Important notes

- (1) BTRI restricts the use of those pesticides, which are highly toxic and MRL has been quoted against each.
- (2) BTRI accepts no responsibility/liability in case of any dispute in the uses of such product beyond the permissible limit as mentioned.
- (3) It is important that unnecessary pesticide application will incur extra cost, which will not be desirable from economic point of view as well as might create resistance problem.
- (4) BTRI always emphasizes that pesticides should be procured from any authorized dealer with proper guarantee of its purity, efficacy and shelf-life.

Do's and Don'ts

- (1) Apply pesticides when absolutely needed
- (2) Use only approved pesticide at the recommended dosage and dilution rate
- (3) Maintain safe harvest interval between spraying and harvesting
- (4) Do not use pesticide indiscriminately
- (5) Same chemical used in the same field for several years is not wise
- (6) Take timely control measure
- (7) Apply chemical pesticide judiciously
- (8) Avoid over dose and under dose
- (9) Pesticide should pose no residual problem on tea
- (10) Pesticide would not be phytotoxic
- (11) Consider cost of pesticide
- (12) Procure pesticide from a registered dealer for its reliability
- (13) Follow LD₅₀ values and toxicity level
- (14) Strictly follow the shelf-life of a pesticide
- (15) Do not spray during extreme sun or in rainy condition
- (16) Spray from periphery towards the centre of the section
- (17) Spray strictly in the morning or late afternoon
- (18) Never spray up wind; avoid strong wind
- (19) Never mix pesticide near water resource, pond, well, stream etc.
- (20) Educate the sprayer personnel on the correct use of pesticides and sprayer
