Preface

The Bangladesh Statistical Yearbook 2025 is a compilation of important socio-economic, demographic, labor and employment and environmental information that provides a comprehensive account of the trends, status and progress of Bangladesh. It is a regular publication of the Bangladesh Bureau of Statistics (BBS) and the current edition of this publication is the 45th of its kind. It presents both cross-sectional and time series data to facilitate comprehensive analysis. It gives an overview of the financial year 2024-25 as well as the calendar year 2025. It includes quantitative benchmark data on various areas that can be helpful to monitor implementation status of various national plans.

The publication consists of 15 chapters with the latest available data on general features and environment, area, population and households, labor and employment, agriculture, industry, energy, transportation and communication, foreign trade, banking and insurances, price and wages, national accounts, education, health and family planning, consumption, household income and expenditure.

One of the main limitations in timely preparation of this publication is that data produced by other agencies are not always available in time and in suitable form. For timely publication of this yearbook, we eagerly seek co-operation of all concerned agencies and stakeholders to ensure us required data in time.

My sincere thanks and gratitude go to the hon'ble Secretary, Statistics and Informatics Division, for his excellent guidance in bringing out this publication. I also would like to thank Director, National Accounting Wing, BBS and his colleagues for their painstaking effort in preparing the manuscript and presenting it in time. The member of the Editors' Forum of BBS and the Publication Scrutiny Committee of SID deserve special thanks for their technical integrity and efforts to improve this publication.

I hope, readers and users will find this publication a useful addition to their database.

Comments and suggestions would be highly appreciated.

BANGLADESH: An Overview

Historical Background

The history of Bangladesh is an eventful combination of turmoil and peace, as well as prosperity and hardship. It has thrived under the glow of cultural splendor and suffered under the ravages of war. The territory now constituting Bangladesh was under the Muslim rule over five and a half centuries, from 1201 to 1757 A.D. Then it was ruled by the British, after the defeat of the last sovereign ruler of Bengal, Nawab Siraj-ud-Daulah, at the Battle of Plassey on the fateful day of June 23, 1757. The British ruled over the entire Indian sub-continent, including this territory, for nearly 190 years from 1757 to 1947. During that period, Bangladesh was a part of the British Indian provinces of Bengal and Assam. With the termination of the British rule in August 1947, the sub-continent was partitioned into India and Pakistan. Bangladesh then became a part of Pakistan and was named as East Pakistan. It remained so for about 24 years, from August 14, 1947, to March 25, 1971. The Independence of Bangladesh from Pakistan was declared on 26 March 1971, which is celebrated as Independence Day. After a 9-month-long war of liberation, Bangladesh swept to victory on 16 December 1971, which is celebrated as Victory Day.

Geographical Location and Area

Bangladesh lies in the northeastern part of South Asia, between 20°34' and 26°38' north latitude and 88°00' and 92°04' east longitude. The country is bounded by India on the west-north and north-east while Myanmar on the south-east, and the Bay of Bengal on the south. The area of the country is 56,977 sq. miles or 147,570 sq. km. The limits of the territorial water area of Bangladesh are 12 nautical miles, and the area of the high seas extending to 200 nautical miles measured from the baselines constitutes the economic zone of the country. Bangladesh won in Arbitral Tribunal/PCA more than 118,813 square kilometers of waters comprising territorial sea, exclusive economic zone extending out to 200 NM across a sizable area, and also has undeniable sovereign rights in the seabed extending as far as 354 NM from the Chattogram coast in the Bay of Bengal with all the living and non-living resources. To achieve an equitable result, the tribunal awarded Bangladesh 19,467 sq. km of area out of a total disputed area of 25,602 sq. km (approx.).

Physiography

Except the hilly regions in the north-east, south-east and some areas of high land in the northern part, the country consists of plain and fertile land. A network of rivers exists in the country of which the Padma, the Jamuna, the Teesta, the Brahmaputra, the Surma, the Meghna and the Karnaphuli are prominent. All those rivers have 230 tributaries with a total length of about 24,140 kilometers. The alluvial soil is thus continuously being enriched by heavy silts deposited by rivers during the rainy season.

Flora and Fauna

According to available information from the Bangladesh Forest Department (BFD) the total forest land is 2,575,196 hectares, which is 17.45 percent of the total area of the country. The Sundarbans is the largest mangrove forest in the world. It lies in the southern part of the Ganges delta and spreads across the coastal areas of Bangladesh and West Bengal of India. The section of the Sundarbans that belongs to Bangladesh has been listed on the UNESCO World Heritage List. The Sundarbans is known for its wide range of flora and fauna. It is home to the world-famous 'Royal Bengal Tiger'. Numerous species of birds, spotted deers, crocodiles, and snakes also inhabit the area. The country produces timber, bamboo and cane. Bamboos grow in almost all areas, but quality timber grows mostly in the hilly regions of the country. Among the timber, sal, gamari, chaplish, telsur, jarul, teak, garjan and sundari are valuably important. Plantation of rubber in the hilly regions of the country was undertaken and extraction of rubber had already been started.

Climate

Bangladesh generally enjoys a sub-tropical monsoon climate. While there are six seasons in a year, three—namely Winter, Summer and Monsoon are prominent. Winter, which is quite pleasant, begins in November and ends in February. In winter, there is usually not much fluctuation in temperature, which ranges from a minimum of 7°C—13°C (45°F—55°F) to a maximum of 24°C—31°C (75°F—85°F). The maximum temperature recorded in the Summer is 37°C (98°F), although in some places it occasionally rises to 41°C (105°F) or more. Monsoon starts in June and stays up to October. This period accounts for 80% of the total rainfall. The average annual rainfall varies from 1429 to 4338 millimeters. The maximum rainfall is recorded in the coastal areas of Chattogram and northern part of Sylhet district, while the minimum is observed in the western and northern parts of the country.

Population

The Bangladesh Bureau of Statistics conducted the sixth Population and Housing Census in the country from 15 to 21 June 2022. According to the last census results, the population (adjusted) of the country stood at 169.83 million in 2022, comprising a male population of 84.08 million and a female population of 85.65 million. The average annual population growth rate was recorded at 1.22%. The population density, which stood at 976 persons per sq. km in 2011, increased to 1,119 persons per sq. km in 2022. The sex ratio of the population was 98.04 in 2022, compared with 100.3 in 2011. The total number of households reached 41,010,051, distributed as 27,820,341 in rural areas and 13,189,710 in urban areas.

Bangladesh Bureau of Statistics introduced the Sample Vital Registration System (SVRS) in 1980 to determine annual population changes during the inter-censal period. As reported in the SVRS, the estimated population of the country stood at 171.73 million as of 1 July 2022. Of this total, the male population was 84.74 million, and the female population was 86.99 million, yielding a sex ratio of 97.5. The natural growth rate of the population was 1.35%. The population density increased from 1,153 persons per sq. km in 2021 to 1,163 persons per sq. km in 2022.

According to the latest estimations from the Demography and Health Wing of the BBS, the country's estimated population stood at 174.81 million as of 31 December 2025.

<i>Labour Forces</i>	In 2024, the total labour force reached 71.71 million marking a decrease of 1.74 million compared to the Labour Force Survey 2023. This workforce included 69.11 million employed population and 2.6 million unemployed population based on the 13th ICLS methodology. Of those employed, 46.22 million were male and 22.87 million were female. The unemployment rate among population aged 15 and above rose to 3.66% in 2024, up from 3.35% in 2023. Male labour force participation rate stood at 79.96% while female participation rate was recorded at 38.4%. In terms of broad economic sectors, employment was highest in agriculture, engaging 30.87 million employed population (46%), followed by the service sector with 26.23 million (37%) and the industry sector employing 12.01 million (17%).
<i>Capital and other Cities</i>	Dhaka, formerly known as Dacca, is the capital and the largest metropolitan city of the country. The city is within the monsoon climate zone with an annual average temperature of 25°C (77°F) and monthly temperatures varying between 18°C (64°F) in January and 29°C (84°F) or more in August. Chattogram is the main seaport and the second-largest metropolitan city of Bangladesh, and has extensively developed port facilities for ocean-going steamers.
<i>Administrative Setup</i>	Bangladesh is governed by a Parliamentary form of Government. The President is the head of the State, while the Prime Minister is the head of the Government. According to the Constitution, the Prime Minister is appointed by the President based upon the result of the electorate's choice in the parliamentary general election. The Prime Minister is assisted by a council of ministers in discharging his/her duties. For the convenience of administration, the country is divided into eight administrative divisions; each is placed under a Divisional Commissioner. Each division is further sub-divided into zilas (Districts). After the administrative re-organization carried out in 1984, the country has been divided into 64 zilas. Each zila is further divided into a number of Upazilas (Sub-districts). The representatives of the government at the zila and upazila levels are the Deputy Commissioner (DC) and Upazila Nirbahi Officer (UNO), respectively.
<i>The legislature</i>	The constitution provides a Parliament for Bangladesh (to be known as the House of the Nation) in which legislative power of the Republic is vested. It consists of 300 members directly elected by adult franchise. The Members of House of the nation elect another 50 female members. Thus, the total number of members of the House is 350.
<i>The Judiciary</i>	The Supreme Court of Bangladesh is the highest judicial organ and comprises of the Appellate Division and the High Court Division. The Supreme Court of Bangladesh is headed by a Chief Justice. The Supreme Court serves as the guardian of the Constitution and enforces the fundamental rights of the citizens. The Appellate Division hears and determines appeals from judgments, decrees, orders or sentences of the High Court Division. At the district level, the district court is headed by a Sub Judge who is assisted by an Additional District Judge, subordinate judges, assistant judges and magistrates.
<i>Local Government</i>	The tiers of Local Government are (i) Union Parishad, (ii) Upazila Parishad and (iii) Zila Parishad. However, in the urban areas, there are two types of Local Government System—namely (i) Pourashava (Municipality) and (ii) City Corporation. The Local Government bodies are constituted by the representatives directly elected by the people.

Fundamental Foreign Policy of Bangladesh

The fundamental Foreign Policy of Bangladesh is- The state shall base its international relations on the principles of respect for national sovereignty and equality, non-interference in the internal affairs of other countries, peaceful settlements of international disputes and respect for international law on the principles enunciated in the United Nations Charters and on the basis of those principles shall –

- a) Strive for the renunciation of the use of force in international relations and for general and complete disarmament;
- b) Uphold the right of every people freely to determine and build up its own social, economic and political system by ways and means of its own free choice; and
- c) Support oppressed peoples throughout the world waging a just struggle against imperialism, colonialism or racialism.

Communication System (Update korte hbe)

The country has about 3,365 kilometers (as of 2023-24) of rail-way, 161,441 kilometers of paved road and roughly 6,000 kilometers of perennial and seasonal waterways. Side by side with development of road transport, efforts are under way to develop the water transport system. In fact, rivers are the life line of the nation, which provide the cheapest means of transport, water for agricultural operation and ensure supply of fish for people. Steps have been taken to put more mechanized boats into service and modernize the existing country boats.

Regarding air transport facilities, Dhaka is connected by air with Toronto, London, Bangkok, Abudhabi, Tokyo, Kuala Lumpur, Singapore, Karachi, Mumbai, Kolkata, Dubai, Jeddah, Kathmandu, Yangon, Kuwait, Rome and Bahrain by her national airline (Biman). A number of foreign airlines operate their international services with a link to Dhaka. Regular air services are operated by the Biman between Dhaka and other major towns in the country. The two sea ports of Bangladesh are situated in Chattogram and Mongla. Payra sea port is the 3rd sea port of Bangladesh located on the bank of Rabnabad Channel under Kalapara, Patuakhali. Among the river ports and terminals, Dhaka, Narayanganj, Chandpur, Barishal, Khulna, Aricha, Paturia, Goalando (Daulatdia), Bhairab Bazar, Noapara, Meghnaghat and the Cox's Bazar River ports are important.

The country has a network of radio and television broadcasting. There were two television stations in Dhaka and Chattogram under government management. Presently, 42 television channels are broadcasting under the government & private ownership. The television system was introduced on 25 December 1964, and since then, sub-stations have been set up in Sylhet, Khulna, Rangpur, Mymensingh, Natore, Noakhali, Satkhira, Cox's Bazar, Rangamati, Thakurgaon, Patuakhali, Brahmanbaria, Jhenaidah, Rajshahi etc. The Colour Television system was introduced on 1st December 1980. An extensive telecommunications system, driven largely by advanced mobile phone networks, has connected the capital city to all other regions of the country. International telecommunication lines have also been established to major cities around the world through satellite communication channels controlled by the earth's ground stations at Betunia in the Chattogram Hill-Tracts and Talibabad (Kaliakoir) in Gazipur Zila. Furthermore, grassroots community radio networks play a vital role in ensuring access to hyper-local information across rural communities. Ultimately, to support high-speed data communication, Bangladesh has been deeply linked to the global internet infrastructure through submarine cables in the Bay of Bengal.

Education and Culture

The education system of Bangladesh is divided into Primary (grades 1 to 5), Secondary (grades 6 to 10), Higher Secondary (grades 11 to 12), and Tertiary. In addition, there are some private institutions that provide English-medium education, offering 'O' level and 'A' level courses. The high allocation in the national budget for education demonstrates the strong commitment of the Government of Bangladesh to human resource development through education. Bangladesh also has a Madrasa education system, which emphasises religious studies.

Bangla is the mother tongue of Bangladesh. To establish Bangla as the mother language, Bangalees had to sacrifice their lives during the Pakistan period. A number of people embraced martyrdom on February 21, 1952, to establish Bangla as one of the state languages. In recognition of their supreme sacrifice, UNESCO declared 21st February as the "International Mother Language Day" throughout the world.

Bangladesh has a rich historical and cultural past, combining Dravidian, Indo-Aryan, Mongolian, Mughal, Arab, Persian, Turkish, and West European cultures. The land, the rivers, and the lives of the common people have combined to form a rich heritage. The culture of Bangladesh is composed of different forms, including music, dance and drama, arts and crafts, folklore and folktales, language and literature, philosophy and religion, festivals, and celebrations. Pohela Baishakh (Bengali New Year), Independence Day, Victory Day, National Mourning Day, Eid-ul-Fitr, Eid-ul-Azha, Muharram, Durga Puja, Shahid Dibash and International Mother Language Day, and Buddha Purnima are widely celebrated across the country.

Bangladeshis are great enthusiasts of sports and games. Football, handball, basketball, volleyball, table tennis, hockey, badminton, cricket, kabaddi (also known as Ha-Du-Du), swimming, boat racing, and lawn tennis are some of the most popular games in this country.

Agriculture and Main Crops

Bangladesh is mainly an agricultural country. Agriculture contributes about 11.71% (FY 2024-25) to the total Gross Domestic Product (GDP) of the country. According to the final report of the Labour Force Survey 2024, this sector accommodates around 44.67% of the total labour force. Due to natural calamities like floods, cyclones, droughts, etc., loss of production in both food and cash crops is almost a regular phenomenon. Yet in recent years, there has been a substantial increase in food grain production. Agricultural holdings in Bangladesh are generally small, but the use of modern machinery and equipment is gradually increasing. Rice, jute, sugarcane, potatoes, vegetables, wheat, tea and maize are the principal crops of Bangladesh. Crop diversification programmes, credit supply, extension work, research and input distribution policies pursued by the government are yielding positive results. The country is now on the threshold of attaining self-sufficiency in food grain production.

Fish Wealth

Bangladesh is rich in fish wealth. In the innumerable rivers, canals, tanks, and other low-lying and depressed areas and paddy fields that remain under water for about 6 months in a year and cover nearly 12 million acres, tropical fish of hundreds of varieties are cultivated. Rice and fish constitute an average Bangladeshi's principal diet. Hilsa, lobsters and shrimps are some of the fish varieties that are exported to foreign countries. Having the Bay of Bengal in the south, Bangladesh enjoys a geographic advantage for marine fishing.

Mineral Resources and Energy

Bangladesh has a few proven mineral resources. The country has enormous deposits of natural gas. As of December 2022, 28 gas fields have been discovered from which natural gas is available for power-generation, industrial and other uses. Fertilizer factories that are operating in the country, including the petro-chemical complex at Ashuganj use a sizeable quantity of natural gas.

Coal deposits have been found in Bangladesh and mining activity is going on with international assistance. Electricity is produced by both thermal and hydro-electric processes. The total generation of electricity amounted to 101,187 million kilowatt-hours in 2024-25. The solitary hydro-electric project having installed capacity of producing 230 MW electricity is located at Kaptai in the Chattogram Hill Tracts. Limestone, the basic raw material for the production of cement, has been found in some places in the country, and cement factories are being set up for its utilization. Other minerals found include hardrock, lignite, silica sand, white clay, etc. Salt is manufactured on a small scale at several thousand evaporation sites in the coastal areas of Chattogram and Cox's Bazar.

Extensive radio-active sand deposits have been found all along the beaches from Kutubdia to Teknaf. A survey estimates the reserve to be of the order of 0.5 million tons of sand containing a significant amount of usable heavy minerals.

Industries

Although Bangladesh is predominantly an agricultural country, a large number of large-scale industries based on both indigenous and imported raw materials have been set up. Among them, ready-made garments, cotton textile, pharmaceuticals, fertilizer, wood product, iron and steel, ceramic, cement, leather products, plastic products and chemical are important ones. Other notable industries are engineering and ship building, oil refinery, paints, colours and varnishes, electric cables and wires, electric lamps, fluorescent bulbs, other electrical goods and accessories, matches, cigarettes etc. Among the cottage industries, handlooms, carpet-making, shoe-making, coir, bamboo and cane products, earthenware, brass and bell metal products, bidi and cheroots, small tools and implements, ornaments, etc. are important.

The manufacturing sector contributes about 23.00% (as of 2024-25) of the total GDP. The industry that has been making crucial contribution to the economy is none other than the readymade garment (RMG) industry which is now the single biggest export earner for Bangladesh. Bangladesh holds the second position in ready-made garments exports and majority export goes to the European Union and the USA. In 2024-25 the export earnings from RMG sector were 39,346.97 million USD which accounts for 81.49% of total export earnings of the country.

Finance, Banking and Insurance

Bangladesh has a mixed banking system comprising nationalized, private and foreign commercial banks. Bangladesh Bank is the central bank of the country and is entrusted with the responsibilities of formulating monetary policies of the Government and of controlling all commercial banks. The GrameenBank is a core microfinance organization and also community development bank in Bangladesh providing small loans (known as microcredit) to impoverished people without requiring collateral. The system is based on the idea that the poor have skills that are under-utilized but do not have the capacity to take loan from conventional banks by providing collateral. The bank also accepts deposits, provides other services, and runs several development-oriented businesses including fabric, telephone and energy companies.

In recent years, the banking system has been greatly changed. In light of the avowed Government policy of encouraging the private sector to play its due role in economic development of the country. The Government has allowed setting up of commercial and investment banks in the private sector. In response to this encouraging Government policy, quite a number of commercial and investment banks including some Islamic banks have been set up in the private sector.

There are other specialized financial institutions—namely, the Bangladesh House Building Finance Corporation (BHBFC), Bangladesh Krishi Bank (BKB), Bangladesh Development Bank PLC (BDBL), and Co-operative Banks—operating in their respective fields to facilitate these sectors by providing credit and tailored financial services on convenient terms. Additionally, the Government has established specialized structural frameworks to provide equity support to public limited companies in the private sector. Complementing these capital mechanisms, the Government has institutionalised the Bangladesh Investment Development Authority (BIDA), the Bangladesh Economic Zones Authority (BEZA), and the Bangladesh Export Processing Zones Authority (BEPZA) to systematically streamline foreign and domestic investments, develop modern industrial infrastructure, and accelerate private sector growth.

In the field of insurance, the Government has allowed both public and private sectors to operate life as well as non-life insurance businesses in order to develop strong competition. In the public sector, there are Jiban Bima Corporation for life insurance and Sadharan Bima Corporation for general insurance. In the private sector, eighty (80) fully registered companies are currently engaged in the life and general insurance business under the regulatory supervision of the Insurance Development and Regulatory Authority (IDRA).

*Tourists’
attractions*

Bangladesh is a large delta laden with bounties of nature. The borderland along the north-east, east and the south-east is evergreen forested hills with wondrous wildlife. All her six seasons vibrate with fairs and festivals, mirth and merriment.

Though Bangladesh is one of the world’s smallest countries, it has the world’s longest unbroken sandy sea-beach along the Bay of Bengal at Cox’s Bazar, The Sundarbans, (the largest mangrove forest), the home of the Royal Bengal Tiger and the spotted deer, it is recognized as the part of world heritage by UNESCO for being the diffuse home of flora and fauna. Dhaka-the capital known as the city of mosques, Rangamati-the heart of the panoramic lake district, Sylhet-land of holy shrines of great religious saints and of fascinating hills and tea gardens, Chattogram-the largest port city and the Commercial Capital of the country known as the city of holy shrines, Mainamati, Mahasthangarh and Paharpur archaeological treasures in the country over the period from 300 BC to 1200 AD. Saint Martin’s, a beautiful coral island about 10 km south-west of the southern tip of the mainland is a tropical slime with beaches fringed with coconut plants and beautiful marine life are one of the most attractions in the country. Besides these, Kuakata’s long, wide, unique beach in Patuakhali and Foy’s Lake, a man-made lake in Chattogram, set amidst picturesque surroundings, are prominent natural attractions. Above all riverine beauty, colourful tribal life and simple village life of the friendly millions are the main motivational factors for potential visitors.

Bangladesh has a variety of attractions for visitors, tourists and holidaymakers including archaeological sites, historical mosques and monuments, resorts, beaches, anthropological communities, forests, flora and fauna.

The Government of Bangladesh recognized tourism as an industry and declared a National Tourism Policy for the development of domestic and international tourism in Bangladesh. Bangladesh Parjatan Corporation, the national tourism organisation, is playing the leading role as promoter of the industry.

Empowerment of Women

The term empowerment denotes a structural process through which women in general gain control over resources and decision-making processes. Women's empowerment in Bangladesh is making steady progress alongside the country's overall development. According to the Bangladesh Bureau of Statistics (BBS) Labour Force Survey 2024, the national female labour force participation rate has risen to 38.40% under the 13th ICLS framework, showing that more women are joining the workforce across major sectors. However, there is a clear gap between rural and urban areas: female participation is 45.34% in rural areas, compared to 22.52% in urban areas.

Furthermore, the BBS Time-Use Survey 2021 shows significant differences in household responsibilities. On average, women spend 5.9 hours per day on unpaid domestic and care work, while men spend 0.8 hours each day. On safety and well-being indicators, the results of the Violence Against Women (VAW) Survey 2024 show measurable improvement. Specifically, the rate of intimate partner violence (IPV) over the past year dropped from 54.7% in 2015 to 48.7% in 2024.

Despite this progress, challenges remain, as 75.9% of ever-married women have experienced some form of violence during their lifetime. Reducing the gap in formal employment and encouraging a balanced division of household work remain key priorities for achieving full gender equality.

Education Policy

The government has adopted the National Education Policy, 2010, in alignment with the constitutional provisions. This policy functions as a strategic roadmap to transform the country into a citizen-friendly society, governed by a well-planned education system focused on social welfare. The policy aims to enhance intellectual capability, foster a strong work ethic, and develop social skills, while instilling moral, human, cultural, scientific, and social values at both personal and national levels.

The main characteristics of the education policy are to develop a humane, rational, principled, self-respecting, non-superstitious, tolerant, non-sectarian, patriotic, and hardworking citizen capable of leading the nation forward toward people-oriented development and progress.

Energy Policy/Plan

The Power System Master Plan (PSMP 2016) was aimed at assisting Bangladesh in formulating an extensive energy and power development plan, covering energy balance, power balance, and tariff strategies. Five goals were set in PSMP 2016: 1) Enhancement of imported energy infrastructure and its flexible operation; 2) Efficient development and utilization of domestic natural resources (gas and coal); 3) Construction of a robust, high-quality power network; 4) Maximization of green energy and promotion of its introduction; and 5) Improvement of human resources and mechanisms related to the stable supply of energy. Bangladesh also formulated an Energy Efficiency and Conservation Master Plan (EECMP). A newly planned

Integrated Energy and Power Master Plan (IEPMP) was subsequently introduced in 2023. As part of its energy policy, along with coal-based thermal power generation, a nuclear power generation initiative has been taken by Bangladesh to reduce dependency on natural gas. Concurrently, renewable energy is being heavily emphasized. Driving this overall clean energy transition is the two-unit Rooppur Nuclear Power Plant project, located 140 kilometers west of Dhaka, which is designed to deliver 2,400 MW of zero-emission baseload capacity to the national grid. Concurrently, the deployment of utility-scale solar and wind energy projects continues to be emphasized nationwide to meet statutory clean energy targets.

Chapter 1

LAND AND ENVIRONMENT

1.01 Characteristics of General Soil Types

General Soil Types	Division/District of important occurrence	Characteristics
Floodplain Soils		
01. Non-calcareous Alluvium	Chattogram: Brahmanbaria, Chandpur, Chattogram, Cumilla, Rangamati, Khagrachhari & Bandarban Hill districts, Cox's Bazar. Sylhet: Habiganj, Moulvibazar, Sunamganj & Sylhet. Dhaka: Dhaka, Jamalpur, Kishoreganj, Manikganj, Mymensingh, Narayanganj, Narsingdi, Netrokona, Sherpur & Tangail. Rajshahi: Bogura, Dinajpur, Gaibandha, Kurigram, Lalmonirhat, Naogaon, Nilphamari, Pabna, Panchagarh, Rangpur & Sirajganj. Barishal: Barishal, Bhola, Pirojpur, Patuakhali & Barguna.	Raw sandy and salty alluvial deposits, usually stratified either from the surface or below the cultivated topsoil in the active floodplain areas (young char lands) or massive in the older flood plain areas. Brahmaputra and Teesta alluvia are rich in mica and biotite, alluvia of other rivers are less micaceous. These are neutral to alkaline in reaction and are saline in the coastal tidal areas.
02. Calcareous Alluvium	Chattogram: Chandpur, Chattogram, Cox's Bazar, Feni, Lakshmipur & Noakhali. Dhaka: Dhaka, Faridpur, Gopalganj Madaripur, Manikganj, Munshiganj, Rajbari & Sariatpur. Khulna: Bagerhat, Khulna, Kushtia, Magura, Narail & Satkhira. Rajshahi: Chapai Nawabganj, Natore, Pabna & Rajshahi.	Calcareous Alluvium is similar in characteristics to the Non-Calcareous Alluvium in addition, these are slightly to moderately calcareous due to presence of calcities derived mostly from the Gangetic sources. St. Martins Island has sands mixed with calcareous coral debris. These are saline in the coastal tidal areas.
03. Acid Sulphate soil	Chattogram: Cox's Bazar. Khulna: Bagerhat, Khulna & Satkhira.	Grey or dark grey clayey soils with yellow patches of jarosite developed in tidal deposit areas, once covered by mangrove vegetation, lying adjoining to Khulna Sundarbans in the Ganges tidal floodplain and the Chakaria Sundarbans in the coastal tidal floodplain of Cox's Bazar District. These become extreme acidic and toxic when dried/drained. These are also saline to variable degrees.
04. Peat	Barishal: Barishal & Pirojpur. Sylhet: Habiganj, Moulvibazar & Sylhet. Dhaka: Gopalganj, Madaripur & Netrokona. Khulna: Bagerhat, Jashore, Khulna & Narail.	Highly organic dark coloured soils developed under submerged conditions mainly in the Gopalganj-Khulna basin areas and locally in Hakaluki Haor and other smaller waterlogged beels and valleys. If it is drained and allowed to dry out peat shrinks irreversibly, and causes cracking and subsidence of the ground surface.

General Soil Types	Division/District of important occurrence	Characteristics
05. Non-calcareous Grey Floodplain Soils	Barishal: Barguna, Barishal, Jhalokathi, Patuakhali & Pirojpur. Chattogram: Brahmanbaria, Chandpur, Chattogram, Cumilla, Cox's Bazar, Feni, Khagrachhari, Lakshmipur, Noakhali. Sylhet: Habiganj, Moulvibazar, Sunamganj & Sylhet. Dhaka: Dhaka, Gazipur, Jamalpur, Kishoreganj, Manikganj, Munshiganj, Mymensingh, Narayanganj, Narsingdi, Netrakona, Sherpur & Tangail. Khulna: Bagerhat. Rajshahi: Bogura, Dinajpur, Gaibandha, Kurigram, Joypurhat, Lalmonirhat, Naogaon, Nilphamari, Panchagarh, Rangpur, Sirajganj & Thakurgaon	Prismatic and/or blocky structured predominantly grey sandy loams to silty clay loams on young floodplain ridges and silty clay loams to clays in basins, slightly acid to neutral. These become saline in dry season in the coastal tidal areas.
06. Calcareous Grey Floodplain Soils	Chattogram: Chandpur, Chattogram, Feni, Lakshmipur & Noakhali. Barishal: Barishal, Barguna, Bhola, Patuakhali & Pirojpur. Khulna: Bagerhat, Khulna, Narail & Satkhira.	Structured, grey silt loams to silty clays, calcareous from the surface or at shallow depths, developed from Ganges alluvium. These become saline in the dry season in the coastal tidal areas.
07. Grey Piedmont Soils	Chattogram: Brahmanbaria, Chattogram, Rangamati, Khagrachhari & Bandarban Hill districts, Cumilla, Cox's Bazar, Feni. Dhaka: Mymensingh, Netrakona & Sherpur. Sylhet: Habiganj, Moulvibazar, Sunamganj & Sylhet	Structured, grey sandy loams to clays, strongly acid, developed in piedmont outwash in the piedmont aprons and valleys in areas adjoining or within the north-eastern hilly region. These soils are often affected by flash floods from the hills and liable to burial by fresh sandy deposits.
08. Acid Basin Clays	Chattogram: Brahmanbaria & Cumilla, Dhaka: Dhaka, Gazipur, Jamalpur, Kishoreganj, Mymensingh, Narsingdi, Netrakona, Sherpur & Tangail. Rajshahi: Bogura, Chapai Nawabganj, Naogaon, Natore, Pabna, Rajshahi & Sirajganj. Sylhet: Habiganj, Moulvibazar, Sunamganj & Sylhet	Very strongly acid, grey to dark grey heavy plastic clays mainly occurring in the Sylhet Haor and Chalan Beel areas and in deep valleys of the Madhupur Tract. These are usually seasonally deeply flooded and have heavy consistence.
09. Non-calcareous Dark Grey Floodplain Soils	Barishal: Barishal, Patuakhali & Pirojpur, Chattogram: Brahmanbaria, Chandpur, Cumilla, Feni, Lakshmipur, Noakhali Dhaka: Dhaka, Faridpur, Gazipur, Gopalganj, Jamalpur, Kishoreganj, Madaripur, Manikganj, Munshiganj, Mymensingh, Narayanganj, Narsingdi, Netrakona, Sariatpur, Sherpur & Tangail. Khulna: Bagerhat, Chuadanga, Jashore, Jhenaidah, Khulna, Kushtia, Magura, Meherpur, Narail & Satkhira. Rajshahi : Bogura, Dinajpur, Gaibandha, Kurigram, Naogaon, Natore, Nilphamari, Pabna, Panchagarh, Rajshahi, Rangpur, Sirajganj & Thakurgaon. Sylhet: Habiganj, Moulvibazar, Sunamganj & Sylhet.	Structured dark grey loamy soils on old flood plain ridges and clay in basins. Slightly acid to somewhat alkaline in reaction. The basin clays have heavy consistence.

10. Calcareous Dark Grey Floodplain Soils	Dhaka: Dhaka, Faridpur, Gopalganj, Madaripur, Manikganj, Munshiganj, Rajbari & Sariatpur. Khulna: Bagerhat, Chuadanga, Jhenaidah, Khulna, Kushtia, Magura, Meherpur, Narail & Satkhira. Barishal: Barishal, Jhalokati & Pirojpur. Rajshahi: Chapai Nawabganj, Natore, Pabna, Rajshahi & Naogaon	Structured dark grey silty clay loams to heavy clays occurring in basins and on low ridges of the old Ganges river floodplain and locally in the Ganges tidal floodplain and old Meghna estuarine flood plain. Soils are calcareous within a depth of 1.2m below the surface. Clays are highly cracking when dry, drought prone and have heavy consistence. These become saline in the day season in the Tidal floodplain.
11. Calcareous Brown Floodplain Soils	Chattogram: Chandpur, Feni, Lakshmipur & Noakhali. Dhaka: Dhaka, Faridpur, Gopalganj, Madaripur, Manikganj, Munshiganj, Rajbari & Sariatpur. Khulna: Bagerhat, Chuadanga, Jhenaidah, Khulna, Kushtia, Magura, Meherpur, Narail & Satkhira. Rajshahi: Chapai Nawabganj, Natore, Pabna, Rajshahi & Noagaon	Calcareous, brown silt loams to light silty clays, occurring in the Ganges river floodplain and locally in the young and old Meghna estuarine flood plains. Locally these are leached of lime up to a depth of 1 m from the surface.
12. Non-calcareous Brown Floodplain Soils	Chattogram: Chattogram, Rangamati, Khagrachhari & Bandarban Hill districts Dhaka: Jamalpur, Narsingdi, Mymensingh, Netrakona & Sherpur, Khulna: Chuadanga, Jhenaidah, Jashore & Satkhira. Rajshahi: Bogura, Chapai Nawabganj, Dinajpur, Gaibandha, Kurigram, Lalmonirhat, Nilphamari, Panchagarh, Rangpur & Thakurgaon.	Non-calcareous brown sandy loams to clay loams occurring in the old Himalayan piedmont plain, Tista and old Brahmaputra floodplains and locally in the old Ganges river floodplain. Soils are slightly to strongly acid in reaction.
13. Brown Piedmont Soils	Chattogram: Bandarban, Chattogram, Cox's Bazar & Khagrachhari. Sylhet: Habiganj, Moulavibazar & Sylhet. Dhaka: Mymensingh, Netrakona & Sherpur.	Brown sandy loams to clay loams occurring in the higher sites of valleys and piedmont plains in and around the north-eastern hill areas. Soils are very strongly acidic.
14. Black Terai Soils	Rajshahi: Dinajpur, Panchagarh & Thakurgaon.	Very dark grey to black sandy loams to clay loams occupying low floodplain ridges and depressions mainly in the northern part of the old Himalayan piedmont plain. Top soils are strongly to very strongly acidic but the sub soils are slightly acidic in reaction.
Hill Soils		
15. Brown Hill Soils	Chattogram: Bandarban, Cumilla, Chattogram, Rangamati, Khagrachhari & Bandarban Hill districts, Cox's Bazar & Feni. Dhaka: Mymensingh, Netrakona & Sherpur. Sylhet: Habiganj, Moulavibazar, Sunamganj & Sylhet.	Brown sandy loams to clay loams, slightly to strongly acid, sometimes shallow over shaley/sandstone bedrocks on very steep high hills

General Soil Types	Division/District of important occurrence	Characteristics
<u>Terrace Soils</u>		
16. Shallow Red-Brown Terrace Soils	Dhaka: Dhaka, Gazipur, Jamalpur, Mymensingh & Tangail. Rajshahi: Naogaon.	Brown or red brown, usually strongly acid, structured, friable to firm clay loams to clays intergrading into a greyer, compact Madhupur clay substratum within a metre below the surface. These mainly occur on the narrow terraces of the Madhupur Tract and locally in the dissected Barind Tract.
17. Deep Red-Brown Terrace Soils	Chattogram: Brahmanbaria Dhaka: Dhaka, Gazipur, Jamalpur, Mymensingh, Narsingdi & Tangail. Rajshahi: Bogura, Dinajpur, Gaibandha & Rangpur.	Brown to red, slightly to strongly acid, finely structured, friable clay loams to clays, gradually intergrading into a mixed red, black and pale brown, friable, weathered Madhupur clay substratum to a deeper depth. These occur extensively on the edges of broad level terraces in the Madhupur Tract and locally in the north- eastern edge of the Barind Tract.
18. Brown Mottled Terrace Soils	Dhaka: Dhaka, Gazipur, Jamalpur, Mymensingh & Tangail. Rajshahi: Bogura, Dinajpur, Gaibandha, Joypurhat, Naogaon & Rangpur.	Brown mottled with specks of grey, pale brown and red, slightly acid, structured, friable clay loams to clays intergrading into a mixed red black and pale brown, rather friable and weathered Madhupur Clay substratum. These occur in the middle parts of the broadly dissected level terraces of the Madhupur Tract and locally on the edges of the Barind Tract.
19. Shallow Grey Terrace Soils	Dhaka: Dhaka, Gazipur, Jamalpur, Mymensingh & Tangail. Rajshahi: Bogura, Chapainawabganj, Dinajpur, Joypurhat, Naogaon, Rajshahi, Rangpur & Sirajganj.	Whitish grey slightly to strongly acid, friable, somewhat porous silt loams to silty clays intergrading into a weakly mottled grey, compact and little altered Madhupur clay substratum at a shallow depth. These occur extensively in the level Barind Tract and locally on the flat areas of the narrow terraces of the Madhupur Tract.
20. Deep Grey Terrace Soils (including Grey Valley Soils)	Dhaka: Dhaka, Gazipur, Jamalpur, Mymensingh & Tangail. Rajshahi: Bogura, Chapai Nawabganj, Dinajpur, Gaibandha, Joypurhat, Naogaon, Rajshahi & Rangpur.	Whitish grey, speckled with brown or red mottles, slightly to strongly acid, friable and highly porous silt loams to silty clay loams, usually grading into a strongly mottled red and grey, rather friable and permeable Madhupur clay at a deeper depth. These occur extensively in the western parts of Barind Tract and also, in smaller extent in the interiors of broad level terrace of the Madhupur Tract and in shallow valleys in both areas.

CHAPTER 15

NOTES ON DATA AND THEIR SOURCES AND OTHERS

Chapter 1

General Features and Environment

The main objectives of this chapter are to provide a broad idea of the historical emergence of the nation as well as the location, physiography, climatic conditions, and major socio-economic features of the country.

Data on the characteristics of general soil types among divisions and district-wise distribution of agricultural lands by types, have been collected from Soil Resources Development Institute. Data on forest area by regions are from the administrative records at the office of the Chief Conservator of Forests, govt. of the People's Republic of Bangladesh.

Hydrological data like- river system in Bangladesh, main rivers according to length, area of major standing water bodies, the flow of major rivers, water level of major rivers, static water, and in-stream storage potential, tidal variation and highest salinity, etc. are presented in this chapter are collected from administrative records of SRDI, WAPDA, MPO, SPARRSO & BWDB.

Data on the loss of human lives and properties in recent major cyclones and tidal surges are compiled from the administrative records of the Bangladesh Meteorological Department which have been presented in this chapter.

Data on annual rainfall, monthly temperature, humidity, rainfall, maximum and minimum temperature are presented here from the records of the Bangladesh Meteorological Department.

Chapter 2

Area, Population, Household and Housing Characteristics District

In this chapter, attempts to provide information on administrative units in Bangladesh like households, and population by district, upazila, and municipality, intercensal growth of population, age-sex distribution, marital status of the population, population by religion, youth population, tribal population, birth and death rates, mortality, life expectancy and population of major cities. Information on households regarding the source of drinking water, toilet facilities, and electricity connections has also been provided in this chapter.

Sources of data

The main data sources are Population and Housing Census, those are reported in the year of 1961, 1974, 1981, 1991, 2001, 2011 & 2022 and reports of the Sample Vital Registration System (SVRS) of BBS.

The Sample Vital Registration System (SVRS) was introduced by the Bangladesh Bureau of Statistics (BBS) in 1980 to determine the annual socio-demographic changes in population during the intercensal period. Initially, 103 Primary Sampling Units (PSUs) were selected, and each PSU consisted of about 250 continuous households. Out of 103 PSUs, 62 PSUs were from rural areas and 41 PSUs were from urban areas. With this sample size, it was possible to produce estimates at the national level with an urban-rural break-up. Based on the technical committee's recommendation and to meet the data needs of the planners, policymakers, and other users, the sample PSUs were increased to 210 PSUs in 1983, consisting of 150 from rural and 60 from urban areas. This could provide estimates at the division levels with an urban-rural break-up in 1991. To meet the users' demand for district estimates, the number of PSUs was again increased to 500 in 1995. With the availability of a sampling frame from the Population and Housing Census 2001, the sample design was recast. An Integrated Multipurpose Sample Design (IMPS) was introduced effective from July 2002, and the number of PSUs increased to 1000 to provide the estimates of vital events at the district level. The number of PSUs was increased from 1000 to 1500 under the IMPS design based on the Population Census 2011. Data collection from 1500 PSUs was started in July 2013, till 2014. From 2015 to December 2023, the upgraded number of PSUs was 2012. After the 6th Population and Housing Census 2022, the IMPS has been designed. Since January 2024, SVRS data have been collected from 2,766 PSUs.

Transition in Data Collection Method

From 1980 to 2021, SVRS followed the Chandra Sekar-Deming dual recording method, which was manual and paper-based. Until December 2021, the data for this surveillance were collected manually using a paper-and-pencil-based interview. However, in a paradigm shift towards modernization, 2022 marked the transition to a single recording system (System-II), combined with a validation survey for better accuracy. Since January 2022, annual schedules have been collected using the Computer Assisted Personal Interviewing (CAPI) method. Since then, the data collection program has been introduced following the Single Recording System.

SVRS operates through a five-tier coordinated monitoring system to ensure data integrity and effective supervision through 2,766 local female registrars (LRs) at PSU Level; 610 supervisors at Upazila Level; 64 supervising officers at District Level; 8 divisional coordinators at Division Level; and 20 officials overseeing the system at Headquarters Level from SVRS Team. To ensure high-quality data collection and field supervision, SVRS uses both online and offline monitoring systems, which are managed centrally from the SVRS Monitoring and Control Room. Quality control measures include Geo-fencing for defined survey boundaries, audio recordings of interviews following consent taking for rechecking, photographs of households and selfies of LRs and GPS tracking with timestamps to verify visit times. Right now, the SVRS questionnaire has 11 modules. Those are- Household, Individual, In-migration, Out-migration, Marriage, Divorce, Birth, Death, Pregnancy Register, Contraceptive and Disability Module.

Sample Selection

The IMPS has been developed based on the Population and Housing Census 2022 frame for the collection of data in the SVRS. A single-stage stratified cluster sampling methodology was adopted for the selection of the SVRS sample EAs. Administrative districts of the country are regarded as the domain of the study. These domains were divided into two residential categories, viz., rural and urban. A total of 809 urban EAs and 1957 rural EAs are selected from the entire sample area comprising 2766 PSUs. The average size of the PSUs is 130 households.

Definitions on Fertility and Mortality

FERTILITY

Sex-Ratio

The ratio of males to females in a given population is usually expressed as the number of males per 100 females.

Child-Women Ratio (CWR)

The number of children under 5 years of age per 1,000 women of childbearing age (between ages 15 to 49) in a given year. It is a rough fertility indicator based on census data. It is sometimes used when no adequate data on births are available.

Crude Birth Rate (CBR)

The number of live births per 1000 mid-year population in a given year.

Age-Specific Fertility Rate (ASFR)

Number of live births to women in a given age group per 1,000 women in the same age group in a given year. It is usually calculated for 5-year age groups from 10-14 to 45-49 or 15-19 to 45-49.

Total Fertility Rate (TFR)

The average number of children that would be born alive to a woman (or group of women) during her reproductive period if she were to live through all her childbearing years (15-49 years) and bear children according to the age-specific fertility rates of a given year.

Gross Reproduction Rate (GRR)

The average number of daughters that would be born alive to a woman (or a group of women) during her lifetime if she passed through her child-bearing years conforming to the age-specific fertility rates of a given year.

Net Reproduction Rate (NRR)

The average number of daughters that would be born to a woman if she passed through her lifetime from birth, conforming to the age-specific fertility and mortality rates of a given year. This rate is similar to the Gross Reproduction Rate and takes into account that some women will die before completing their childbearing years. NRR 1.00 means each generation of mothers is having exactly enough daughters to replace itself in the population.

MORTALITY

Crude Death Rate (CDR)

The number of deaths per 1000 mid-year population in a given year.

Child Death Rate (ChDR)

The child death rate is defined as the number of deaths among children aged 1-4 per 1000 mid-year population in the same group.

Infant Mortality Rate (IMR)

The number of deaths of infants under one year of age per 1000 live births in a given year.

Life Expectancy at Birth

The average number of additional years a person would live at birth if current mortality trends were to continue.

NATURAL GROWTH RATE (NGR)

The natural growth rate is the difference between the Crude Birth Rate (CBR) and the Crude Death Rate (CDR) expressed as a percentage.

Chapter 3 Labour Forces

In 2024, the total labour force reached 71.71 million marking a decrease of 1.74 million compared to the Labour Force Survey 2023. This workforce included 69.11 million employed populations and 2.6 million unemployed population based on the 13th ICLS methodology. Of those employed, 46.22 million were male and 22.87 million were female.

The unemployment rate among population aged 15 and above rose to 3.66% in 2024, up from 3.35% in 2023. Male labour force participation rate stood at 79.96% while female participation rate was recorded at 38.4%. In terms of broad economic sectors, employment was highest in agriculture, engaging 30.87 million employed population (46%), followed by the service sector with 26.23 million (37%) and the industry sector employing 12.01 million (17%).

Chapter 4 Agriculture: Crops, Livestock, Forestry and Fishery

This chapter concerns with data on agriculture. Broad agriculture sector comprises of agriculture, forestry and fishing. Agriculture, forestry and fishing sector is divided into 4 sub-sectors: i) Crops and Horticulture, ii) Animal Farming, iii) Forest and Related Services, iv) Fishing. The value-added originating in each branch of the activities is equivalent to the value of gross output minus the value of current inputs used for producing that output. For example, in crop sub-sector the value of gross output is obtained by multiplying the quantity of the output of each crop by homestead prices. The value of inputs such as seed, fertilizer, pesticides etc. is also worked out by the same method (i.e. the quantity used times their respective purchase cost/price) and subtracted from the value of gross output of crops to end up with value added which is equivalent to the sum of compensation of employees and gross operating surplus originating in agricultural

crops sub-sector. The value added defined as such, is also estimated for other sub-sectors like, animal farming, forest and related services and also for fishing sector.

Gross value added at current and constant prices is shown in table no. 4.02 and 4.03. Gross value added from Agriculture at constant prices is shown in table 4.10 to 4.13.

Chapter 5 Industry

This chapter focuses on the present position and trend of industry sector in Bangladesh. It includes the Index of Industrial Production (IIP) and Producer Price Index (PPI) and presents the statistical series data of the industry. The index of industrial production comprises of three sub-sectors of industry namely (i) manufacturing, (ii) mining and quarrying and (iii) electricity. Quantities underlying these series are important indicators to indicate the growth of industrial sector of the country. The base year of both indices is 2015-16.

The index of industrial production has been compiled by three categories considering the Total Person Engaged (TPE) in the establishment for the revision, review and rebase of the base year 2015-16.

1. IIP- Large scale (TPE: 250 and above)
2. IIP- Small, Medium and Micro (SMMI) scale (TPE: 10-249)
3. IIP- Cottage scale (TPE: 1-9)

The weight for IIP-Large scale and IIP-SMMI is derived from the Gross Value Added (GVA) using updated Survey of Manufacturing Industries (SMI) 2019 and the weight for IIP-Cottage is derived from the Gross Value-Added using Cottage Industry Survey 2011 at 4-digit class level. Each class of industry has a weight equal to its relative contribution to the total gross value added of production.

IIP is a weighted average of the relative changes in the quantities of a specified set of goods and services over time. PPI is also a weighted average of the relative changes in the prices of a specified set of goods and services over time. The weights of fixed base period are used for the indices and the Laspeyre's formula has been used for the compilation of IIP.

All sub-sectors (manufacturing, mining & quarrying and electricity) included in the Index of Industrial Production has been shown in the table no. 5.01. The table no. 5.02, 5.03, 5.04 show the Index on Large Scale, Index on SMME Scale, Index on Cottage Industries subsequently at 4-digit class level following ISIC Rev. 4. The table no. 5.05 shows

Price Index on domestically produced industrial goods at 4-digit class level.

Chapter 6

Energy

This chapter presents an integrated database on energy statistics in the country against the financial year. The data in the publication is sourced from different concerned Ministries/Department of the government. Energy data are collected from the source agencies as like Bangladesh Power Development Board (BPDB), Bangladesh Petroleum Corporation (BPC), National Board of Revenue (NBR), Bangladesh Rural Electrification Board (BREB), Bangladesh Oil, Gas and Mineral Corporation (Petrobangla) annually and national figures are compiled.

Energy data covers all the energy commodity by type of fuels and energy sources. Data are provided in original units for the different types of coal, crude oil, natural gas, Petroleum products, coal and electricity. Energy Statistics broadly covers a multipurpose body of data such as extraction, reserve and potential for generation, production, installed capacity and capacity utilization, storage, foreign trade and values of energy products, transmission, consumption and energy balance etc.

Chapter 7

Transport and Communication

Transport and communication chapter cover: (i) Railway transport; (ii) Road transport (mechanized/non-mechanized vehicles); (iii) Water transport (mechanized/non-mechanized); (iv) Air transport; (v) Communication Telephone services, Postal services, Radio and Television services) and (vi) Tourism.

Data of this sector are usually collected from secondary sources. The following type is collected by mail and/or personal contact from the concerned organizations:

Railway Transport

Bangladesh Railway compiles data on the operation of the railway's route kilometer, stations, and rolling stock by gauge, passenger and cargo carried, revenue earnings, operational expenses, and other aspects of railway traffic and publish in their information book. The statistics on railway transport are mainly collected from Bangladesh Railway for this book.

Road Transport

Statistics is gathered from a variety of sources scattered over the wide range of the economy and as such quality of data is affected to the extent by the multiple objectives underlying the collection and compilation of data by the sources concerned. However, the same for the organized sector, defined to be registered and/or maintained in the form of records either administrative or statistical, are of good quality and fairly reliable. The organizations in the organized sector and the statistics collected from them are shown below.

Bangladesh Road Transport Corporation: operation of bus, coach, and truck plying on road. Roads and Highways Department: road mileage by type of road, the progress of road construction, and expenditure incurred on maintenance of roads, culverts and targets achieved. Bangladesh Road Transport Authority, Ministry of Communication, Railway Division, Roads and Road Transport Division: number of vehicles (on-road) registered by type of vehicles, the motor car, bus, truck, taxi, jeep, station wagon, auto-rickshaw, motorcycle, etc. classified by region, seating capacity, and kind of fuel used.

Water Transport

Statistics of this sector are also to be characterized by similar nature, sources, and methodology of amassing the basic data. Here again, the quality of data is a little undermined when these from traditional sources are to be monitored. But those from the organized sector are fairly dependable. The sources and the statistics collected from them are shown below:

— Chattogram and Mongla Port Authorities: vessels handled and their turn round at ports, cargo handled by major commodity groups, number of national and international seaborne ships entered into and cleared from the ports.

— Bangladesh Inland Water Transport Authority (BIWTA): type and category of vessels, tonnage and passenger capacity and navigable waterways etc.

Bangladesh Inland Water Transport Corporation (BIWTC): number of vessels by type, passenger and

cargo carried, and the ferry services under its control and supervision.

Bangladesh Shipping Corporation (BSC): number of vessels with carrying capacity, number of voyages, passengers and cargo carried, net profit earned, assets and liabilities, working capital, etc.

Air transport

Statistics of this sector though small in size but good in quality are well maintained by Biman Bangladesh Airlines, the national carrier of the country. The statistics collected from this source are the performance of Biman, number of airplanes by type, number of flights operated on National routes and passengers and cargo carried.

Civil Aviation Authority of Bangladesh (CAAB): aircraft, passenger and freight/mails movement by airports etc.

Communication

The type of statistics collected in this highly organized public sector is shown below:

— Bangladesh Post Office Department: number of post offices in the country by division, number of letters, money orders booked through post offices, and postal rates (air mail) from Bangladesh to selected countries. It also provides data on some radio sets licensed.

— Bangladesh Telecommunications Company limited: number of telephone sets in the country by division and also several telegraph offices by region.

— Bangladesh Television: number of television sets licensed by type and by region.

Tourism

Statistics of this sector are narrowly defined to include only international tourist movements. Bangladesh Parjatan Corporation is the concerned organization that provides data on the arrival of tourists by nationality and foreign exchange earnings thereof etc.

Road Accidents

Statistics of this nature are the indicators of efficiency of public administration and are regularly compiled in Police Directorate. The Police Directorate is responsible for the collection and compilation of several road accidents by region and by important cities. These data concern the number of accidents and the number of persons injured and killed in such accidents.

Fare and Freight Index

The index has been developed based on the fare and freights of Bangladesh Railways, Bangladesh Road Transport Corporation (BRTC), Bangladesh Inland Water Transport Authority (BIWTA) and Biman Bangladesh Airlines. The Laspeyre's formula has been used for computing the index with 1995-96 as the weighted base year.

Chapter 8 Foreign Trade Statistics

1.1 Introduction

Collection, compilation and dissemination of Foreign Trade Statistics (FTS) on both exports and imports are considered as one of the major activities of BBS. BBS brings out this annual publication regularly since 1973-74. The specific objective of FTS is to ensure timely availability of foreign trade data for policy-makers, planners, researchers and other users. This publication contains data on exports and imports with unit, value, quantity and country of origin by commodity following the harmonized commodity description and coding system (HS code) at 2 to 8 digits' level.

Publishing micro level data on foreign trade is considered as one of the salient features of the report to its users. To maximize the utilization of the publication, time series data together with comparative statistics have also been presented and discussed. To have an overall view at a glance about foreign trade trend, summary and key findings have been added at the beginning of the report.

1.2 Data Collection Process

At present, BBS collects foreign trade data only from secondary sources. All data are originated from the various customs stations such as sea, land and air ports have been collected from the National Board of Revenue (NBR). NBR collects data from all customs stations that are the primary sources of foreign trade data. BBS collects online data from NBR which contain data in tabular form covering different fields of FT. BBS uses some data as per its requirements from these diversified fields.

In the past, BBS collected 'bills of entry' for imports and 'shipping bills' for exports entries for sea born data. For customs clearance, the importers had to submit bill of entry and exporters shipping bills to the customs houses located at the sea port of Chittagong

and Mongla for every consignment imported into or intended of export from Bangladesh. BBS personnel posted at Chittagong and Mongla Customs Houses were responsible for collecting and sending these bills to BBS. The BBS staffs posted at the mentioned two customs houses used to collect the documents regularly and carried them to Dhaka twice or thrice a month. At present, BBS only collects online data from NBR.

Accordingly, the land-born foreign trade data were compiled from the monthly returns received from the land customs stations across the country.

Air-borne data were collected from the air-borne trade returns. These are the bill of entries for imports and customs statements for exports that are received from the air freight unit in Dhaka. But at present, both land-born and air-born foreign trade data have been collected online from NBR.

1.3 Scope and Coverage

Except military hardware, bullion, currency notes, coins and goods in transit, FTS includes all other commodities which pass through the boundary of customs territory. In case of imports, all goods and commodities entering into the country and for exports, all goods and commodities leaving the country are incorporated in FTS.

FTS also covers data of the commodities imported to and exported from the country recorded at Export Processing Zones (EPZ). The entire data on exports and imports recorded at various routes such as sea, air, land and postal parcels are taken into account for further processing.

1.4 Classification of Commodities

On the basis of 'harmonized commodity description and coding system (HS code)' based on the Standard International Trade Classification (SITC) Rev-3, FTS of Bangladesh are compiled and classified. These classifications are arranged in 98 chapters under 21 sections which cover all commodities of international trade. They include under broad headings of commodities at 4-digit level and detailed description of 8-digit level. BBS has prepared the HS code at 2 to 8-digit level to cover all commodities under foreign trade. Imports are recorded by country of consignment and exports by country of the last known destination. BBS enlists the quantities and values collected online from NBR against HS code and commodities imported and exported. BBS does not change the value of the commodity supplied by NBR. But, in case of quantity, BBS checks and rechecks them in order to find out any inconsistencies between value and quantity. If any anomaly is found,

BBS examines it and fixes a reasonable figure of quantity based on observations of last few years' figures of the same commodity. Bangladesh Bureau of Statistics follows Brussels Definition of Value (BDV) for the purpose of valuation. The BDV of goods was introduced in December 1950 under the Principles of the General Agreement on Tariffs and Trade (GATT). The objective was to provide a comparable system of valuation. It has been accepted by almost all countries of the world. Under the BDV, the dutiable value of goods imported for home consumption is calculated at normal price i.e., the price which they could fetch at the time when duty becomes payable on a sale in the open market. In practice, valuation of goods is rather tricky and depends on expediency of revenue collection. Currently, tariff values or the international prices are perceived by the customs authority from floor level for the purpose of determining customs and related duties. BBS records import value on cost, insurance and freight (CIF) basis and export value on free on board (FOB) basis.

1.5 Data Processing, Tabulation and Publication

Foreign Trade Section head of National Accounting Wing collects online data from NBR on a monthly basis. Then that online data is sent to the officers of Foreign Trade Section National Accounting Wing, BBS for rearranging, processing, tabulating etc. After completion of related works, the personnel of Foreign Trade Section do the correction, compilation and editing. Though most of the tabulations are made according to HS Coding, some selected tabulations are done on the basis of category of goods by different exporting or importing accounts.

Selected monthly tables are published in the Monthly Statistical Bulletin and other monthly and annual publications of BBS. FTS are published on fiscal year basis, from July 1 to June 30.

1.6 Systems of Trade

There are two systems of computing trade statistics: (i) the special trade system and (ii) the general trade system. Special trade system is based on the concept of "clearance through the customs frontiers" which is, in fact, the statistical boundary. Any commodity that is not cleared by the customs is excluded from such statistics. The general system of trade considers the national boundary as the statistical frontier. It means that all goods and commodities except military goods, bullion, currency notes, coins and goods in transit, entering or leaving the country are recorded in trade statistics.

Earlier Bangladesh followed the special trade system. For better coverage, Bangladesh is now applying the

general trade system. The main characteristics of the general trade system are summarized below:

General System of Trade

Imports

- i) Imports “entering directly” for home consumption or use.
- ii) Imports into customs bonded manufacturing plants.
- iii) Imports into customs bonded warehouses and free area.

Exports

- i) Exports of national production.
- ii) Exports from customs bonded manufacturing plants.
- iii) Nationalized exports.
- iv) Exports from customs bonded warehouses and free area.

Re-export is included after clearance from customs and falls under category (iii) and (iv) mentioned above.

1.7 Computation of Trade Indices

Indices of imports and exports are designed to measure the overall position and direction of movements of values, prices, and quantum of commodities bought and sold in international markets. The construction of indices is based on published data. One type of index i.e. unit price index is computed by taking 2002-2003 as the base year.

Unit Price Index (UPI): It represents the overall direction of price movements of commodities bought and sold in international markets. Prices are based on FOB values of exports and CIF values of imports.

The main reasons for selection of 2002-03 as base year are:

- i) It was considered as a normal year for business/trade activities.
- ii) In 2002-03 BBS, harmonized commodity description and coding system (HS) 8-digit level was adopted. In HS coding system, the total number of commodities is 8123. For better classification and representation of new commodities in the

index basket, the year of introduction HS code was chosen as the base year.

BBS has been computing various annual indices of foreign trade and publishing them in its Monthly Statistical Bulletin and other monthly and annual publications.

Chapter 9

Finance, Foreign Aid, Banking, Insurance, Co-operatives and Credit Distribution

Finance

Government budgets are of two kinds revenue budget and development budget. Budget estimates are prepared by the Ministry of Finance. These are required to be placed before the Jatiyo Sangshad for discussion and to the President for approval.

Revenue receipts are classified under two major heads, viz, tax receipts and non-tax receipts. Tax receipts include income and wealth tax, land revenue, customs, excise, sales tax, etc. Non-tax items cover income from Government enterprises and properties such as post offices, telegraph & telephone, railway, currency, forest, civil works and registration fees, etc.

The economic classification of the Government budget has been presented in the respective table. Economic analysis of the budget involves the re-classification of budgetary data according to economic and functional characteristics.

The government's development expenditures by various sectors have been presented. These are based on the government's annual development expenditures the development expenditure of the Government has been compiled from data collected through a detailed questionnaire filled in by the government and its agencies and in cases of non-response estimates are derived from the Annual Development Programme.

Receipts and expenditures of the Bangladesh railway, post office, and telephone and telegraph department have been presented separately. Separate budget estimates for these departments are prepared and required to be presented before the Jatiya Sangshad. Economic analysis of these budgets involves re-classification of budgetary data according to economic and functional characteristics.

Receipts and expenditures of corporations and autonomous bodies including financial institutions and insurance companies have been presented.

The budgets of the corporations and autonomous bodies have been analyzed and re-classified according to the economic and functional characteristics.

Receipts and expenditures of local government bodies such as Municipalities, Zila, Thana, and Union Parishad have been shown in separate tables. These data have been collected through a detailed questionnaire filled in by the local government bodies. The sources of these data are the annual budgets of the institutions themselves.

Banking, Insurance, Co-operative and Credit Distribution

This chapter presents data on the financial activities of nationalized, foreign, and private banks as well as the financial transactions of cooperative societies and other specialized financial institutions in Bangladesh.

Banking

There are tables on bank branches operating in Bangladesh. Consolidated position on abilities and assets of scheduled banks, bank advances for economic purposes, foreign exchange reserves, lending rates and rate of interests for profit on National Saving Schemes, cash remittance, and use of foreign currency accounts held by Bangladeshis staying abroad. Bangladesh Bank and concerned Bank organization are the sources of data.

Insurance

There are tables in this connection that present structural information on Insurance companies/organizations in Bangladesh. Statistical data on claims and surrenders in the Life Insurance business etc are presented Department of Insurance is the source of data.

Chapter 10 Prices & Wages

1. Construction of Consumer Price Index (CPI)

The CPIs are compiled on monthly basis. Monthly prices of various items are used for

computation of the indices. Annual indices are also computed by averaging the 12 month's indices. The reference groups of the indices are the average urban and rural households of Bangladesh.

Three principal consumer indices (CPIs) are produced and disseminated i.e. National, urban, and all rural. The national CPI is calculated by combining the urban and rural indices using as weights. For computing the three CPIs all goods and services included in the index baskets were classified under twelve commodity divisions following the COICOP (Classification of Individual Consumption by Purpose). The indices covered twelve commodity divisions which are: -

- (1) Food and Nonalcoholic Beverages
- (2) Alcoholic Beverages, Tobacco and Narcotics
- (3) Clothing and Footwear
- (4) Housing, Water, Electricity, Gas, and Other Fuels
- (5) Furnishings, Household Equipment, and Routine Maintenance of the House
- (6) Health
- (7) Transportation
- (8) Communication
- (9) Recreation and Culture
- (10) Education
- (11) Restaurants and Hotels
- (12) Miscellaneous Goods and Services.

Selection of items: The using price schedules are updated on the basis of 2016-17 Household Income and Expenditure Survey (HIES) and Present base index are used in 2021-22. Data were collected from selected shops in each market or from selected units or service providers in the case of services. In constructing price indices, the geometric average price for each item was considered. In the rebased CPI (base/reference index 2021-22=100), BBS has been collecting price data from 154 (64 from rural areas, the remaining 90 from urban areas, including special consideration of Dhaka and Chattogram City Corporation) markets across the country. Each Market has 03 regular outlets. Three prices are collected for every item included in CPI basket from three outlets of every market. Prices for 242 food items as well as 507 non-food items are being collected using a unique schedule.

Selection of Index reference/period: The period for which the value of the index is set equal to 100. It should be noted that, in practice, the duration of the

weight reference period for a CPI is typically a year, or even two or more years, whereas the CPI is calculated monthly or quarterly, the duration of the price reference period being a month, quarter, or year. Current CPI for the base index 2021-2022=100 is based on the concepts and methods presented in the "Consumer Price Index Manual: Concepts and Methods (2020)". During the 51st session, the United Nations Statistical Commission endorsed this manual and encouraged all nations to utilize it for the compilation of their national CPI.

Bangladesh Bureau of Statistics has been regularly compiling the following consumer price index numbers on the basis of 2021-22 as the Index reference/ period.

- (i) Consumer price index, urban areas.
- (ii) Consumer price index, rural areas.
- (iii) Consumer price index, National.

Determination of Weights: The Consumer Price Index (CPI) is usually calculated as a weighted average of price changes for the goods and services covered by the index. The purpose of weights is to describe the relative importance of goods and services, measured by their share in total household consumption. The weight of each good or service determines the effect of its price change on the overall index. On the other hand, Reference index or base index refers the period for which the value of the index is set equal to 100. For the CPI with a base index of 2021-2022=100, the 2016 HIES is used. In computation of CPIs according to base/reference index 2021-22=100, two consumer baskets are used: (i) urban basket and (ii) rural basket.

BBS has taken up compilation of urban, rural, National CPIs. The National CPI is derived from the indices compiled separately for the urban and rural households, based on the weights calculated by using the 2016-17 HIES. The weights of individual items of CPI, all urban and all rural have been derived from the computer data sheets of 2016-17 Household Expenditure Survey. The weights of group and sub-group of CPI, all urban and all rural have been derived from the computer data sheets of the 2016-17 Household Expenditure survey which is given below.

Group	Weight Rural	Weight Urban
General	100.00	100.00
(1) Food and Nonalcoholic Beverages	48.65	38.37
(2) Alcoholic Beverages, Tobacco and Narcotics	2.97	2.08

Group	Weight Rural	Weight Urban
(3) Clothing and Footwear	6.36	5.69
(4) Housing, Water, Electricity, Gas, and Other Fuels	13.02	19.02
(5) Furnishings, Household Equipment, and Routine Maintenance of the House	3.94	3.68
(6) Health	4.55	3.97
(7) Transportation	7.33	12.88
(8) Communication	2.26	2.47
(9) Recreation and Culture	1.56	1.51
(10) Education	3.20	4.71
(11) Restaurants and Hotels	2.23	2.06
(12) Miscellaneous Goods and Services.	3.92	3.56

Formula Used: During the 51st Session of the United Nations Statistical Commission endorsed this Manual as an international statistical standard on March 4, 2020 and urged all countries to use this Manual in the compilation of their national CPIs. CPIs are calculated at two stages:

First, Elementary Indexes are compiled using Jevons formula & chained Jevons.

$$I_j^{0:t} = \frac{\prod (p_i^t)^{\frac{1}{n}}}{\prod (p_i^0)^{\frac{1}{n}}}$$

Where, 0

and t are two period

$$I_{jc}^{0:t} = \prod \left(\frac{p_i^t}{p_i^0} \right)^{\frac{1}{n}} = \frac{\prod (p_i^1)^{\frac{1}{n}} \prod (p_i^2)^{\frac{1}{n}} \dots \dots \dots \prod (p_i^t)^{\frac{1}{n}}}{\prod (p_i^0)^{\frac{1}{n}} \prod (p_i^1)^{\frac{1}{n}} \dots \dots \dots \prod (p_i^{t-1})^{\frac{1}{n}}} = \frac{\prod (p_i^t)^{\frac{1}{n}}}{\prod (p_i^0)^{\frac{1}{n}}}$$

Second, Higher-level indexes are compiled using the Modified Young's formula.

$$I_{MY}^{0:t} = \sum w_j^b I_j^{0:t-1} I_j^{t-1:t}$$

Where, $\sum w_i^b = 1$

$$I_Y^{0:t} = \sum w_t^b \cdot \left(\frac{p_t^t}{p_i^0} \right)$$

$$w_i^b = \frac{p_i^b \cdot q_i^b}{\sum p_i^b q_i^b}$$

II. Method of Construction of House-rent Index:

- (a) **Definition of House-rent:** House-rent is the actual monthly rent paid to the owner of a private residential house excluding gas, electricity, and water charges. HRI reflects the average rent change over time of a specified set of rented houses representing a given group of population. Residential houses of Government, Semi-Government, other organizations, and also enemy property/abandoned property are not included in the house-rent collection.
- (b) **House-Rent index:** HRI reflects the average rent change over time of a specified set of rented houses representing a given group of population. Population and Housing Census of 2011 and the Survey on Occupied Residential Houses and Real Estate Services of 2018 were the sources of information used to determine the types of houses rebased (base/reference index (2021–22 = 100) in the basket. These 'basket items' (different types of rented houses) were selected based on the number of rented houses. HRI (base/reference index 2021-22=100), HRIs are calculated in two stages. First, elementary indexes are calculated for each of the elementary aggregates. Second, higher-level indexes are calculated by taking weighted averages of the elementary rent/price indexes.

	Classification of houses	National Weights
(1)	Pucca houses	62.71
(2)	Semi-Pucca houses	29.63
(3)	Kutchha & Jhupri houses	7.66

- (c) **Source of data:** House-rent of private BBS has been gathering rent and price data from 154 locations and places across the nation for the rebased HRI (base/reference index 2021–22 = 100). Of these, 64 are in rural areas, and the remaining 90 are in urban areas, with Dhaka and Chattogram City Corporation receiving special consideration. Twenty different types of houses have their rent and prices collected according to a schedule.

III. Method of Computing Indices of the Cost of Building Construction:

The index of the cost of construction of a building is divided into 3 groups, viz. (i) Building materials (ii) Transport cost, and (iii)

Labour Charges of construction labor. During compilation of BMPI (Base/reference index 2021-22=100), BBS collect price data from 66 (01 from each district and 02 from Dhaka city corporation) markets across the country. BBS collect prices from 66 markets (01 from each district and 02 from the Dhaka City Corporation markets) throughout the country. Three quotations (prices) are collected for each item from each of the markets. Prices of BMPI are 107 items (Variety 133) being collecting using unique schedule. BMPI's (Base/reference index 2021-22=100) building/construction materials and services in the basket were determined based on Construction survey 2013-14. Jevon's and modified young formula are used for constructing the Index.

Number of items and weight distribution by group by centre are as follows:

	Group/Subgroup of Items	National (Weight)
1	Group-1 Building Materials	74.30
	Bricks & Stone	15.81
	Cement & Sands	14.03
	Iron & Steel	18.25
	Wood & Bamboo	6.16
	Materials Rent/Others	1.61
	Tiles	3.06
	Paint & Varnishes	2.14
	Glass & Sanitary Fittings	7.70
	GI & PVC Pipes	1.81
	Hardware & Electrical Fittings	3.73
2	Group-2	22.90
	Transport Charges	22.90
3	Group-3	2.80
	Labour Charges	2.80

IV. Method of computing the Wage Rate Index:

- (a) **Definition of Wage Rate** Amount of money received either in cash or in kind in a day for standard daily working hours or earnings of low paid labour who works on hourly basis have been included here as wage earners. Salary paid and high contract-based earnings have been excluded from compilation of WRI.
- (b) **Wage Rate Index:** Wage Rate Index (WRI) is an important indicator for measuring the trend and changes in the aggregate wages of the wage earners of a country. The wage

rate index is intended to measure the movement of nominal wages of low paid skilled and unskilled labour over time in different sectors of the economy. It is also used to measure changes in real wages. WRI reflects the average wage rate change over time of a specified set of occupations of three broad economic sectors like Agriculture, Industry and Service representing a given group of population. Bangladesh Bureau of Statistics (BBS) has been producing and publishing Wage Rate Index (WRI) since 1974 on regular basis with 1969-70 as base year. Already BBS has revised and rebased the Wage Rate Index (WRI) with 2021-22 as current base year. It has been prepared with the help of Labor Force Survey 2016-17

During compilation of WRI according to rebased WRI (Base/reference index 2021-22=100), BBS collected wage data from all 64 district. Three quotations of wages are collected for each item/occupation from each of the districts. Wages of 63 occupations are being collecting using unique schedule. Average monthly wage rate of low paid skilled and un-skilled labourers are estimated by 63 occupations such as 17 occupations from agriculture sector, 30 occupations from industry sector and 16 occupations from service sector.

SL	Name of Sectors	Weights
(1)	Agriculture	48.11
	(a) Agriculture	45.39
	(b) Fisheries	2.72
(2)	Industry	41.20
	(a) Construction	36.08
	(b) Production	5.12
(3)	Service	10.69

Chapter 11

National Income

National accounts estimation is one of the core activities of BBS. BBS has been compiling GDP and other national accounts aggregates by production approach and expenditure category since 1972-73. At present these estimates are based on the 2008 SNA framework and 2015-16 as a base year for the constant price estimates.

BBS is largely confined to the compilation of GDP by Industrial origin and GDP by expenditure components. GDP by industrial origin is in more detail, providing estimates of gross value added by 19 major ISIC sectors. GDP estimates both current and constant market prices are provided by fiscal years (FY) i.e. for the July-June period.

Estimates of GDP by expenditure components are less elaborate. Estimates are made for basic aggregates such as private and public consumption, gross fixed capital formation by public and private sectors, and exports and imports both in current and constant prices.

It is worthwhile to mention that BBS has revised GDP and other national accounts estimates from 2005-06 to 2015-16 with 2015-16 as a base year for constant price estimates. The revised estimates reflect a wide data coverage along with methodological improvements for the estimation of outputs of various sectors and subsectors.

The national accounts statistics are published in the various regular publications of BBS with limited scope. Besides, BBS has published detailed statistics on national accounts in the publication namely: - Twenty Years of National Accounting of Bangladesh, 1972-73 to 1991-92, National Accounts Statistics of Bangladesh (Revised Estimates, 1989-90 to 1998-99), Bangladesh National Accounts Statistics: Sources and Methods (Revised estimates from 1995-96 to 2013-14 with base year 2005-06), Bangladesh National Accounts Statistics: Sources and Methods (Revised estimates from 2005-06 to 2020-21 with base year 2015-16)

BBS also releases a report on preliminary and final estimates of GDP in the middle of each fiscal year.

Chapter 12

Education

Statistics of enrollment, educational attainment, grade, students, teachers and educational institutions have been compiled following the concepts, definitions, classification and tabulation procedures as per revised recommendations of the UNESCO conference on Standardization of Educational Statistics (SES) as far as practicable in the context of Bangladesh.

Educational attainment is defined as the highest grade completed and/or attained by a person in the system of regular special and adult education at home or abroad.

Grade is defined as a stage of instruction usually covered in the course of a school year.

Student is defined as a person enrolled and/or registered in a programme of education defined at the outset.

Class is defined as group of students (Pupils) who are usually instructed together by a teacher or by several teachers.

Teacher is defined as a person employed, even part-time and/or without remuneration to communicate knowledge, skills etc.

A school (educational Institution) is defined as a group of students (pupils) of one or more grades, organized to receive the instruction of a given type and level under one teacher, or of various types and/or levels under more than one teacher under the direct supervision of the head of the establishment. A school is said to be a government school if it is operated by the government whether national or local, whatever the origin of its financial resources. Similarly, a school is said to be a private school if it is not operated by a government authority (national or local), whether or not it receives financial support from such authorities. The latter can, however, be further classified as "aided" or "non-aided" depending on whether or not they derive financial support from government authorities.

Statistics on educational finance presented also conform to the following definitions:

- Receipts refer to cash received by or made available to or for schools, including appropriations, subventions, fees, cash value of property received as gifts, etc.
- Expenditures refer to financial charges incurred by or on behalf of schools for goods and services.
- Capital/development expenditures refer to expenditures for land, building and equipment etc.

The system of education through the indicators of the number of educational institutions, teachers and student participation rate, teacher-student ratios, operating expenses per student, and total govt. expenditure on education, percentage of literacy etc. has been presented in the respective tables.

The number of teachers and student ratio in public universities is shown here. Yearly average per head expenditure in public universities student and faculty wise number of students in public universities have been shown. The number of students' teacher's institutes, faculty, department, male-female students, and subject-wise number of students in private universities, have been present in this chapter. The number of general colleges with students, teachers by region and output of the examinations of general colleges have been shown in separate tables. The number of govt. and non-govt. recognized Intermediate and Degree colleges with several teachers and students therein by region and by sex have been given in the tables. The number of secondary schools by govt. and non-govt. by region, by urban and rural distribution, have been given. The number of secondary schools with teachers and students by gender, average no. of teachers and students per Secondary school and teacher-student ratio have been shown.

Government & affiliated Madrasahs with several teachers and students by type and by region and the result of the madrasah education, as reported by the Bangladesh Madrasah Education Board, have been given. The number of primary schools by govt. and

non-govt. with teachers and students, by rural and urban, students by sex and region, the average number of students and teachers per primary school and teachers' students' ratios as reported by AUEO/ATEO/URC Instructor, Ministry of Education, have been given in separate tables.

Sanskrit and Pali Tols with teachers and students are also given, a number of Technical Institution by type with teachers and students for the number of Teachers Training colleges both primary and secondary level have been given in separate tables. Unani college with the number of teachers and students, as available from the Bangladesh and Board of Unani and Ayurvedic system of Medicine, have been presented in respective tables. Professional colleges as law, Agriculture, Arts & crafts, Home Economics, Social welfare and Research, with number of students and teachers as obtained from the Bureau of Educational Information and Statistics have been given in the tables.

The results of the S.S.C and H.S.C and Technical Education as obtained from the Boards of Intermediate and Secondary Education, Technical Education Board and Bureau of Educational Information and Statistics have been presented in respective tables. The school attendance rate by age and sex, and the literacy rate by region are given in respective tables. The rate of literacy for census years, however, are not directly comparable because of difference in definitions that have been appended to the tables concerned. The gross expenditure on education by type of educational Institution has been compiled by BBS and appended in the concerned tables. Tuition fees of different educational institutions and the average monthly tuition charge in the Dhaka Metropolitan Statistical Area have been presented in separate tables. The number of primary and Junior scholarships awarded in Bangladesh by grade & rate has been given in a table.

Chapter 13

Health, Family Planning and Social Statistics

This chapter presents data on health facilities, manpower and services, public expenditure and nutritional status. Data are also presented on social issues and community facilities including a number of tube wells, newspapers, book publishing and circulations, film production, cinema halls, legal services, crime and religious institutions.

Growth of medical facilities, number of medical colleges, post-graduate medical institutes, Tuberculosis clinics and rural health centers, The Directorate of health services is the source. The number of hospitals and hospital beds, number of blood slides examined and malaria cases detected are shown in the tables concerned. The Ministry of Health and Family Welfare and the Directorate of Health Services are the sources.

Local production of drugs and medicines, comparative prices of selected imported raw materials and licentiate business units in drugs by categories are given in respective tables.

Public expenditure on health and related activities in the health sector are given in separate tables. The Bangladesh Bureau of Statistics is the source. Data on the district-wise distribution of health, maternal and child health and family planning facilities have been presented in respective tables. The Directorate of Population Control and Family Welfare is the source. The table shows data on a number of family planning personnel by region. The productions and no. of sales centre of sanitary latrines by former districts up to 2024 have been shown in table & show the number of newspapers and books published and a number of newspapers & periodicals with their gross circulation. The production of films by type and language and the number of cinema houses by region, the number of advocates and lawyers by region, the number of crimes by type and number of places of worship by region, and data on the regional non-govt. hospitals and clinics with beds, number of Imams trained by region have been given on respective tables.

Chapter 14

Poverty, Inequality, Household Income, Expenditure and Consumption

This chapter focuses on the household income, expenditure, poverty and inequality statistics. BBS produces these statistics by conducting Household Income and Expenditure Survey (HIES) since long. The first round of Household Expenditure Survey (HES) in 1973-74. However, BBS has conducted total 17 rounds of this survey in last fifty years. The latest round HIES was conducted in 2022 to generate national, rural and urban and divisional level statistics. Importantly, BBS also produces district and Upazila/Thana level poverty maps by using Small Area Statistics (SAE) methods with the collaboration of World Food Program (WFP) and World Bank Group (WBG) since 2000.

Household Income

Household income is defined as the material return in kind or in cash in exchange for goods and services etc, by the household earners, other than boarders, lodgers and servants. The income of the household was further classified by recording monthly and annual income in cash or in-kind and imputed income as related to the reference period.

Household Expenditure

Consumption expenditure refers to the household consumption expenditure defined as the value of goods and services finally consumed by resident households of Bangladesh.

1.1 Objectives of the HIES:

- ▶ Obtain detailed data on household income, expenditure and consumption.
- ▶ Determine poverty profile with urban and rural breakdown.
- ▶ Provide information about standard of living and nutritional status of population.
- ▶ Provide data to determine the weights of consumer price indices.
- ▶ Provide household level consumption data used in compiling national accounts estimate.
- ▶ Provide detailed information on health status and educational level of the population.
- ▶ Determine poverty estimates by administrative divisions and detailed socio-economic characteristics of the population and households.
- ▶ Provide benchmark data for formulation of appropriate policy for poverty reduction, improvement in standard of living and nutritional status of the population.
- ▶ Provide relevant data for monitoring of the Poverty Reduction Strategy (PRS)/Five-year plan and the Sustainable Development Goals (SDGs).
- ▶ Provide data on nature, volume and distribution of resources under different Social Safety Net programmes.
- ▶ Collect data related to calculation of demand function and elasticity.
- ▶ Generate data for formulating appropriate fiscal policies.
- ▶ Collect data on type and extent of disability by age, sex and locality.
- ▶ Provide data on migration and remittances.
- ▶ Collect detailed data on credit and repayment situation and practices.

1.2 Sampling Design of HIES 2022

For HIES 2022, a two-stage stratified cluster sampling design was followed under the sampling frame developed from the available second zonal operation of Population and Housing Census 2022. The primary sampling unit (PSU) was the Enumeration Area (EA) of the Population and Housing Census 2022. Each EA is a cluster of around 100 households.

At the first stage, required number of PSU's were selected and a complete household listing was carried out in the selected PSU's. Then at the second stage, 20 households were selected randomly from each selected PSUs for interview in the field.

1.3 Sample Size of HIES 2022:

For designing the sample for HIES 2022, two different target variables/indicators were used. These are: (i) Prevalence rate of the main indicator (poverty head count ratio) (ii) Nominal household consumption expenditure. These were considered as the core indicators of HIES. Using both the indicators, rough calculation showed that about 900 households or 45 PSU's (as 20 households were selected in each PSU) for each domain (division by rural & urban) were required to provide a reasonably precise estimate at domain level.

METRIC SYSTEM OF WEIGHTS AND MEASURES

Bangladesh has adopted metric system of weights and measures from 1.7.1982.
