

EPI Surveillance Bulletin

18th NID coverage and Upcoming Measles Vaccination Campaign

Bangladesh has successfully completed 18th NID. Analysis of data from the independent observers checklists show that high coverage in this 18th NID has also been achieved. According to the findings of the data 98.4% of the targeted 22 million 0-59 months old children were provided OPV nationally. 92.7% of those children were vaccinated at NID sites and 5.7% during house to house child search. Division wise coverage is also ranging from 97.2% in Barisal to 99% in Sylhet.

Measles Vaccination Campaign with OPV Distribution:

The Measles vaccination campaign integrated with OPV distribution will be conducted as a rolling campaign in two weeks from 14-28 February 2010 through EPI outreach sites without hampering routine EPI sessions. In the rural areas, regular vaccinators will work in routine EPI outreach sites. In all routine EPI sites vaccination will be done from 8 am to 3 pm in all working days including Saturday. In the urban areas all trained vaccinators will work in all EPI sites. At least one fixed site in all UHC, District Hospital, Medical College Hospital, City Corporation Ward and Municipality will remain open on every working day during campaign.

All children aged 0-59 months will be vaccinated with OPV regardless of previous vaccination status and all children aged 9 - 59 months will be vaccinated with Measles vaccine considering the eligibility in this Measles vaccination campaign. Children who will receive OPV on the day of campaign will be tallied as campaign doses. Only those who will eligible for routine OPV on the day of routine EPI sessions will be tallied as routine doses and all other children will be tallied as campaign doses. However, a child who received measles vaccine within last 28 days will not be eligible to get vaccine; the child should wait until 28 days are over and if possible get vaccine in the campaign. If a child has not received routine measles vaccine, the dose given during campaign will be considered as campaign dose. The guardian of the child will be requested to bring him/her to any routine EPI sites after 28 days to get routine dose of Measles before the child's second birth day.

In order to make the measles vaccination campaign a success all preparations are underway. Training has been completed for all supervisors, workers, vaccinators and volunteers. Registration of target children, IPC with household members, religious leaders, and public representatives; advocacy meeting at national, divisional, district, upazila, city corporation and municipalities level; meeting with professional bodies like Bangladesh Medical Association (BMA), the Pediatric Association, renowned Medical Professionals and News Editors are being done.

Bangladesh Television, Bangladesh Betar, Private TV Channels, News papers, department of mass communication and renowned personalities are being going to contribute a lot in mass awareness. Like previous national campaign the health and family planning field workers are relentlessly working with NGO workers and volunteers from all walks of the community to sensitize people and implement the campaign successfully.

We are very much optimistic to effectively complete the upcoming measles vaccination campaign with OPV distribution with support from all walks of people. Let us work together sincerely to make the campaign a real success.

Surveillance Summary

| Description | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 ¹ |
|--|------|------|------|------|------|------|------|------|-------------------|
| Number of AFP cases | 1287 | 1365 | 1128 | 1301 | 1458 | 1619 | 1844 | 1790 | 1501 |
| No. of compatible cases according to virologic classification system | 36 | 0 | 0 | 2 | 0 | 2 | 0 | 0 | 0 |
| No. of cases with isolation of wild poliovirus | 0 | 0 | 0 | 0 | 0 | 18 | 0 | 0 | 0 |
