Arsenic Risk Reduction Project (ARRP) is being implemented by the Department of Public Health Engineering (DPHE), under the Ministry of Local Government, Rural Development and Co-operatives, Government of Bangladesh. The main objective of the project is to provide safe water to the arsenic affected population in upzilla having union(s) more than 60% arsenic contaminated as identified by the Situation Analysis of Arsenic Mitigation 2009 by DPHE and JICA. To identify the present situation of arsenic contamination of the country by blanket screening of the point water sources is the second important objective of the project. The project intends to hire a competent, qualified and experienced local NGO (registered in the districts/ working experiences in the districts of last five years) to assist DPHE in the implementation of the screening activities in the arsenic contaminated unions of the country.

The detailed Terms of Reference (ToR) for the assignment can be found at the following website: ([www.dphe.gov.bd](http://www.dphe.gov.bd)) or from the office of the undersigned. Selection of Local NGO will be made by Quality and Cost Based Selection (QCBS) method set out in the Procurement Regulations.

The PE reserve the right to accept or decline all the Eoi's.
