

# **Role of BBS in Monitoring the Progress of SDGs in Bangladesh**

**Md. Alamgir Hossen**  
Deputy Director  
and  
Member-Secretary, SDG Cell  
Bangladesh Bureau of Statistics (BBS)

THE 2030 AGENDA FOR  
SUSTAINABLE DEVELOPMENT

# Background

Under supervision and guidance of Statistics and Informatics Division (SID), Bangladesh Bureau of Statistics (BBS), as the National Statistical Office (NSO), has completed a **rigorous exercise on Data Gaps for SDGs** monitoring and the first analytical report was published in April, 2016 based on the **targets**

# cont... Background

Based on the publication, General Economic Division (GED) has conducted workshops and rigorous consultation with most of the data generating relevant Ministries/Divisions and agencies including BBS and prepared a national data gap analysis

## cont... Background

- To fill the gap both 'data mining' and 'data generation' is important
- Data from **secondary source** is highly concerned with the **international standard and quality**
- SID and BBS has already established separate Cells named as '**SDG Cell**' for data mining and coordination of official statistics related to SDGs
- **Statistics Act, 2013** mandated BBS to generate official statistics and vetting of other official statistics by different Agencies
- For SDGs indicators, BBS is also liable for validation of data produced by other ministries/divisions/agencies
- The **frequency and disaggregation** of data generation has been considered to be increased

## Sources of Data

- **Data available in BBS – Official data**
- **Data available outside BBS – Administrative data**
- **Data not available (to be collected and developed)**

## Availability of data for monitoring SDGs indicators in Bangladesh

## Challenges: Data Support to SDGs

- Production of **disaggregated statistics** by age, sex, disability and sub-national level
- **Comparability of Data:** Harmonizing the concepts, definitions, methodologies etc. following international standards
- Availability of baseline data
- Conducting a large number of **new surveys**
- **Technical support availability** for regular monitoring
- Introduction of **modern technology** in collection of statistical data and quick dissemination

## Way Forward

- **Leading Role of BBS** in generation and validation of the official data as NSO
- **Conducting new surveys** identified for data generation
- **Developing partnership** with other national and international organizations
- Formulation of **Guidelines for Administrative Data** generation for SDGs indicators
- Implementation of **Statistics Act, 2013** and National Strategy for the Development of Statistics (**NSDS**)
