Message

The Government of Bangladesh is committed for ensuring quality healthcare and health professionals education for all concerned. We are trying to strengthen the health and education systems by adopting strategies for the best use of all available resources and restructuring management systems. I am extremely delighted to know that the first **“Medical Education Bulletin 2022”** is going to be published with an innovative idea. I hope this yearly publication of the Directorate General Medical Education (DGME) will be considered as an evidence in medical education field which can be utilized by the policy people as well as other stakeholders of health professionals education. Under the committed, strong and wise leadership of Honorable Prime Minister Sheikh Hasina, Bangladesh made significant progress in the health sector as reflected through achievements of MDG targets. The Government of Bangladesh is now considering attainment of the targets of Sustainable Development Goal (SDG) both as an opportunity and a challenge.

The Bangladesh Health Workforce Strategy-2015 was developed and came into effect in 2016. Since then, many changes have taken place in health system especially emergence of COVID-19. In the present context of Medical Education & Family Welfare Division, Ministry of Health & Family Welfare and Directorate General Medical Education (DGME), it is the need for a formal strategic plan for development of medical education for the future health workforce in Bangladesh.

I expect it to improve continually with the innovative strategies of medical education. To keep pace with current development of teachers, students of health professionals' educational institutes should have recent advance updated knowledge and skills of medical education. So, I appreciate the efforts of Directorate General Medical Education (DGME) for this Medical Education Bulletin. I thank WHO Bangladesh and other stakeholders for their valuable inputs for publishing in this document. I expect more innovative ideas and detailed data of health research related to Health Professionals Education (HPE) in the public and private sectors to enrich the medical education leading to achieve the goals of health and prosperity for all.

Joy Bangla, Joy Bangabandhu.

Message

It is a great pleasure for me to know that the Directorate General of Medical Education (DGME) is going to publish the first "**Medical Education Bulletin, 2022**". This will be an annual flagship publication from the DGME, ME&FWD. It will also serve as a reflection of achievements and future challenges of Medical Education in Bangladesh. After achieving Millennium Development Goals (MDGs) Bangladesh has made remarkable progress in the journey of achieving Sustainable Development Goals (SDGs) & Universal Health Coverage (UHC). It has been recognized by awarding Honorable Prime Minister Sheikh Hasina, Government of the People's Republic of Bangladesh in 2021 at UN meeting. To achieve SDGs and UHC quality Health Professionals Education (HPE) is the gate way to ensure better health care system.

The art of medical education is about the change of conventional ideas how to cope with the health systems. Effective change is essential to maintain enthusiasm to invest in the health professionals education to ensure health care of the future. Health Professionals Education provides several important insights for optimal change of different professionals. Positive role models and learning environment are the examples of those intended professional and organizational behavior. Effective teaching learning, educational tools like e-learning systems, good assessment and feedback system, curriculum development are all pivotal components of the educational process.

In the perspective Plan of Bangladesh (2021-2041), Government of Bangladesh is committed to achieve High-Income status by 2041. To contribute to the achievement of that status, Ministry of Health and Family Welfare (MOH&FW) is in preparation of the fifth sector program, which aims to strengthen the health system as well as the health professionals education system for high quality health care and health professionals education for ensuring services to the people of Bangladesh. I hope this Medical Education Bulletin 2022 will be the reflection of present context of medical education and can be used as evidence of progress in medical education in Bangladesh as a ready reference.

I appreciate the hard work of personnel in the DGME for this publication. Their efforts in this innovate idea for publishing medical education bulletin is also praiseworthy. I hope they will continue their good works, despite our limitations and constraints.

Md. Saiful Hassan Badal

Message

Professor Dr. AKM Amirul Morshed

Director General

Directorate General of Medical Education (DGME)

Mohakhali, Dhaka

I am really delighted to present the first “**Medical Education Bulletin 2022**” to our distinguished readers. This annual publication of DGME will be an innovative document with facts and figures regarding medical education for all concerned stakeholders. Bangladesh has made glorious achievement in health sector by providing need based quality health services to the people with available resources. After achieving Millennium Development Goals (MDGs) four and five Bangladesh is now in the era of Sustainable Development Goals (SDGs). Government of Bangladesh (GOB) has committed to achieve universal health coverage (UHC) & SDGs by 2030. In the meantime, COVID-19 pandemic situation has explored the gaps in access, quality, equity in education & service and also in financial risk protection.

Bangladesh health care system is continuously aspiring for providing quality health services through quality medical education by producing competent health professionals. So maintaining quality of education through proper governance is the demand of the present time. In this circumstances, the Directorate General Medical Education was established under Medical Education and Family Welfare Division of the Ministry of Health and Family Welfare (MOHFW) in Bangladesh on 24th November, 2019.

In the coming years, as the health care and biomedical research landscapes evolve, we will ensure that we respond to the educational needs of the country and of the health professionals education. To keep pace with current development, both teachers and students of health professional's institutes must gain new skills to be competent for effective communication, teaching-learning, assessment, instructional materials development and curriculum development. Competent teachers must be able to capture the attention of today's students by helping them to learn to act as future change agent. Medical education is a multifaceted process and so the quality improvement in medical education is a great challenge. National Quality Assurance Body is performing the activities as per developed National tools and guidelines on QAS for Medical Colleges.

Publishing this “**Medical Education Bulletin 2022**” is an enormous and difficult task but I am very happy that my colleagues for doing their jobs efficiently. This publication will be used as authentic evidence for different sectors of medical education. I am highly grateful to Honorable Minister, Ministry of Health and Family Welfare (MOHFW) and the Honourable Secretary of Medical Education and Family Welfare Division for their kind cooperation, constant support and guidance in all of the activities regarding publication of this bulletin. I am also thankful to those who contributed at different steps of the publication of this bulletin including WHO Bangladesh, HRB, HSD. Constructive advice from the readers and multiple stakeholders will help to improve and quality of the yearly bulletin in future.

Message

I am extremely pleased on publication of the first Medical Education Bulletin 2022 by Directorate General of Medical Education (DGME) under the Ministry of Health and Family Welfare (MOHFW), Bangladesh. Given that medical education processes, data and information are not readily available in the country, the publication of the bulletin will enable easy access to data for the medical education system in Bangladesh.

The health workforce, which comprises doctors, dentists, nurses, midwives, pharmacists, and many other categories, is the foundation of the health system and ensure effective and quality health service delivery. Medical education systems, led by MOHFW, play a vital role in developing appropriately skilled health workforces.

Gaps in disaggregated data on different categories of skilled health professionals, licensed and registered professionals with geographical distribution adversely affect the human resource planning and management. The Medical Education Bulletin is expected to address these data gaps.

Since its inception in 2019, WHO Bangladesh has supported the DGME in strengthening its education management information system (EMIS). We are heartened to see the gradual progress in the development of HR database. As we advance, we encourage DGME to strive further to establish a comprehensive and interoperable online EMIS at DGME to generate an automated Medical Education Bulletin every year.

I congratulate DGME for their dedicated effort in the publication of this Bulletin and wish them all the best for the future. I also reiterate WHO's commitment to supporting the Government and people of Bangladesh in improving the national health education system as well as advancing health system performance towards achieving Universal Health Coverage and SDGs.

Editors' Desk, Medical Education Bulletin 2022

Greetings from the editorial desk of the Medical Education Bulletin 2022, Research, Publication & Curriculum Development wing, Directorate General of Medical Education (DGME). Medical Education Bulletin (MEB) 2022 is the first ever type of it in Bangladesh published by DGME under Medical Education and Family Welfare Division (ME&FWD), MOH&FW with the support from WHO & HRB, HSD. It is planned to be published yearly and made available in print and online version. This will allow free access by all concerned stakeholders to its contents. MEB is dedicated to publishing achievements, near future plans, news, awareness, research, information related to Medical Education from DGME, this medical education bulletin will disseminate updated knowledge of current situation of Medical Education of Bangladesh & also will act as a living document by generating evidence in the field of health professionals education.

This MEB will be a common platform by the medical education personnel who are trying to plan, develop and maintain a standardized medical education not only for physicians but also for nurses, midwives, medical technologists and other allied health professionals. We are confident that MEB will be one of the most appropriate common communication media/material in the near future, among and by the all health professionals.

Medical education is continuously aspiring for providing quality health services by producing competent health professionals. It is also trying for updating the curriculum, faculty development with novel innovations. For that, maintaining quality of health professionals' education through proper governance is the present crying need of Bangladesh.

From its establishment in 2019, DGME is working for continuous development of the standards of medical, dental and allied health professionals education along with upgradation of health professionals' institutes. Curriculum development, faculty development, teaching-learning, teachers evaluation, assessment system, instructional materials development, research methodology and bio-statistics, educational management and leadership, financial management, ICT in health professionals' education, blended learning, governance & administration, integrity in medical education, professionalism, mental health and educational environment, patient safety, health ethics, doctor patient relationship, health rights & rights of health professionals and social accountability of health professionals institutes are the major areas of interest to work by DGME under ME & FWD.

DGME made a three years journey to achieve standardized medical education with quality. DGME also paid tremendous effort for effective & balanced health workforce development & its utilization in the history of Medical education in Bangladesh.

Bangladesh could face the challenges of maintaining teaching-learning sessions by adopting e-learning and online sessions and providing adequate health care, medical commodities, diagnostic testing, and intensive care even in the full-blown epidemic of COVID-19. Now a days, we need to change the behavior and attitude of the health professionals as well as to improve the spirit and dynamics of their mental health. So, we have to face the challenges for proper time felt utilization of their upgraded knowledge, skill and attitude to fulfil the demand of the society. system performance towards achieving Universal Health Coverage and SDGs.

We encounter problems of shortage and imbalanced production of health professionals, their maldistribution and certification of the health professionals with inadequate competencies and imbalanced skills which need immediate attention with a strategic policy & direction to achieve the targets of UHC & SDGs by 2030. Licensing examination for registration of health professionals can be a way out in this regard.

We have to expand the horizon & enlighten the system by sharing the views and ideas of the key personnel of home and abroad. We are ready to accept and incorporate the scientific research findings specially in line with global and regional health professional's education to enrich medical education of Bangladesh and also for production, development, deployment and retention of health workforce in medical education sector.

We hope better days with a new era of quality medical education ensuring adequate and equitable access to health care.

Directorate General of Medical Education (DGME): A brief description

According to the Gazette issued by the Cabinet division dated 16/03/2017, the Ministry of Health and Family Welfare has been reorganized into Health Services Division and Medical Education and Family Welfare Division.

Pursuant to this, in the notification dated 25/08/2019 of the Ministry of Public Administration, with 149 new posts and 29 previous posts have been transferred and granted the establishment of Directorate General of Medical Education.

Directorate General of Medical Education was established on 24/11/2016 with the notification of Medical Education and Family Welfare Division, Ministry of Health and Family Welfare.

Ministry of Finance issued a notification on 16/09/2019AD for the transfer of 31 posts permanently and 118 posts on year-to-year reservation basis and 29 posts in the structure of Directorate General of Medical Education (DGME).

In continuation of this, in the notification dated 25/08/2019 of the Ministry of Public Administration, with 149 new posts and transferring 29 previous posts to form the following structure of Directorate General of Medical Education with a total of 178 manpower-

Director General : 01 person

Additional Director General : 02 persons

Administration (01)
Medical Education (01)

Director : 09 persons

Medical education (01)
Administration (01)
Human resource management (01)
Planning and development (01)
Financial management (01)
Research, publication and curriculum development (01)
Alternative medicine (01)
Discipline (01)
Dental education (01)

Deputy Directors:

11 persons

Government & Private Medical Colleges (01), Administration (02), Training (01), Discipline (01), Financial Management (01), Planning & Development (01), Human Resource Management (01), Alternative Medicine (01), Dental (01), Research Publication & Curriculum Development (01).

Assistant Director

: 16 persons

Administration (04), Training (01), Human Resource Management (01), Discipline (01), Budget (01), Audit (01), Planning (01), Development (01), Government Medical College (01), Private Medical College (01), Alternative Medicine (01), Dental (01), Research Publication and Curriculum Development (01).

Vision

Establishing, ensuring, and maintaining standards in medical education institutions in order to secure national health care by producing qualified and competent manpower.

Mission

Maintaining a high standard of medical education provision in all academic settings.

Strategic Objectives:

- Strengthening supervision activities in medical educational institutions.
- Production of quality trained manpower from medical educational institutions.
- Formulation and updating of laws, rules, policies, strategies, curricula related to medical education.
- Construction of physical infrastructure of health professionals' educational institutions, development and expansion.
- Increasing opportunities for medical education through establishment of e-libraries.

Major Activities of DGME

- Continuing the development and improvement of the quality of all public and private medical colleges, dental colleges, and allied health professionals' institutes.
- Ensuring quality education at post graduate institutes for development of post graduate health professionals.
- Taking steps to ensure smooth implementation of proper guidelines leading to quality improvement in the education system of IHT and MATs and monitoring as per policies.

Major Areas under DGME

- Both government and non-government following institutes-
- Medical College
- Dental College
- Dental Unit of Medical College
- Institute of Health Technology (IHT)
- Medical Assistant Training School (MATS)
- Homoeopathic Medical College
- Unani and Ayurvedic Medical College
- Centre for Medical Education

Current number of public and private medical institutes under DGME:

SI No.	Institution	Public	Private	Total
1	Medical College	38	74	112
2	Dental College	1	8	9
3	Dental Unit of Medical College	12	14	26
4	Institute of Health Technology (IHT)	15	97	112
5	Medical Assistant Training School (MATS)	11	200	211
6	Homoeopathic Medical College (with Diploma)	3	68	71
7	Unani and Ayurvedic Medical College (with Diploma)	3	38	41
	Total	83	499	582

Current seats in medical educational institutions at public and private level (as per HRH data sheet 2022):

SI No.	Institution	Public	Private	Total
1	Medical College	4525	6808	11333
2	Dental College and Unit	565	1405	1970
3	Institute of Health Technology (IHT)	2765	8895	11670
4	Medical Assistant Training School (MATS)	922	12824	13746
	Total	8777	29882	38659

Achievement and near future plan of different departments of DGME

Medical Education Department, DGME

Achievements

1. Arrangement of MBBS and BDS admission test centrally
2. Establishment of IHT and MATS admission test centrally
3. Conduction of Homeopathic, Unani and Aiurved admission test centrally
4. Organize web portal online application of MBBS/BDS admission for foreign students
5. Preparation of Equivalence Certificate for foreign and abroad studying students for MBBS, BDS, IHT, MATS course
6. Provided technical support in nursing admission test

Near Future Plan:

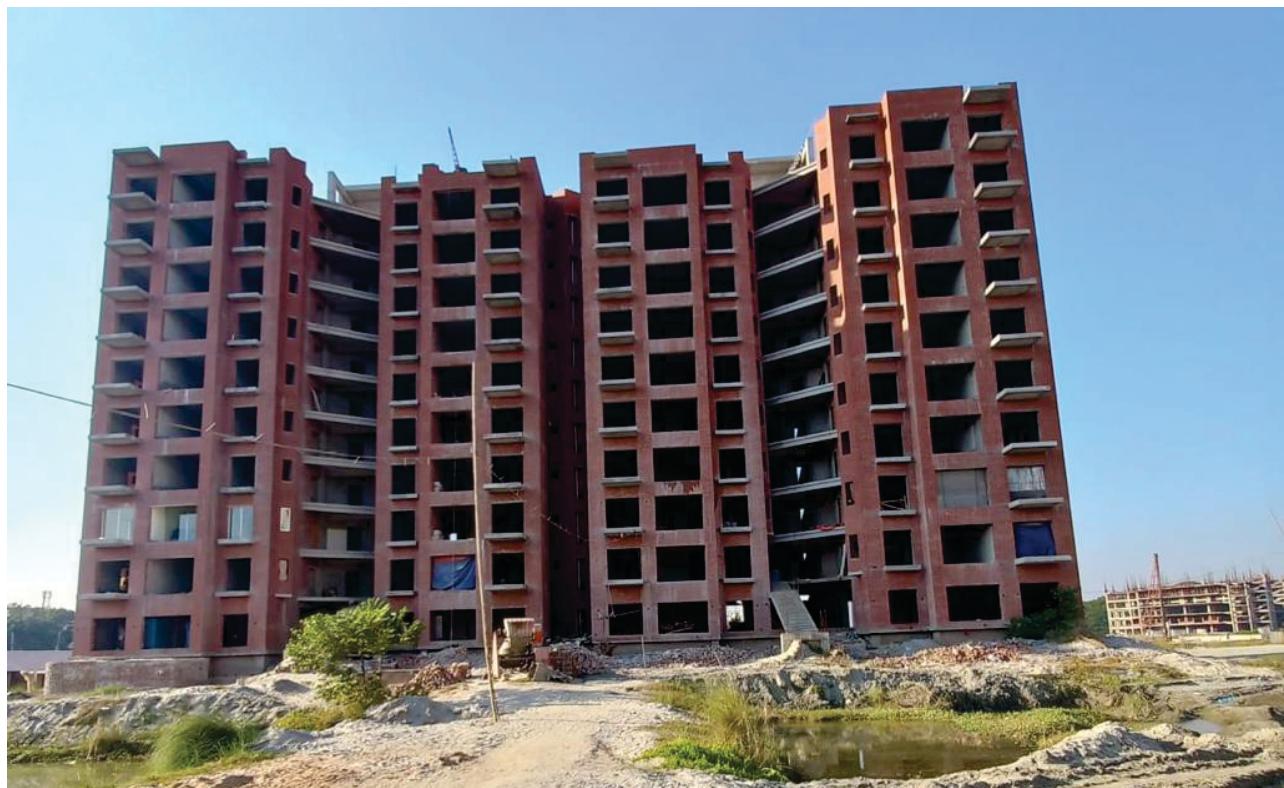

- Develop online database for Government and Non-government medical college information in systematic and sustainable way
- Strengthening of medical education and quality assurance analysis by supportive supervision
- Accelerate the activities of pair group review between two peer medical colleges
- Enhance technical support through proper communication for logistics and increase teacher number for IHT, MATS, Medical College (where applicable)

Achievements:

1. Directorate General of Medical Education has completed the feasibility Study of -
 - Project of Establishment of Chandpur Medical College and Hospital and nursing college nineteen (19) hostels with modern facilities in 10 different Medical colleges
 - Netrokona, Hobiganj, Magura and Noagaon Medical College and Hospital and Nursing college
 - Khulna Dental College & Hospital and Mugda Medical College
 - Chandpur IHT
2. DGME planning wing has prepared the DPP for-
 - Establishment of Medical College & hospital and Nursing College in Chandpur, Netrokona, Hobiganj, Magura and Noagaon districts
 - nineteen(19) hostels with modern facilities in 10 different Medical colleges
 - Khulna Dental College & Hospital and Mugda Medical College
 - Chandpur IHT
3. Developed a proposal for feasibility study for infrastructural development of Dhaka Dental College.
4. Proposal for manpower of- 19 Hostels in 10 different medical colleges projects have been approved.
5. Technical Assistance proposal for Establishment of Management Information System (MIS) has been sent to ministry. Another Technical Assistance Proposal has been proposed for developing competency based allied health workforce .
6. Central Student Portal and Foreign Students Portal which is a part of DGME automation is currently operating in the Planning department of DGME.
7. A proposal for standard Set up for medical college and hospital equipment has been sent to ministry with updated suggestion and tentative price from different medical colleges, hospitals and institutes.
8. DGME planning and development is authorized for drawing and design for establishment of MATSs & IHTs.
9. Completed one project successfully in due time- Fesibility study of Khulna Dental college and Mugda Medical College.
10. One project is going on- Establishment of Shaheed Tajuddin Ahmad Medical college, Gazipur. Civil work of Hospital building is complete, Civil work of Academic building, Boys and girls hostel, Doctors quarter, Boundary wall , land development, electrical works, distribution of furniture and equipment are at final stage.

Near Future Plan:

- To provide physical excellence in medical education environment.
- To establish enough healthy infrastructural development in Medical & dental Colleges and Hospitals.
- To monitor the achievements of different developmental projects under DGME.

Human Resource Management (HRM), DGME

Achievements

1. According to the direction of the Medical Education & Family Welfare Division, Ministry of Health and Family Welfare, standard set up of manpower of various medical colleges and health service institutions, 10 beds, 20 beds (trauma), 31 beds upazila, 50 beds district, 100 beds upazila and district, 250 bed district, 600 bed non-teaching hospitals, IHT, MATS, A proposal for standard manpower of 16 medical educational institutes and 37 medical colleges in various groups have been sent to the Medical Education and Family Welfare Division, Ministry of Health and Family Welfare. Ministry of Public Administration is working on the Standard Set up and implementation is under process.
2. Quality Assurance Scheme (QAS) has been re-enforced by regular inspection to improve the quality of the teaching -learning in different government medical colleges.
3. A standard web site (www.dgme.gov.bd) has been developed for the DGME. Currently the work of enriching and updating the information on the web site is going on.
4. The proposal for technical assistance in developing individual MIS for the DGME has been passed and initiatives have been taken to complete it in the shortest possible time.

Near Future Plan:

Development of MIS/HRIS for new Directorate General of Medical Education.

Achievements

1. The feasibility Study for Khulna Dental College & Hospital has been completed.
2. Providing assistance to the Director General, Directorate General of Medical Education (DGME) for inspection to take measure for renewal, increase of seats, discipline, and quality control of various government and private dental colleges/units for up-gradation and uplifting the standard of dental education.
3. Arranging of different training for the skill development of teachers of dental colleges & units.
4. Coordinating with ministry for 936 new post-creation of eight government dental units & 148 new post-creation of Dhaka dental college.
5. Coordinating national level selection process of students for admission in to Government and Private & dental colleges/units.
6. Preparing periodic reports on manpower situation of public and private dental colleges/units and follow up of career planning activities.

Near Future Plan:

- Establish Khulna Dental College & Hospital.
- Establish and take permission for admission of BDS students to Sheikh Lutfar Rahman Dental College, Gopalganj.
- Review & updating of BDS curriculum'2016 and teaching system for standardization & up-gradation.
- Convert dental units of medical colleges to dental colleges.

Financial Management, DGME

Achievements

1. Training on financial management and procurement for principals/vice-principals/focal persons of government medical colleges/MATS/IHT.
2. Training on financial management and procurement for staffs of government medical colleges.
3. Introduction and approval of annual procurement plan for all government medical colleges.
4. Introduction of D-nothi at financial management section of DGME.
5. Allocation of budget for medical colleges/MATS/IHT.

Near Future Plan:

- | Training on financial management and procurement for the members of different committees of procurement process.
- | Improvement of financial management regarding budgeting and budget utilization through training sessions, physical visit, zoom meeting etc.

Achievements

1. Admission of Bachelor of Unani Medicine and Surgery (BUMS), Bachelor of Ayurvedic Medicine and Surgery (BAMS) & Bachelor of Homeopathic Medicine and Surgery (BHMS) courses in all graduate level Unani, Ayurvedic & Homeopathic Medical Colleges at Government and Private level is done on the basis of merit through centrally coordinated admission test through Directorate General of Medical Education (DGME).
2. According to the decision of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation (BIMSTEC) "Task Force on Traditional Medicine" (BTFTM) 4th meeting, the website creation work required by the Ministry of Health and Family Welfare has been completed for the purpose of creating a similar Pharmacopoeia on traditional medicine among BIMSTEC member countries.
3. The Faculty of Unani and Ayurvedic Medicine ran by the Private Hamdard Bangladesh has been affiliated under the Public University (University of Dhaka) as per the policy of the Directorate General of Medical Education.
4. All the information of all government and private level Unani, Ayurvedic & Homeopathic Graduate and Diploma Medical Colleges of Bangladesh has been collected and preserved.
5. Upgradation of Unani, Ayurvedic and Homeopathic Graduate Course Curriculum.

Near Future Plan

- Upgradation of existing teaching facilities of Government Unani and Ayurvedic Medical Colleges & Government Homeopathic Medical College and establishment of more graduate Unani, Ayurvedic & Homeopathic Medical Colleges.
- Revision of BUMS, BAMS & BHMS course-curriculum and preparation of Post graduate Course-Curriculum for MD, MS.
- Preparation of standard treatment guidelines of Unani, Ayurvedic & Homeopathic systems of medicine in the context of Bangladesh and preparation of Unani, Ayurvedic & Homeopathic Pharmacopoeia to maintain safety, efficacy & quality.

Allied Health Professionals Education: MATS & IHT, DGME

Achievements

1. Introduction of four years academic course at IHT & MATS from the session 2022-2023
2. Post Creation of 5 new government Institute of Health Technology at (i) Chottogram, (ii) Sylhet (iii) Rangpur (iv) Barisal and (v) Khulna.
3. Allotment of Revenue Code of 4 new government Institute of Health Technology of (i) Chottogram (ii) Sylhet (iii) Rangpur and (iv) Barisal.
4. Commencement of academic activity of IHT Madaripur.
5. Initiation of post creation procedure of 15 new government IHT at (i) Tungipara, Gopalganj (ii) Manikganj, (iii) Madaripur, (iv) Shahid M. Monsur Ali IHT, Sirajganj (v) Satkhira, (vi) Gopinathpur, Akkelpur, Joypurhat, (vii) Gazipur (viii) Sreenagar, Munshiganj (ix) Kabirhat, Noakhali (x) Dhamoirhat, Naogaon, (xi) Sunamganj (xii) Shibchar, Madaripur (xiii) Mymensingh (xiv) Nageswari, Kurigram and (xv) Joypurhat Puraton Hospital, Joypurhat.
6. Initiation of post creation procedure of 9 new government MATS at (i) Tungipara, Gopalganj (ii) Manikganj, (iii) Kobirajpur, Rajoir, Madaripur (iv) Pangsa, Rajbari (v) Jhenaidah (vi) Satkhira, (vii) Patnitala, Naogaon (viii) Kajipur, Sirajganj and (ix) Gazipur.
7. Drafting of new recruitment rules for government MATS and IHT.
8. Initiation of administrative approval procedure of 12 new government MATS and 12 new government IHT.

Near Future Plan:

- Commencement of academic activity in 5 new IHT and 5 new MATS.
 - Those five IHT are at (i) Manikganj (ii) Sreenagar, Munshiganj (iii) Nageswari, Kurigram (iv) Kabirhat, Noakhali (v) Dhamoirhat, Naogaon
 - & Those five MATS are at (i) Manikganj (ii) Pangsa, Rajbari (iii) Gazipur (iv) Kajipur, Sirajganj and (v) Kobirajpur Rajoir, Madaripur.
- Filling up all the newly created/vacant posts.
- Allotment of Revenue Code of all the new IHT and MATS.
- Introduction of supervised clinical training of the students of MATS and IHT.
- Ensuring need based supply of different goods to MATS and IHT.

Research, Publication & Curriculum Development, DGME

Achievements

Developed-

1. MBBS curriculum in 2021
2. Three Operational Manuals of Phase I MBBS course in 2022
 - Anatomy
 - Physiology
 - Biochemistry
3. MT-EPI course in 2021
4. Health Assistant course in 2021
5. MATS Curriculum in 2022

Medical Technology Diploma Curricula of 13 courses for IHT are also developed-

6. Medical Laboratory Technology (DMLT)
7. Dental Technology (DDT)
8. Intensive Care Assistant (ICA)
9. Pharmacy Course,
10. Radiology & Imaging
11. Physiotherapy
12. Radiotherapy
13. Sanitary Inspectorship
14. Operation Theatre Assistant
15. Occupational Therapy
16. Prosthetics & Orthotics
17. Cardiology
18. Cardiac perfusion

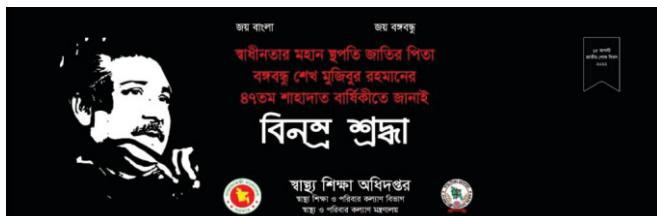

Near Future Plan

1. To review & update BDS curriculum 2016
2. To develop operational manuals (more 8 subjects) of Phase II, III & IV of MBBS curriculum 2021
3. To completion of review & updating of Unani & Ayurvedic and Homeopathic curricula
4. To develop capacity of medical teachers on conducting research & publications
5. To establish “Research Cell” at each health professionals institutes
6. To publish “Medical Education Bulletin 2023”

Administration, DGME

- Ensuring the administrative services of the officers and employees under the Directorate General of Medical Education and its affiliated institutions
- Grant all types of leave or its advancement
- Transfer of officers & staff in public interest or on application
- Completion of the recruitment process of 11 -20th grade staff
- Grant of post retirement leave or advancement of its for final withdrawal of fund
- Complete and implement annual performance agreements (APA)

Annual Performance Agreement (APA)

Annual Performance Agreement (APA) is the innovative approach in an organization to increase accountability, enhance performance and use of resources properly. The Government of Bangladesh has introduced performance evaluation system, known as Annual Performance Agreement (APA), for all Government offices since 2014-15 financial years. The purpose was to encourage activities those are result oriented as well as to ensure institutional transparency, accountability, proper utilization of resources and above all enhancing institutional efficiency. During preparation of APA documents, each Government organization has to select its respective strategic objectives (SO) for performance enhancement.

There are two types of SO's:

strategic objectives those are set by respective offices according to the major responsibilities of the office and mandatory strategic objectives (MSOs) those are set by the Cabinet Division to ensure good governance, improve service delivery and enhance financial management in Government offices.

Every MSO has some activities those describe the tasks to achieve it. Some of the activities include promoting E-filing, implementation of National Integrity Strategy, use of Unicode in office documents, introduction of Innovation/Small Improvement Projects, Citizen's Charter and Grievance Redress System etc.

The features of APA are as follows: APA is target based and time bound;. Targets are generally explained by vision, mission, strategic objectives, activities and indicators set by an office for a financial year. APA is evaluated against a total score of 100. This score is distributed among the strategic objectives. Each strategic objective has activities and every activity has performance indicator/s. Scores are also distributed against each indicator. The targets are measured in five scales: excellent (100%), very good (90%), good (80%), fair (70%) and poor (60%).

The Directorate general of Medical Education (DGME) has signed APA contact with Ministry of Health and Family welfare from its establishment in 2019 performed all strategic objectives with in due time.

This year in 2022 DGME has signed APA with ten Government medical colleges also.

Disciplinary actions

1. Bringing various cases and writs to the notice of the concerned court in coordination with the Department/Ministry.
2. Disciplinary opinion/dismissal for sanction of promotion, selection grade, skill limit, LPR, pension and exemption from service, conducting personal hearing if necessary.
3. Disciplinary matters of all officers and employees of the Directorate and the institutions under its jurisdiction such as investigation of complaints, unauthorized absence, departmental cases, disposal of appeals, temporary suspension etc.

Achievements

- Soft/scan copy of all old case files from hard copy.
- Soft copy/scan copy of all incoming letters.
- Saving the soft copy/scan copy of all incoming letters including cases in Google Drive.
- In the light of the letters received about the complaints raised in various medical colleges, forming the inquiry committee and submitting the report to the Ministry at the earliest.
- Issuance of certificates as soon as possible to professors, assistant professors, associate professors, lecturers working in various medical colleges in view of the application for various needs.

Under the Operational of Medical Education & Health Manpower Development, DGME

Achievements

1. Supply of furniture, computer accessories & other educational materials to Bangladesh College of Physicians & Surgeons (BCPS) costing about two core & fifty lacks taka.
2. Allowance of Research grant to 407 persons for the improvement or post graduate education.
3. Arrangement of eight workshops for developing the post graduate education more up to date.
4. Supply of furniture, computer accessories, chemicals, modern medical equipment's and others educational materials to 37 Medical Colleges, 26 IHTs and 22 MATSs costing about 76 core taka.
5. To implement Residential Field Site Training (RFST) allowance given to 660 medical students.
6. Establishment of E-library to make the medical education modern and up to date.
7. Establishment of simulation lab in 8 medical colleges for modernization of medical education.
8. Training was imparted to 525 medical teachers to increase their teaching skills.
9. Curricular reform for MATS to comply the present world standard paramedical education.
10. Training was imparted to 3950 doctors, 26350 health workers & 2900 SACMOS about their duties & responsibilities working at Upazilla Health Complex.
11. Medico-legal training was imparted to 1400 doctors
12. Training was imparted to 240 person for improving their computer skills.

Near Future Plan

Targets of Medical Education and Health Manpower Development Operational Plan in FY 2022-2023 are as follows-

- | Total 500 research grants will be provided through BCPS
- | Thirty seven (37) Medical Colleges, 26 IHT and 22 MATS will be provided furniture, computer equipment, chemicals, modern medical equipment and other educational materials as per demand
- | Total 4000 medical and dental students will be provided to implement residential field site training.
- | Maintain of e-Library.
- | More 08 Simulation Lab will be Established.
- | Total 700 medical teachers will be imparted research methodology training.
- | Total 700 medical teachers will be provided training mental health issue.
- | Total 440 health services provider will be provided updated IT training.
- | Training of 525 Medical teachers will provided to improve the skills of teaching methodology.
- | Around 350 doctors will be provided medico legal training.
- | About 1800 SACMOs at Upazila and district level will be trained on responsibilities and duties.
- | Around 14000 health workers at Upazila and district level will be trained on responsibilities and duties.
- | Total 2700 doctors at Upazila and district level will be given training on responsibilities and duties.
- | About 7000 health workers at Upazila and district level will be provided on financial management, office management, store management training.
- | Around 240 people will be provided computer training.

Centre for Medical Education (CME) Mohakhali, Dhaka

Achievements

1. CME conduct two years Masters in Medical Education (MMEd) course.
 - Total admitted 154, total 118 have passed the MMEd course
 - Current batches: 19th Batch (6 students) in Part II, 18th batch (6 students) is beginning their thesis part and 17th Batch (11 students) is about to appear thesis examination.
2. Conduct one year Postgraduate Diploma in Health Professions Education (PGDHPEd).
3. In 2021 CME had conducted an “Online Certificate Course on Medical Education (e-CMEd)” where more than 400 medical and dental teachers were enrolled and among them 298 medical and dental teachers successfully completed the training.
4. CME acts as the national secretariat of NQAB since 1998 as per developed National tools and guidelines on Quality Assurance Scheme (QAS_ for Medical Colleges.
5. CME conducts 5 days training on “Teaching Methodology & Assessment”, where 267 medical and dental teachers were trained in 2021-22 fiscal year.
6. CME conducting 3 days training on “e-based academic activities”, where 150 medical and dental teachers were trained in 2021-22 fiscal year.
7. CME is publishing two issues of peer reviewed “CME Journal” every year.
8. From January, 2022 CME had started wider scale sensitization training on “Teaching Methodology & Assessment” for the medical teachers by TOT programme by its own initiative. In 1st phase total 1461 participants from 34 medical institutions completed this training and in 2nd phase total 2583 participants from 59 medical institutions are on the way to complete the training.
9. CME has initiated for promoting & introducing Blended Learning in medical, dental, nursing & allied health professionals institutes.
10. Conducting need based projection of specialist physicians of Bangladesh with the collaboration of WHO.
11. CME regularly develop, review and update MBBS, BDS, IHT all courses, MATS, SIT, EPI and HA Curricula.
12. CME conducts training on Teaching Methodology and Assessment for the teachers in IHT, MATS, and other allied health professionals institutes.
13. Provide technical support & collaboration to DGME, BM&DC, SMFB, BNMC, BPC, DNMS, DGHS, ME&FWD, MOH&FW, Dean offices, Medical & dental Colleges, BSMMU, BCPS.
14. CME work as “WHO Collaborating Centre for Medical Education” since 5 August 2016 till now.

Near Future Plan

- Training of Medical Teachers:
 - All medical teachers-5 days training on “Teaching Methodology & Assessment”
 - Assistant Professor- 21 days training on Basic Concept of Teaching,
 - Associate Professor- 7 days on Teaching Methodology and Assessment,
 - Professor- 7 days on Leadership and Management

- Training of Allied Health Professionals (Nursing, IHT, MATS, Homeopathy, Ayurvedic & Unani medicine) on “Teaching Methodology & Assessment.”
- Training on Research Methodology and Publication, Blended Learning and E-learning.
- Establish an “Institute for Teachers Training & Research on Health Professionals Education”

Accreditation in Medical Education

Accreditation is a process by which a designated authority reviews and evaluates an educational institution or program against a clearly defined set of standards. Accreditation as a tool for performance improvement. It is global issue since 2010 raised by World Federation of Medical Education (WFME), Educational Commission for Foreign Medical Graduates (ECFMG), USA and World Health Organization (WHO).

As per ECFMG- "In 2010, ECFMG instituted medical school accreditation by a recognized accrediting agency as a future requirement for ECFMG Certification. The goal of this initiative, now known as the Recognized Accreditation Policy, is to stimulate accreditation efforts worldwide and promote global standards for the evaluation of undergraduate medical education.

The progress to date has been dramatic. Many accrediting agencies have sought recognition, enhancing the quality of medical education around the world.

ECFMG continues to hold medical school accreditation as vitally important to ensuring the quality of medical education and, ultimately, patient care. ECFMG plans to launch the policy in 2024 in a way that both maintains the importance of medical school accreditation by a recognized agency and acknowledges that global events have disrupted key aspects of the accreditation and recognition processes. When the policy is initially implemented in 2024, it will not be a requirement for ECFMG Certification.

The most recent update to the implementation plan, and reflects the following:

- Initial implementation of the Recognized Accreditation Policy will begin in 2024 as planned.
- Initial implementation will involve reporting a medical school's recognized accreditation status in the *World Directory of Medical Schools* and in the ECFMG Status Reports for IMGs who apply to U.S. training positions using the Electronic Residency Application Service® (ERAS®).
- Initial implementation will not impede an individual's eligibility for ECFMG Certification.
- At the current time, the World Federation for Medical Education (WFME) and the National Committee on Foreign Medical Education and Accreditation (NCFMEA) of the U.S. Department of Education are approved by ECFMG for the recognition of medical school accrediting agencies.

The recognized accreditation policy will continue to evolve at ECFMG's sole discretion. the requirements of the policy are in addition to all other policies related to ECFMG Certification."

In line with WFME & ECFMG involving the South East Asia Regional (SEAR) Countries WHO-SEARO has developed criteria and standards for accreditation of Medical Institutes for this region. In Bangladesh Medical Education & Family Welfare Division, Ministry of Health & Family Welfare involving all concerned stakeholders has developed the "**Bangladesh Medical Education Accreditation Act 2021**" which has been approved by Cabinet.

Regulatory bodies in the field of health professional's education in Bangladesh

In this regard, medical education and family welfare division (ME & FWD), MOH & FW is the highest regulatory body. ME & FWD, MOH & FW operates and implements it directly and also its concerned directorates- such as, Directorate General of Medical Education (DGME) for medical, dental and allied health professionals (IHT, MATS), Homoeopathic, Unani and Ayurvedic education, Directorate General of Nursing and Midwifery (DGNM) for nursing and midwifery education in Bangladesh.

For graduate level Medical, Dental, Nursing, Homoeopathic, Unani and Ayurvedic education Faculty of medicine of different public universities (DU, CMU, RMU, SMU), specially in student enrollment, admission, curriculum endorsement, teaching-learning, faculty members, student assessments and rewarding certifications after completion of the respective courses along with the collaboration with the ministry and concerned directorates.

For post-graduate medical/dental education BSMMU looks after all concerned issues in collaboration with ministry and concerned directorates.

BMDC is the independent authority to approve MBBS, BBS, and all post-graduate medical and dental curricula, MBBS/BBS student enrollment and setting different criteria and standards for academic institutes, faculty members. BMDC also provides temporary and permanent license to the graduate and post-graduate medical and dental practitioners with the provision of renewal and suspension (if required). BMDC also provides certificates to the SACMOs who pass from MATS.

Bangladesh Nursing and Midwifery Council (BNMC) looks after the curriculum development, set criteria and standards for different nursing and midwifery courses, institutes/organizations, faculty members, monitor teaching-learning, student assessments and provides license through conducting licensing examination. For BSC/Masters courses in Nursing, student enrollments, teaching-learning, student assessments and certificates are given by the different public universities under its concerned faculty.

State Medical Faculty of Bangladesh (SMF, B) looks after the diploma level curriculum, teaching-learning, assessment, set criteria and standards for IHT and MATS under ME & FWD, MOH & FW in collaboration with DGME.

Bangladesh pharmacy council (BPC) looks after the diploma level curriculum, teaching-learning, assessment, set criteria and standards of diploma pharmacy course at IHT under ME & FWD, MOH & FW in collaboration with DGME.

Establishing a comprehensive education management information system (EMIS) at the Directorate General of Medical Education (DGME) under the Medical Education and Family Welfare Division (MEFWD)

The Directorate General of Medical Education (DGME) is the focal point for rendering educational services to the following professionals—medical doctors, dentists, medical specialists, medical technologists, medical assistants, pharmacists, and alternative care professionals. DGME performs a wide range of activities which require a robust education MIS (EMIS) to support its operational needs. In this regard, a scoping review was conducted in 2021 with technical support from WHO Bangladesh. The scoping review drew the skeleton of the future EMIS of DGME and following list of software/ICT components were exclusively identified. These components together will compose a comprehensive 360-degree MIS to support DGME with all its operational and service-related activities. Each of these components have their specific operational domain. Some components are standalone systems; however, some are interdependent and require data exchange protocols to support each other's functionality. DGME and relevant stakeholders identified these components keeping both short-term and long-term vision in consideration.

Table 1: Component of future EMIS at DGME

SI No.	Software	*Dependency
1.	Facility Registry (FR) - Facility Registry the central database to manage facility-related detailed information. The information includes facility location and address, administrative and functional type, infrastructure details, major services, a summary of the workforce (staff and posts). Also, the system is used to perform evaluations on facility infrastructure and services.	**Geolocation Registry
2.	Human Resource Information System (HRIS) - HRIS is a system for organizing, managing and distributing human resources optimally and tracking their HR activities. A complete set of HR processes should be available in the system. The processes include staff placement & distribution, resource planning, staff service particulars, HR processes like transfer, promotion, Release, Joining, PRL, leave, lien etc.	Facility Registry
3.	Student Information Portal (SIP) - This is a student-centric portal to capture and manage all the information related to students and their academic activities. The information includes student admission information, academic year, discipline, passing year and other academic milestones, i.e. internship, training, fieldwork, academic achievements.	Facility Registry
4.	Admission Test Management System (ATMS) - This is a public web portal for publishing admission related information. It contains online admission test registration forms, online payment gateway integration (bKash, Bank, Card), and has features for publishing results. The portal should be integrated with the DGME official website and DGME National Dashboard. Currently an automated process is already established in DGME. Further enhancement and	Facility Registry

	customization will be required.	
5.	Central Inventory & Logistics Management System (CILMS) - A web-based system to manage inventory and logistics. The system will track all goods and assets, report on the stock levels, manage vendors, track usage, expiry and need. This will help the organization reduce cost and effort by utilizing the inventory and logistics in the most optimal way.	Facility Registry, HRIS,
6.	DGME National Dashboard (ND) - A real-time dashboard is required to be developed mainly for the stakeholders to evaluate the progress of the organization at different administrative levels. The infographics, graphs and reports will be generated based on many data-feeds coming from all the different existing software systems and databases. The national dashboard will allow the stakeholder to take effective and timely decisions based on real-time data.	All available systems
7.	Remote Learning Platform (RLP) - This is an online web-based platform to facilitate remote learning and other academic activities between the students and the teachers. Digital libraries and knowledge centres will be integrated with this remote learning platform. Students can log in to this system and access a wide range of interactive, multimedia-based study materials related to their field of study. The remote learning platform includes features like virtual classrooms, assessment tools, assignment management, online exams and other necessary academic collaboration tools. The system should have the provision to incorporate advanced AR(Augmented Reality), VR(Virtual Reality) based learning tools.	DGME Website
8.	Digital Library & Knowledge Centers (DLKC) - There are several physical libraries located in different facilities under DGME, which can be made more effective by automating the library management process. This will ensure better management of library assets, optimize human resource needs, reduce the cost of operation and provide the quality service to the users of the library.	Facility Registry, HRIS, Student Information Portal (SIP), Logistics Management System
9.	Online Staff Training Portal (OSTP) - This is an online training and capacity building portal for staff. The portal will use audio-visuals and interactive training contents for remote, proactive and autonomous training of staff on topics like MIS, operational, administrative and other curriculums. The portal will track completion and provide certification to the participants. This will significantly reduce the overhead related to capacity building, cost of transportation and the need for real-time trainers.	Facility Registry, HRIS,

10.	DGME website update & integration - Enhance DGME website so that it can accumulate the public domain data from all existing systems and automatically publish in the website for easy access by citizens, students and staff. This information can include notices/announcements generated from HRIS, Student portal,	NA
	Logistic Management System etc. Update website content structure and introduce a content management system. As a part of the citizen service provided by DGME, a web-based one-stop query and response system for the public, students & staff should be added to the website.	
11.	Medical Dorms & Hostel Management System (MDHMS) - This is an online portal for managing dorms and hostels and the residents of these facilities centrally and distributedly. The system will give a clear picture of how many seats are vacant, occupied, occupied by whom and until when.	Facility Registry, HRIS, Student Information Portal (SIP)
12	Attendance Management System (AMS) - An attendance tracking system to track and report attendance of staff and students.	Facility Registry, HRIS, Student Information Portal (SIP)

Establishing the central human resource information system (HRIS) at the DGME: The journey has begun

Human Resource Information System (HRIS) is a web-based software platform where organizations can manage their staff information systematically with uniformity and consistency so that the present scenario of the workforce is visible to the administration with maximum details. This enables the stakeholders and policymakers to take effective and timely measures based on real-time data. HRIS also optimizes HR-related processes by reducing duplication, redundancy and complexity.

HRIS is the key component which will be at the centre of all operational and administrative processes under DGME. DGME needs to develop its own infrastructure in alignment with the web-based Central Human Resource Information System (CHRIS) of the Ministry of Health and Family Welfare (MOHFW) where a complete set of HR processes can be automated. This includes staff personal, academic and professional information, staff placement & distribution information, resource planning parameters, staff service particulars, and processes like transfer, promotion, join, release, PRL, leave, lien etc.

The information structure and the process flow of the successfully established Central HRIS (developed by MoHFW) should be adopted to maintain the national coding systems integrity and reporting data field consistency and ensure maximum interoperability. DGME can extend the existing HRIS and customize it based on specific needs and establish their own separate HRIS which will be exclusively the Directorate. However, API integration for automatic information exchange should be established with the existing systems to avoid all kinds of data duplication and redundancy.

Key Features

Following is a list of essential features required to make the HRIS operational. However, the system should eventually handle all the HR processes within the Directorate/organizations. The features should be modular and open for extension/modification maintaining the integrity of the information architecture.

1. Designation & Sanctioned-Post Registry

This is one of the core components of HRIS where posts of pre-defined designations are sanctioned for different facilities through the system. Creation of posts should be based on valid GO(Government Order) and should be handled by a central authority. Once a post/designation is created it will appear in the Facility Dashboard. A facility level user (i.e Facility Admin) will be able to view these sanctioned posts and assign staff against them. Facility level users should not have permission to create, update or delete any designation or post. If needed, he/she will reach the higher authority who can make necessary changes/corrections. The permission policy should be possible to be managed by the system administrator user group.

A specific designation consists of a fully-qualified name (i.e Professor, Accountant, etc) along with additional information i.e. group, class, discipline, pay scale. Bangladesh professional category and WHO Health Professional category etc. These fields should be configurable and easily manageable so that any update/change in these fields can be easily accommodated in the system.

2. Sanctioned post

A Post (also known as Sanctioned Post) is a designation created in a facility. Once a post has been sanctioned, a provider/staff can be placed in that post. A sanctioned post can be empty or filled. Total number of sanctioned posts is vital information and it should be centrally regulated. Only authorized users should be allowed to create, update, edit, delete and restore these posts. While creating/updating a post, the user will be required to provide a proof (i.e. Government

Order Copy) of the existence of the post(s). Data relation wise, a sanctioned post always belongs to a facility/organization. Posts under a facility can be viewed by accessing the facility details page. A sanctioned post consists of following attributes:

3. Staff/Provider Registry (Staff Database)

Provider/Staff Registry is a database of all the staff under DGME. A list of primary information that needs to be captured in this database. Additional information might be required to be tagged at a later stage during implementation.

4. HR Processes

Following HR processes should be established and automated through the HRIS. The processes are crucial for keeping the data up to date. The system should store a complete history of an organization and its staff in a chronological order. HR processes include (but not limited to)- Transfer, Promotion, Deputation, Additional Role Assignment, Leave, Lien, Retirement, Disciplinary actions, Training and Educational Qualification.

For further information, the 2021 WHO-DGME Scoping review report can be referred.

List of Government Medical Colleges

Total Courses: 50 (FCPS & MCPS) under BCPS (seats are not fixed)

Formulation of a faculty development guidelines for medical colleges in Bangladesh: key findings of an assessment

Background

Faculty members are the backbone of any educational institution or system. We can hardly think about any good educational institution without good and qualified faculty members. Now good faculty members are not always borne on their own. Studies indicate that teaching is not an innate gift. It is a process as well as an art. It evolves with the change of time, interest and technology. Hence, faculty members require support for development of good teaching skills. Faculty development has become an integral part of health professional's education today because of rapidly changing healthcare scenario. Advancement of medical technologies through the use of information and communication technologies, emergence of new diseases such as COVID-19, rapid globalization, litigation, and hunch for new technologies have led changes in the need and expectation of the society. Now society does not only want medical doctors or clinical experts but also good communicators, collaborators, managers, scholars, professionals, health advocates, above all, the society wants change agents. Are the contemporary faculty members ready for these? How do we develop those competencies or skills among them? What is happening in health professional education in Bangladesh in this regard? There is not much information available on this in Bangladesh. With technical assistance from WHO Bangladesh, DGME undertook an activity conducting a situation analysis and formulation of a faculty development framework for medical and dental colleges in Bangladesh in 2021.

Context

In all the MOHFW/GOB medical colleges, there are about 4,478 approved/sanctioned posts for the faculty members and out of them only 2,518 posts have been filled in (only 56%).

Table 1: Total faculty members in government medical colleges in 36 GOB medical colleges

Category	Total sanctioned posts (GOB)	Total Filled post
Professor	599	205
Associate Professor	1004	464
Asstt. Professor	1656	939
Curator	44	31
Lecturer	1175	879
Grand Total	4478	2518

It is well documented that the country has a severe shortage of basic science subjects related teachers in all medical colleges and this shortage has both short term and long-term impact on the educational system of the country.

Why do we need a faculty development guideline?

Faculty members are the key strengths of the academic institutions. All Institutions and individual disciplines strive to skill medical teachers, researchers and administrators for their evolving and current responsibilities, consequently, the competencies of faculty members are continuously being redefined due to change of time, interest and technology. Therefore, faculty development requires proper planning and implementation, which is critical to achieve the desired goals. There are probably as many barriers to implementing a faculty development programme as there are factors driving the

process. As a result of some of these factors, the focus of faculty development has shifted from individual teacher development to a more institutional and systematic planning approach, which can be perceived as top-down, and at the expense of individual academics.

Environmental context of each institution impacts on how faculty development is managed, however, any faculty development programme should address both the professional (i.e. in the interest of the institution) and the personal (i.e. benefiting the individual) development of teachers.

Faculty developers have a significant role to play as agents of change in terms of the promoting an institutional culture that

values both the personal and professional development of individual faculty members. To assist the faculty developers, this guide aims to identify some of the principles that have been reported to contribute to 'effective' and successful faculty development. These principles will not only meet the institutional needs, but also those of different disciplines and individual faculty members.

It is well documented that the country has a severe shortage of basic science subjects related teachers in all medical colleges and this shortage has both short term and long-term impact on the educational system of the country.

Why do we need a faculty development guideline?

Faculty members are the key strengths of the academic institutions. To assist the faculty developers, this guide aims to identify some of the principles that have been reported to contribute to 'effective' and successful faculty development. These principles will not only meet the institutional needs, but also those of different disciplines and individual faculty members.

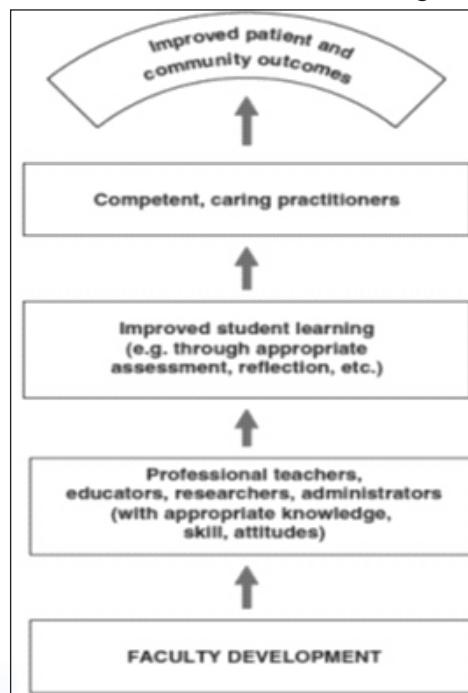

Fig. 1: Relationship between faculty development and med education outcomes

Barriers to faculty development

Many factors may impede faculty development, ranging from unsupportive leadership, resistance to change, lack of faculty motivation and an unwillingness of faculty members to acknowledge deficiencies in their teaching ability, knowledge or skills. Researchers have identified three major barriers impact on faculty development: lack of institutional support, misconceptions and attitudes of teachers and the relative paucity of research on what constitutes effective teaching improvement.

General Objectives

To formulate a faculty development framework for medical colleges in Bangladesh through conducting a situational assessment.

Specific Objectives

- To explore factors affecting existing faculty development methods and techniques practiced in different medical.
- To develop the framework of the faculty development guidelines based on the situational assessment and stakeholder's consultations.

Methodology

A technical working committee was established under the leadership of the Director General of DGME and the Centre for Medical Education (CME) took the implementation role of the assessment. The technical committee developed a questionnaire adapting the personal review form of the National Quality Assurance Scheme (NQAS). The questionnaire was sent to all 112 medical colleges (public and private) and 86 medical colleges responded to the call.

The findings of the survey report on faculty development guidelines are as follows-

- Distribution of the respondents (total 183) Govt. Medical College 88(48%), Non govt. 87(48%), Army medical college 4(2%) & Autonomous 4(2%)
- Distribution of the designation of respondents Principal 10(5.5%), vice principal 10(5.5%), professor 62 (33.9%), Associate Prof 37(7.5%), Assistant Prof 58(31.7%), Registrar 1(0.5%), Lecturer 8(4.4%) & Others 2(1.1%)
- Mean of identified competencies for faculty development in Bangladesh (in a 5-point scale)-
 - leadership skills: 4.11
 - administrative skills: 4.16,
 - teaching competencies: 4.17.
 - assessment competencies: 4.33
 - research: 3.69,
 - professionalism and role modeling: 4.20,
 - program design and implementation: 3.77
 - communication skills: 4.11.
- Do you have supportive environment in your college/institute to conduct research and write article publications? Fully supportive 78 (44.6%) , Somehow supportive 66 9(37.7%) & Neither supportive nor obstructive 25 (14.3%)
- For Faculty Development at medical College/Institute/Organization--- Medical Education Unit (MEU) as a separate unit/department 147 (82.6%), Provision of regular training for faculty members 120(67.4%), Exploring and providing necessary logistic and funding for attending national level trainings 115 (64.6%), Exploring and providing necessary funding for attending international level trainings 41(23.0%) & No provision of trainings at all 30(16.9%)

- Who plays key roles in deciding training for faculty members? -- Faculty member themselves 34 (19.4%), By the Principal 44(25.1%), Jointly (faculty and management) 70 (40.0%), CME/DGME/Ministry of Health and Family Welfare 27 (15.4%)
- How often do you have opportunity to attend in-service training?---Monthly 15(8.7%), Quarterly 11(6.4%), Half early 10(5.8%), Yearly 42(24.4%), Rare opportunity 78 (45.3%) & No provision of in-service training 16(9.3%)
- Where did you attend the in-service training ?--- At institute 76 (46.6%), At national level 31(19.0%), At CME 82 (50.3%), At DGME 16(9.8%), At DGHS 23(14.1%), MOH&FW 4(2.5%), At aborad 14(8.6%) & Others 5(3.1%)
- How do you best utilize the learning from attending in-service training?--- Improving teaching learning activities 145 (87.9%), Supporting students for learning 97 (58.8%), Constructing assessment tools 69 (41.8%), Conducting research activities 70 (42.4%), Improving patient care management 60 (36.4%)
- QAS & Practice of Faculty Development Programme-- Are you aware of the ongoing QAS? Yes 106 (61.6%) & no 66 (38.4%), Does your medical college have QAS? Yes 100 (60.2%) & no 66 (39.8%), Have you participated in FDP as per QAS yearly filling up "Personal Review From"? Yes 47(28.1%) & no 120 (71.9%)
- Faculty Development & Policy Decision - Are you aware of any national level faculty development guideline document? Yes 46 (28%) & no 117(71.3%), Do you think that we need to develop a guideline for faculty development for the medical colleges? Yes 136(100), Do you think that Medical Education Unit (MEU) at medical college/institute can be the right place to conduct faculty developed programme at your medical college/ institute? Yes 164(96.5) or no 6(3.5) & There is no faculty development guideline for medical colleges yes 76 (45.8%)
- Faculty shortage in basic sciences and paraclinical subjects in different medical colleges--- Lack of incentives (both financial and non-financial) 135 (81.3%), Lack of adequate number of posts in those teaching positions 88 (53.0%), No comprehensive effort undertaken to address the shortage issue. 98 (59.0%) & There is no faculty development guideline for medical colleges 76(45.8%)

Recommendations and plan for follow up actions:

- Establish a fair and transparent faculty development guideline with adequate resources and monitoring system.
- Introduce a comprehensive competency development framework for faculty members of the medical colleges.
- Introduce a faculty development guideline for all medical colleges in Bangladesh as part of the National Quality Assurance Scheme (NQAS).
- All medical colleges must have a functional Medical Education Unit (MEU) with competent faculty, staff, equipment & space. It must conduct seminar, symposium, workshops and other Continuing Medical Education (CME) and Continuing Professional Development (CPD) activities.
- The MEU must conduct at least one in a month CME /CPD activities in the medical colleges.
- Each department must conduct at least one per month CME /CPD activities in the respective department in collaboration with MEU.
- Establish a monitoring and accountability framework from college, Directorate to Ministry level.
- Regular lectureship examination for govt. medical colleges and developing lecturer pull for non govt. medical colleges through central examination.

- Developing faculty development framework as per identified areas with indicators and measurable outcomes
- Development of module on “Educational Management” incorporating leadership, management, administration and financial management for the teachers

National Quality Assurance Scheme (NQAS) in Medical Colleges of Bangladesh

The commitment towards Universal Health Coverage (UHC) urges for quality and equitable healthcare for all. Knowing the fact that 'no health without health workforce', there is a need to ensure quality health workforce in all places. To produce quality health workforce, quality education is a must. Quality education creates provisions for development of relevant competencies including knowledge and skills in a particular field. Appreciating the necessity of quality medical education, a National Quality Assurance Scheme (NQAS) was established in 1998 in Bangladesh. National guidelines and tools for quality assurance were revised and published in 2012 with support from the World Health Organization (WHO). Subsequently, the Government (GO) urged all medical colleges in Bangladesh to practice NQAS in their respective institutions.

Purpose of Quality Assurance Scheme:

- To achieve stated academic standards
- To improve teaching-learning & assessment quality and enhance students' achievement
- Support academic staff to enhance job satisfaction Improve Institutional academic performance

Principles of Quality Assurance Scheme:

- Accountability
- Self-evaluation
- External Peer Review

Overview of the NQAS:

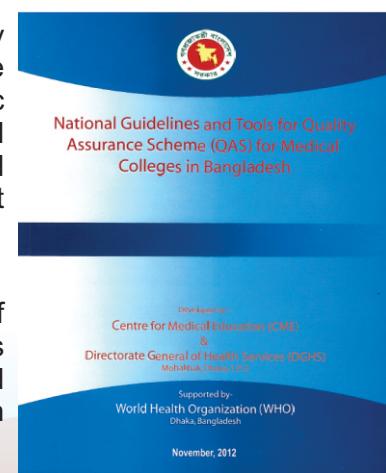

The NQAS aims to ensure academic standards and improve teaching-learning quality including students' achievements in a respective academic setting. Its composition includes two frameworks, namely organizational framework and operational framework. Organizational framework is comprised of national and institutional frameworks. In the national framework, a National Quality Assurance Body (NQAB) is constituted by: Director-General, Directorate General of Medical Education (DGME) (Chair) and Director, CME (Member Secretary) and CME is designated as the Secretariat. Other members are – Joint Secretary (ME), ME&FWD; President, Bangladesh Medical and Dental Council (BMDC); Director, Medical Education, DGME; Director (Dental Education), DGME, Deans, Faculty of Medicine of different public universities. The NQAB is given the responsibility of overseeing the overall activities of NQAS. The operational and institutional frameworks are described below:

Institutional framework:

The institutional framework of NQAS includes an Institutional Quality Assurance Body (IQAB) headed by the Principal of the respective medical college. The committees are the Academic Council, Academic Coordination Committee, Four Phase Coordination Groups, External Examiners, Exchange review visit team of academic coordinators and External review visit team by the Directors of DGME & student representatives.

Operational framework:

This framework includes a set of procedures by which, Bachelor of Medicine & Bachelor of Surgery (MBBS) education is assessed. This includes three areas: 1) Course appraisal, 2) Faculty development and review 3) External review. There are standard forms for reporting on each area, which are available in the guideline book.

Curricular Evolution & Reform in Bangladesh

The word “Curriculum” refers to a two wheeled Chariot drawn by horses in a race. Educationists adopted this word to refer to the “Study Track” along which students travel during a course of study. Word Curriculum derived from Latin word Race -course in 17th Century at University of Glasgow.

Curriculum is a formal plan of educational experiences and activities offered to a learner under the guidance of an educational institution. Curriculum in fact is an organised plan of course outlines, along with the objectives and learning experiences to be used for achievement of these activities.

Curriculum is the blue print that entails the goal of any educational activities and endeavor to achieve the goal. Curriculum refers to a series of planned activities that are intended to bring about specific learning outcomes.

Curriculum is not static, it is dynamic. Because –society is changing, diseases demography is changing, medical science expand exponentially, concepts of teaching are changing & newer teaching technologies are available. But- there is a proverb- “It is easier to change a graveyard than to change a curriculum.’ In such a context Bangladesh has taken initiatives to review and update all health professionals curricula time to time to update as per global standards. The evolution & reform of different curricula are given below--

Evolution of MBBS Curriculum since 1982, 1988, 2002, 2012 till 2021

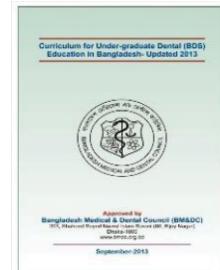

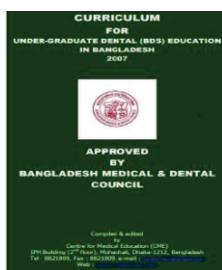

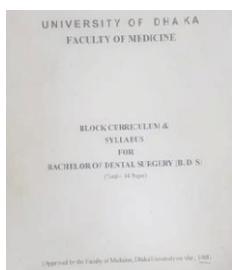

Major Highlights of Reviewed & Updated MBBS Curriculum 2021 under DGME -

- Generic Topics on Medical Humanities. Total 18 (Phase I:5, Phase II: 3, Phase III : 2, Phase IV: 3 & Internship :5) in four phases & during internship
- Related behavioral, professional & ethical issues will be discussed in all clinical and other teaching learning sessions
- Integrated Teaching: Total Topics =102, Total Hours = 259. [Phase I: 12 topics, (36 hours), Phase II: 7 topics, (17 hours), Phase III: 10 topics, (18 hours), Phase IV: 42 topics (common) (126 hours), Departmental: 31 topics, (62 hours), {Medicines 10, Surgery 11, Obs & Gynae 10 topics }]
- Emphasized clinical teaching including ambulatory care teaching
- List of competencies of each subject has been identified to acquire

- Preventive aspects of all diseases will be given due importance in teaching learning considering public health context of the country and others parts of the world.
- Residential Field Site Training (RFST) for 10 days at Upzilla Health Complex in 3 phase under Community Medicine & Public Health
- Inclusion of structured essay questions (SEQ), Single Best Answer (SBA) type of MCQ along with SAQ, MCQ – M/T, OSCE/OSPE & Structured Oral Examination (SOE) in assessment system
- Inclusion of CGPA
- No carry on system before passing 1st professional examination.
- Must join internship within one month after passing the final professional examination & must be completed within two years from the starting date of internship.
- Within one year (12 months) of internship period 11 months at respective medical college hospital and one month at Upazila Health Complex (UHC)/field level
- After taking admission into the first year of MBBS course, a student must complete the whole MBBS course (pass the final professional MBBS examination) within 12 years timeline

Evolution of BDS Curriculum since 1988, 2007 till 2016

To be reviewed
& updated in
2023

Major Highlights of Reviewed & Updated BDS Curriculum 2016

- Inclusion of Integrated Teaching
- Related behavioral, professional & ethical issues will be discussed in all clinical and other teaching learning sessions
- Emphasized clinical teaching-learning
- List of competencies of each subject has been identified to acquire
- Preventive aspects of all diseases will be given due importance in teaching learning considering public health context of the country and others parts of the world.
- Residential Field Site Training (RFST) for under Dental Public Health
- Inclusion of MCQ along with SAQ, MCQ-M/T, OSCE/OSPE & Structured Oral Examination (SOE) in assessment system
- Carry on system.
- Within one year (12 months) of internship period 11 months 15 days at respective dental college hospital and one month at Upazila Health Complex (UHC)/field level

Evolution of Medical Technology Curricula in Bangladesh since 1987, 2004, 2008 till 2022

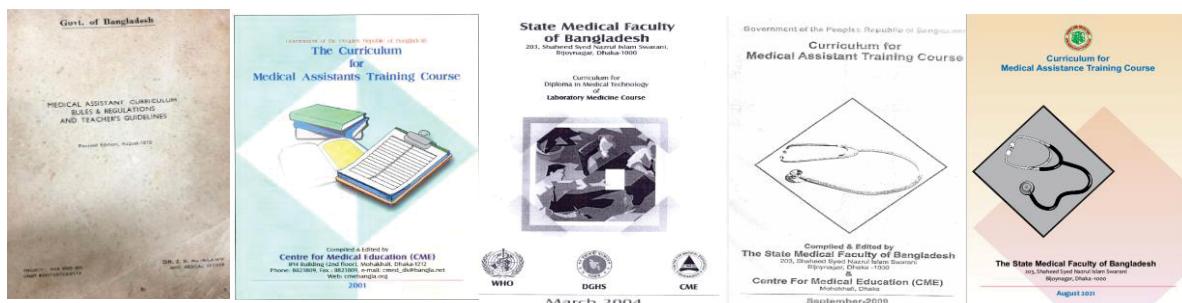

Major Highlights of Reviewed & Updated Medical Technology Curricula 2021 under DGME-

- Duration of the course has been increased from 3 years to 4 years
- List of competencies have been identified of all subjects to acquire
- Subject re- distribution has been done within 4 years
- Departmental course wise lab placement-In small groups for performing activities by the student themselves as per log book
- More time allocation for log book based specific subjects/course oriented relevant departmental academic lab based practical/hands on training/demonstration to acquire identified competencies of each subjects/course in 1st, 2nd, 3rd & 4th year
- Communication skill, Behavioral science, and ethics SDG, UHC, etc. are added with due importance as considering future job description
- Log book based special lab based attachment as per future job description in 4th year

- Inclusion of MCQ – M/T, OSCE/OSPE & Structured Oral Examination (SOE) in assessment system along with previous SAQ
- Preparatory leave for formative & summative examination
- Inclusion of carry on System
- Inclusion of GPA
- Maximum duration is 07 years to complete 4 years Medical Technology course at IHT

Evolution of MATS Curriculum in Bangladesh since 1979, 2001, 2004, 2009 till 2021

Major Highlights of Reviewed & Updated MATS Curriculum 2021 under DGME

- Duration of the course has been increased from 3 years to 4 years
- List of competencies have been identified of all subjects to acquire
- Exposure to hospital environment, patients and basics of clinical teaching will be 2 hour every week in 1st year with formative assessment
- Teaching-learning (Lecture & clinical morning - evening clinical teaching) with formative assessment on—(i) Medicine (ii) Surgery (iii)Obstetrics & Gynaecology
- **A. Teaching-learning (Lecture & morning –evening clinical teaching)** with formative assessment on—Medicine, Surgery, Obstetrics & Gynaecology
- **B. Placement at Upazilla health complex:** Three months (12 weeks), (Indoor, Outdoor, Emergency & ongoing health programmes)
- Teaching-learning (Lecture, practical & morning & evening clinical placement) with formative & summative assessment
- **Hospital Placement**-In small groups for performing activities by the student themselves as per Log book at hospital & UHC
- More time allocation for practical/hands on/ clinical training
- Departmental academic lab for practical & hands on training
