EPI Surveillance Bulletin

Epidemiologic Week 48: November 23 - 29, 2003

Dec 2003

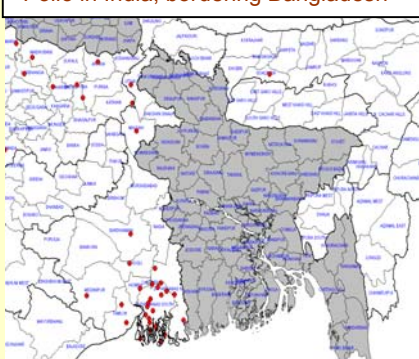

12th NIDs Preparations Underway

12th NIDs preparations came to the stage of final launching as the series of orientations and planning meetings at different levels started through the National Briefing Meeting for the Trainers at the EPI Bhaban on 4 December 2004. The high officials present in the session pledged to make the 12th NIDs the best in the face of the high threat of

importation of polio virus from India. Although this risk has decreased following substantial decrease in number of cases in India this year, there are still cases occurring in the vicinity of Bangladesh's border in the Indian States of West Bengal, Bihar and

Assam. Bangladesh will be considered to be a high risk country till India reaches "0" case status. International experts believe that Bangladesh is protected from importation at this moment due to "immunity barrier" formed by consistent high coverage achieved during the NIDs and by relatively high routine OPV3 coverage. 12th NIDs are needed to keep up this "immunity barrier" and thus

Polio in India, bordering Bangladesh

protecting the children of Bangladesh from the menace of poliomyelitis.

The orientations are scheduled as follows:

1. Divisional Planning Meetings: 7-14 December
2. District/CC Orientation Meetings: 13-20 December
3. Upazila/Municipal Meetings: 20-31 December
4. Ward level Volunteer's Meetings: 01-15 January. The 1st and 2nd rounds of 12th NIDs are scheduled for 18 January and 29 March 2004 respectively.

The other important activities of the preparatory phase of the NIDs are micro-planning, updating of maps, IPC and miking. IPC this time is planned to be closely supervised to improve its quality. As usual importance has been given to miking, especially to mosque miking on the day of NID and to sermon by the Imams during the Friday prayer prior to it. Emphasis has been given to traveling population as they are the most likely to be missed; sites for mobile populations are planned for all 5 days of NID week.

Meanwhile the year 2003 is heading towards the end and all the national surveillance indicators are being maintained at certifiable level; but in some districts some of the indicators have not reached the desired target. Recognizing the hard work needed to sustain the surveillance activities at optimal level, EPI thinks that there are rooms for further improvement and there should not be any sense of complacency. Any case of reported AFP should always be investigated without delay; AFP was, is and will continue to remain as top priority in EPI activities.

Shishu Shishu Proti Shishu Khuje Fero Proti Shishu !

Surveillance Summary for 1998-2003 (through Epidemiologic Week 48, November 23 - 29, 2003)

	1998	1999	2000	2001	2002	2003 ¹
Number of AFP cases	475	761	1138	1287	1365	1065
No. of clinically confirmed polio cases	298	322	197	NA	NA	NA
No. of compatible cases according to virologic classification system	NA	NA	NA	36	0	0
No. of cases with isolation of wild poliovirus	10	29	1	0	0	0
No. of discarded polio cases (i.e., non-polio AFP)	165	439	941	1251	1365	1031
No. of cases pending classification	0	0	0	0	0	34
Expected annual number of non-polio AFP cases (1/100,000 children <15 yr)	495	505	515	533	549	556

AFP Surveillance Performance Indicators:

Indicator	Target	1998	1999	2000	2001	2002	2003
1. Annual Non-Polio AFP rate in children < 15 years old	≥ 1/100,000	0.33	0.87	1.82	2.35	2.49	2.25 ²
2. Completeness of active reporting from hospitals	≥ 90%	46%	73%	95%	100%	100%	100%
3. Timeliness of active reporting from hospitals	≥ 80%	15%	44%	72%	88%	100%	99%
4. Suspected AFP cases investigated within 48 hours of notification	≥ 80%	89%	83%	93%	96%	96%	98%
5. Confirmed AFP cases with 2 stool specimens collected ≤ 14 days after paralysis onset	≥ 80%	59%	49%	68%	80%	89%	89%
6. Stool specimens arriving at laboratory ≤ 3 days after collection	≥ 80%	88%	81%	92%	97%	98%	100%
7. Stool specimens arriving at laboratory in "good" condition "good" = 1. Presence of unmelted ice or temperature <8°C 2. Adequate volume (≥ 8 grams or size of ½ thumb) 3. No evidence of leakage 4. No evidence of desiccation (drying)	≥ 90%	92%	97%	100%	100%	99%	100%
8. Confirmed AFP cases receiving a follow-up exam at least 60 days after paralysis onset	≥ 80%	80%	97%	95%	93%	99%	95% ³
9. Stool specimens with laboratory results ≤ 28 days after specimen receipt	≥ 80%	16%	58%	94%	99%	100%	100% ⁴
10. Stool specimens from which non-polio enterovirus (NPEV) was isolated	≥ 10%	5%	13%	21%	29%	28%	24%

¹ Data as of Nov 29, 2003; ² NPAPF rate annualized for cases according to Sep 27, 2003; ³ among cases with inadequate stools occurring up to Aug 30, 2003; ⁴ as of Oct 30, 2003:

Please provide your feedback and comments to Dr. Sunil Kumar Das, DPM-EPI or Dr. Md. Lutfur Rahman, Program Manager,
