

## ACTIVITY REPORT

**Support for operation & Maintenance of Mobile Water Treatment Plant (MWTP):** The payment was made for a total of four skilled operators and three dedicated drivers has been disbursed for the duration spanning July to December 2023. This allocation was covered a six-month period and underscores the commitment to compensating the skilled workforce responsible for the operation and transportation of MWTP during this specified timeframe. The skilled operators, adept in their respective roles, play a pivotal role in the efficient functioning of various processes, ensuring the smooth operation of machinery, equipment, or systems within the timeframe. Their expertise was instrumental in maintaining a high level of productivity and contributing to the overall success of the program. Similarly, the three drivers, integral members of the team, fulfill a crucial role in the logistics and transportation operations as well as doing the supplementary role of the operators when needed. Whether transporting personnel, equipment, or goods, their skills and dedication contribute significantly to the seamless functioning of the MWTP operation activities, ensuring timely and safe deliveries.

SL.	Name	Designation	Months	Status
1	MD. Alauddin	Operator	July'2023 to December'2023	Paid
2	MD. Al Amin	Operator		
3	MD. Rasel Khan	Operator		
4	Sarkar Tarek Ahmed	Operator		
5	MD. Elias Sheikh	Driver		
6	MD. Nazmul Faquir	Driver		
7	Md. Abu Bakar Siddique	Driver		

**Maintenance for Vehicle & Treatment Unit (Six Months):** The procurement of essential items for the upkeep of vehicles and mobile water treatment plants were conducted periodically. In total, there are 30 units in the inventory, all the units are currently in full operational condition. Ongoing maintenance work is being carried out on all the units, additionally addressing issues related to repairs and replacing of tires. The dedicated efforts to address these concerns underscore the commitment to ensuring that all units are in optimal working order, contributing to the overall effectiveness of the vehicles and water treatment plants. To facilitate at-a-glance monitoring and financial oversight, a comprehensive list of costs associated with these maintenance activities has been compiled. This breakdown allows for a quick assessment of the resources allocated to sustaining the fleet and water treatment capabilities. Overall, the combination of functional units and ongoing maintenance efforts reflects a proactive approach to vehicle and water treatment plant management, promoting reliability and longevity in their operational lifecycles.

**Hands on Training for the DPHE MWTP operation and maintenance:** This training program is specifically designed to address the maintenance and operational requirements mobile water treatment units acquired by the Department of Public Health Engineering (DPHE) through the recently completed Emergency Water Supply Project. The primary objective was to sustain and ensure the continued functionality of these mobile treatment units, focusing on the related capacity building of DPHE mechanic and staff. These units are vital for providing access to clean and safe drinking water in emergency situations characterized by waterborne diseases and increased demand for safe water. Through these eight trainings, a total of twenty-six mechanic & drivers have been capacitated from 25 districts and they have been equipped to operate and maintain the mobile water treatment facilities and ensure the operation of emergency clean water during any disaster. (Mechanic & Driver details are attached in annex-1)
