

EPI Surveillance Bulletin

Epidemiologic Week 32: August 3 - 9, 2003

Vol. 6 No. 7

Aug 2003

Decision of NSC: Bangladesh to Mark Three Years of Polio Free; 12th NIDs Dates Fixed

On 22 August 2003 Bangladesh reaches an important landmark on the road to polio free status. On this day in 2000, Dolly, a 4 month-old girl from Mirpur of Dhaka City had onset of paralysis caused by poliovirus. Since then our high quality surveillance system has not identified a single case of polio in Bangladesh.

poliovirus from India. This threat must not be underestimated as several cases have been found in close proximity of Bangladesh's border districts of Satkhira, Jessore, Kushtia and Thakurgaon. Therefore, in the letter of appreciation addressed to all concerned in polio eradication along with recognition and praise for their work, Honorable Minister of

Shishu Shishu Proti Shishu Khuje Fero Proti Shishu !

Health and Family Welfare Dr. Khandaker Mosharraf Hossain will urge them to continue their support for polio eradication activities. These activities include the successful implementation of the 12th NIDs, strengthening of routine EPI and maintaining high level of surveillance through timely reporting of all cases of AFP in children under the age of 15 years. Signing of the letter of appreciation will be followed by a press conference and a talk show to be aired on both the national radio and television.

On 7 August 2003, the National Steering Committee decided to implement the 12th NIDs according to following schedule:

18 January 2004: 12th NIDs 1st round (OPV)

19-22 January: Child-to-Child Search

29 February: 12th NIDs 2nd Round (OPV+ VitA)

1-4 March: Child-to-Child Search.

The 12th NIDs will play a very important role in protecting Polio Free status of Bangladesh and efforts should be made to vaccinate each and every child under 5 years of age in both its' rounds.

EPI takes this opportunity to congratulate the readers of Surveillance Bulletin and all the persons involved directly or indirectly with polio eradication on this occasion and to wish you all a happy continuous polio free Bangladesh!

Surveillance Summary for 1998-2003 (through Epidemiologic Week 32, August 3-9, 2003)

| | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 ¹ |
|---|------|------|------|------|------|-------------------|
| Number of AFP cases | 475 | 761 | 1138 | 1287 | 1365 | 752 |
| No. of clinically confirmed polio cases | 298 | 322 | 197 | NA | NA | NA |
| No. of compatible cases according to virologic classification system | NA | NA | NA | 36 | 0 | 0 |
| No. of cases with isolation of wild poliovirus | 10 | 29 | 1 | 0 | 0 | 0 |
| No. of discarded polio cases (i.e., non-polio AFP) | 165 | 439 | 941 | 1251 | 1365 | 661 |
| No. of cases pending classification | 0 | 0 | 0 | 0 | 0 | 91 |
| Expected annual number of non-polio AFP cases (1/100,000 children <15 yr) | 495 | 505 | 515 | 533 | 549 | 556 |

AFP Surveillance Performance Indicators:

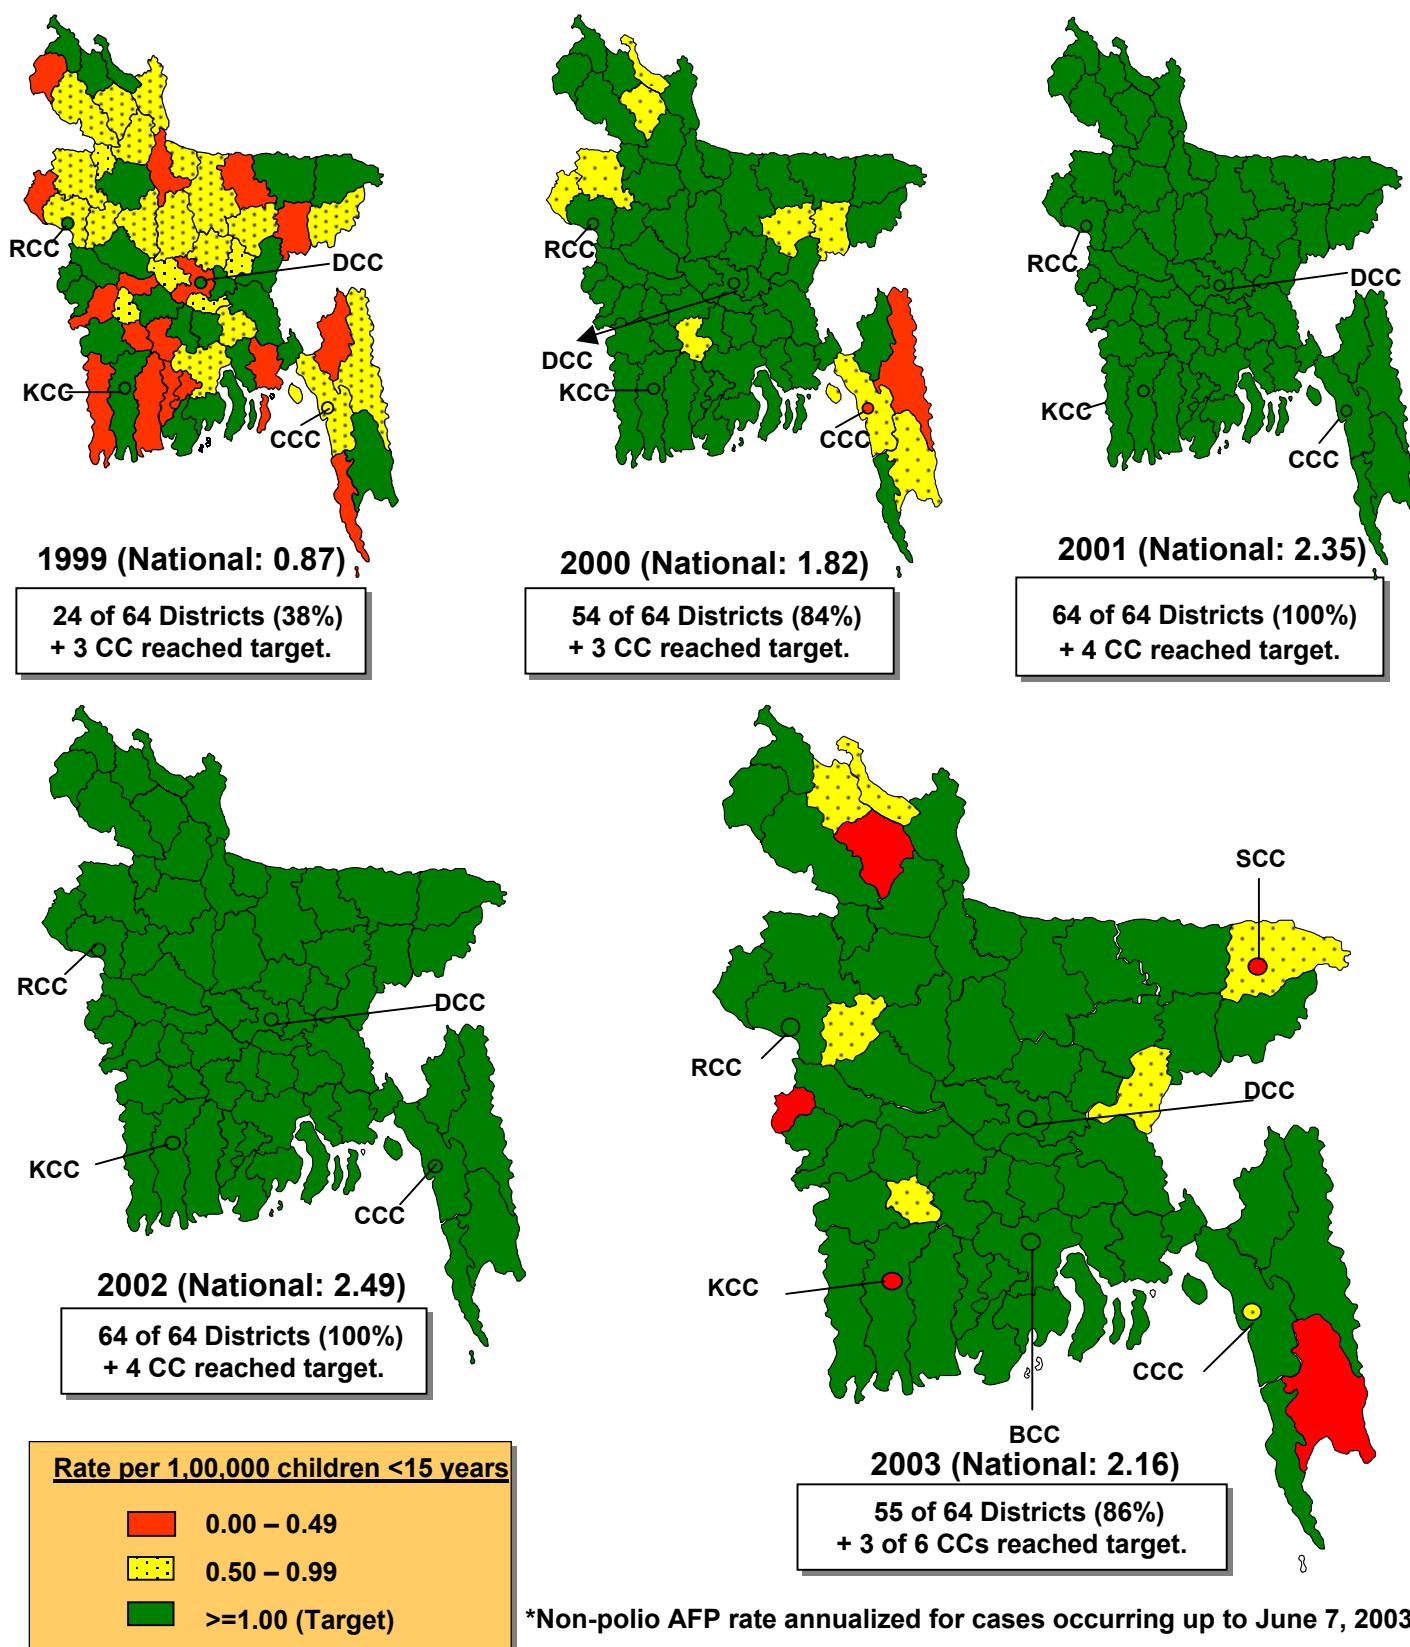

| Indicator | Target | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|---|-------------|------|------|------|------|------|-------------------|
| 1. Annual Non-Polio AFP rate in children < 15 years old | ≥ 1/100,000 | 0.33 | 0.87 | 1.82 | 2.35 | 2.49 | 2.16 ² |
| 2. Completeness of active reporting from hospitals | ≥ 90% | 46% | 73% | 95% | 100% | 100% | 100% |
| 3. Timeliness of active reporting from hospitals | ≥ 80% | 15% | 44% | 72% | 88% | 100% | 100% |
| 4. Suspected AFP cases investigated within 48 hours of notification | ≥ 80% | 89% | 83% | 93% | 96% | 96% | 97% |
| 5. Confirmed AFP cases with 2 stool specimens collected ≤ 14 days after paralysis onset | ≥ 80% | 59% | 49% | 68% | 80% | 89% | 90% |
| 6. Stool specimens arriving at laboratory ≤ 3 days after collection | ≥ 80% | 88% | 81% | 92% | 97% | 98% | 100% |
| 7. Stool specimens arriving at laboratory in "good" condition "good" = 1. Presence of unmelted ice or temperature <8°C 2. Adequate volume (≥ 8 grams or size of ½ thumb) 3. No evidence of leakage 4. No evidence of desiccation (drying) | ≥ 90% | 92% | 97% | 100% | 100% | 99% | 100% |
| 8. Confirmed AFP cases receiving a follow-up exam at least 60 days after paralysis onset | ≥ 80% | 80% | 97% | 95% | 93% | 99% | 89% ³ |
| 9. Stool specimens with laboratory results ≤ 28 days after specimen receipt | ≥ 80% | 16% | 58% | 94% | 99% | 100% | 99% ⁴ |
| 10. Stool specimens from which non-polio enterovirus (NPEV) was isolated | ≥ 10% | 5% | 13% | 21% | 29% | 28% | 23% |

¹ Data as of Aug 9, 2003; ² NPAFP rate annualized for cases according to Jun 7, 2003; ³ among cases with inadequate stools occurring up to May 10, 2003; ⁴ as of Jul 11, 2003.

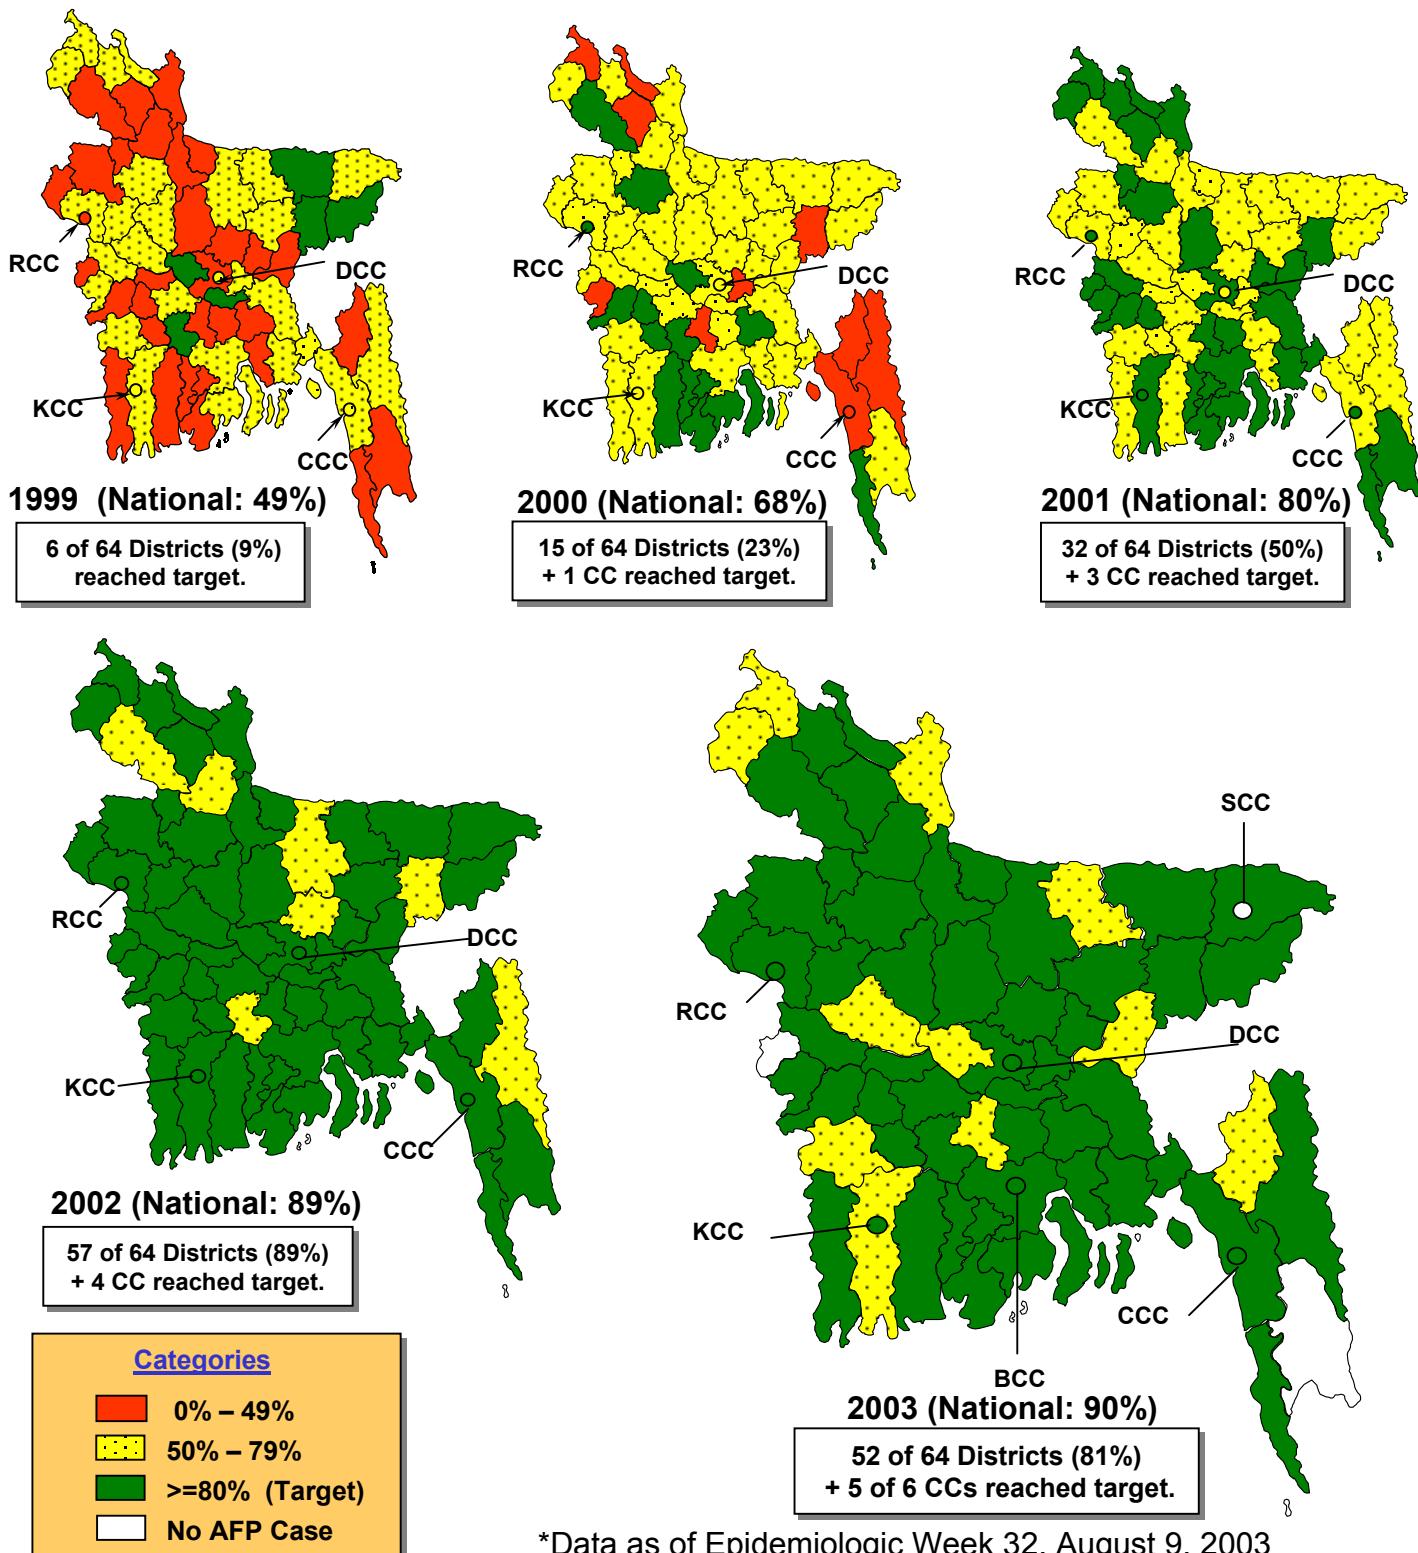

| District | # Expected non-polio AFP | Total # AFP ¹ | Wild polio-virus isolated | # Compatible cases | Non-Polio AFP cases ¹ | Pending final classif. ¹ | Annualized Non-polio AFP Rate ² (1,00,000) | Notification within 10 d after paralysis onset ¹ | Investigation within 48 h after notification ¹ | % with 2 stools within 14 days ¹ | Stool sample arriving to lab within 72 hrs ¹ | # eligible for 60-day follow-up ³ | % with 60-day follow-up ³ |
