Foreword

National Accounts Statistics is one of the core publications of Bangladesh Bureau of Statistics (BBS). It is published annually and plays an important role in evaluation and monitoring of overall economic performance of the country.

This publication intends to provide an insight on sector-wise economic performance of the country through measuring selected core macroeconomic indicators such as Gross Domestic Product (GDP), Gross National Income (GNI), Gross Disposable Income (GDI), Savings, Investment, Consumption etc. This publication focuses on the provisional estimates of GDP and other national accounts aggregates for FY2019-20 along with final estimates of the same indicators for FY2018-19.

I am happy to know that BBS is going to publish the 23rd issue of the series. I firmly believe that policy planners, academics, researchers, students and other stakeholders will find this publication as a useful source of information on wide range of macroeconomic indicators of the country.

I would like to convey my sincere thanks to Mohammad Tajul Islam, Director General, BBS and his colleagues for their untiring efforts in bringing out this publication.

Preface

Bangladesh Bureau of Statistics (BBS) publishes annual National Accounts Statistics since 1997, which is considered as one of its important publications. This is the 23rd issue of the series. This publication reflects the macro-economic situation and describes sector-wise overall economic performance of the country. It also acts as an instrument to monitor and evaluate macroeconomic stability of the economy. This publication provides the provisional estimates of Gross Domestic Product (GDP) and other national accounts aggregates for FY2019-20. The final estimates of GDP and other related national accounts aggregates for FY2018-19 are also presented in this publication.

I express my sincere gratitude and thanks to Mr. Mohammad Yamin Chowdhury, Secretary, Statistics and Informatics Division (SID) for his continuous support and guidance towards completion of this publication. I would like to convey my thanks to Director, National Accounting Wing (GDP and Foreign Trade) and his colleagues for their relentless efforts in bringing out this publication in time.

I hope this publication will be useful to the planners, policy makers and researchers who have reasons to be concerned with the overall macroeconomic situation of Bangladesh.

Comments and suggestions for further improvement of this publication will be highly appreciated.

1 Provisional Estimates of Gross Domestic Product (GDP) for Fiscal Year (FY) 2019-20 and Final Estimates of GDP for FY2018-19

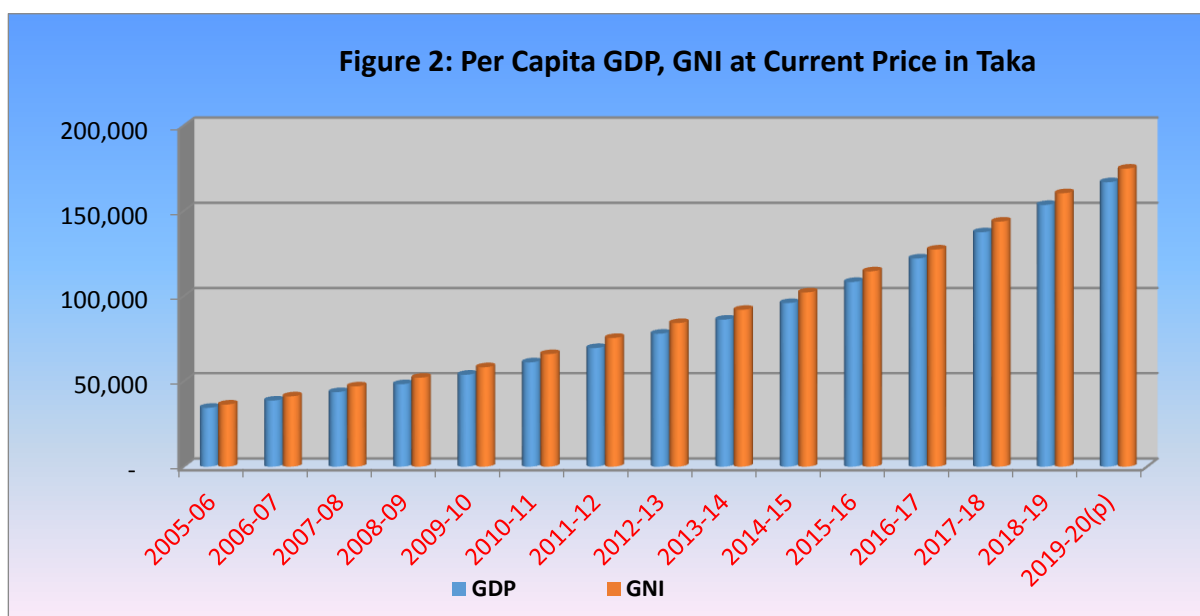

Provisional Estimates of GDP for FY2019-20

Provisional estimates of GDP for FY2019-20 indicate an expansion of the economy, with a growth of 5.24% in real term as compared to 8.15% (final estimate) in FY2018-19. As compared to FY2018-19, the lower GDP growth in FY2019-20 is mainly due to decrease in growth of (i) Agriculture (ii) Mining (iii) Manufacturing (iv) Electricity, Gas and Water Supply (v) Construction (vi) Wholesale and retail trade and (vii) Hotel and Restaurants etc. However, the growth of overall manufacturing sector increased to 5.84% in FY2019-20 as against 14.20% in the previous year.

The GDP growth rates at current and constant prices during the years from FY2005-06 to FY2019-20(p) are shown in the following graph.

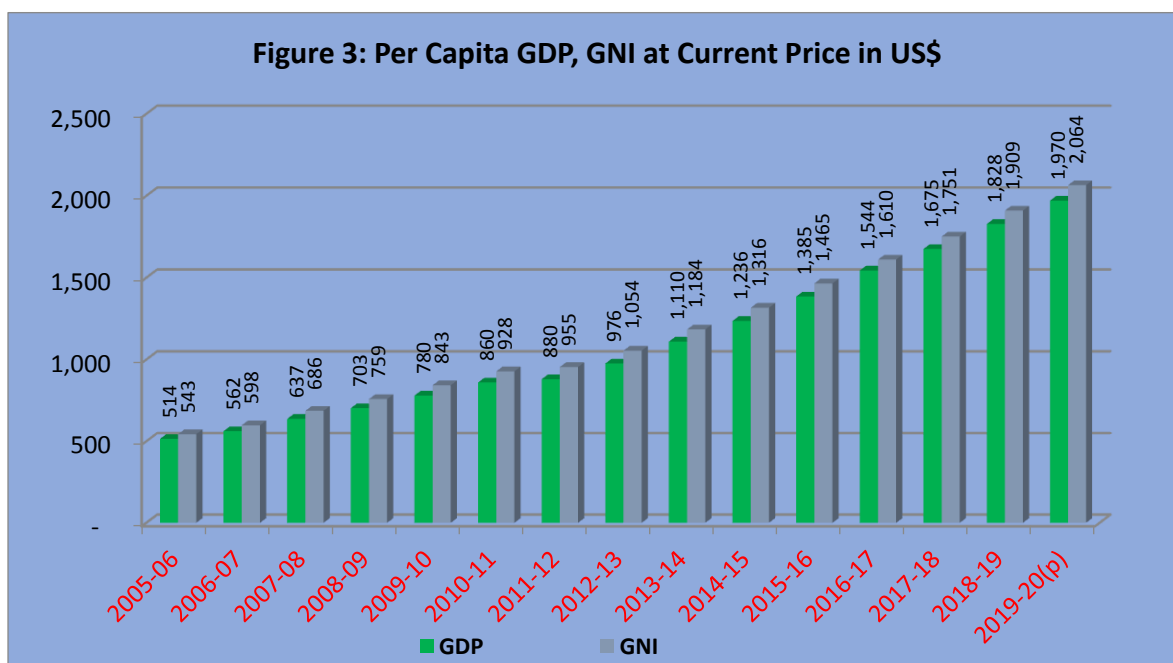

GDP at current market prices is provisionally estimated at Tk. 27,964 billion which is about 9.99% higher than that of FY2018-19. GDP at constant market prices is provisionally estimated at Tk. 11,637 billion which is 5.24% higher than that of FY2018-19 as shown in Table 5 and Table 6.

Per Capita Income

At current prices the per capita GDP and GNI for FY2019-20 are estimated at Tk. 166,888 (US\$ 1970) and Tk. 174,888 (US\$ 2064) respectively. At constant prices (at 2005-06 prices) the per capita GDP and GNI for FY2019-20 are estimated at TK. 69,452 and Tk. 72,781 respectively. The provisional estimates are based on up to nine months actual data available for the real sectors, government budget and the projected or trend data of the remaining sectors and sub-sectors.

Sectoral Performances of the Economy for FY2018-19:

Agriculture Sector

The agriculture sector contributes about 13.02% of the total GDP. It includes three sub-sectors namely (i) Crops and horticulture (ii) Animal farming and (iii) Forest and related services. The overall growth rate of the broad agriculture sector for FY2019-20(p) is provisionally estimated at 3.11% in real terms over FY2018-19.

Crop Agriculture

Crops and Horticulture Sub-sector: According to the provisional estimate, the crops and horticulture sub-sector of the agriculture sector is likely to increase by 0.89% in real terms in FY2019-20(p) over FY2018-19. This growth is due to increase in Aman and some minor crops production.

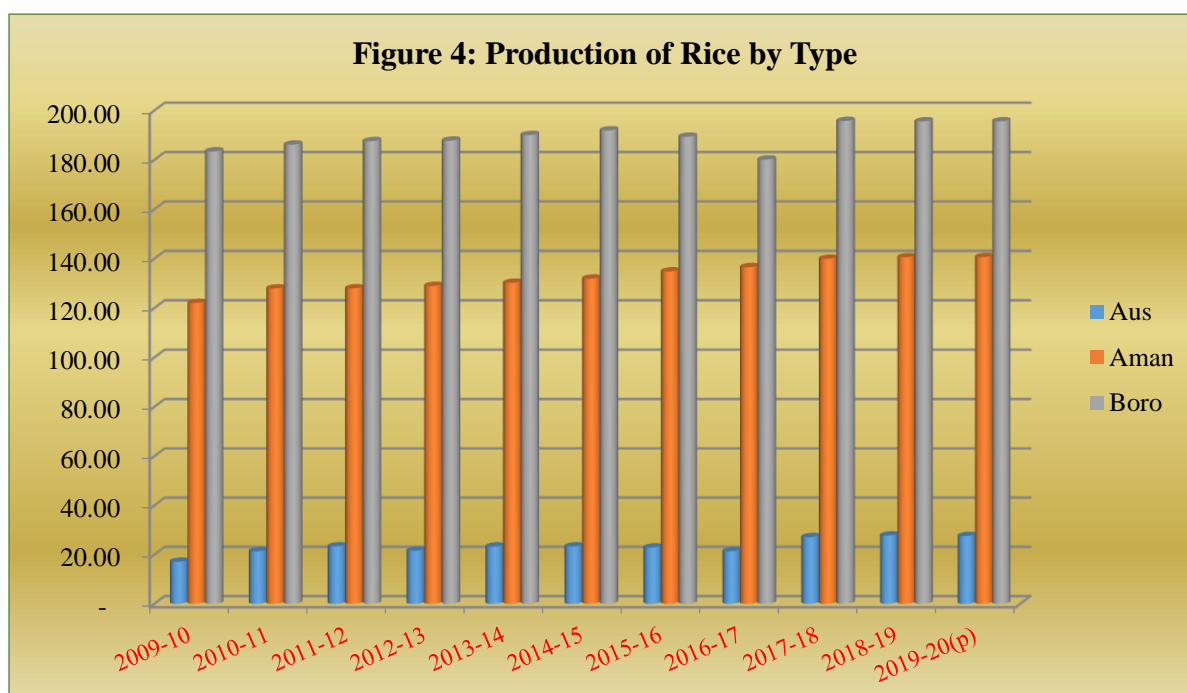

Table 1. Production of Some Major and Minor Crops

(Lac Metric Ton)					
Crops	2015-16	2016-17	2017-18	2018-19	2019-20(p)
Cereals					
Aus	22.88	21.34	27.09	27.75	27.54
Aman	134.83	136.56	139.93	140.54	140.63
Boro	189.37	180.14	195.75	195.60	195.60
Wheat	13.48	13.11	13.01	10.16	10.16
Maize	24.45	30.25	32.88	35.69	35.69
Total food cereals	385.01	381.40	408.66	409.74	409.62
Other cereals					
Tobacco and beverages	5.19	6.60	5.70	6.07	6.67
Jute (lac bale)	75.58	82.46	88.94	85.76	80.45
Fruits	47.04	47.61	47.77	49.98	53.91
Oilseeds	9.31	9.36	7.93	8.54	9.18
Pulses	3.78	3.79	3.87	4.08	4.25
Spices	24.69	24.70	26.55	26.71	27.21
Vegetables	131.36	141.80	143.22	143.77	143.77

Note: "p" denotes provisional estimates

- Production of Aus rice is 27.54 lac metric tons in FY2019-20(p) against 27.75 lac metric tons in the previous year, i.e. 0.76% lower.
- Aman rice production is estimated at 140.63 lac metric tons in FY2019-20(p) against 140.54 lac metric tons in FY2018-19.

- Boro rice production is estimated at 195.60 lac metric tons in FY2019-20 that has been repeated from the estimation of 2018-19.
- It also assumes that the previous year's production of Wheat will be retained (10.16 lac metric ton) in FY2019-20(p).
- Production of Maize has been increased significantly over the recent past and BBS is actively considering to adopt the same procedure for estimating its production like other major crops. In FY2019-20(p), the production of Maize has been retained to 35.69 lac metric tons.
- Production of Jute has decreased from 85.76 lac bales in FY2018-19 to 80.45 lac bales in FY2019-20(p), i.e. 6.19% lower.
- Minor crops contributed about 30% to the total output of the crop sub-sector which includes pulses, spices, sugarcane, fruits, vegetables, tobacco etc. Most of the minor crops production is yet to be finalized and hence the previous year's production has been taken as estimated production for FY2019-20. It may cause some changes in the production of minor crops if the final estimation is used. It needs to mention here that during the estimation of provisional GDP, a number of both major and minor crops have not been harvested. Therefore, final estimate was not done. Over-all, the growth of agriculture and forestry sector is likely to increase by 2.08% in FY2019-20(p) as against 3.15% growth in the previous year.

Non-crop Agriculture

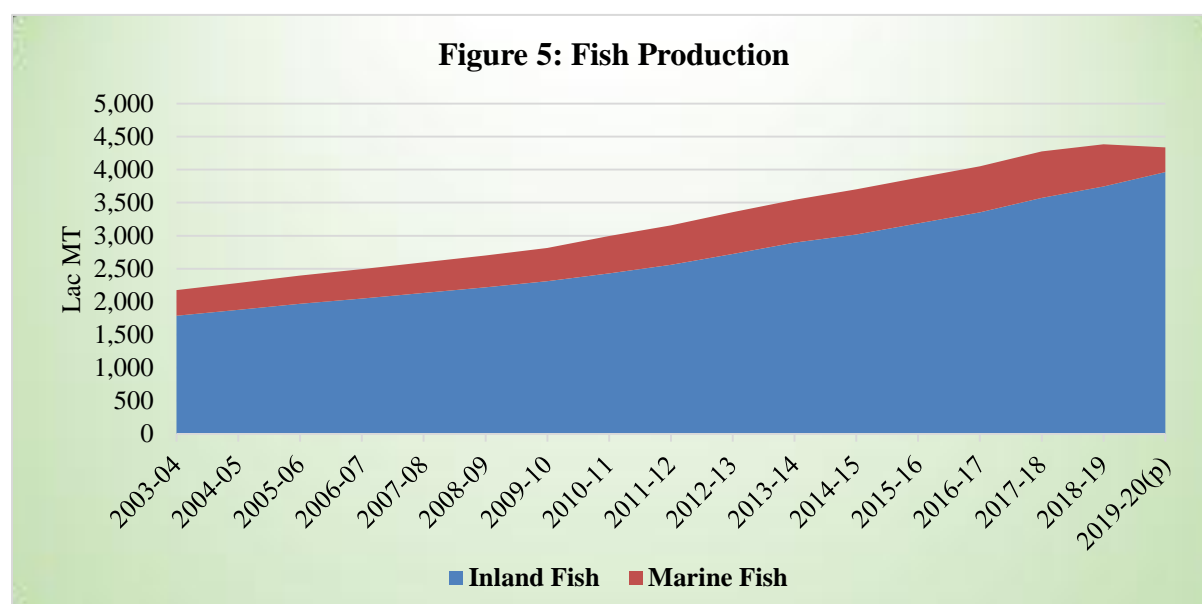

Animal Farming and Forestry: The growth rate in the animal farming sub-sector is likely to be 3.04% in FY2019-20 compared to 3.54% in FY2018-19. Gross value added in the forestry and related services sub-sector is expected to grow by 6.36% during FY2019-20, compared to 8.34% in FY2018-19.

Fishing: Total production of inland and marine catches as estimated by the Directorate of Fisheries (DoF) is higher in FY2019-20 than that of the previous year. The fishing sector is likely to grow by 6.10% in FY2019-20 compared to 6.21% in FY2018-19.

Table 2. Fish Production (adjusted)

(Thousand Metric Ton)			
Year	Inland Fish	Marine Fish	Total Production
2005-06	1,969	427	2,396
2006-07	2,048	446	2,494
2007-08	2,133	464	2,597
2008-09	2,218	482	2,700
2009-10	2,311	503	2,814
2010-11	2,429	566	2,995
2011-12	2,559	597	3,156
2012-13	2,723	633	3,356
2013-14	2,895	648	3,543
2014-15	3,018	684	3,702
2015-16	3,186	692	3,878
2016-17	3,353	697	4,051
2017-18	3,572	704	4,277
2018-19	3,745	639	4,384
2019-20(p)	3,963	674	4,637

Note: "p" denotes projected estimates

Industry Sector

The broad industry sector comprises (i) mining and quarrying (ii) manufacturing (iii) electricity, gas and water supply and (iv) construction activities. The industry sector accounts for 35.36% of GDP at constant prices for FY2019-20. The growth rate of the broad industry sector is provisionally estimated at 6.48% for FY2019-20 compared to 12.67% for FY2018-19. The expected sectoral performances are likely to be as following:

Mining and Quarrying: Data of major components of this sector, i.e. gas, coal and hard rock are obtained from Petrobangla. Estimation of this sector has been made on the basis of four months (July-October, FY2019-20) data. Mining and quarrying sector is likely to sustain its growth at 4.38% in FY2019-20 compared to 5.88% in FY2018-19. Production of coal at Barapukuria is included in the ‘Other Mining’ sub-sector. The growth rate of the ‘Other Mining’ sub-sector is 9.01% in FY2019-20 as compared to 13.08% in the previous year.

Manufacturing: This sector comprises two sub-sectors:

- i) Large and medium scale industries and
- ii) Small scale industries

Provisional estimate of Quantum Index of Industrial Production (QIIP), compiled with updates of export data, is used in computing value added of large and medium scale industries. Growth rate of value added for large & medium scale industries is estimated at 5.47% in FY2019-20 as compared to 14.84% in FY2018-19.

Production of large and medium scale manufacturing industries, particularly in the case of food products, beverage, textile, pharmaceuticals, wood and product of wood, printing and reproduction of recorded media, other non-metallic mineral products, machinery and equipment etc. shows higher growth in the first six months of FY2019-20. However, wearing apparels, leather and related products, coke and refined petroleum products, chemical and chemical products, electrical equipment etc. showed negative growth in the first six months of FY2019-20 as compared to the corresponding period of the previous year.

For estimating output of small scale industries Quantum Index of Industrial Production for Small Scale Industries is used. This sub-sector contributes about 21.5% of the total value added of manufacturing sector. The production of this sub-sector mostly depends on indigenous raw materials and is generally immune to external shocks. Estimated index of small scale manufacturing industries show higher growth in current fiscal year for dairy products, edible oil, textile, knitwear, leather products, wooden furniture, iron and steel and its products etc. On the other hand, production indices of jewelry, metal products, printing

and publishing etc. show downward trend in the same period. Growth rate of small scale industries as a whole stands at 7.78% in FY2019-20 as against 10.95% in FY2018-19.

Table.3. Quantum Index of Major Industries (Large and Medium Scale Industries)
(Base: 2005-06)

Code	Name of Industry	2016-17	2017-18	2018-19	July-December

30	Other transport equipment	560.00	604.43	607.53	593.66	754.35	27.07
31	Furniture	151.44	184.81	193.84	196.07	195.20	-0.45

Overall growth rate of manufacturing sector is estimated at 5.84% in FY2019-20 as compared to 14.20% in FY2018-19.

Electricity and Gas: The data available up to December 2019 have been used for projecting the growth rate of this sector. Long term trend of the annual production of electricity and gas is shown in the following table:

Table 4. Production of Gas and Electricity

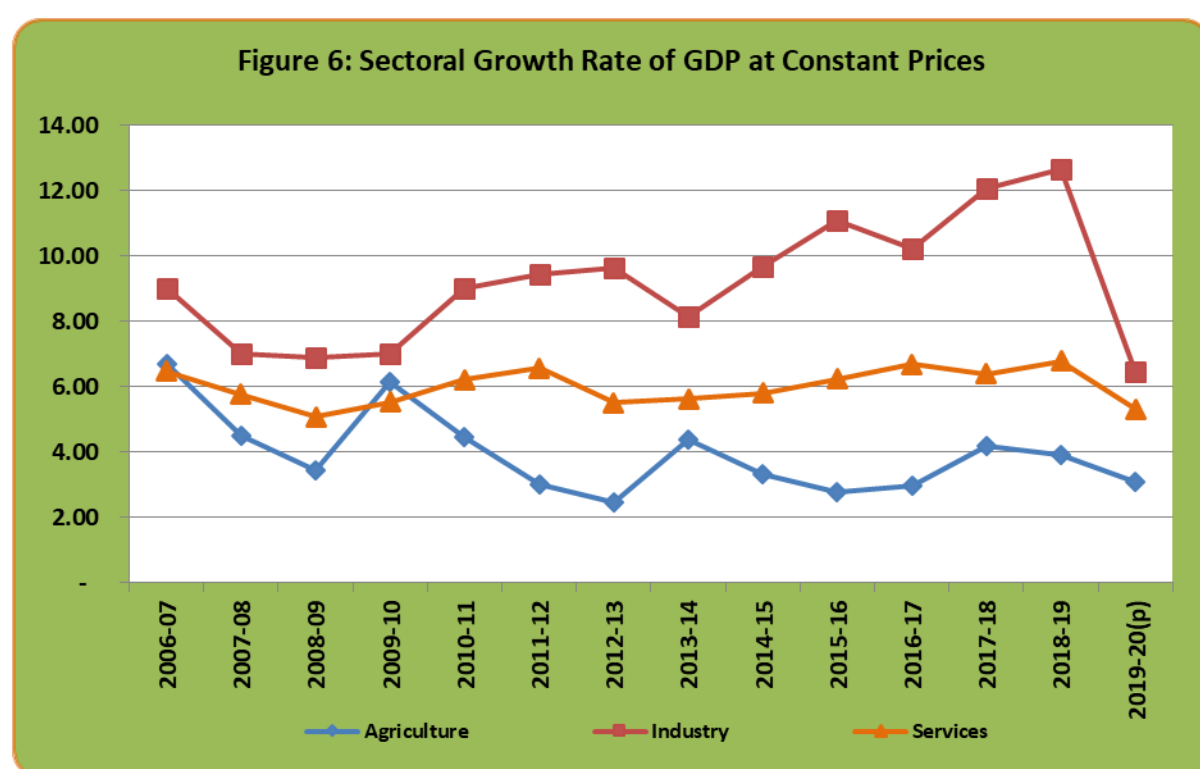

Year	Gas (10 ⁶ Cu. meter)	Electricity (10 ⁶ KWh)
2005-06	14,921	22,977

2013-14	23,232	38,040
2014-15	25,263	40,358
2015-16	27,559	46,371
2016-17	27,445	50,691
2017-18	27,430	56,014
2018-19	27,233	61,789
2018-19	9408.8 (July-October)	31,211 (July- December)
2019-20	8799.9 (July-October)	33,252 (July- December)

- In FY2017-18 and FY2018-19 electricity production was 56,014 and 61,789 million KWh respectively as reported by Power Development Board (PDB). Electricity production for the first six months (July-December 2019) of FY2019-20 was 33,252 million KWh, which was 2,041 million KWh higher than that of the same period of the previous year. It is expected that the generation of electricity will maintain the same growth in the full year of FY2019-20.
- In FY2017-18 and FY2018-19 gas production was 27.43 and 27.23 billion cubic meters respectively. Gas production for the first four months (July-October 2019) of FY2019-20 was 8.80 billion cubic meters, which was -6.47% lower than that of the same period of previous year.

As a result, the growth rate of the electricity, gas and water supply sector is expected to be 6.55% in FY2019-20 as compared to 10.33% in FY2018-19.

Construction: The major components of construction activities are pucca, semi-pucca, kutcha house construction and other structures. The value of output of pucca and semi-pucca dwelling and non-dwellings construction is estimated using commodity flow approach. This approach envisages estimation of production of commodities used in construction after adjusting them for inputs in other industries, changes in stocks; imports and exports so as to obtain the net availability of commodities for construction purposes. The expenditure on

kutchha house construction is estimated in an indirect way, based on the estimated increase in the stock of such houses and the cost of construction of an average quality house. Cement, iron and steel, bricks, timber & round wood and fixtures & fittings are the major inputs of the construction sector. Import of clinker in the first six months of FY2019-20 is 9.31% higher than that of the same period of previous year. Data available from Bangladesh Bank shows that the import of iron and steel during July-December 2019 is 12.65% higher than that of the same period of previous year. As a whole the construction sector is likely to achieve slightly lower growth rate compared to the previous year. The construction sector is, therefore, projected to grow by 9.06% in FY2019-20.

Service Sector

Service sector or tertiary sector includes all service activities. Total output of the service sector consists of the collective outputs of the wholesale and retail trade, transport, storage and communication, financial intermediations, real estate, renting and business activities, public administration and defence, education, health and social work and community, social and personal service activities. The sectoral share of the service sector is 55.86% of total GDP at current prices. Growth scenarios of the service sector for FY2019-20 are briefly as following:

Wholesale and Retail Trade; Repair of Motor Vehicles, Motorcycles and Personal and Household goods: Commodity flow method is applied to estimate output of this sector which depends on agriculture and manufacturing sectors. The output of this sector is likely to register a growth rate of 5.02% in FY2019-20 compared to 8.14% in previous year. It is due to decrease in manufacturing production and imported commodities in FY2019-20. Table 5 and table 6 present the value added estimates and the growth rates of wholesale and retail trade sector during FY2016-17 to FY2019-20 at current and constant prices respectively.

Hotel and Restaurant: Growth rates obtained from Hotel and restaurant survey 2009-10 are used for estimating output of Hotel and Restaurants sector adjusted by coefficients from survey of selected economic indicators. Consumer Price Index (CPI) is used for constant price estimates. The sector is expected to achieve a growth rate of 6.46% in FY2019-20 which is lower than previous year (7.57%).

Transport, Storage and Communication Sector: Major sources of information of this sector are Bangladesh Road Transport Authority (BRTA), Bangladesh Railway (BR), Bangladesh Shipping Corporation (BSC), Chittagong Port Authority, Bangladesh Inland Water Transport Corporation (BIWTC), Bangladesh Post Office etc. The combined effect of information from these sectors show that the transport, storage and communication sector is expected to achieve a growth rate of 6.19% in FY2019-20 which is lower than previous year (7.19%). Post and Tele communication services increased with a growth of 6.16% in FY2019-20. Communication services, particularly the Mobile Phone Services (MPS) market continued to drive the telecommunication industries because of strong consumer demand which led to the growth of Post and Telecommunication sub-sector. Hence the share of this sector in GDP is estimated 11.09% at constant prices.

Financial Intermediations: The financial institutions such as central bank, schedule banks, leasing companies, insurance companies, microfinance institutions, stock markets etc. belong

to this sector. The sources of data are Bangladesh Bank, Insurance Development and Regularity Authority (IDRA), Bangladesh Insurance Association, Bangladesh Central Depository Ltd and annual report of other financial institutions. Net interest income is the key indicator used to estimate the value added of banking sector, whereas premium received less claim paid is used to estimate the value added of insurance sector. Other financial auxiliary includes money changers, insurance agents and stock markets. The sector experienced an increase of 7.38% in FY2018-19, where the increase is estimated to 4.46% in FY2019-20.

Real Estate, Renting and Business Activities Sector: Inter-censal compound growth rate is used for estimating dwelling houses. Annual average house rent and maintenance cost are used for estimating output and intermediate consumption respectively at constant price. Extrapolation and set movers obtained from the Population and Housing Census, 2011, have been used for estimating the value added in this sector for FY2019-20. The growth rate in this sector is provisionally estimated at 4.85% in FY2019-20.

Public Administration & Defence Sector: This sector covers services rendered by the administrative departments of the central and the local governments, government non-profit institutions (NPIs) and defense sector as well. The sources of data are the budget documents of the central government (revenue and development budgets) and local governments. At constant prices Public Administration and Defense sector is likely to grow by 6.02% in FY2019-20 against 6.40% growth in the previous year.

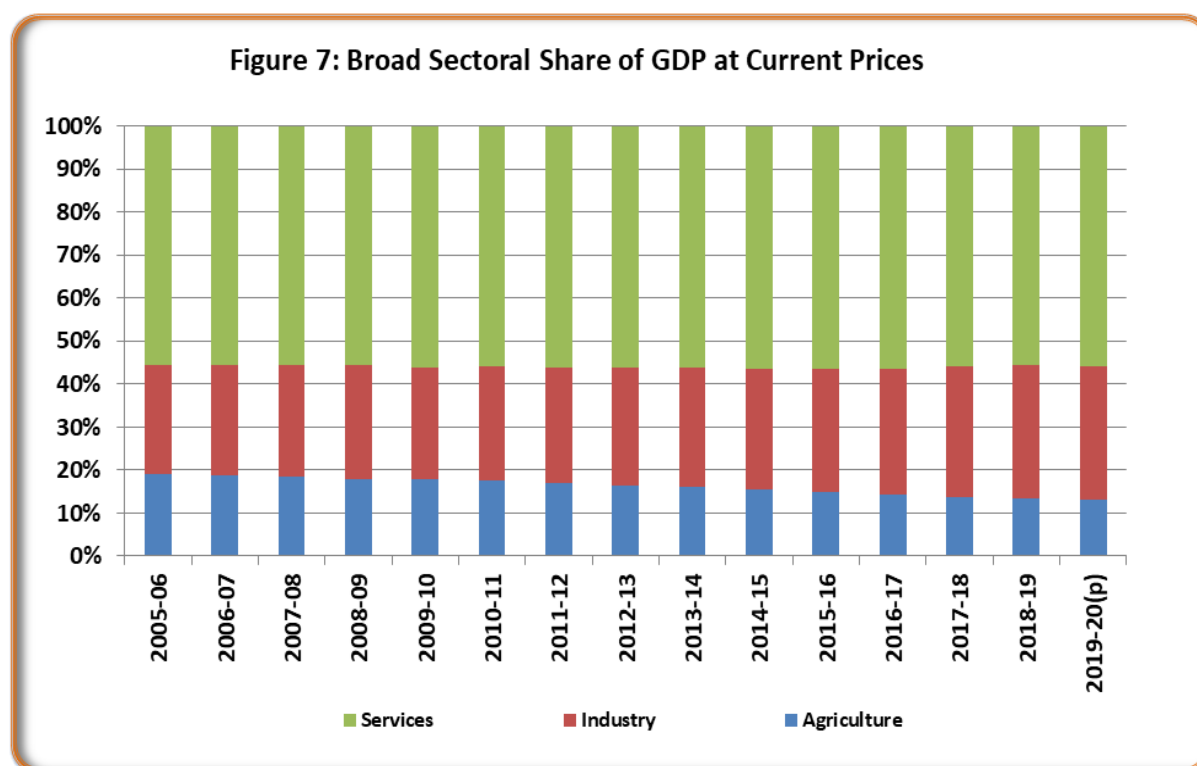

Education Sector: Gross value added (GVA) of this sector is compiled mainly from public and private educational institutions. Public part is estimated from Government budget document. Private part is estimated from the growth rate of “Private education survey 2006-07”. Sectoral growth rate for education is expected to be 6.19% in FY2019-20 compared to 7.66% in FY2018-19.

Health and Social Works: Health sector is divided into public and private sub sector. Current price GVA of Public sector is estimated following income method by using government expenditure data collected from the office of the Controller General of Accounts (CGA). Current price estimates are then deflated to obtain estimates at constant price by using CPI national. Growth rate of the Survey on Private Health Establishments, 2007 is used to estimate constant price GVA of private sector and it is being inflated by the said deflator to come up with current price estimate. It is estimated that the sector would achieve a growth of 9.96% in FY2019-20 as compared to 11.79% in FY2018-19.

Community, Social and Personal Services: This sector is projected to grow by 3.61% in FY2019-20 over FY2018-19. Estimates of this sector are compiled from the growth rate of “Labour force survey 2013” and “Professional and miscellaneous survey 1992-93”.

Sectoral Shares in GDP

At current prices the share of Agriculture sector (which includes crop and non-crop agriculture, animal farming and poultry, forestry and fishing) in total GDP is estimated at 13.02% in FY2019-20 as against 13.32% in FY2018-19. At current prices, the share of Industry sector in total GDP is 31.13% for FY2019-20 as against 30.15% for FY2018-19. The share of service sector (wholesale and retail trade; hotel and restaurants; transport, storage and communication; financial intermediations; real estate, renting and business activity; public administration and defence; education; health and social work; community, social and personal services) in total GDP is 55.86% for FY2019-20 which was 55.53% for FY2018-19. The data on sectoral shares show that the share of agriculture sector in GDP is gradually decreasing while that of service sector is increasing.

These changes indicate that while physical output (particularly for crops and horticulture) of Agriculture sector has increased on a sustained basis, its relative contribution has been declining while service sector contribution has been steadily increasing over the period.

Final Estimates of GDP for FY2018-19

The provisional estimates of Gross Domestic Product (GDP) for FY2018-19 were released in May 2019. These estimates are revised and finalized incorporating latest information of agricultural production, index of industrial production and performance of other key sectors like construction; transport, storage and communication; financial intermediations and government expenditure. Thus, final estimates of GDP are based on a more complete annual data than what were available for the provisional estimates. The salient features of the final estimates are stated below:

Estimate at constant prices (base: 2005-06)

a. Gross Domestic Product

Gross domestic product at constant prices (base: 2005-06) in FY2018-19 has now been estimated at Tk. 11,057,936 million, against Tk. 10,224,375 million in FY2017-18, showing a growth rate of 8.15 percent over the previous year. The slight increase in growth rate of real GDP in final estimate (8.15%) as compared to the provisional estimate for the FY2018-19 (8.13%) is primarily due to upward revision in the growth of agriculture, construction, wholesale and retail trade, hotel and restaurant, transport, storage and communication, education and some other sectors.

b. Per Capita GDP

Per capita GDP in real terms (base: 2005-06) for FY2018-19 has been estimated at Tk. 66,795 as against Tk. 62,477 for FY2017-18. The growth rate of per capita GDP has been estimated at 6.91% for FY2018-19.

Agriculture Sector

According to the final estimates, the agriculture sector (including fishing) showed a growth of 3.92% in FY2018-19 over FY2017-18. Such growth was largely attributed to the increased production of Aus, Aman and Potato.

In the provisional estimates, the crop sub-sector was estimated to grow by 1.75% but in the final estimates, this sub-sector's growth rate stood at 1.96%.

In the provisional estimates, the fisheries sub-sector was estimated to grow by 6.29%, but in the final estimates, this sub-sector recorded slightly lower growth rate of 6.21% based on fish production data provided by the Directorate of Fishery (DoF).

Industry Sector

Mining and Quarrying: In the provisional estimate, the projected growth rate of mining and quarrying sector was 7.39% in FY2018-19. The final estimate showed a growth rate of 5.88%.

Manufacturing: The overall growth rate of manufacturing sector has been finally estimated at 14.20% for FY2018-19 which is lower than the provisional estimate of 14.73%. In the final estimate, large and medium scale manufacturing industries grew by 14.84% as against 15.61% for FY2018-19.

Electricity, Gas and Water: The overall growth rate of this sector has been finally estimated at 9.58% for FY2018-19 which is lower than the provisional estimate of 10.57%. The electricity, gas and water sub-sector grew by 10.33%, 0.57% and 11.57% respectively in FY2018-19.

Construction: In the provisional estimates for FY2018-19, the growth rate was calculated at 9.63%. The final estimate shows a increase in the growth rate and stands at 10.25% in FY2018-19.

Services Sector

Wholesale and Retail Trade; Repair of Motor Vehicles, Motorcycles and Personal and Household Goods: The growth rate in this sector is finally estimated at 8.14% as against 7.70% in the provisional estimate for FY2018-19.

Transport, Storage and Communication: In the final estimate, the growth rate in Transport, storage and communication sector is 7.19% against 6.88% in the provisional estimate.

Financial Intermediation: The growth rate of financial intermediation is finally estimated at 7.38% in the FY2018-19.

Public Administration: The growth rate of Public Administration and Defense sector is finally estimated at 6.40 percent as against 6.45 percent in the provisional estimate for FY2018-19.

* Table 10 and table 11 show the volume and growth rate of GDP in the provisional and the final estimates for FY2018-19.

Estimate at Current Prices

Gross Domestic Product

Gross domestic product at current prices for FY2018-19 has now been estimated at Tk. 25,424,826 million, against Tk. 22,504,793 million in FY2017-18, showing a growth rate of 12.98% over the previous year.

The growth rate of GDP for FY2018-19 over FY2017-18 is finally estimated at 12.98% which was 12.69% in provisional estimate.

Provisional and Final Estimates of GDP by Expenditure Category

Provisional and Final Estimates by Expenditure Category

Taking the perspective of final uses of a country's output, GDP can be derived as the total of final consumption expenditure, gross capital formation and net exports. Final consumption expenditure is incurred by three institutional sectors i.e. General Government, Households and Nonprofit Institutions Serving Households (NPISH).

Final Consumption Expenditure (FCE)

At current prices the final consumption expenditure is likely to grow by 9.57% in FY2019-20 compared to the previous year. In FY2019-20, the final consumption is Tk. 20,886,722 million as against Tk. 19,062,661 million in FY2018-19. In FY2019-20, its share in GDE (Gross Domestic Expenditure) and GDP (Gross Domestic Product) are 74.36% and 74.69% respectively. In FY2018-19, the share of final consumption expenditure was 74.65% of GDE and 74.98% of GDP.

Private Final Consumption Expenditure (PFCE): The final estimate of Private Final Consumption Expenditure for FY2018-19 is 17,468,248 million which was 17,696,159 million in the provisional estimate (Table 24). The final estimate of PFCE for FY2018-19 is (-)1.29% lower than the provisional estimate. Table 12 shows the rate of change of consumption expenditure at current prices.

Table 12. Growth Rate of Final Consumption Expenditure

Year	Growth Rate (%)			Consumption-GDP Ratio (%)		
	Total	Private	General Government	Total	Private	General Government
2012-13	12.45	12.25	15.35	77.96	72.85	5.12
2013-14	12.00	11.65	16.92	77.91	72.57	5.34
2014-15	12.71	12.60	14.22	77.84	72.44	5.40

2016-17	13.49	13.27	16.02	74.67	68.67	6.00
2017-18	17.71	17.44	20.76	77.17	70.81	6.36
2018-19	9.77	9.62	11.45	74.98	68.71	6.27
2019-20(p)	9.57	9.58	9.45	74.69	68.45	6.24

"p" denotes provisional estimates

General Government Consumption Expenditure: Based on budgets (allocations/ estimates), general government consumption expenditure is projected to grow by 9.45% in FY2020.

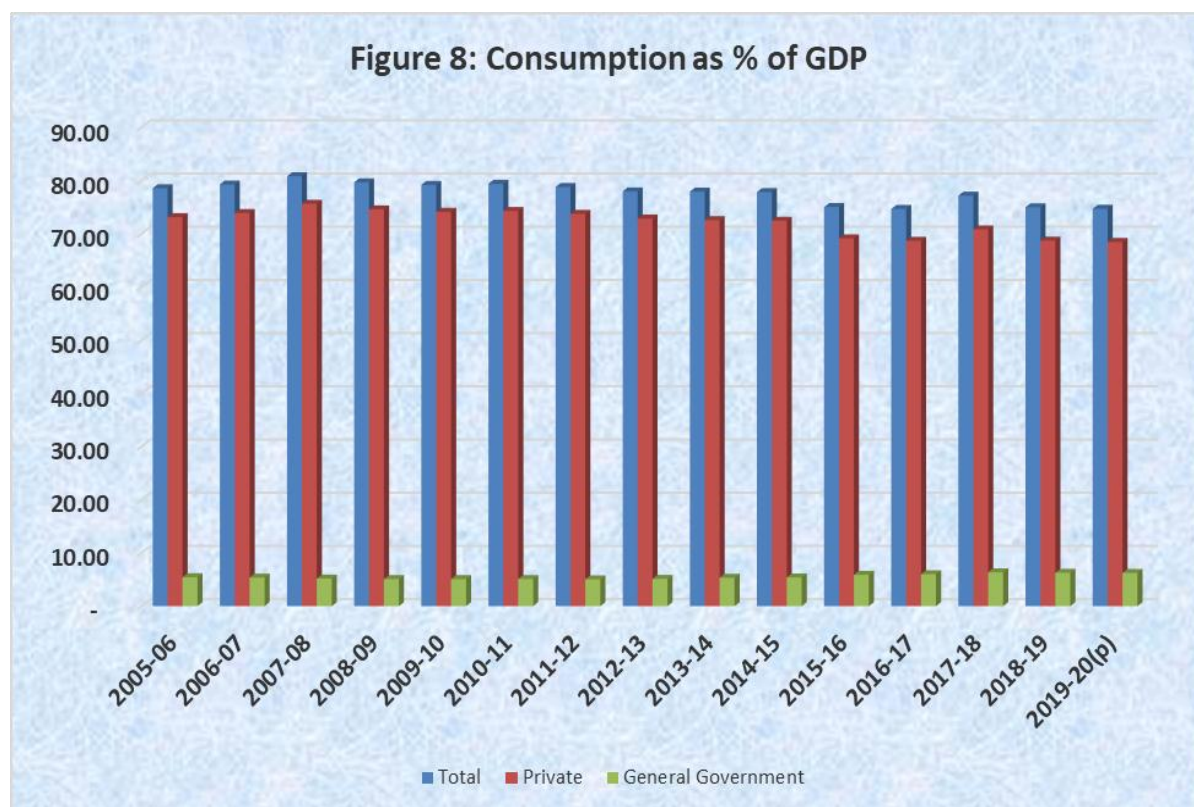

- The final government consumption expenditure is expected to be Tk. 1,745,085 million in FY2019-20 which is 6.24% of the GDP (Table-14). In FY2018-19, the final consumption expenditure was Tk. 1,594,413 million, which was 6.27% of the GDP.
- In FY2019-20, the growth rate of general government final consumption expenditure in real terms is likely to be 7.25% while this growth rate is estimated at 9.45% at current prices.

* Revised series, RE denotes revised estimates and BE denotes budget estimates

Figure 8 shows the final consumption expenditure and its share by private and general government.

Total expenditure and consumption of general government from FY2011-12 to 2019-20 is presented in the following table.

Table 14. Expenditure and Final Consumption of General Government

(Million Taka)

Year	Total Expenditure	Total Consumption	% of Consumption
2011-12(RE)	1,462,388	531,753	36.36
2012-13(RE)	1,727,583	613,385	35.51
2013-14(RE)	1,972,638	717,189	36.36
2014-15(RE)	2,263,472	819,176	36.19
2015-16(RE)	2,697,447	1,021,088	37.85
2016-17(RE)	3,276,448	1,184,667	36.16
2017-18(RE)	3,981,892	1,430,561	35.93
2018-19(RE)	4,572,853*	1,594,413	34.87
2019-20(BE)	5,391,557*	1,745,085	32.37

RE denotes revised estimates and BE denotes budget estimates, * denotes only Central Government expenditure

Gross Capital Formation (GCF)

The gross capital formation is made up of gross fixed capital formation (GFCF) and change in inventories (increase/decrease). Gross capital formation or investment is expected to be Tk. 8,879,880 million in FY2019-20 compared to Tk. 8,026,695 million in FY2018-19. Growth rate of gross capital formation is likely to be 10.63% at current prices compared to 14.19% in FY2018-19. The percentage share of GFCF to GDP is likely to be 31.75% during FY2019-20 compared to 31.57 in FY2018-19.

Private Gross Capital Formation: The private gross capital formation is estimated Tk. 6,608,370 million (74.42% of total GCF) in FY2019-20. In FY2018-19, private gross capital formation is estimated at Tk. 5,985,825 million. The growth rate of GCF for FY2019-20 over FY2018-19 is expected to be 10.40% in nominal terms.

- Private GCF or investment grew by 14.34% in FY2018-19 over FY2017-18 and is expected to grow by 10.40% in FY2019-20.
- Private investment-GDP ratio is likely to be 23.63% in FY2020 compared to 23.54% in FY2019.
- Public investment-GDP ratio is likely to be 8.12% in FY2019-20 compared to 8.03% in FY2018-19.

Net Exports of Goods and Services

Net exports of goods and services are the difference between exports and imports of goods and services. In FY2018-19 the total exports and imports were recorded at Tk. 3,895,909 million and Tk 5,450,079 million. As a result, the country posted a trade deficit of Tk.1,554,170 million. In terms of GNI at current prices, the trade deficit was 5.85%.

The volume of export for FY2019-20 has been projected on the basis of six months’ (July, 2019-December, 2019) actual data on export available from the balance of payments statement (BOP) prepared by Bangladesh Bank.

- The value of imports of goods and services for FY2019-20 is estimated at Tk.5,420,104 million compared to Tk. 5,450,079 million in FY2018-19.
- Growth rate of imports of goods and services is likely to be around (-) 0.55% in Y2019-20 over FY2018-19.
- The value of exports of goods and services for FY2019-20 is estimated at Tk. 3,742,021 million compared to Tk. 3,895,909 million in FY2018-19.
- Growth rate of exports of goods and services is likely to be around (-) 3.95% in FY2019-20 over FY2018-19.

Table 20. Investment-GDP Ratio

Year	Investment as % of GDP					
	2005-06 Prices			Current Prices		
	Total	Private	Public	Total	Private	Public
2011-12	30.44	24.46	5.98	28.26	22.50	5.76
2012-13	30.25	23.47	6.78	28.39	21.75	6.64
2013-14	31.33	24.20	7.13	28.58	22.03	6.55

2017-18	33.69	25.17	8.51	31.23	23.26	7.97
2018-19	33.78	25.24	8.53	31.57	23.54	8.03
2019-20(p)	34.25	25.50	8.75	31.75	23.63	8.12

Note: “p” denotes provisional estimates

Net factor income

Based on provisional estimate, net factor income posted a positive growth of 17.99% in FY2019-20 over previous year.

Net current transfer

Based on provisional estimate, net current transfer posted a negative growth of 1.74% in FY2019-20.

Investment and Savings

During FY2018-19, the investment-GDP ratio was 31.57%, of which investment-GDP ratio for public sector was 8.03% and private sector was 23.54%. In FY2019-20, the investment-GDP ratio is estimated at 31.75% while public and private sector investment-GDP ratios are likely to be 8.12% and 23.63% respectively. Table 21 shows the savings and investment balance during FY2013-14 to FY2019-20.

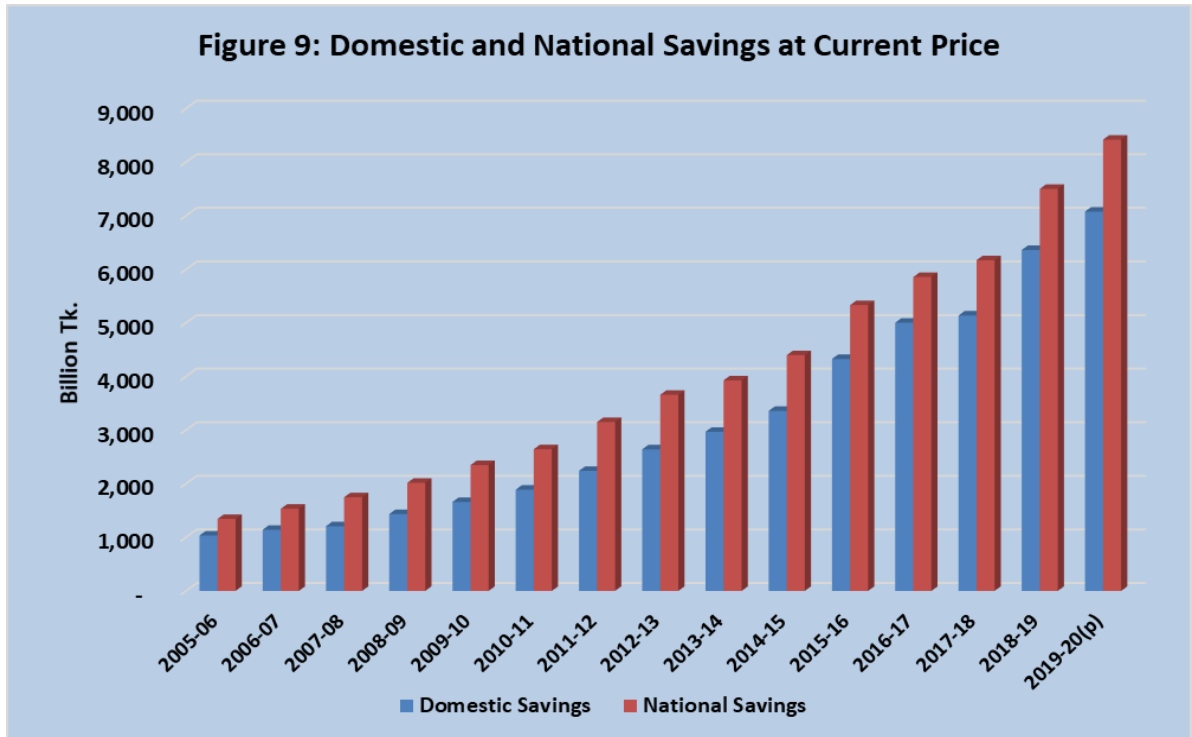

Table 21. Savings and Investment as percent of GDP

Category	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20(p)
Investment	28.58	28.89	29.65	30.51	31.23	31.57	31.75
Private	22.03	22.07	22.99	23.10	23.26	23.54	23.63
Public	6.55	6.82	6.66	7.41	7.97	8.03	8.12

Public	1.51	1.54	1.96	2.03	1.88	2.09	2.12
National Savings	29.23	29.02	30.77	29.64	27.42	29.50	30.11

Note: "p" denotes provisional estimates

In FY2019-20, about 75.24% of the total investment is recorded for construction, 18.10% in plant and machinery, 6.66% in transport equipment.

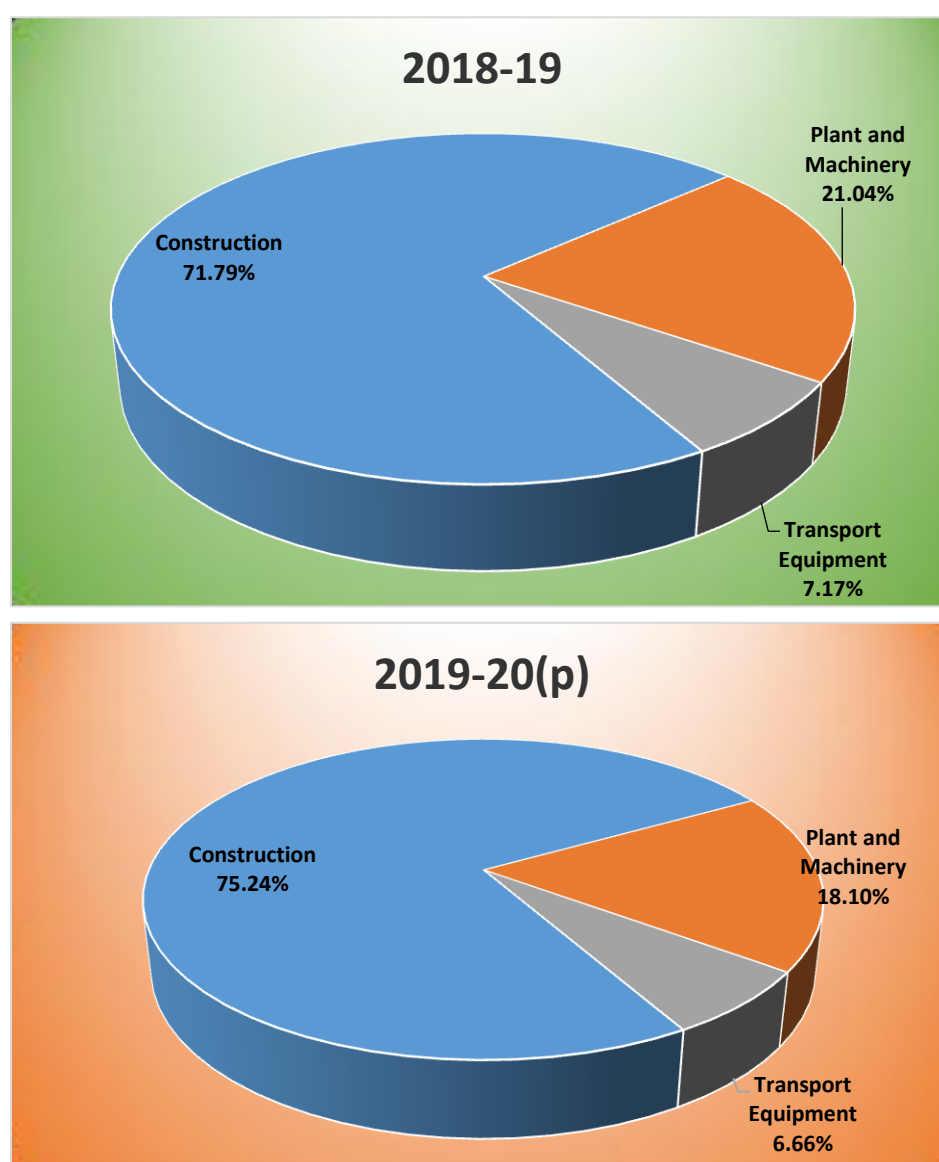

In FY2018-19, about 71.79% of the total investment is recorded for construction, 21.04% in plant and machinery and 7.17% in transport equipment.

Table 22. Composition of Gross Fixed Capital Formation

(Million Taka)

Year	Construction	Plant and Machinery	Transport Equipment	Others	Gross Fixed Capital Formation
2011-12	1,956,904	658,786	334,310	32,254	2,982,253
2012-13	2,354,061	657,298	354,451	37,888	3,403,697
2013-14	2,62,0743	847,432	371,761	-	3,839,936

Note: "p" denotes provisional estimates

Figure 10: Composition of GFCF for FY2018-19 and FY2019-20(p)

Saving: Saving represents the excess of current income over current expenditure. Domestic saving is a residual estimate i.e., it is the difference between GDP and final consumption. Thus,

$$\begin{aligned}
 \text{GDP} &= C + I + (X - M) \\
 \text{or, GDP} - C &= I + (X - M) \\
 \text{or, S (Saving, Domestic)} &= I + (X - M) \\
 \text{Again, GDP} &= C + I + (X - M) \\
 \text{or, GDP} + \text{NFI (Net Factor Income)} &= C + I + (X - M) + \text{NFI} \\
 \text{or, GNI (Gross National Income)} &= C + I + (X - M) + \text{NFI} \\
 \text{or, GNI} + \text{NCT (Net Current Transfer)} &= C + I + (X - M) + \text{NFI} + \text{NCT} \\
 \text{or, GNDI (Gross National Disposable Income)} &= C + I + (X - M) + \text{NFI} + \text{NCT} \\
 \text{or, GNDI} - C &= I + (X - M) + \text{NFI} + \text{NCT} \\
 \text{i.e. S (National Saving, Gross)} &= I + \text{CAB, where} \\
 &\quad \text{CAB} = (X - M) + \text{NFI} + \text{NCT} \\
 \text{Where GNDI} &= \text{Gross National Disposable Income} \\
 \text{CAB} &= \text{Current Account Balance obtained from the Balance of Payments (BOP)}
 \end{aligned}$$

When net factor income and net current transfers from abroad are taken into account with gross domestic saving, the national saving could be arrived.

It is obvious from the equation $S \text{ (national saving)} = I + \text{CAB}$ that, if $\text{CAB} = 0$, then $S=I$. Obviously, it is a case only for a closed economy. On the other hand, if CAB is negative (-), the Investment is greater than saving and conversely if CAB is positive (+) the saving is greater than investment.

Final Estimates of Expenditure Based GDP, FY2018-19

Of the main components of GDP by expenditure category, private consumption expenditure grew by 9.62% at current prices while it grew by 3.92% at constant prices in FY2018-19 over FY2017-18. Based on data, private consumption expenditure has finally been estimated at Tk. 17,468,248 million as against Tk. 17,696,159 million in the provisional estimates in FY2018-19, which is 1.29% lower than the provisional estimate. This difference between provisional and final estimates of GDE at current and constant prices in FY2018-19 may be seen in Table 24 and Table 25.

The final estimate of gross fixed capital formation or investment is higher than the provisional estimate in FY2018-19. Investment growth rate was 13.88% at current prices for the provisional estimate while the growth rate in the final estimate 14.19% during FY2018-19. Growth rate of private investment in final estimate goes up to 14.34% as against 13.35% in provisional estimate. Also public sector investment in final estimate goes up to 13.75% as against 15.44% in the provisional estimate for FY2018-19.

3 Inflation and Growth Rate

Inflation

As per Consumer Price Index (CPI) of base: 2005-06, the rate of inflation during FY2018-19 was 5.48% compared to 5.78% in FY2017-18. Prices of food items increased by 5.51% while prices of non-food items increased by 5.43% during FY2018-19. During FY2019-20, nine month average inflation rate is 5.60%.

Besides the CPI, price changes can also be measured by percentage change of GDP deflator. It can be used as an alternative measuring tool of inflation as CPI takes into account only the selected consumer items. On the other hand, National Accounts Statistics (NAS) take into account the prices of all outputs (goods and services) produced from each and every economic activity for an accounting year within a geographical territory.

A comparative view of inflation rates based on CPI and GDP deflator from FY2006-07 to FY2019-20(p) have been presented in Figure 11.

Table 26. Inflation Rate: National

(Base: 2005-06 = 100)

Concepts and data sources used in compiling GDP estimates

1. GDP is an aggregate measure of the total value of gross output produced within the economic territory of a country in a specified period, before deducting allowance for consumption of fixed capital (CFC) or depreciation. GDP is measured by using three different approaches.
2. Provisional GDP estimates for Bangladesh are compiled using both “production” and “expenditure” approaches. Data sources used for “production” approach include crops statistics, extrapolation based on inter-census growth rate of population and agriculture censuses, current industrial production survey, government budgets, other administrative records, external trade statistics, etc.
3. Under “**Production**” approach/method, GDP is measured as the total value added (value of output minus intermediate consumption) arising from production of all goods and services sectors of the economy. It is the sum of value added of all industrial sectors.
4. For “**Expenditure**” approaches data sources include Household Income and Expenditure Survey (HIES), external trade statistics, balance of payment statistics, government accounts and related data from non-government organisations.
5. Under “**Income**” approach GDP can be measured as the sum of incomes paid out to the employees by the producers known as Compensation of Employees (CE), Mixed Income (MI) of the self-employed persons and Operating Surplus (OS) of the producers and the Consumption of Fixed Capital (CFC). The sum of all elements covering payments to the factors of production is also equal to gross value added at basic prices. If Indirect Taxes (IT) less subsidies on production and products are added, it would be equivalent to GDP in market prices. For lack of required data, BBS do not compile GDP by using this approach.
6. **Inflation** is a sustained increase in the general price level of goods and services in an economy over a period of time.

Publication schedule of production and expenditure based GDP estimates

7. **Production** and **Expenditure** based “Provisional Estimate of Annual GDP” are released with a time lag of about nine months after the reference year (i.e. in April / May of the current financial year). Annual GDP estimates along with other national accounts aggregates are also published in the Monthly Statistical Bulletin and other publications of BBS.

8. The final estimates are based on confirmed data and released within eight to nine months after the end of the financial year. The GDP estimates of Bangladesh are published as follows:

- i) **Provisional GDP Estimates** : Data mainly upto December of the fiscal year to be used for estimation and publication by April-May of the fiscal year.
- ii) **Final GDP Estimates** : By April-May of the following fiscal year.

Qualification of data and caveats on the use of provisional GDP estimates

GDP estimates by Production Approach:

9. Provisional GDP estimates based on production approach are subject to a number of qualifications due to non-availability of the required data. These qualifications are:

1. Agriculture and Forestry

- a. Crops and horticulture : Generally actual production figures of aus and jute are used. For other major crops (aman, boro and wheat) projected production figures are used. *Estimates made by the Ministry of Agriculture and Sample Crop Cutting by BBS are used to validate the estimates.* Minor crops are imputed at last year's levels and validated as and when necessary with the production estimates available from agriculture data of BBS and the most recent Household Income and Expenditure Survey (HIES).
- b. Animal farming : Extrapolated on the basis of inter-census growth rate obtained from Census of Agriculture, 1983-84, Census of Agriculture, 1996 and 2008.
- c. Forest and related services : Outputs projected on the basis of earlier years.

2. Fishing

Based on estimates/projection provided by DOF and validated on the basis of the most recent HIES data.

3. Mining and Quarrying

Administrative data of BCIC and Petrobangla are used for estimating most of the outputs.

4. Manufacturing

Actual growth plus extrapolation based on QIIP for medium and large industries and also QIIP for small industries are taken into consideration.

5. Power, Gas, Water

Based on targets, modified by actual production data up to December for gas and electricity of the fiscal year.

6. Construction

Based on the trend of imports of major construction inputs and domestic production data of related industries till December of the fiscal year.

7. Wholesale and Retail Trade

Growth rate reflecting trends of imports, agricultural and industrial production.

8. Hotels and Restaurants	Extrapolated on the basis of Report on Integrated Annual Survey of Non-farm Economic Activities and recent Hotel and Restaurant Survey.
9. Transport, Storage and Communication	Imputation of last year's figure and selective use of administrative data available up to December of the fiscal year. Also the budgetary data of government transport and communication agencies of the fiscal year are used.
10. Public Administration and Defence	Based on national budget allocations for the fiscal year.
11. Financial Intermediations	Projections based on last year data, bank deposit and credit up to December 2018.
12. Real Estate, Renting and Business Activities	Projections based on inter-census growth rate: Population Census, Labour Force Surveys, Household Income and Expenditure Survey (HIES) and estimates of housing stock and rental income.
13. Health and Social Work	Based on national budget allocations for the FY2019-20 for public sub-sector estimates. Projection and extrapolation growth rates of the major components used for private sub-sector estimates.
14. Education	Based on national budget allocations for the public sector. Projection and extrapolation of growth rates for private sub-sector.
15. Community, Social and Personal Services	Projection and extrapolation growth rates of major components.

Provisional estimates provide trends of economic performance. Provisional GDP estimates are usually subject to revisions because of subsequent data changes.

Expenditure based GDP estimates

Expenditure based provisional GDP estimates are relatively imprecise in nature because of weakness in the database used in calculation. The estimates are also subject to limitations of the methodologies used in estimating the components. Uncertainties in the actual expenditures during first quarter are likely to affect the volume of public sector investments. The basis of extrapolation of the private consumption expenditures and investments is also fragile. Owing to data limitations, no account is taken of the overall stock changes. Consumption of NPISH and acquisition net of disposal of valuables are assumed to be included in private consumption.

The provisional GDP estimates by expenditure category are compiled on the basis of the following data sources:

1. **General Government Final Consumption Expenditure:** Based on national budget allocation, government final consumption is extrapolated.
2. **Private Final Consumption Expenditure:** Extrapolation is done based on recent HIES data and also residual method is adopted for reconciliation.
3. **Gross Fixed Capital Formation:** Import of capital goods and domestic production of materials for capital goods like construction input upto December of the fiscal year is used.
4. **Net Exports:** Based on Balance of Payment (BOP) data and actual trends of imports and exports up to December of the fiscal year.
