

DPHE Achievements" basically refers to the successes or achievements achieved by **the Department of Public Health Engineering (DPHE)** .

The Department of Public Health Engineering (DPHE) is an important organization under the Ministry of Local Government, Rural Development and Cooperatives of the Government of Bangladesh, which works to improve the public health of the country.

"DPHE Achievements" typically include:

- **Safe water supply:** Installation of tube wells, construction of water treatment plants and expansion of piped water supply systems to provide safe drinking water in rural and urban areas.
- **Improvement of sanitation systems:** Ensuring healthy sanitation facilities, such as installing healthy latrines and increasing public awareness on this issue.
- **Project Implementation:** Successfully implementing various developmental projects related to public health, such as providing water and sanitation services during disasters or in emergency situations such as Rohingya camps.
- **Infrastructure construction:** Construction and maintenance of necessary infrastructure for water supply and sanitation systems.
- **Policy formulation and implementation:** Following and implementing various laws, rules and policies to improve the quality of public health.

In short, the DPHE achievement is the overall success and contribution of this department in ensuring safe water and healthy sanitation for the people of the country.
