Department of Paediatric Surgery

Introduction

The Paediatric Surgery Department of Dhaka Medical College Hospital started its journey in 1993. The department aims to perform a comprehensive clinical evaluation and management, research and education program with a focus on different childhood surgical diseases. Our physicians and researchers work together with one common purpose to find a curative measure for every child. To keep pace with the increasing number of patients and with a view to provide better patient care, 4 (four) individual departments named General Pediatric Surgery, Neonatal Surgery, Pediatric Surgical Oncology, and Pediatric Urology were established in 2017.
