9. Description:

Background information, current situation and its relevance to National Policies, Sectoral Policy, SDG, Vision 2021, Five Year Plan, MTBF etc.

Director, Planning and Research in the DGHS is mandated to take-care planning activities within the DGHS and ensure necessary research for feeding the proper planning. As Line Director of the Planning, Monitoring and Research Operational Plan (OP), the responsibilities are expanded to encompass monitoring of the implemented activities as per the plan and if required make necessary changes in the plan to achieve the desired objective. Thus PMR OP supports the DGHS

in planning, monitoring and research. As part of the planning function, it supports in the preparation/revision of OPs, Programme Implementation Plan (PIP), Development Project Proposal (DPP), Technical Assistance Project Proposal (TAPP), Feasibility Study/Survey, Preliminary Development Project Proposal (PDPP), and Preliminary Technical Assistance Project Proposal (PTAPP) within the DGHS. It also provides need based support to the Project Evaluation Committee (PEC), Departmental Project Evaluation Committee (DPEC), Special Project Evaluation Committee (SPEC), Departmental Special Project Evaluation Committee (DSPEC), Project Scrutiny Committee (PSC), Project Steering Committee (PSC), and Project Implementation Committee (PIC). It also works very closely with the Planning Wing of the MOHFW. Considerable experience has been gained through the lessons of a number of pilot initiatives on local level planning (LLP) in the last two SWAp periods. However, upon recommendations from MTR 2014 the LLP Programme has been changed into Evidence-Based Health Planning (EBHP). PMR OP has conducted EBHP Programme at division and district level based on WHO's six building blocks of health system, in which a substantial number of field level managers have been capable to solve their problem at field. Previous experiences suggested that, initiating activities like, coordination with other government offices and NGOs, allocation of resources at field level, monitoring of government and non-government health activities and community engagement in local health plan would be more helpful for succeeding in EBHP.

The monitoring component of PMR includes; a) capacity building plan to facilitate and promote the development of monitoring and evaluation knowledge, skills and competence of different level of health system personnel b) data quality plan to integrate periodic data quality assessment (DQA) using different monitoring tools to assess progress of ongoing activities; and c) data utilization plan to ensure that generated data are being utilized for informed decision making. The PMR OP supports the LDs under DGHS for regular monitoring of their activities, particularly keeping conformity with the indicators and results framework. It also supports DGHS for periodical monitoring of the OPs under DGHS. It supports the Planning Wing/Programme Monitoring and Management Unit (PMMU) for preparing six monthly reports, annual/midterm programme implementation reports (APIR/MTIR) and conduction of annual/midterm programme review (APR/MTR) of sector programme. There were limitations of monitoring of field activities in a systematic way in previous sector programme.

For research it works in collaboration with different institutions, like, BMRC, NIPSOM, BSMMU and medical colleges for building capacity to conduct research and allocate fund for conduction of research. PMR OP also has a role to prioritize those research topics, the findings of which would be helpful for planning and re-planning of different health programme and policies. It also have the responsibilities to summarize different recommendations of research findings for implementation

Challenges

1. With the adoption of Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC), planning context has been changed. PMR OP has to adopt the new changed context through building its own capacity and supporting the other LDs together with their Programme Managers (PMs) and Deputy Programme Managers (DPMs) to be acquainted fully with the SDGs and UHC agenda.
2. Several indicators have been set to achieve the targets of SDGs. Through data-gap analysis, it has been seen that there are need to generate new data in some cases and reformulate old data in some other cases to monitor the progress of SDGs. There is also challenge to get

disaggregated data, like, male-female, urban-rural, age-wise etc. The issue of data reliability have to be addressed by utilizing own data at local level through data review and analysis.

3. The 4th Health, Population and Nutrition (HPN) Sector Programme has adopted many new directions like governance, stewardship, efficiency, equity, quality etc. PMR OP need to make other OP personnel fully aware of these new dimensions of the programme for their proper planning and monitoring while implementing. The managers at division, district and upazila level also need to be fully aware of these new dimensions so that they are also in same line, when implementing the activities at field level.
4. PMR had been mostly engaged at DGHS level, however its engagement at other levels (like divisional, district and upazila, City Corporation, municipalities etc.) for planning and monitoring particularly to take forward stewardship, efficiency, equity, quality will add more value to the sector programme.
5. Driving the research agenda to make evidence based decision at different levels of health system in collaboration with different research institutions including BMRC are another challenge.
6. Capacity building of the PMR unit to adequately deliver its mandates and responsibilities.
7. To bring desired changes in health, nutrition and family planning activities at urban areas, a strong coordination mechanism is necessary between MOHFW & Urban Local Government Institutions and PMR can play vital role in it.
8. Non-government organization (NGOs) play on important and vital role in rendering health services in urban areas. Coordination and proper planning at grassroots level is crucial to avoid duplication of services as well as of resources.

Cross cutting issues including poverty, environment, climate change, bio-diversity, women & children, gender and person with disability/ excluded groups etc.

PMR OP will contribute significantly in poverty reduction through proper planning based on evidences generated by research and effective monitoring of health services which contribute in poverty reduction.

Effective planning, monitoring and research will contribute in conservation of environment through proper management of healthcare wastes. Also support in mitigating health risks of environmental pollution of soil, water and air.

Proper planning, monitoring and research will ensure better health adaptability due to climate change effects and also make sure adequate healthcare for the climate change affected population.

Access and utilization of promotive, preventive, curative and rehabilitative health services by the women and children will ensure improvement of their health status and gender issues in health service delivery can be properly addressed through adequate planning, monitoring and research.

Related Strategy in the PIP :

The 4th HPNSP coincides with the adoption of the United Nations' SDGs by world leaders in New York on the 25 September 2015. The 2030 Agenda for Sustainable Development articulates an ambitious set of targets aimed at transforming the world by ending poverty, hunger and

inequality, taking action on climate change and the environment and improving health and education. The new Global Goals replace and expand the previously agreed MDGs. The 4th HPNSP has been designed with appropriate strategies and efforts for focused improvements in increasing access to, and quality of health care and improving equity along with financial protection in order to meaningfully realize the objectives of UHC.

Related Strategies:

- SO 1 : To strengthen governance and stewardship of the public and private health sectors
- SO 2 : To undertake institutional development for improved performance at all levels of the system
- SO 6 : To improve health measurement and accountability mechanisms and build a robust evidence-base for decision making

10. Programme-wise priority activities of the OP

Component-1: Planning

Planning is a powerful management tool. Only robust plan based on evidence and priorities can support in achieving the sector program's objectives. PMR will support at different levels within DGHS to internalize the priorities of the sector programme and make plan accordingly based on evidences for achieving the objectives of the sector programme.

Activities:

1. Orientation training for the LDs, PMs, DPMs, Divisional Directors, Civil Surgeons, Upazila Health and Family Planning Officers about the SDGs, UHC, priorities and principles of the 4th HPN sector programme.
2. Orientation training for the newly appointed LDs, PMs and DPMs about the sector programme and on cross-cutting issues with other OPs.
3. Support managers at divisional, district and upazila level to prepare coordinated plan to ensure quality service delivery within respective jurisdiction.
4. Support managers at different levels for proper planning to achieve Disbursement Linked Indicators (DLIs).
5. Support other OPs within DGHS for the required PIP/OP preparation and revision. Also planning, preparation and revision of development projects (DPP, TPP, TAPP, PDPP, DPR etc.)
6. Support OPs/Managers within the DGHS for proper reflection of gender equity and community engagement, ensuring voice and accountability

Component-2: Monitoring

Monitoring is essential for proper implementation of the programme. Timely monitoring allows for making necessary management decision to ensure proper implementation of the programme and thus achieve the programme's objectives.

Activities

1. Periodic monitoring of progress of OPs under DGHS through regular monitoring meeting.
2. Orientation training of the LDs, PMs, DPMs including new appointees on monitoring techniques for proper monitoring of the programme.
3. Facilitate collection of information from the OPs for the preparation of AP/MTIR and AP/MTR processes.
4. Support managers at divisional, district and upazila level to monitor coordinated plan to ensure quality service delivery within respective jurisdiction.
5. Support managers at different levels for proper monitoring for the achievements of Disbursement Linked Indicators (DLIs)
6. Support OPs within the DGHS for proper monitoring of gender issues and community engagement, ensuring voice and accountability.

Component-3: Research

Research helps to generate evidences based on which appropriate management decisions can be taken. Sometimes managers are not familiar with the research findings and thus decisions taken by them may not reflect real problem issues. Managers seldom undertake research by themselves and are content in publishing results and not concern about the proper dissemination for the use of policy makers, planners and managers.

Activities

1. BMRC as a cost center under this OP will receive allocation for building research capacities and conducting research.
2. Capacity development of managers and /or clinicians at different levels on research.
3. Identification of research topics in consultations with the LDs, PMs, DPMs and managers at different levels for conduction of research to generate evidences for making decision.
4. Dissemination of research findings to the policy makers, planners and managers for appropriate usages.

Component-4: Strengthening of Planning and Research Unit of DGHS

Strengthening capacity of managers of Planning and Research unit of DGHS is the crucial, as they have to play the stewardship role within DGHS to support LDs, PMs, and DPMs of other OPs, so that they can deliver their best in reaching their OP objectives. The LDs, PMs, DPMs of different OPs should be capable of understanding health planning and implementation, effective and efficient use of resources, supervision and monitoring, managing the health programmes, coordination with different Government and Non-government sectors. It is also necessary to increase the capacity of health managers at different level on planning, monitoring and research

Activities

1. Capacity building on Planning, Monitoring and Research.
2. Views Exchange in different levels.
3. Support to planning and research unit, DGHS.

Background Information/Description:

In Bangladesh, Health care delivery system is increasingly becoming more complex. Rapid demographic changes due to fast urbanization, epidemiological transition from communicable to non-communicable diseases and confronted with double burden in nutrition (under nutrition as well as over nutrition) are the key issues for Health planning. Health, Nutrition and Population Strategic Investment Plan (HNPSIP) is more focused on ensuring equitable access to quality health service for community.

Planning: Health Planning is “the process of defining community health problems, identifying needs and resources, and take administrative action to achieve the goals. It is the combination of analyzing the evidence and information, dreaming up ideas, using logic and imagination and judgment in order to come to a decision about what should be done”.

Effective planning is a powerful management tool. Only robust plan, prepared on the basis of evidence and priorities can support in achieving the sector program’s objectives. PMR will support at different levels within DGHS to internalize the priorities of the sector Programme and make plan accordingly based on evidences for achieving the objectives of the sector program.

This 4th sector Programme is very crucial, as because, this period coincides with the initiation of two very important global health efforts, one of which is the Sustainable Development Goals and the other is the Universal Health Coverage (UHC). PMR OP has set the strategies and activities keeping in mind to achieve the health indicators of SDGs as well as to undertake programs related to UHC.

The financial support for the health sector Programme is incurred through development budget which consist of government funds (GoB) and project aids (PA), through development partners with the pool fund of World Bank. A new financial mechanism has been introduced by World Bank to link disbursement with production of results, and some Programme indicators have been identified to link with disbursement, called DLI.

Sustainable Development Goals (SDGs):

Sustainable Development Goals (SDGs) define global sustainable development priorities and aspirations for 2030 and seek to mobilize global efforts around a common set of goals and targets. The SDGs call for worldwide action among governments, business and civil society to end poverty and create a life of dignity and opportunity for all, within the boundaries of the planet. Between 2000 and 2015, the Millennium Development Goals (MDGs) provided an important development framework and achieved success in a number of areas such as reducing poverty and improving health and education in developing countries. The Sustainable Development Goals (SDGs) succeed the MDGs, expanding the challenges that must be addressed to eliminate poverty and embracing a wide range of inter-connected topics across the economic, social and environmental dimensions of sustainable development

Health is a fundamental human right and a key indicator of sustainable development. Poor health threatens the rights of children to education, limits economic opportunities for men and women and increases poverty within communities and countries around the world. In addition to being a cause of poverty, health is impacted by poverty and strongly connected to other aspects of sustainable development, including water and sanitation, gender equality, climate change and peace and stability. In order to accelerate progress and address new health challenges, all actors, including the private sector need to partner to develop health care solutions that work for people, families, communities and nations. At minimum business has a responsibility to respect all human rights, including the right to health. Small, medium and large companies can both benefit from and contribute to achieving healthy societies. The SDGs provide a new opportunity for the private sector to support the delivery of health needs around the world through their products, services and business activities including value chains and distribution networks, communication activities, occupational health and safety practices and provision of employee benefits.

Universal Health Coverage (UHC):

UHC means that all individuals and communities receive the health services they need without suffering financial hardship. It includes the full spectrum of essential, quality health services, from health promotion to prevention, treatment, rehabilitation, and palliative care. UHC enables everyone to access the services that address the most important causes of disease and death, and ensures that the quality of those services is good enough to improve the health of the people who receive them. Protecting people from the financial consequences of paying for health services out of their own pockets reduces the risk that people will be pushed into poverty because unexpected illness requires them to use up their life savings, sell assets, or borrow – destroying their futures and often those of their children. Achieving UHC is one of the targets the nations of the world set when adopting the Sustainable Development Goals in 2015.

Disbursement Linked Indicator (DLI):

Disbursements are linked to the achievement of tangible and verifiable results. Disbursement-linked indicators (DLIs) play a critical role in PforR operations—they provide the government with incentives to achieve key Programme milestones and improve performance. In today's world development is about results. Everyone government officials, parliamentarians, civil society, poor people, the private sector is demanding programs that help deliver sustainable results. In January 2012, the World Bank introduced a new lending instrument; Programme for Results (PforR) the first major development financing instrument to formally link disbursements to the achievement of results. With PforR, the Bank intends to help partner countries improve the design and implementation of their development Programs and achieve lasting results by strengthening institutions and building capacity.

Training provided to local health managers in management and evidence based planning and budgeting. District evidence-based planning and budgeting for effective coverage of SRHR including MNCAH developed, implemented, and monitored.

- Conduct rapid assessment of health facilities for SRHR including MNCAH services and identify the gaps in quality of health services;
- Develop district and sub-district based evidence based plans through decentralized participatory planning processes;
- Develop capacity of the managers and service providers at different levels through need based TA support for planning, budgeting, implementation, monitoring and evaluation/research under this initiative;
- Strengthen Management Information systems (MIS) covering community and facility services in conjunction with national HMIS;"

District Evidence Planning and Budgeting (DEPB)

Through this OP, extensive activities will be undertaken to prepare and implement coordinated plan, based on evidences, at different levels of implementation. The managers at these levels will be capable to plan and monitor their own activities. There will be special emphasis on maternal and reproductive and child health and in low performing districts and upazilas. This OP will also implement the project on “*Improving maternal, sexual, and reproductive health and rights in Bangladesh*” funded by Global Affairs Canada (GAC), supported by UNICEF and UNFPA, for a period of five years (2017-2022). This project will also contribute to GOB’s efforts to achieve SDG goals. The specific objective of this project is to improve progress relating to sexual and reproductive health and rights and reduce maternal and newborn mortality in five low performing districts (Rangamati, Moulavibazar, Patuakhali, Sirajganj, Jamalpur).

Planning, Monitoring & Research,
DGHS, Mohakhali, Dhaka.

The diagram illustrates the flow of information from various data sources to the Planning Wing, MOHFW. The central hub is the Planning Wing, MOHFW. It receives data from several sources: MIS Health Services (DHIS) via a solid arrow labeled 'APR, SmrPR'; PRIVATE/ NGO SECTOR via a solid arrow labeled 'APR, SmrPR'; FINANCIAL/ ADMIN RECORDS (DGUS, DGFP, MOHFW) via a solid arrow labeled 'APR, SmrPR'; and Census, Registration, Sample Vital Registration, and Population Surveys via a solid arrow labeled 'APR, Periodic Reports'. The Planning Wing, MOHFW also sends data to several destinations: LHMIS and PMIS via a solid arrow labeled 'Missing link'; NASR and NTP via a solid arrow labeled 'Missing link'; EPI and IEDCR via a solid arrow labeled 'Missing link'; and EmOC and IMCI via a solid arrow labeled 'Missing link'. A large arrow at the bottom indicates the flow from 'Facility/Institution Based' to 'Population Based'.

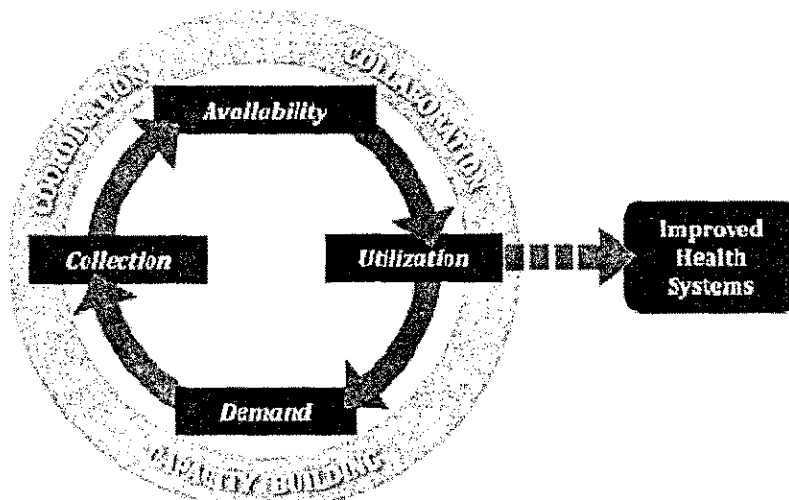

Community engagement involves dynamic relationships and dialogue between community members and local health department staff, with varying degrees of community and health department involvement, decision-making and control. While the health department shares its health expertise, services and other resources with the community through this process, the

community can share its own wisdom and experiences to help guide public health Programme efforts. “Community” may include individuals, groups, organizations, and associations or informal networks that share common characteristics and interests based on place, issue, or identity-based factors. These communities often have similar concerns, which can be shared with the health department to help create more relevant and effective health programs.

Human resources for health (HRH) monitoring and evaluation (M&E) plan is a fundamental component of national efforts to strengthen the health workforce. The purpose of a national M&E plan for HRH is to guide the measurement of and monitor progress in the implementation of a country’s HRH strategic and/or operational plan. Monitoring and evaluation are both

critical to assessing programmatic progress, toward national goals, objectives, and targets. M&E can measure progress, identify areas for improvement, explain why a strategy is or is not working, and suggest corrective strategies.

Most importantly, strong capacity in M&E is a prerequisite for ensuring the sustainability of a highly functioning and high-quality health workforce. If human resources (HR) managers do not know how many health workers are employed and at their posts, whether their competencies meet the needs of their catchment populations, and other key information, then health Workforces may be understaffed, poorly distributed, unqualified, or imbalanced. If HR managers lack information on what motivates health workers, they cannot offer incentives that persuade them to stay. Understanding patterns in health service and health workforce data can improve decision-making around all aspects of the health worker life cycle. A team will be formed in the divisional level to monitor Programme activity, DLI activity, project activity and facility activity in the district and below level. A coordinator will be recruited under PMR OP to coordinate all the activities. Monitoring will be conducted in the form of data collection, online monitoring by DHIS-2 software and data analysis. Monthly review meeting will be held in district level. A vehicle will be hired to conduct monitoring activities funded by PMR.

Research :

Research helps to generate evidences based on which appropriate management decisions can be taken. Unfortunately managers are not familiar with the research findings and thus decisions taken by them may not reflect evidences. Managers seldom undertake research. Researchers are happy in publishing results and not concern about the proper dissemination for the use of policy makers, planners and managers.

Bangladesh Medical Research Council (BMRC) was established in 1972 by order of the President as an Autonomous Body under Ministry of Health and Family Welfare (MOH&FW). The objectives, rules & regulations of the Council were formulated by resolution of the MOH&FW in 1974 & 1976. As per Resolution of the Government, BMRC is the focal point for health research. The objectives of BMRC are to identify problems and issues relating to medical and health sciences and to determine priority areas in research on the basis of health care needs, goals, policies and objectives.

Health research is essential to improve the design of health intervention, policies and service delivery. Research will, therefore, be an integral part of the Health Population Nutrition Sector Investment Programme (HNSIP) and will play an important role with regard to evidence based decision-making, facilitation of innovation, supporting adjustments in sectoral resource and in support of policy development for 4th HNPSP.

The range of research to be undertaken will include basic medical and bio-medical research, demographic, epidemiological, operational, and policy research & clinical research, including research on reproductive health, impact and cost-effectiveness studies, behavioural and health systems research. Research results will serve to guide policy development, Programme priorities, and improvement of service delivery; they will also be essential to monitoring Programme achievement and assessing Programme impact. Increased emphasis will be given to research that will have direct implications for health interventions and is designed to improve the quality of care and health status of the people and to research that relates spending patterns to disease burden.

The current allocation/spending in research are inadequate for guiding sectoral policies. Institutes that are involved in research are not suitably developed and need strengthening. Research efforts are sometimes characterized by duplication, inappropriate prioritization and inadequate dissemination. These issues will be addressed to provide overall guidelines for research priorities as well as research Co-ordination and dissemination. Failure to utilize research results, another identified research issue, is a widespread problem not limited to concerned policy or implementation areas in the design, progress and results of the research from the initial stages onward. Basic & Clinical researches will be conducted by cost centres while PMR OP preferably will be responsible for conduction of Health system, Implementation research or Operational researches.

National Health Research Strategy :

Bangladesh Health Research Strategy has been developed to promote the practice and conduct of research that contributes towards the improvement of the human health and welfare of the Bangladeshi population. It attempts to create a framework and environment for health research to contribute effectively to health development, and for evidence to lead to strategy formulation. It constitutes an important tool, which in the long term should contribute to the improvement of our health system and inform interventions geared towards a better life for all Bangladeshi. The need for Bangladesh needed to be coordinated, coherent national health research machinery that contributes to equitable health development. The document relied on health research experiences, knowledge, expertise, available literature, various country experiences and a variety of national and internationally accepted standards and practices in health research.

In the health sector, the ongoing progress is always hampered by limited technical and managerial capacity of the health systems managers and policymakers. Lack of support from national and international health institutes to enhance capacity of evidence use and strategic information management in the health policy making process is slowing down the progress as well. In order to strengthen the capacity of researchers and policy maker at individual, organizational and institutional level research policy communication cell has been developed under PMR OP. The overall objective of the project is to support evidence-informed public health policy-making in Bangladesh, leading to progress towards universal health coverage (UHC) and improved health equity, particularly for urban poor and those suffering from NCDs.

A point of contact between DGHS and the research community, and research evidence is disseminated in the form of policy briefs and full-length articles. It will act as both repository and communicator of high quality evidence for health policy decision-making; policy briefs produced related to systematic reviews and other research and evidence of relevance published and disseminated.

- Act as a repository for all health systems related journals and publications.
- Act as a communicator between researchers and policy makers.
- Provide facilities for the health managers to have increase access to evidence
- Enhance public engagement
- Act as a platform for dissemination, seminar and dialogue for health research.
- Arrangement of different training including evidence based policy making training, public engagement training etc.

Meta-Analysis Research Center (MARC) is an enterprise to facilitate quantitative research syntheses which will be run by in collaboration with DGHS and Department of Community Medicine. Community Medicine faculty will collaborate and consult with national and international institutions on meta-analysis projects. Meta-analysis Research centre will be established initially at 3 medical colleges then it will be expanded to other medical colleges.

Research environment will be created in all medical colleges & Capacity building of Researchers

Enhancing the scientific and techno-logical capacity of the developing world is once again on the global agenda. Scientific journals play a central role in the dissemination of research results; at the same time, the importance of scientific publication in advancing the careers of research scientists has given them particularly the top international journals increased possibilities to influence research

priorities. Scientific journals and their editors, therefore, use this influence to help quicken the pace and galvanize health research in developing countries. Access to the international scientific and technical literature has several facets. Researchers in developing countries require access not only as readers but also as authors: for them to feel part of the global science community they need not only to obtain information but also to be able to contribute to it and take part in the global discourse.

Institutional Review Board (IRB):

An institutional review board (IRB), also known as an independent ethics committee (IEC), ethical review board (ERB), or research ethics board (REB), is a type of committee used in research in the Bangladesh that has been designated to approve, monitor, and review of Medical; specially biomedical and behavioural researches, survey involving humans or not. They often conduct some form of risk-benefit analysis in an attempt to determine whether or not research should be done. The purpose of the IRB is to assure that appropriate steps are taken to protect the rights and welfare of humans participating as subjects in a research study. A key goal of IRBs is to protect human subjects from physical or psychological harm, which they attempt to do by reviewing research protocols and related materials. The protocol review assesses the ethics of the research and its methods, promotes fully informed and voluntary participation by prospective subjects capable of making such choices (or, if that is not possible, informed permission given by a suitable proxy), and seeks to maximize the safety of subjects.

In the Bangladesh, Ministry of Health and Family welfare and its executing body have empowered IRBs of DGHS under Planning and research unit to approve, require modifications in planned research prior to approval, or disapprove research. IRBs are responsible for critical oversight functions for research conducted on human subjects that are "scientific," "ethical," and "regulatory." The body is responsible for overseeing national and international funded research. IRBs are most commonly used for studies in the fields of health and the social sciences, including anthropology, sociology, and psychology. Such studies may be clinical trials of new drugs or devices, studies of personal or social behaviour, opinions or attitudes, or studies of how health care is delivered and might be improved. Administrative, scientific and ethical clearance should be received from IRB, DGHS before conduction of any research or survey. The outcome of the study should be disseminated to the scientific community and policy level.

Members of IRB:

Sl no	Designation of institute	Designation of IRB
1	Director General, Directorate General of Health Services	- Chairperson
2	Additional Director General (Planning and Development), DGHS	Vice Chairperson
3	Director, IEDCR	- Member
4	Director, NIPSOM	- Member
5	Representative Medical Education and Research, BSMMU	- Member
6	Representative from Principal, Dhaka Medical College	- Member
7	Director, Disease Control, DGHS	- Member
8	Representative of BMA (Research)	- Member

Terms of Reference of IRB:

- Quarterly workshop of the stakeholders for formulation/proposal for research conducted under different OPs on human subjects or other issues that are scientific, ethical, and regulatory.
- Approve, require modifications in planned research prior to approval, or disapprove research.
- Audit of ethically approved research projects conducted by different institute's /OPs/ BMRC/national and international organizations.
- Development of mechanism of reviewing, coordinating, assessing and enhancing quality and usefulness of study findings and progress of the study activities.

Data Safety Monitoring Board (DSMB) :

Data and safety monitoring board is an independent group of experts who monitor patient safety and treatment efficacy data while a clinical trial is ongoing. If there are prior data to suggest that the intervention being studied has the potential to induce potentially unacceptable toxicity. If it would ethically be important for the trial to stop early if the primary question addressed has been definitively answered, even if secondary questions or complete safety information were not yet fully addressed.

Role of DSMB :

- Interim/cumulative data for evidence of study-related adverse events;
- Interim/cumulative data for evidence of efficacy according to pre-established statistical guidelines, if appropriate;
- Data quality, completeness, and timeliness;
- Performance of individual centers;
- Adequacy of compliance with goals for recruitment and retention, including those related to the participation of women and minorities;
- Adherence to the protocol;
- Factors that might affect the study outcome or compromise the confidentiality of the trial data (such as protocol violations, unmasking, etc.); and,
- Factors external to the study such as scientific or therapeutic developments that may impact participant safety or the ethics of the study.

A research review committee may be formed to evaluate and final selection of research protocol headed by ADG (Planning & Development). The committee will be approved by, DG, Directorate General of Health Services.

Strengthen capacity of different level health managers is the crucial issue to well governs the health delivery system. This activity will mainly focus on health planning and implementation, effective and efficient use of resources, supervision and monitoring, managing the health facility, coordination with DGFP and other Government and Non-government organization and primary health care activity. Increase the capacity of planning and research wing personals of DGHS on planning, monitoring and supervision will help to deliver proper plan and strengthen the monitoring and supervision system.

Global Health Diplomacy :

New skills in global health diplomacy are needed to navigate the changing global health landscape, to negotiate global regimes, international agreements and treaties as well as to maintain relations with a wide range of actors. There is an increasing range of health issues that transcend national boundaries and require action on the global forces that determine the health of people. The broad political, social and economic implications of health issues have brought more diplomats into the health arena and more public health experts into the world of diplomacy. In recent years, there is an increase in the number of international agreements on “soft issues”, such as the environment and health; it is now

recognized that some of these issues have significant “hard” ramifications on national economies.

Impact of Global Health Diplomacy:

Multi-level and multi-actor negotiation processes that shape and manage the global policy environment for health found the compromises and the agreements are reached, in multilateral venues, new alliances and in bilateral agreements. The art of diplomacy juggles with the science of public health and concrete national interest balances with the abstract collective concern of the larger international community in the face of intensive lobbying and advocacy. Interact with the private sector, nongovernmental organizations, scientists, activists and the media, to name but a few, since all these actors are part and parcel of the negotiating process.

Views exchange in different levels/collaboration:

A collaborative partnership between researchers and sponsors in developed countries and researchers, policy makers, and communities in developing countries helps to minimize the possibility of exploitation by ensuring that a developing country determines for itself whether the research is acceptable and responsive to the community's health problems. Moreover, without the engagement of researchers and host communities in the developing country, a study is unlikely to have any lasting impact, and, without the investment of makers of health policies, the research results are unlikely to influence policy making and the allocation of scarce health-care resources. A collaborative partnership also demonstrates awareness of and respect for cultural differences.

Formation of Technical Group:

The objectives of the TG are: (1) To develop a conceptual framework for the proper implementation of activity of PMR OP and Health and establish its objectives and modalities of work; (2) To review working papers and other technical input for the smooth implementation; (3) To review budgetary requirements for the functioning of PMR OP and develop recommendations for necessary resource mobilization.

List of the areas of Research:

1. Global Public Health Issues
2. Health Inequality and Social Determinants of Health
3. Environmental and Occupational Health,
4. Health Policy and Health Care Delivery
5. Reproductive and Child Health and Nutrition
6. Obesity and Chronic Disease
7. Survey on DLI

Project Brief:

“Improving maternal, sexual, and reproductive health and rights in Bangladesh “

This joint UN initiative and partnership project on *“Improving maternal, sexual, and reproductive health and rights in Bangladesh “* funded by Global Affairs Canada (GAC), will be implemented by two UN agencies (UNICEF and UNFPA) in partnership with MoHFW and other partners, for a period of five years (2017-2022). UNICEF will be the administrative agency to manage and coordinate the joint UNICEF-UNFPA initiative and form a national steering/core committee with GOB and other key stakeholders to coordinate and manage the project. This project reflects the UN agencies’ vision for supporting SRHR including system strengthening for delivery of high quality MNCAH services and will contribute to achieving the national outcomes and outputs articulated in the Government of Bangladesh’s 7th five-year plan, new Health sector programme 4th HNP (2017-2022) and its National Strategy for Maternal Health, Bangladesh Every Newborn Action Plan (BENAP) within Health System Strengthening (HSS) framework. The proposed joint project will also contribute to the Government of Bangladesh’s efforts of achieving both *SDG Goal 3 Good Health and Well Being* and *Goal 5 Gender Equality*¹.

This joint project have been developed with an increased focus on equity and socio-economic, gender disparities in addressing women and adolescents’ health and wellbeing as it pertains to the full spectrum of sexual and reproductive health and rights. The ultimate objective is to improve *sexual and reproductive health and rights and reduce maternal and newborn mortality in five low performing districts* (Rangamati, Moulavibazar, Patuakhali, Sirajganj, Jamalpur).

Operational Plan- PMR

Total allocated Budget: \$ 500,926 (BDT 40,199,311)
1 USD=BDT 80.25

1141 Training provided to local health managers in management and evidence based planning and budgeting.

1142 District evidence-based planning and budgeting for effective coverage of SRHR including MNCAH developed, implemented, and monitored.

- Conduct rapid assessment of health facilities for SRHR including MNCAH services and identify the gaps in quality of health services;
- Develop district and sub-district based evidence based plans through decentralized participatory planning processes;

অবকাঠামো বিভাগের প্রতিনিধি আরো বলেন, এ ওপির আওতায় প্রাইস কন্টিনেন্সি বাবদ অর্থ বরাদ্দ রাখা যৌক্তিক ছিল। সভাপতি এর প্রেক্ষিতে মন্তব্য করেন যে, আবশ্যকতা থাকলে ওপি পুনর্গঠনকালে লাইন ডাইরেক্টর এ বাবদ ওপিতে অর্থ বরাদ্দ রাখতে পারেন। এ পর্যায়ে যুগ্ম-প্রধান, স্বাস্থ্য সেবা বিভাগ বলেন, আলোচ্য ওপিতে গ্লোবাল এ্যাফেয়ার্স কানাডা এবং ইউএসএআইডি কর্তৃক ডিপিএ বাবদ প্রদেয় সহায়তার আওতাভুক্ত কার্যক্রম সম্পর্কে ওপির রাইট-আপ অংশে সংক্ষেপে উল্লেখ করা প্রয়োজন।

(৩.২) সিদ্ধান্ত: প্রস্তাবিত ওপির উপর আলোচনার পর সভায় নিম্নলিখিত সিদ্ধান্ত গৃহীত হয়:

(৩.২.১) অনুমোদিত পিআইপি'র ২নং ভলিউমের এনেক্সার-১ (উন্নয়ন বাজেটের আওতায় প্রস্তাবিত জনবল) (পৃষ্ঠা ১-৫৬) অনুযায়ী জনবলের সংখ্যা ওপিতে উল্লেখ করতে হবে এবং সে আলোকে বেতন-ভাতাদি ওপিতে অন্তর্ভুক্ত করতে হবে;

(৩.২.২) এসেসিয়াল সার্ভিসেস প্যাকেজ (ইএসপি) সংশ্লিষ্ট সেবাসমূহ এমএনসিএইচ ওপি'র রাইট-আপ অংশে যথাযথভাবে উল্লেখ করতে হবে;

(৩.২.৩) ওপির রাইট-আপ অংশে গ্লোবাল এ্যাফেয়ার্স কানাডা এবং ইউএসএআইডি কর্তৃক ডিপিএ বাবদ প্রদেয় সহায়তার আওতাভুক্ত কার্যক্রম সম্পর্কে সংক্ষেপে উল্লেখ করতে হবে;

(৩.২.৪) উপর্যুক্ত ৩.২.১ হতে ৩.২.৩ নং সিদ্ধান্ত অনুযায়ী অপারেশনাল প্ল্যান পুনর্গঠনের শর্তে প্রস্তাবিত 'মেটরনাল, নিওনেটাল, চাইল্ড এন্ড এডোলেসেন্ট হেলথ (এমএনসিএইচ)' শীর্ষক অপারেশনাল প্ল্যানটি মোট ৭৭৯১৩৩.৪৬ লক্ষ টাকা (জিওবি ৬০০৮৬.৯৬ লক্ষ টাকা ও প্রকল্প সাহায্য ৭১৯০৪৬.৫০ লক্ষ টাকা, তন্মধ্যে আরপিএ ১৮৫৮১২.২৫ লক্ষ টাকা) প্রাক্কলিত ব্যয়ে জানুয়ারি ২০১৭ হতে জুন ২০২২ মেয়াদে স্বাস্থ্য অধিদপ্তর কর্তৃক বাস্তবায়নের জন্য স্টিয়ারিং কমিটি কর্তৃক অনুমোদনের সুপারিশ করা হলো।
