Foreword

The Foreign Trade Statistics (FTS) is an important annual publication of Bangladesh Bureau of Statistics (BBS) which has been published regularly since 1973-74. The publication contains disaggregated data on FTS, which are the end product of a complex process comprising many stages starting from the collection and processing of basic records of compilation. This is the 35th issue of FTS series which bears detailed information on merchandise export and import figures for the fiscal year 2020-21 in different dimensions.

The National Board of Revenue (NBR) is the only source of data that are compiled and used in this report. Following International Customs Organization (ICO) guideline by NBR at the compilation stage, this publication is produced in the light of concepts and definitions used in International Merchandise Trade Statistics (IMTS)-2010. It is the only publication of the country compiled by BBS where trade data both in value and quantity are presented at eight digit-level following Harmonized Commodity Description and Coding System widely known as HS code.

My sincere thanks are given to Director General, BBS and his colleagues for preparing this report. I believe that our efforts will bring a success if the information presented in this report serves the purposes of policy-makers, academics, researchers, business community and other stakeholders.

It would be highly appreciated if any suggestion or recommendation is found in this regard.

Preface

Bangladesh Bureau of Statistics is going to publish the report on Foreign Trade Statistics which includes exports and imports findings, the major factors in accelerating economic growth of the country. Considering the significant role of foreign trade in economic growth, BBS has been publishing the FTS since 1973-74 regularly in order to ensure due coverage of foreign trade data. This report is the 35th issue of this series of publication. This report provides 'Key Foreign Trade Statistics' which reflects an overview of the foreign trade of Bangladesh at a glance and 'Statistical Tables' depict detailed foreign trade statistics on export and import for the fiscal year 2020-21. This issue has two parts: Volume-I, five tables for export and Volume-II, four tables for import data.

My sincere thanks are to officials of Foreign Trade Statistics National Accounting Wing for their relentless efforts in bringing out this publication.

I gratefully acknowledge the cooperation extended by National Board of Revenue (NBR) and its customs stations in providing primary data on imports and exports for the fiscal year 2020-21.

I firmly believe that this publication will be a useful document for policy-makers, planners, researchers, academics, business community and other stakeholders.

Any comment and suggestion of this publication would be highly appreciated.

CHAPTER- I

1.1 Introduction

Collection, compilation and dissemination of Foreign Trade Statistics (FTS) on both exports and imports are considered as one of the major activities of BBS. BBS brings out this annual publication regularly since 1973-74. The specific objective of FTS is to ensure timely availability of foreign trade data for policy-makers, planners, researchers and other users. This publication contains data on exports and imports with unit, value, quantity and country of origin by commodity following the harmonized commodity description and coding system (HS code) at 2 to 8 digits level.

Publishing micro level data on foreign trade is considered as one of the salient features of the report to its users. To maximize the utilization of the publication, time series data together with comparative statistics have also been presented and discussed. To have an overall view at a glance about foreign trade trend, summary and key findings have been added at the beginning of the report.

1.2 Data Collection Process

At present, BBS collects foreign trade data only from secondary sources. All data are originated from the various customs stations such as sea, land and air ports have been collected from the National Board of Revenue (NBR). NBR collects data from all customs stations that are the primary sources of foreign trade data. BBS collects online data from NBR which contain data in tabular form covering different fields of FT. BBS uses some data as per its requirements from these diversified fields.

In the past, BBS collected ‘bills of entry’ for imports and ‘shipping bills’ for exports entries for sea born data. For customs clearance, the importers had to submit bill of entry and exporters shipping bills to the customs houses located at the sea port of Chittagong and Mongla for every consignment imported into or intended of export from Bangladesh. BBS personnel posted at Chittagong and Mongla Customs Houses were responsible for collecting and sending these bills to BBS. The BBS staffs posted at the mentioned two customs houses used to collect the documents regularly and carried them to Dhaka twice or thrice a month. At present, BBS only collects online data from NBR.

Accordingly, the land-born foreign trade data were compiled from the monthly returns received from the land customs stations across the country.

Air-borne data were collected from the air-borne trade returns. These are the bill of entries for imports and customs statements for exports that are received from the air freight unit in Dhaka. But at present, both land-born and air-born foreign trade data have been collected online from NBR.

1.3 Scope and Coverage

Except military hardware, bullion, currency notes, coins and goods in transit, FTS includes all other commodities which pass through the boundary of customs territory. In case of imports, all goods and commodities entering into the country and for exports, all goods and commodities leaving the country are incorporated in FTS.

FTS also covers data of the commodities imported to and exported from the country recorded at Export Processing Zones (EPZ). The entire data on exports and imports recorded at various routes such as sea, air, land and postal parcels are taken into account for further processing.

1.4 Classification of Commodity

On the basis of 'harmonized commodity description and coding system (HS code)' based on the Standard International Trade Classification (SITC) Rev-3, FTS of Bangladesh are compiled and classified. These classifications are arranged in 98 chapters under 21 sections which cover all commodities of international trade. They include under broad headings of commodities at 4-digit level and detailed description of 8-digit level. BBS has prepared the HS code at 2 to 8-digit level to cover all commodities under foreign trade. Imports are recorded by country of consignment and exports by country of the last known destination. BBS enlists the quantities and values collected online from NBR against HS code and commodities imported and exported. BBS does not change the value of the commodity supplied by NBR. But, in case of quantity, BBS checks and rechecks them in order to find out any inconsistencies between value and quantity. If any anomaly is found, BBS examines it and fixes a reasonable figure of quantity based on observations of last few years' figures of the same commodity. Bangladesh Bureau of Statistics follows Brussels Definition of Value (BDV) for the purpose of valuation. The BDV of goods was introduced in December 1950 under the Principles of the General Agreement on Tariffs and Trade (GATT). The objective was to provide a comparable system of valuation. It has been accepted by almost all countries of the world. Under the BDV, the dutiable value of goods imported for home consumption is calculated at normal price i.e., the price which they could fetch at the time when duty becomes payable on a sale in the open market. In practice, valuation of goods is rather tricky and depends on expediency of revenue collection. Currently, tariff values or the international prices are perceived by the customs authority from floor level for the purpose of determining customs and related duties. BBS records import value on cost, insurance and freight (CIF) basis and export value on free on board (FOB) basis.

1.5 Data Processing, Tabulation and Publication

Foreign Trade Section head of National Accounting Wing collects online data from NBR on a monthly basis. Then that online data is sent to the officers of Foreign Trade Section National Accounting Wing, BBS for rearranging, processing, tabulating etc. After completion of related works the personnel of Foreign trade Section do the correction, compilation and editing. Though most of the tabulations are made according to HS Coding, some selected tabulations are done on the basis of category of goods by different exporting or importing accounts.

Selected monthly tables are published in the Monthly Statistical Bulletin and other monthly and annual publications of BBS. FTS are published on fiscal year basis, from July 1 to June 30.

1.6 Systems of Trade

There are two systems of computing trade statistics: (i) the special trade system and (ii) the general system of trade. Special trade system is based on the concept of “clearance through the customs frontiers” which is, in fact, the statistical boundary. Any commodity that is not cleared by the customs is excluded from such statistics. The general system of trade considers the national boundary as the statistical frontier. It means that all goods and commodities except military goods, bullion, currency notes, coins and goods in transit, entering or leaving the country are recorded in trade statistics.

Earlier Bangladesh followed the special trade system. For better coverage, Bangladesh is now applying the general trade system. The main characteristics of the general trade system are summarized below:

The General Trade System

Imports:

- i) Imports ‘entering directly’ for home consumption or use.
- ii) Imports into customs bonded manufacturing plants.
- iii) Imports into customs bonded warehouses and free area.

Exports:

- i) Exports of national produce.
- ii) Exports from customs bonded manufacturing plants.
- iii) Nationalized exports.
- iv) Exports from customs bonded warehouses and free area.

Re-export is included after clearance from customs and falls under category (iii) and (iv) mentioned above.

1.7 Computation of Trade Indices

Indices of imports and exports are designed to measure the overall position and direction of movements of values, prices and quantities of commodities which are bought and sold in the international market. Construction of indices is based on published data. Unit Price Index is computed by taking 2002-2003 as the base year.

Unit Price Index (UPI): It represents the overall direction of price movements of commodities bought and sold in the international market. Prices are based on FOB values of exports and CIF values of imports.

The main reasons for selection of 2002-03 as base year are:

- i) It was considered a normal year for business/trade activity.
- ii) HS coding system at 8 digit level was adopted in BBS in 2002-03. In HS coding system, the total number of commodities is 8123. For better classification and representation of new commodities in the index basket, the year of introducing HS code was chosen as the base year.

BBS has been computing various annual indices of foreign trade and publishing them in its Monthly Statistical Bulletin and other monthly and annual publications.

CHAPTER- II

2.1 Balance of Trade

Foreign trade plays a vital role in achieving rapid economic development of a country. Since Bangladesh is a developing country, foreign trade can be considered and given the utmost importance. But unfortunately, trade balance of this country is still very unfavorable. Each year Bangladesh has to spend a huge amount of money for importing consumer goods and materials which are not a favorable for our country. Bangladesh also spends much more amount of money for importing industrial raw materials, but it shows a positive signal for our economy. The country's requirement of petroleum products is entirely met by imports.

During the last five years, trade gap of Bangladesh has followed previous trend of increasing. It is observed from the last five year figures given in Table 2.1 that the trade gap is widening gradually. Over the last few years, some non-traditional items have been enlisted in the exportable commodities list. The trend of balance of trade of Bangladesh during the last 5 years is shown below:

Table 2.1 Trade Balance of Bangladesh During Last Five Years.

Year	Trade Balance (Million Tk.)	Ratio of Exports and Imports
2016-17	-1708658	1:1.57
2017-18	-2423708	1:1.78
2018-19	-2241055	1:1.64
2019-20	-2629990	1:1.94
2020-21	-3153162	1:1.91

Source: National Board of Revenue (NBR)

Note: Trade balance is negative (-) for Bangladesh.

It is evident from the table 2.1 that the trade gap in 2020-21 had been increased. In 2019-20, it was 2629990 million which had been increased to 3153162 million in 2020-21

2.2 Imports

During the last five years, the average growth of imports was recorded to 11.91%, the lowest decreased by 4.91% in 2019-20 and the highest 21.89% in 2020-21. Average import value during 2016-17 to 2020-21 was Tk. 5604305 million. Total import value in 2020-21 was 6633052 million in taka and million in 78211 US dollars. Year wise imports are given in table 2.2.

Table 2.2: Imports of Bangladesh from 2016-17 to 2020-21.
