# IHR YELLOW BOOK

Disease Control Unit, CDC, DGHS

Publication date (2<sup>nd</sup> Edition): 15 May 2023

Chairman: Professor Dr. Md. Nazmul Islam

Director, Disease Control and Line Director, Communicable Disease Control (CDC), and National Focal Point, International Health Regulation (IHR), Bangladesh.

Co-Chairman: Dr. Md. Shafikul Islam

Deputy Director and Program Manager, Communicable Disease Control (CDC), Directorate General of Health Services.

Editor: Dr. Md. Nasir Ahmed Khan

Senior Adviser, IHR, Migration Health & Emerging Re-emerging Disease Control Program, Communicable Disease Control (CDC), DGHS

Co-coordinator: Dr. Mustufa Mahmud

Deputy Programme Manager, IHR, Migration Health & Emerging Re-emerging Disease Control Program, Communicable Disease Control (CDC), DGHS

## Preface

Public Health Emergency of International Concern (PHEIC) can have a disastrous effect on its people and economy, regardless of their origin. Improving IHR compliance provides grounds for better health system strengthening, which is key to moving countries closer towards Universal Health Coverage. Multisectoral, collaborative working within and across sectors is fundamental to improve IHR (2005) compliance. This IHR Yellow Book contains the list with details information about the IHR stake holders and partners working together with IHR Programme, CDC, DGHS for implementation of IHR-2005. It is important to develop relationship between IHR programme of CDC and stakeholders of IHR-2005 in the context of Sustainable Development Goals (SDGs) which follow the fundamental principle of interdependence and interlinking with one another. In this context the role of National IHR Focal point is very crucial in influencing the IHR capacity of SDG 3 (health and well-being for all at all ages).

The IHR recognize the interconnected nature of the world and how prone it is to rapid spread of diseases. The IHR further recognizes an increasing number of potential public health challenges beyond infectious disease, including environmental changes, chemical hazards and radio nuclear threats. The IHR has several salient features. First, the IHR prescribe a set of 'core capacities', those required for the Member States to effectively detect, assess, notify and report events and respond to public health risks and emergencies of national and international concern. Core capacities exist for diverse technical areas including legislation, surveillance, laboratory capacity and chemical and radio nuclear safety. Second, the IHR promote proactive risk management through the early detection of potential international threats (with notification and other reporting requirements under IHR). The regulations also mandate national IHR focal points in each Member States' and WHO country offices to facilitate the communication and reporting processes. This is particularly important in the mobile world as information (both accurate and not) can be spread within seconds. Finally, the IHR attempt to prevent unjustified closing of borders or unnecessary interference with international trade and travel to avoid economic loss.

A mechanism for multisectoral multidisciplinary coordination, communication and partnerships to detect, assess and respond to any public health event or risk is key to the successful implementation of the IHR by WHO and the 196 States Parties that have agreed to be bound by them. The National IHR Focal Points (NFPs) are critical to the implementation of the IHR as they conduct the communications aspects of the IHR, both within countries and internationally, who are accessible at all times to communicate with the WHO IHR Regional Contact Points and with all relevant sectors and other stakeholders in the country. As the designated point of contact between WHO and States Parties it is essential that NFPs are provided with the necessary authority, capacity, training and resources to effectively carry out their functions required of them by the IHR.

This IHR YELLOW BOOK considers the successes of the Bangladesh Ministry of Health and Sports thus far in improving IHR compliance and highlights that an even greater focus on collaboration and assistance among IHR Stakeholders would lead to more sustainable outcomes. In this context, we have developed this IHR Yellow Book for communication among relevant sectors, for reporting, response, coordination and communication mechanisms during health emergencies. Through several special Focal person meetings we have designate focal points in relevant sectors to work closely and to communicate regularly with IHR NFP.

## Acknowledgements

This document was developed by International Health Regulation (IHR-2005) Programme, CDC, Directorate General Health Services with the technical support from IHR stakeholders. The stakeholders from Ministry of Health, other government Ministries, and agencies who provided valuable feedback and observations in the consultative meetings are remembered with gratitude.

# INTERNATIONAL HEALTH REGULATION (IHR-2005)

## MIGRATION HEALTH & EMERGING RE-EMERGING DISEASE CONTROL PROGRAMME

### INTRODUCTION:

**T**he International Health Regulations (IHR) are an international legal instrument that is binding on 196 countries across globe, including the Member States of WHO. In May 2005, the fifty-eighth world health Assembly (WHA) adopted the International Health Regulation (2005) [IHR (2005)] which subsequently entered into force on 15 June 2007, with 123 members countries signing the document. The purpose and scope of the IHR (2005) are “to prevent, protect against, control and provide

a public health response to the international spread of diseases in ways that are commensurate with and restricted to public health risks, and which avoid unnecessary interference with international traffic and trade.” State parties are required by the IHR (2005) to develop minimum core public health capacities. Attaining the minimum public health core capacity as per IHR (2005) will significantly contribute to the SDG goal for 2, 3 and 6.

### AIM:

The aim is to help international community prevent and respond to acute public health risks that have the potential to cross borders and threaten people worldwide.

Member states be able to timely detect, assess, notify and report events and respond to Public Health Risks and *Public Health Emergency of International Concern (PHEIC)*

## OBJECTIVES:

- Enactment of adequate legal framework and laws for implementation of IHR 2005
- Implementation of Multisectoral and Multi-disciplinary coordination and communication mechanism
- Establishment of cross border surveillance of priority diseases among neighboring countries (with India, Myanmar)
- Enactment of Establishment of cross border surveillance
- Inclusion of component of IHR in curriculum of medical and Public health, and courses in related fields and in all related training
- Adoption of mechanisms and documented procedures among all relevant sectors, particularly those responsible for human health and animal health to minimize the transmission of zoonotic diseases from animal to human
- Strengthening Laboratory capacities, Infection Prevention and Control
- Plan of action for developing human resource for IHR 2005 implementation
- Plan of action for Risk Communication and strategy development
- Plan of action for strengthening core capacities of Points of Entry(PoE)
- Strengthening capacities to respond to potential hazards
- Detect Assess and Respond to Food safety issues and related hazards
- Implementation of mechanism for timely detection and effective response to potential radio-nuclear hazards/events/emergencies in collaboration with other sectors responsible for radio nuclear managements
- Ensure timely detection and effective response to potential chemical risks and /or events in collaboration with other sectors responsible for chemical safety, industries, transportation and safe disposal

## IHR: Core Capacity Index

The 15 core capacities are:

- (1) National legislation, policy;
- (2) Coordination and National Focal Point communications;
- (3) Financing
- (4) Laboratory
- (5) Surveillance;
- (6) Human Recourses;
- (7) Health Emergency Management;
- (8) Health Services Provision;

- (9) Infection Prevention & control;
- (10) Risk communication & community engagement (RCCE);
- (11) Points of entry & border health
- (12) Zoonotic diseases;
- (13) Food safety;
- (14) Chemical events;
- (15) Radio nuclear emergencies.

## Progress in achieving IHR minimum core capacities

IHR (2005) State Part Self-Assessment Annual Report  
National Profile 2024  
Bangladesh

### All Capacities Average

## ACTIVITIES DONE FOR IMPLEMENTATION OF IHR IN BANGLADESH:

- Strengthening IHR core capacities: Identified the status for different indicators, as well as analysis was done for countries capabilities, gaps, opportunities and challenges. These information were used for IHR capacity building.
- Activities taken to strengthen and establish functional coordination and communication mechanism between relevant national competent authorities responsible for implementation of IHR in Bangladesh.
- Table-top exercise with stake holders and Core Committee members (Mapping of Risk resources for Biological, chemical hazards, radioactive events and threats in Bangladesh). Mapping done for the risk and resources and threats in Bangladesh and identified resources available to combat those problems.
- All hazard Public Health Emergency Contingency Plan for Hazrat Shahjalal International Airport (HSIA), Dhaka, was redeveloped in November 2019, which give necessary guidelines to lead during pandemics and communicable disease events and other public health emergencies.
- Extended Core committee meeting with stake holders (Designated POEs): Integrating collaboration between the aviation/navigation, custom and health departments at the POEs, reviewed the national legislations/acts/protocols available for the PoEs.
- Construction of the third terminal

started in December 2019 and is still under construction. According to the project design, the facilities of the terminal includes, 26 boarding bridges of which 12 will be built in the first phase and additional 14 bridges will be built at a later phase, 16 conveyor belts, 115 check-in counters including 15 self-check-in kiosk, 64 departure immigration desks, 59 arrival immigration, 3 VIP immigration desks and 10 automated 'e-gates' at the exit. For the passengers' convenience there will be 12 walkalators, 35 escalators, and 43 elevators. It is important to ensure public Health security in this Airport during any kind of Health Emergencies.

Accordingly, the mission was undertaken by IHR Programme, CDC, DGHS with the objective to assess the planned provisions for establishing optimal IHR Core Capacities and Health Services at the 3rd Terminal, HSIA and provide pertinent recommendation, including on public health related aviation provisions.

- The Global COVID-19 pandemic has put a tremendous strain on our overall healthcare system. The government's timely decisions and effective action have helped us to deal with this crisis successfully. The oxygen crisis is one of the most important components in the treatment of corona patients.

Bangladesh faced an increase in the number of COVID-19 cases, rising to the peak in the second wave during the 2<sup>nd</sup> - 3<sup>rd</sup> quarters of 2021. DGHS responded efficiently to the crisis to improve the national capacity for the provision of medical oxygen to meet the increased needs through enhancing the capacities of health facilities in the oxygen management system. The absence of information for quantification of need, aggravated by available

information in understanding the oxygen landscape in Bangladesh, and bringing together all the available data on oxygen production and consumption for the medical sector including an understanding of the industrial sector became necessary in order to prepare for any further wave Covid insurgence. In this respect, CDC, DGHS in collaboration with UNICEF, and other partners took initiative in undertaking the oxygen landscaping exercise to bring together all the available data on oxygen production and consumption for the medical sector and finalized the development of the national gas system in Bangladesh with a view to the development of a National Oxygen plan. Operationalization of the national, medical oxygen plan and the

associate guidelines towards the rational use of oxygen in the country, through evidence-based planning and informed decision-making on the oxygen system and capacity development in Bangladesh, would prepare the country for any future pandemic in a sustainable way.

### HEALTH SCREENING AT POINTS OF ENTRY (PoEs):

Pandemic or any disaster does not follow any immigration rule or political boundaries of the countries. International Points of Entries (PoEs) are now handling millions of people, many of whom may be potential **reservoirs** and transmitters of highly infectious diseases. It is necessary to be prepared beforehand for any outbreak of public health emergencies. So, that countries shall have core capacity requirements at the designated airports, seaports and ground crossings “for responding to events that may constitute a public health emergency of international concern (PHEIC) and be prepared to provide appropriate public health emergency response by establishing and maintaining a **public health emergency contingency plan**, including the nomination of a coordinator and contact points for relevant point of entry, public health and other agencies and services”[Annex1.B.2.aIHR (2005)]. According to IHR 2005 multiple ministries participation and active involvement is

necessary to ensure healthy environment of the ports of entry and ensure delivery of health services to the passengers and airport staff to implement IHR-2005. Moreover remain prepared to respond to any health related emergencies at the point of entry terminal.

CDC, DGHS, MoHFW has taken initiatives to strengthen PoEs capacities to prevent and control spread of diseases through points of entries (PoEs) (Table 1). The activities undertaken in collaboration and with technical support from International Organization for Migration (IOM) and WHO to increase core capacities at PoEs as mentioned in the IHR 2005 and thus ensuring the country's better preparedness against Public Health Emergencies (PHEIC).

**Table 1: Back ground information on existing (Functioning) PoEs:**

| Type of PoEs        | Number<br>In country | Designated<br>number(s) | With core<br>Capacity assessed | Designated<br>competent<br>authority |
|---------------------|----------------------|-------------------------|--------------------------------|--------------------------------------|
| Airports            |                      |                         |                                |                                      |
| International       | 3                    | 1                       | 2                              | 1                                    |
| Domestic            |                      |                         |                                |                                      |
| STOL                | 7                    |                         |                                |                                      |
| Sea Ports           | 2                    | 1                       | 1                              | 1                                    |
| Ground<br>Crossings | 23                   | 1                       | 11                             | 1                                    |

The IHR capacities in Bangladesh have been significantly improved over the past several years, reaching 71% and has exceeded both the global and regional averages.

## Intergovernmental Negotiation Body for IHR Amendments:

Due to catastrophic failure of the international community in showing solidarity and equity in response to the coronavirus disease (COVID-19) Pandemic, the World Health Assembly convened special sessions, where it established an Intergovernmental Negotiating Body (INB) open to all Member States and Associate Members ( and regional economic integration organizations as appropriate) to draft and negotiate a WHO convention, agreement or other international instrument on pandemic prevention, preparedness and response, with a view to its adoption under Article 19, or under other provisions of the WHO Constitution as may be deemed appropriate by the INB. DPM and Senior Adviser IHR Programme, CDC, DGHS attended the meetings physically and online.

**INB Meeting Zeneva**

### TRAINING:

- Orientation and awareness meeting was done with all doctors, nurses, sanitary inspectors and other related staffs of Hazrat Shahjalal International Airport (HSIA).
- Training was done for doctors, Nurses, immigration, customs, airline operators and related staffs on prevention and control of Corona virus in Bangladesh of Hazrat Shahjalal International Airport (HSIA).

- Awareness and dissemination meeting was done on IHR-2005 & Emerging Re Emerging Diseases for Pilots, crews and related staffs of different airlines.

## RISK COMMUNICATION:

- The communication materials for risk communication and community engagement, developed by CDC ensuring that people have the right information, delivered in the right way, to take appropriate and proportionate steps to protect themselves.

- Real-time exchange of information, advice and opinions between experts or officials and people who face a hazard or threat to their survival, health, or economic or social wellbeing. It enable people at risk to make informed decisions to mitigate the effects of a threat (hazard) – such as a disease outbreak – and take protective and preventive measures. Risk communication

is proven to be a critical tool in emergency preparedness and response. It is a core capacity of

the International Health Regulations (IHR 2005) and is one of five strategies within the Pandemic Influenza Preparedness (PIP) framework.

- Developing relationships and structures that engage communities as equal partners in the creation of emergency response solutions that are acceptable and workable for those they impact in important. Lessons learned in risk communication and community engagement initiatives during COVID-19 & in every public health emergency have informed subsequent response efforts, leading to planning that better integrates risk communication into operational activities and brings communities to the forefront as valued and essential partners for effective, equitable and inclusive emergency preparedness and response.
- Health messages were given to passengers through leaflet, X stand, digital stand, electronic message, video clip etc.

### PREPARATION OF SOPS AND GUIDELINES:

- Guidelines were prepared to ensure treatment, infection prevention and control at different level and in the community to prevent and control Emerging & RE Emerging Diseases and increase mass awareness in the community. (These guidelines were given in the DGHS website- <https://www.dghs.gov.bd>)

## Surveillance and Control of Mosquito vector at HSIA

One of the core capacity for PoEs is capacity building for vector surveillance and control at points of entry and up to (at least) a 400-metre perimeter around them. CDC organizes evidence-based vector control strategies, and if necessary invoking emergency measures to control the mosquito vector at HSIA in collaboration with Airport authority and Dhaka North City Corporation.

## MIGRATION HEALTH

**GOAL:** To improve the health status of all categories of migrants and protection of their fundamental right to health.

### OBJECTIVES:

1. To establish a strategic Monitoring & Information System (MIS)
2. To enhance policy and legal framework & provide support for the health and social protection of migrants
3. To enable existing health & social welfare systems to be more migrant sensitive
4. To facilitate multi-sectoral partnership for migration health at national and regional level

Migration health addresses the physical, mental and social needs of migrants and their families, and the public health needs of communities of the countries of origin and destination, through policies and practices corresponding to the emerging challenges facing mobile population today. Migrants constitute large number of population moving out of the country and generating huge remittances. Despite the migrant's great contribution to the economy of Bangladesh, it is unfortunate that they are often exposed to occupational health hazards and have very limited access to health benefits. Health of migrants has become a more prominent concern of the government as Prime minister stated in the 64th World health assembly for the country's commitment to ensure the welfare of migrants especially by migrant inclusive health policies.

### STRATEGY:

The government of Bangladesh is committed to improving the health status of all categories of migrants including inbound, outbound and internal migrants throughout the migration process, and for the progressive realization and protection of their fundamental right to health.

- To establish a strategic Monitoring and information system (MIS) for Migrants, Health
- To enhance policy and legal framework of migration health to provide support for the Health and social protection of migrants
- To enhance policy and legal framework of migration health to provide support for the Health and social protection of migrants

- To enhance policy and legal framework of migration health to provide support for the Health and social protection of migrants
- To enable existing health and social welfare system to be more migrant sensitive
- To facilitate multi-sectoral partnerships for migration health at national and regional Level

## **FUTURE PLANS**

- Assessment and revision of legislation
- Develop a surveillance system to detect radiation and chemical related events
- Develop a mechanism to share data on surveillance and the control of public health events of international concern (PHEIC) with neighbor countries
- Conduct national risk assessment to identify potential country specific urgent public health events
- Mapping available national resources for IHR relevant hazards
