Make 17th NIDs a Success

Bangladesh was polio free since 22 August 2000 before the importation of wild polio case on 8 **January** 2006. Since the detection of 1st polio case Rahima at Chandpur district due to importation from India, Bangladesh has conducted four rounds of 13th NIDs, two rounds of 14th, 15th and 16th NIDs and mop-up campaigns in 2006 and 2007 to stop the transmission and importation of wild polio virus. As for today the last case of polio in Bangladesh was detected on 22 November 2006. But the threat of new importation is still valid. Globally four countries are still endemic for polio. These are India, Pakistan, Afghanistan and Nigeria. As the country is surrounded by polio endemic India, in order to maintain the polio free status Government of Bangladesh has planned to observe the 17th NIDs in 29 November 2008 (First round) and 3 January 2009 (Second round) following 4 days child-to-child search after each round. This decision has been taken in the meeting of the National Committee for Immunization Practices (NCIP) with the Secretary, Ministry of Health and Family Welfare in the chair. It was also decided that vitamin-A will be provided to 1-5 years old children in the first round and anti-helminthic (Albendazole) to 2-5 years old children in the second round along with OPV.

To maintain polio free status the following issues should be considered-

1. Strengthen routine EPI coverage with special emphasis in hard-to-reach and high risk population
2. Observance of high quality NIDs
3. High sensitive disease surveillance activity
4. Effective outbreak response of polio importation in compliance with global recommendation

For successful observance of 17th NIDs all preparatory activities have been taken and the calendar of events has been finalized as follows-

Events	Date
National advocacy and planning meeting	21-Oct
Divisional/CC advocacy and planning meeting	26-30 Oct
District/CC zonal advocacy and planning meeting	2-6 Nov
Upazila/Municipality advocacy and planning meeting	3-13 Nov
Upazila/CC/Municipal level supervisors and FWs orientation	9-20 Nov
NID volunteer orientation	16-27 Nov
Interpersonal communication through house visit by FWs	26 Oct-27 Nov
Review and finalization of NID micro-plan and vaccine management form	26 Oct-13 Nov
National and District level press briefing	27-Nov
NID Miking	27-28 Nov
Inauguration of 17th NID at national level	28-Nov

The following issues should be considered for successful implementation of 17th NIDs-

- Review and update the NIDs micro-plan
- Make effective utilization of NIDs fund specially the additional support
- Strengthen supervision at all level including hard-to-reach and high-risk areas
- Adequate and strategic placement of teams for mobile population
- Organize the NIDs site in a visible place
- Involve institutional volunteers and assign them as team leader for NIDs fixed site
- Organize evening/night sessions for street children and children of working mothers
- Formation of mobile team and route map to visit the places where children might be found (Hospital, Clinic, Orphanage, Prison, Rice mill, Construction site, Day labours in Hat-bazar etc.)

Multi-sectoral participation is essential to make the NIDs successful. For that reason the involvement of different public-private sectors should be ensured like as previous NIDs. NGOs, Teachers-students, Rotarians, Imams, Police, Ansar-VDP, Chowkidar, volunteers should work together along-with Health and Family Planning department.

Extensive mass media campaign have been chalked out to build up people's awareness and to ensure their active participation. Bangladesh Television, Bangladesh Betar, Rotary international, Private TV channels, Newspapers, department of Mass Communication, Press Information Department, Cell phone companies, Banks, Private entrepreneurs, renowned personalities committed their contribution for 17th NIDs. Printing of all training and communication materials from national level has been completed and started to send at different level.

We hope that with all of our concerted efforts and contribution we can make the 17th NIDs successful and maintain polio free status of our country.

Surveillance Summary

Description	2001	2002	2003	2004	2005	2006	2007	2008 [1]
Number of AFP cases	1287	1365	1128	1301	1458	1619	1844	1504
No. of compatible cases according to virologic classification system	36	0	0	2	0	2	0	0
No. of cases with isolation of wild poliovirus	0	0	0	0	0	18	0	0
No. of discarded polio cases (i.e., non-polio AFP)	1251	1365	1128	1299	1458	1599	1844	1392
No. of cases pending classification	0	0	0	0	0	0	0	112
Expected annual number of non-polio AFP cases (1/100,000 children <15 yr)*	533	549	556	563	1094	1114	1135	1153

AFP Surveillance Performance Indicators

Indicators	Target	2001	2002	2003	2004	2005	2006	2007	2008 [1]
01 Annual Non-Polio AFP rate in children < 15 years old	≥ 2.0	2.34	2.49	2.03	2.31	2.66	2.87	3.25	3.06
02 Completeness of passive reporting from facilities	≥ 90%	65%	62%	67%	82%	91%	89%	90%	94%
03 Timeliness of passive reporting from facilities	≥ 80%	38%	36%	62%	75%	84%	83%	85%	88%
04 Suspected AFP cases investigated within 48 hours of notification	≥ 80%	96%	96%	98%	98%	99%	100%	99%	99%
05 Confirmed AFP cases with 2 stool specimens collected within 14 days after paralysis onset	≥ 80%	80%	89%	90%	90%	92%	93%	92%	92%
06 Stool specimens arriving at laboratory within 3 days after collection	≥ 80%	97%	98%	99%	99%	98%	99%	100%	100%
07 Stool specimens arriving at laboratory in "good" condition "good" = 1. Presence of unmelted ice or temperature <8°C 2. Adequate volume (≥ 8 grams or size of ½ thumb) 3. No evidence of leakage 4. No evidence of desiccation (drying)	≥ 90%	100%	99%	100%	100%	100%	100%	100%	100%
08 Confirmed AFP cases receiving a follow-up exam at least 60 days after paralysis onset	≥ 80%	93%	99%	100%	98%	99%	100%	100%	95% [2]
09 Stool specimens with laboratory results: - Within 28 days after specimen receipt (old algorithm)	≥ 80%	99%	100%	100%	100%	100%	98%	100%	-
- Within 14 days after specimen receipt (new algorithm)	≥ 80%							80%	94%
10 Stool specimens from which non-polio enterovirus (NPEV) was isolated	≥ 10%	29%	28%	23%	20%	20%	15%	15%	23%

[1] *Data as of October 11, 2008;* [2] *among cases occurring up to July 27, 2008; * Prior to 2005 NPAFP rate calculated as 1/100,000 under 15 children*
