## Foreword

I am delighted to learn that Bangladesh Bureau of Statistics (BBS) has successfully completed the 'District Statistics 2011' under Medium-Term Budget Framework (MTBF). The initiative of publishing 'District Statistics 2011' has been undertaken considering the importance of district and upazila level data in the process of determining policy, strategy and decision-making. The basic aim of the activity is to publish the various priority statistical information and data relating to all the districts of Bangladesh. The data are collected from various upazilas belonging to a particular district.

The Government has been preparing and implementing various short, medium and long term plans and programs of development in all sectors of the country in order to realize the goals of Vision 2021. For any pragmatic approach in formulating and evaluating development plans and programs reliable statistics are indispensable. BBS has been performing the major responsibility of supplying comprehensive and accurate statistics at the national level.

The present government, in line with its commitment to decentralize administration, has declared upazila as the focal point of administration regenerating upazila parishad through participatory elections. However, upazila level official statistics are still very inadequate. It is praiseworthy that BBS has undertaken timely program of publishing 'District Statistics 2011' where data representing socio-economic characteristics of upazilas of all districts will be available. I am confident that this publication will be of invaluable help to the planners, administrators, researchers, field level officers as well as other users. Various government, non-government and international organizations closely related to policy formulation and implementation may also find this publication useful.

I sincerely thank Mr. Golam Mostafa Kamal, Director General, BBS for bringing out the publication of 'District Statistics 2011'. I hope that in future 'District Statistics' will be published in much more improved form to make it more effective and informative.

## **Preface**

The 'District Statistics 2011' is mainly a compilation work of Bangladesh Bureau of Statistics (BBS). The decentralization policy of government has enhanced demand for timely, qualitative and comprehensive statistical data both for administrative and development requirements. The major regular publications of Bangladesh Bureau of Statistics like Statistical Pocketbook of Bangladesh, Statistical Yearbook of Bangladesh and Agricultural Yearbook of Bangladesh provide aggregate data mainly at the national and regional level. Data for smaller administrative unit like upazila often remains absent in such publications. The 'District Statistics 2011' emphasises to provide upazila level data.

The 'District Statistics 2011' provides both structural and flow-type information of almost all of the priority sectors of our national economy depending on data availability both from published and unpublished sources.

The publication of 'District Statistics 2011' would have not been feasible without the wholehearted co-operation of the various government, semi-government, autonomous, non-government offices and other organizations. In particular, the district and upazila level officials extended their total support and supplied all data. I like to express my sincere thanks to them and hope such co-operation will continue in future.

I am obliged and grateful to Mr. Md. Nojibur Rahman, Secretary, Statistics and Informatics Division (SID) for his enormous support and advice to prepare and to finalize this important publication. My sincere thanks also go to all officers of SID for their wholehearted support and sincere co-operation towards accomplishing this document.

I acknowledge the contributions of Mr. Md. Mizanur Rahman, Deputy Director General, BBS and Mr. Ghose Subobrata, Director, FA & MIS, BBS during development of the Document.

The regional and upazila statistics officers of BBS actively participated in preparation of the report. I thank them all. Finally, I thank Mr. Iftekhairul Karim, Focal Point Officer and Mr. Nasir Uddin Ahmmed, Deputy Director & Ex.Focal Point Officer as well as staff members of Bangladesh Bureau of Statistics for their untiring efforts in making the 'District Statistics 2011' a success. Through user's interaction and feedback, we hope to improve the coverage and quality of information contained in this edition. Any suggestion for improvement of the publication will be highly appreciated.

# **CHAPTER 1**

## **Introduction**

## **District at a Glance**

**Background:** Satkhira is a district in south-western Bangladesh and is part of Khulna Division. Satkhira was originally a sub-division of Khulna District. It was upgraded to a district on February 3, 1984. Nothing is definitely known about the origin of name of the district. There is a popular belief that Bishu Ram, a Dewan of the Moharaja Krishna Chandra of Nadia (now in India), rehabilitated seven aristocratic Brahmins in seven (meaning Sath in Bengali) separate houses (meaning Ghar in Bengali), in consequence of which the area took its name as **Satgharia**. Subsequently it was renamed as **Satkhira** when the British Administration upgraded it to a sub-division in 1861.

**Geographic Area and Location:** Satkhira district is bounded on the north by Jessore District, on the east by Khulna District, on the south by Bay of Bengal and on the west by India. It lies between 21°36' and 22°54' north latitudes and between 88°54' and 89°20' east longitudes. The total area of the district is 3817.29 sq. km. of which 1534.88 km is under reserve forest.

**Historical Events:** The ancient name of Satkhira was Satgharia (noted zamindar Prannath Roy Chowdhury established Satgharia). During the permanent settlement Bishnuram Chakravorti, an official of Raja Krishnachandra of Nadia, purchased Buran Pargana by auction in 1772 and settled at Satgharia village. Prananath Roy Chowdhury, son of Bishnuram Chakravorti, made considerable development in the area. In 1781, most of the areas of Jessore, Faridpur and Khulna were brought under a single administration. But later on while peasant movement spread over the region against the oppressions of indigo planters and the local zamindars, the British established a subdivision at Satgharia under Jessore district to control indigo revolt and to strengthen local administration. By this time 'Satgharia' turned into 'Satkhira' in the records of the British. Satkhira region was a part of the ancient Vanga Janapada. Once it was the capital of the state of Bara-Bhuiyan of Bengal. Peasant Movement against the East India Company and oppressions of the local Zamindars spread over the district in 1801 under the leadership of Titumir. Besides, Indigo Resistance Movement and Wahabi Movement spread over the district during 1854 to 1860.

## Flora and Fauna

**Flora:** One third of Satkhira district on the south is covered by thick forest of mangroves, canes creepers and other trees thriving on muddy saline tidal banks. The forests are known as Sundarban. The forest is named after sunduri tree (*Heritiera fomes*) which is most valuable and beautiful of all trees in the forest.

The eastern boundary of the forest of the district extends beyond the eastern boundary line of the district into the present Khulna district while the western one is formed by the river Raimongal forming the border line of Bangladesh and West Bengal (India). The southern boundary of the forest is the Bay of Bengal. At present the northern boundary of the Sundarban is the northern boundary of the government forest.

The sundari (*Heritiera minor*) is the most important of the forest trees. The colour of its wood is reddish which is very soothing to the eye. Because of its durability it has a great demand. It can tolerate saline water but attains full height on the bank of sweet water rivers like 'Sela' and 'Passur' and available in large quantity. Its timber is very durable and has great demand for posts

and planks. The amur (*Amoor cucullata*) and dhundhul (*Xylocarpus granatum*) have a similarity with 'Pasur' but they are of inferior quality and as used sometimes for making house posts. Small Amoor trees are used for making 'hookka' (Local smoking pipes) stems. One of the largest of the Sundarbans trees is 'bain' (*Avicennia officinalis*) tree. Generally it attains 60 feet in height with large girth. The wood is used for planking and as fuel. The flowers of the tree are small yellow and sweet smelling and afford a distinctive quality of honey. Other important trees are garjan (*Dipterocarpus turbinatus*), goran (*Ceriops roxburghiana*) and kankra (*Brodiaea gymnosoma*). There is a great possibility of utilizing them for tanning purposes. Of them only kankra attains sufficient size and has some value as timber. The gewa (*Excoecaria agallocha*) tree thrives in the most saline areas near the sea. Its wood is white hard and produces good timber. It is very much suitable for making match sticks and boxes and paper pulp. The most striking tree is keora (*Sonneratia apetala*). Deer are especially fond of its leaves and fruits. They flock under its branches to eat its fruits and browse its leaves off as high as they can reach producing a uniform abrupt line along the grove where the foliage has been bitten off. The singra tree supplies best fire wood. The karanj (*Pongamia glabra*) tree is large in size and grows on high river banks.

The hental (*Phoenix paludosa*) and the golpata (*Nipa fruticans*) are found in muddy areas everywhere. The hental resembles a dwarf date-palm and rafters are made of it. The goalpatta is regarded as one of the most important products and its leaves are used for thatching houses.

Except for the Sundarban the flora of the districts is similar to those in the adjoining districts. Innumerable indigenous weeds grow in the beel area. Several types of palms and bamboo clumps grow in almost all the villages. Mango (*Mangifera indica*) and jackfruits (*Artocarpus heterophyllus*) supply the commonest timber and are used for making doors, windows, boxes etc.

**Fauna:** Animals which are common all over the district are jackal (*Canis aureus*), wild hog, wild cat (*Felis chaus*), tree cat etc.

The rivers, khals (Channels) and beels (low lying marshy places) of the district teem with varieties of fish which are listed below according to the source of supply sea fish prawns, shrimps etc.

**River fish:** Pungas (*Pangasius pangasius*), hilsha (*Hilsa ilisa*), bagair (*Bagarius bagarius*), chital (*Notopterus chitala*), boal (*Wallago attu*) etc.

**Beel and Tank fish:** Calibaus (*Labeo calbasu*), ruhi (*Labeo rohita*), katla (*Catla catla*), mrigel or Carp (*Cirrhinus cirrhosus*), boal (*Wallago attu*), shoil (*Channa striatus*), koi (*Anabas testudineus*), magur (*Amblyseps mangois*) etc.

In paddy fields bhetki, bhangan (*Labeo boga*), tangra (*Mystus vittatus*) and parsia find a quick growth. They are caught by the farmers in the months of October, November and December when paddy fields start drying up.

The district affords a very lucrative place to game birds hunters. At the advent of winter season snipes (*Gallinago gallinago*), ducks (*Anas poecilorhyncha*) and geese (*Anser indicus*) begin to flock on beel and char areas. Others common birds are crow (*Corvus splendens*), vulture (*Gyps bengalensis*), sparrow (*Passer domesticus*), cuckoo (*Cuculus micropterus*), kingfisher (*Alcedo atthis*), bulbul (*Picnonotus cafer*), parrot (*Psittacula krameri*), tailorbird (*Orthotomus sutorius*) and lark (*Eremophila alpestris*).

The Sundarban is rich in wild animals. The Royal Bengal Tiger (*Panthera tigris*) famous for its large size strength and colourful striped body is the lord of the Sundarban. The most important of other fauna of the forest is the spotted or chitra deer (*Odocoileus hemionus*). Flocks of deer are

seen in moonlit night grazing eating keora fruit dropped by monkeys (*Macaca mullata*). Monkeys (*Macca mulatta*) literally rule over the trees. Several kinds of serpent's including poisonous cobra (*Naja naja*), karait (*Bungarus caeruleus*), rajshap and non-venomous python (*Python molurus*), dhora (*xenodrophis piscator*), grass snake are seen everywhere creeping in the grass and from tree and place to place.

Crocodiles (*Crocodylus porosus*) and sharks (*Rhincodon typus*) swarm in the river beds, butterflies, moths, bees and wasps fly from flowers specially in spring to gather honey.

Hundred's of varieties of fish various sizes are available in the rivers and creeks of the Sundarbans. Most important are the species are vetki (*Lates calcarifer*), bhangon (*Labeo boga*), jaba (*Siganus javus*), prawn (*Farfantepenaeus aztecus*) of different types are also available.

In the sundarban bon morog (*Gallus gallus murghi*) are also found. Crane, curled doves of various types, paddy-birds, pigeons (*Pavo criptatus*) and other game birds are also plentiful.

## **Concepts and Definitions**

### **1. Population and Housing Census 2011**

The population and housing census is the unique source of reliable and comprehensive data about the size of the population of the country, major socio-economic and socio-demographic characteristics.

It is the total process of collecting, compiling, evaluating, analyzing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country. The essential features of a population census are individual enumeration, universality within a defined territory, simultaneity and defined periodicity.

The population and housing census provides information on the geographic and administrative distribution of the population and household in addition to the demographic and socioeconomic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that political leaders, election officials, planners, national organizations including NGOs and civil society, regional and international organizations can use the data in decision-making.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban area and union/mauza/village in rural area). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance, employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The planners, researchers and policy makers as well as development partners and community administrators will find this report as a valuable reference for use in advising plans and programs for advancing welfare and well-being of the common people, in particular and the community in general.

### **Household**

Persons, either related or unrelated, living together and taking food from the same kitchen constitute a household. A single person living and eating alone forms one-person household.

### **Literacy**

It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over.

### **Community**

It refers to the following five lower geographic, administrative or revenue units:

- i) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having union parishad institution.
- ii) **Mauza :** Mauza is the lowest administrative unit having a separate jurisdiction list number (J.L. No.) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.
- iii) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- iv) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- v) **Mahalla:** Lowest urban geographic unit having identifiable boundaries.

## **Urban Area**

It corresponds with area developed around a central place having such amenities as metalled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agricultural occupations.

**i) City Corporation:** It includes city corporation area declared by the Ministry of Local Government.

**ii) Paurashava/Municipality Area:** It includes paurashavas incorporated and administered by local government under Paurashava Ordinance, 1977.

## **2. Agriculture Census year and reference period**

The census year extends over twelve consecutive months having for different census items the different reference periods or days of data collections. Some items have a year or week reference period. Some others have a specific reference day. The different census items by their reference periods or days are shown below:

### **Agriculture holding**

An agriculture holding is a techno-economic unit of agricultural production under single management comprising all livestock kept and all land used wholly or partly for agricultural production purposes without regard to title, legal form or size. Single management may be exercised by either an individual holder or jointly by two or more individuals or holders or by a judicial person such as a corporation, co-operative or government agency. A holding may consist of one or more parcels (fragments of land) located in one or more areas or mauzas or in more than one administrative unit or division provided that all separate parcels of fragments form parts of same technical unit under operational control of same management.

The definition covers practically all holdings/households engaged in agricultural production of both crops and livestock. Some agriculture holdings may have no significant agricultural land, e.g. holdings keeping livestock, poultry and hatcheries for which land is not an indispensable input for production.

### **Farm holding**

A farm holding is defined as being an agricultural production unit having cultivated land equal to or more than 0.05 acres. Farm holdings are classified into following three broad groups:

(a) **small:** Farm holdings having minimum cultivated land 0.05 acre but operated land more than this minimum but upto 2.49 acres.

(b) **medium:** Farm holdings having operated land in between 2.50 to 7.49 acres.

(c) **large:** Farm holdings having operated land 7.50 acres and above.

Small cultivated land 0.04 acre or less is generally used for kitchen garden growing mainly vegetables. Often seeds of white gourd, water gourd, pumpkin and other strains are sown on households; but these creepers spread out around house roofs and other structures. As such, the minimum cultivated land considered for qualifying to be a farm holding is 0.05 acres.

### **Non-farm holdings**

A non-farm holding is defined as being the one which has neither cultivated nor operated land or has cultivated land less than 0.05 acre.

### **Tenancy**

Owner holdings are those having and operating their owned land and who may or may not be leasing out land.

Tenant holdings are those having no owned land but operating land taken from others on share cropping basis or on other terms.

Owner-cum-tenant holdings are those having owned land and who may or may not be leasing out their own land to others and who may be taking land from others on share cropping basis or on other terms.

### **Agriculture work**

Agriculture work signifies all activities of holder and his/her labour force doing planning, management, and operation of a holding. It includes land preparation, sowing, weeding, harvesting, feeding and tending livestock & poultry, kitchen gardening, supervising agricultural workers, keeping farm records & accounts, preparing agriculture products for marketing (including packaging), repairing farm equipment, constructing farm buildings & fences, and engaging in land reclamation and improvement and other related activities. It excludes home and other family domestic chores.

### **Area under pond**

The pond area remains under water almost through out the year. Normally, households use pond water for various domestic and sometimes agriculture purposes. Ponds are also generally used for fish culture.

In the census the pond area data were collected separately for both single ownership and joint ownership of households.

### **Area under temporary crops**

It is the land area planted to crops having growing cycle or length of life less than one year. These are the temporary crops such as paddy, wheat, jute, cotton, tobacco, sugarcane, pulses, oil seeds, potato, vegetables and other seasonal crops. A list of temporary crops for which data were collected separately was given in back page of "Tally Sheet". The minimum area recorded for a temporary crop was 0.01 acre. Area under temporary crops and temporary-crops net area are equivalents.

### **Area under permanent crops**

It is the land area planted to crops which remain standing for a long period of time and do not need to be replanted after a seasonal harvest. Mango, jackfruit, coconut, guava, lemon, and other fruit varieties are all permanent crops.

### **Current fallow**

It is land brought into cultivation but left out uncultivated in census year for fertility regaining and improvement or for other reasons.

### **Net cultivated area**

This is land area actually cropped during the census year regardless of number of crops grown plus current fallow. It includes areas under temporary and permanent crops and also current fallow.

### **Permanent fallow**

It is land not available for cultivation due to coming into residence and commercial & other uses. Play ground, graveyard, wild shrubs and jungles, marshy land, and the like fall in this category.

### **Irrigated area**

This is area of total land brought under irrigation coverage for growing crops with irrigations done through mechanical or manual means. Irrigated area classifications fall into two categories: (1) surface water irrigation with main water sources being rivers, canals, beels, ponds, and other water bodies; and (2) underground water irrigation with water lifted by shallow tube-wells, deep tube-wells, and country traditional devices. The irrigation equipments are run by electricity, diesel or petrol, or manual labour.

### **Cattle and Buffalo**

Cattle and buffalo heads owned by households on day of enumeration were counted.

### **Goats and Sheep**

Goats and sheep owned by households on day of enumeration were counted.

### **Fowls, Ducks, and Pigeons**

Fowls, ducks, and pigeons owned by households on day of enumeration were counted.

### **Temporary crops gross area**

Areas aggregated for all temporary crops grown in the census year have made **temporary crops gross area** greater than **temporary crops net area** since the latter has within it the same land cropped more than once in different seasons of a year.

### **Intensity of cropping**

It is percentage of temporary crops gross area in comparison with temporary crops net area. It is expressed as follows:

$$\text{Intensity of cropping} = \frac{\text{Temporary crops gross area}}{\text{Temporary crops net area}} \times 100$$

### **Cereals**

Main cereals are rice and then wheat. Other cereals are jab, barley, cheena, maize, kaun, bajra and joar.

### **Pulses**

Main and common pulses are gram, mung, lentil, arhar, gari kalai, khesari and pea.

### **Oil seeds**

### **Cash crop**

Main cash crops are jute, mesta, sunhemp, cotton, sugarcane and tobacco.

### **Spices**

The main spices include turmeric, ginger, chillies, onion, garlic, corriander, black cumin and ani seed.

### **Fuel crops**

Dhaincha and other smaller plants used as cooking-fuel.
