Chattogram Water Supply & Sewerage Authority
Monthly MIS Report
April 2026

		Unit	This month	Year to date	Previous year actual	This year target *1	Evaluation *2	Remarks *3	++	Too good	Very bad
Selected Key Indicators											
E 17*	No Revenue Water= {1-(billed water(C2)/distributable water production(E15*))} X 100	%	25	23	26	24	2%				
C 4*	Revenue collection efficiency (monthly coll.+ outstand. Coll.)/ monthly bill. = (collection(C3)/billing(C1)) X100	%	91	89	89	89	3%				
D 9*	Collection period = (accounts receivable(D6)/monthly billings(C1)) X number of days of month	Day	359	373	323	200	-86%	!			
F 2*	No. of perma. employee per 1000 connections(excl. non-perma. Empl.) = (No. of permanent staff(F1) + non-permanent staff(F5) / total billable connections (A1.1)) X1000	Nos.	4.9	N/A	5.3	7.6	35%	++			
D 8*	Operating Ratio = (personal cost (D2.1) + electricity cost (D2.2) + chemical cost (D2.3) + other O & M (D2.5.1)) / (Total Revenues(D1))	Ratio	0.60	0.70	0.74	1.69	58%	++			
A 3.5*	Functioning meter rate of installed meter = no. of metered (A3.1)/ (no. of metered (A3.1) + average reading (A3.2)) X 100	%	89	N/A	90	90	-1%				
E 19	Water quality sample (E19)	No./month	240	2,400	2,880	240	0%				
E 18*	Leakage occurrence = (no. of leakage recognized by complaint (G3)/ Length of Pipeline at the end of period(E9)/ no. of months covered)	No./km/mth	0.19	2.04	0.28	1.81	-13%				
A 6*	Water supply coverage = ((Billed connection (A1.3) X 26 Person per Connection) + (Total Street Hydrant (A4) X 80 Person per Street Hydrant) / Total Population in water Supply Area (N.B)) X 100	%	67	N/A	68	68	-1%				
B 5*	Average tariff = (Total billing(C1)/ Billed volume(C2)) / 1000	Tk/m3	18.59	17.63	18.61	17.70	5%				
E 16*	Unit production cost (in/c Capt. Cost,Deprec. & Financial Expense.) = Expenses Total(D2)/ (Production distributable water(E15*) +DTW Water directly distributed (E15.1*)) / 1000)	Tk/m3	21.16	19.77	22.21	34.16	42%	++			
A) Connection data											
A 1	Total registered connections	Nos.	104,511	N/A	101,482	104,226	0%				
A 1.1	Billable (non-disconnected) connection	Nos.	98,309	N/A	95,369	98,102	0%				
A 1.2	Non-billable (disconnected) connection	Nos.	6,202	N/A	6,113	6124	-1%				
A 1.3	Billed connection	Nos.	93,901	N/A	91,276	94,548	-1%				
A 2	Breakdown of billable connection (by customer type)										
A 2.1*	Domestic	%	93	N/A	93	92	2%				
A 2.2	Non-domestic	%	7	N/A	7	8	17%				
A 3	Breakdown of billable connection (by meter status)										
A 3.1	Metered	Nos.	87,785	N/A	85,361	88,114	0%				
A 3.2	Average reading	Nos.	10,423	N/A	9,907	9,886	-5%				
A 3.3	Non meter	Nos.	101	N/A	101	102	1%				
A 3.4*	Meter installation rate	%	100	N/A	100	100	0%				
A 3.5*	Functioning meter rate of installed meter	%	89	N/A	90	90	-1%				
A 4	Street Hydrant	Nos.	689	N/A	689	689	0%				
A 5	Religious Institutions	Nos.	368	N/A	368	317	16%				
A 6*	Water supply coverage	%	67	N/A	68	68	-1%				
A 7	Bill sent-out ratio	%	96	N/A	96	96	-1%				

[N: B: Population for This Year (2025-26): 3,721,269]

G 3	Leakage complaints received and attended	Nos.	186	1,970	2,676	1,800	-31%	!		

13714

N/A = not applicable (= pointless to calculate, or nonexistent)

Some numbers may show the same value in spite of different values, which is due to rounding.

*1: "this year target" can be set according to (1) Business Plan, (2) Performance Agreement, (3) discussion with D M D (Engineering), (same or modified value of previous year)

*2: Evaluation is made on the basis of variance from the set target. An evaluation result "X %" means that performance of particular indicator is X % better than what is set as the target.

if the NRW is 24% and the target is 20%, this performance is considered unfavorable. The evaluation result is shown as -20% (= 1 - 24 / 20).

If the number of water quality sample is recorded as 24 when the target is set at 20, this performance can be considered favorable. The evaluation result is shown as 20% (= 24 / 20 - 1).

*3: A warning sign " ++ " appears when the evaluation result exceeds 25%, which is considered as the high-end threshold indicating "too good".

A warning sign " ! " appears when the evaluation result is less than - 25%, which is considered as the low-end threshold indicating "very bad".

A2.1: If the total number of billable connections is 45,000 and the number of domestic connections in billable connections is 36,000, this will be 80% (= 36000 / 45000).

A3.4: Meter installation rate = 1 - (number of non-meter connection / number of billable connection).

A3.5: Functioning meter rate = 1 - (number of average reading connection / number of billable connection). This indicator is used as a proxy of ratio of metered water sold to total water sold.

A6: Water supply coverage is defined as (population served with piped water + population served by street hydrant) / population in service area.

In FY 2010/11, this was estimated at 42% (= (1.192 million + 0.07 million) / 2.98 million)

Supply coverage of this month is computed based on the following assumptions used in Business Plan.

(population in service area = 3 million; user population per connection = 30; population served with standpipes = 100,000; number of standpipes = 689)

A6* :Water Supply Coverage=(Billed Connection x 26 Person per Connection + Total Street Hydrant x 80 Person per Street Hydrant) / Total Population in Water Supply Area *100.

A7: Bill sent-out ratio = Billed connection / Billable connection x 100.

B5: Average water tariff = total billing / total billed volume

C1.1: "Private" includes private customers and users of loose water (sold by bowser)

C1.2: "Government" includes government users, street hydrants and religious institutions

C3.1: Same as C1.1,

C3.2: Same as C1.2

C4: Revenue collection efficiency = collection /billing x 100. CWASA's existing accounting system cannot classify accounts receivable by age.

Therefore the revenue collection efficiency can be shown merely as (total collection during a period + total billing during the same period).

C4.1: Same as C4,

C4.2: Same as C4

C5: Metered volume to billed volume ratio data currently becomes available twice a year due to capacity limitation of computer section.

D1.2: "License and renewal fee of tubewell" in "other operating revenue"

D1.3: Excludes "License and renewal fee of tubewell"

D1.4: As the interest income is not obtainable until the year end, a proxy value is used here so that the net income can be computed. The proxy value is the previous year's monthly interest.

D2.1: Includes salary & allowances, provident fund, gratuity, festival bonus, overtime and earn leave encashment

D2.4: Data is only available quarterly instead of monthly. The cost of the latest three month is converted to a monthly average and shown in the monthly data column.

D2.6: Data is only available quarterly instead of monthly. The cost of the latest three month is converted to a monthly average and shown in the monthly data column.

D4: Under the current system, this value is not obtainable until the year end. However it is expected to become obtainable monthly in the future.

D5: Under the current system, this value is not obtainable until the year end. However it is expected to become obtainable monthly in the future.

D6.1: Same as C1.1,

D6.2: Same as C1.2

D7: Long term liabilities outstanding as unpaid at the end of month

D8: To see more clearly the CWASA capacity to generate the operating profit before depreciation and interest,
the operating ratio is defined as (personnel cost + elec. cost + chemical cost + other O & M) / (total Revenues).

D9: Collection period = (accounts receivable) / (monthly billings/number of days in month)

E6: Production capacity of deep tube wells that supply water directly to users

E7: Production capacity of deep tube wells that supply water to Karulgaht WTP

E15: Distributable water (or system input water) = Water produced at Surface WTP + Water produced at Ground WTP + Water directly distributed from DTW

E15.1: Raw water distributed directly to users from some DTWs on the way to boosters are not included in the distributable water (E15).

E16: Unit production cost =Expenses(Total)/((Distributable Water Volume+DTW Water directly distributed)*1000)

E17: NRW = (unbilled water / water produced x 100) = [1 - billed water / (distributable water production + DTW Water directly distributed)] x 100

E18: Leakage occurrence = Number of leakage recognized by complaint / length of pipeline at the end of period / number of months covered

E20: This is the rate of satisfactory sample complying with the chlorine standard.

E21: This is the rate of satisfactory sample complying with the microbiological standard.

F2: No. of employee per 1000 connections = (number of permanent staff + non-permanent staff) / (total billable connections/1000)

F4: Only staff workers (Class 3 and Class 4) receive overtime. Thus this ratio is computed based on Class 3 and Class 4 workers' pay.
