' results consistent and comparable as well as to avoid the confusions.
- ii. Three sections according to BSIC-2009 (*See Chapter II, Para-2.21*) such as Section-A (Agriculture, Forestry and Fishing), Section-T (Activities of households as employers; undifferentiated goods and services producing activities of households for own use) and Section-U (Activities of extraterritorial organisations and bodies, were not included in the scope of Economic Census 2013. Section-A is independently covered by the Agriculture Census and Section-T conventionally covered partly by the Agriculture Census and partly by the Labour Force Survey. Section-U was not considered because of disregarding the activities under this section in compilation of national accounts aggregates globally. Moreover, this section was also not included in scopes of the earlier two economic censuses, i.e. Economic Census 2001 & 03 and Economic Census 1986.
- iii. The figures of Economic Households are not strictly comparable with that of earlier censuses as the definition used in this census and that of earlier censuses are significantly different (*See Chapter II, Para-2.19*).
- iv. In some cases, figures under the category of Micro Industry against various economic activities (*See Chapter VIII*) are not evident, which has been caused for strictly following the definitions used in the National Industrial Policy-2010 (*See Annex-VI*).

## CHAPTER II

### Concepts & Definitions

#### **2.1 Economic Activity:**

All activities undertaken for profit or own consumption are considered as economic activities. Such activities shall refer to production, distribution, marketing and sales of goods and services.

#### **2.2 Economic Unit:**

Economic Unit is defined as a single establishment or economic household operating economic activities for profit, household gain or indirect benefit to the community.

#### **2.3 Establishment:**

An establishment is an enterprise or part of an enterprise that is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.

The basic economic unit operated in a permanent or temporary place is treated as establishment. If the activity is carried out in a separate room of a household or place only for shop/show room/plants is also considered as separate economic establishment.

#### **2.4 Permanent Structure:**

A structure that has a fixed location and permanent shed, wall and fence is a permanent structure. It may be a building, tin shed or a hut or parts thereof. It usually lasts for more than a year.

#### **2.12 Ward:**

Ward is a part of a Paurashava or City Corporation. For the administrative convenience, each Paurashava or each City Corporation has been divided into several parts. Each part is called a Ward. Every ward has a ward council institution and a distinct map. The equivalent unit of Ward in the rural area is Union.

Ensuring the necessary civil amenities for the people is its important function.

#### **2.16 Upazila Headquarters:**

Upazila Headquarters is also an urban area formed around Upazila complex or Upazila Police Station as a nuclear point. If a part of a Mauza falls within the Upazila Headquarters, the entire Mauza is considered under the coverage of Economic Census for the convenience of census enumeration.

#### **2.17 Growth Centre:**

## CHAPTER IV

### Establishments by Activities

This chapter has highlighted the figures of the establishments and the Total Persons Engaged (TPE) by different non-farm economic activities. According to Bangladesh Standard Industrial Classification (BSIC)-2009 prepared in line with the International Standard Industrial Classification (ISIC), Rev-4, the whole economy has been classified into 21 broad industrial sectors, but three sectors such as Agriculture, Forestry and Fishing, Activities of Households as Employers, Undifferentiated Goods and Services Producing Activities of Households for Own Use, Activities of Extraterritorial Organizations and Bodies have not been covered under the Economic Census 2013. Hence, the figures of the other sectors are described from different viewpoints in this Chapter.

(Note: Section A, T and U of BSIC-2009 are dropped from the table; see- Chapter I, Para 1.3.1)

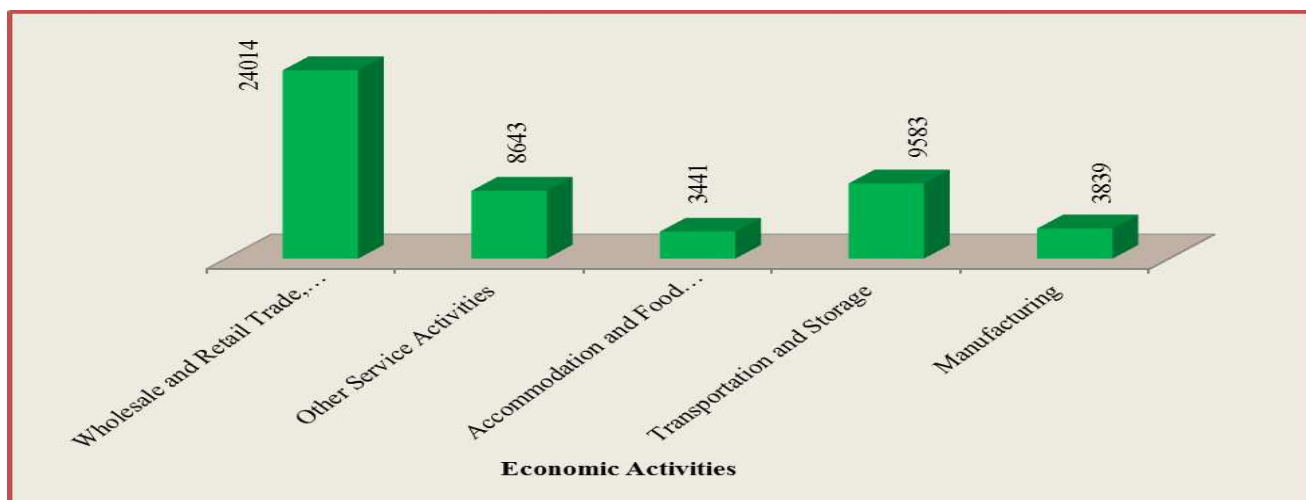

Table 4.1 shows that the total number of 1,17,178 persons are engaged in the total of 52,797 establishments in Madaripur, of whom 1,05,334 (89.89%) are male and only 11,844 (10.11%) female. These figures imply that the male has the strong dominance in the job market, while the female is still insignificant. Moreover, analyzing the same figures of the female of the two censuses, it is found that female participation in the labor market has been significantly increased from 9.06% in 2001 & 03 to 10.11% in 2013.

In Madaripur, the average size of establishment is 2.22 irrespective of the categories of industry (*cottage, micro, small, medium and large; see Chapter VIII*). This figure exposes that the huge number of establishment occupies very tiny size, while the insignificant number is big in size.

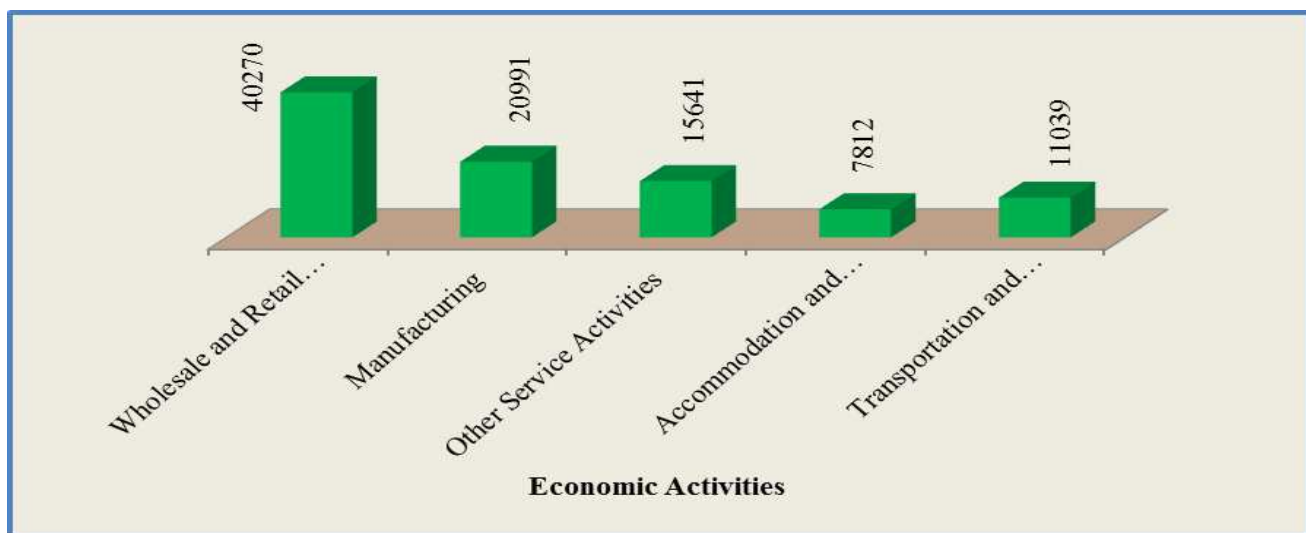

Examining the data by economic activities, it is observed that the Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles activity has appeared as the largest sector with 24,014 (45.48%) establishments, in which 40,270 persons are employed, followed by Transport and Storage with 9,583 establishments & 11,039 TPE, Other Service Activities with 8,643 establishments & 15,641 TPE, Accommodation and Food Service with 3,441 establishments & 7,812 TPE and Manufacturing with 3,839 establishments & 20,991 TPE.

It is important to note that, although the highest number (40,270) of people works in Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles sector, Manufacturing holds the second position with 20,991 TPE.

## CHAPTER V

### Total Persons Engaged (TPE) by Type, Sex and Location

This Chapter has focused on the working status of Total Person Engaged (TPE) in various dimensions. Moreover, annual growth rate of the workers has also been analyzed in different ways. Here, working status refers to the legal status of the working persons which includes five categories like working proprietor, unpaid family workers, full time workers, part-time workers and casual workers.

**Table 5.1: Total Persons Engaged (TPE) by Sex and Annual Growth Rate by Working Status, 2001 & 03 and 2013**

Total	66046	100	60060	5986	117178	100	105334	11844	5.21

Table 5.1 presents data of total persons engaged (TPE) by sex and their working status in the establishments. It appears from the table that the full time workers constitute the highest group having 48.35% (56,657) followed by working proprietor 40.19 % (47,099), unpaid family workers 6.12% (7,167), part-time workers 4.05% (3,977) and casual workers 1.29% (1,506) of total employed persons in the District in 2013.

In 2001 & 03 census, there were four categories of working status, such as working proprietors, unpaid family workers, full time workers and part-time workers. But in Economic Census 2013, the category has been disaggregated into five for better understanding the status of employment.

Among the categories, full-time workers score the highest with 47% followed by working proprietors 36.3%, unpaid family workers 13.7% and part-time workers 3% in 2001 & 03.

Following the data of 2013 census, it is visible that Annual Growth Rates of working proprietors and full time workers are fairly promising while those in unpaid family worker and part-time workers are fairly promising. For full-time workers, it has been increased annually by 5.48%, working proprietors by 6.15% and part-time workers by 7.86%. On the other hand, unpaid family workers have decreased by 2.14%. Distribution of workers by sex shows that female working proprietors and full time workers have grown significantly. Female working proprietors have increased from 563 in 2001 & 03 to 1,150 in 2013. Similarly, full time female workers have increased from 3,763 in 2001 & 03 to 9,091 in 2013.

So, it is found that full-time workers have been increased remarkably over the last decade.

Economic Census 2013 further reveals that the temporary establishments occupy 54.54% working proprietors, 27.81% full time workers, 16.37% unpaid family workers, 1.14% part-time workers and 0.14% casual workers. On the other hand, in 2001 & 03 Economic Census, there were 66.5% working proprietors, 20.6% full time workers, 9.4% unpaid family workers and 3.5% part-time workers in the temporary establishments.

Figures of Economic Census 2013 expose that economic households have 89.10% working proprietors, 9.84% full time workers, 0.56% unpaid family workers, 0.06% part-time workers and 0.45% casual workers; but in accordance with Economic Census 2001 & 03 economic households took up 34.4% working proprietors, 36.3% full-time workers, 28.7% unpaid family workers and 0.6% part-time workers.

It is evident that Annual Growth Rate of TPE is 4.13% for permanent establishment, 3.66% for temporary establishment and 16.22% for economic households, which implies that labour force participation in all types of establishments is growing significantly.

## CHAPTER VIII

### Micro and Macro Establishments

Figures on the establishments by categories, economic activities and locations are presented in this Chapter. It is important to note that establishments have been categorized into five groups such as Cottage, Micro, Small, Medium and Large strictly following the categories described in the *Bangladesh Industrial Policy 2010 (See Annex III)*.

The table 8.1 displays the data on establishments by categories, location and economic activities. Among the categories, Cottage scores the maximum with an outstanding number 49,417 (93.60%) followed by Small with 2,899 (5.49%), Micro with 430 (0.81%), Medium with 28 (0.05%) and Large with 23 (0.04%).

Observing the figures by location, it is found that the shares of Cottage, Micro, Small, Medium and Large establishments in the urban areas are 16.20%, 56.28%, 59.33%, 53.57% and 30.43% whereas that in the rural areas are 83.80%, 43.72%, 40.67%, 46.43% and 69.57% respectively.

Approximately, the similar condition is apparent in case of economic activities; the largest number of establishments is recorded under the category of Cottage in all economic activities followed by Small. *It is noteworthy to mention that Industrial Policy 2010 has opened the boundary for the 'Micro' establishments to be categorized as 'Small' on the basis of either TPE or Fixed Capital. For this reason all the 'Micro' establishments except those of Manufacturing sector have fallen in the 'Small' category.*
