

Preamble:

The Quality of Service (QoS) Report has been prepared in accordance with Table 1 of the “Directives on Quality of Services (QoS)” and published based on the “Drive-Test Methodology to Measure Quality of Service (QoS) for Cellular Mobile Phone Operators” issued by the Bangladesh Telecommunication Regulatory Commission (BTRC).

Previously, QoS reports were submitted by mobile network operators only at the **national level**, and such reports were not subject to systematic verification or reconciliation by BTRC. The present framework therefore introduces a more structured process for independent review and validation of operator-submitted QoS data.

For the first time, the QoS reports submitted by mobile operators are being **reconciled, reviewed, and verified by BTRC**. Based on the verified and reconciled data, QoS performance reports are being prepared and published at the **national, district, and upazila levels**, thereby providing a more comprehensive and transparent assessment of network performance across different geographic areas.

The present report primarily reflects **mobile network performance from a network-centric perspective**. The findings are used by BTRC to identify areas of comparatively weaker network performance and to plan and conduct targeted QoS drive test activities. In parallel, mobile network operators are required to conduct regular drive tests and undertake necessary corrective measures to improve network performance and ensure continuous enhancement of the overall quality of service, thereby increasing the end-user experience.

As this report is being published for the first time, BTRC notes that certain technical parameters of the assessment framework may be examined further to ensure a more realistic reflection of network performance. Any submission from mobile operators will be considered through continued engagement, with subsequent reports expected to become progressively more precise, representative, and refined.
