## **The Clearing and Transfer of Imported Water Purification Tablets (NADCC 33 MG TABS) from Dhaka Airport to DPHE Chattogram Store Warehouse**

### **1. Introduction:**

This report provides a detailed overview of the process involved in the clearing and transfer of imported water purification tablets (NADCC 33 MG TABS) from Dhaka Airport to the DPHE (Department of Public Health Engineering) Chattogram Store warehouse. The goods are being cleared and transferred through M/s Service Lines, a C&F (Clearing and Forwarding) agent, international freight forwarder, and import-export service provider.

### **2. Objective:**

The main objectives of this operation are:

- To ensure the efficient clearance of imported NADCC 33 MG TABS from Dhaka Airport.
- To ensure smooth and timely transfer of these goods from Dhaka to Chattogram.
- To comply with all necessary customs regulations and logistical requirements.
- To guarantee the safe arrival of the goods at the DPHE Chattogram Store warehouse.

### **3. Activity details:**

M/s Service Lines, acting as the C&F agent, facilitated the entire process of clearing and transferring the imported NADCC 33 MG TABS. Initially, they settled the customs duty and taxes for the total packet of  $(72727+200000)= 272,727$  Packets of WPT through a purchase Order (P/O) to the customs authorities. After clearing customs, M/s Service Lines paid the Biman Warehouse charges for temporary storage at Dhaka Airport, followed by the Agent Association Expenses for operational costs. They also covered the forklift charges required to move the goods to the loading area and arranged for the transportation from Dhaka to Chattogram by paying for the truck freight. Upon arrival in Chattogram, unloading fees were settled for transferring the goods into the DPHE Chattogram Store warehouse. Finally, the commission for M/s Service Lines was paid for their role in managing the logistics, ensuring the smooth clearance, transfer, and delivery of the goods.

### **8. Conclusion:**

The successful clearing and transfer of NADCC 33 MG TABS from Dhaka Airport to the DPHE Chattogram Store warehouse is crucial for ensuring that these water purification tablets reach the areas in need of safe drinking water. The efficient coordination between M/s Service Lines, customs authorities, and the DPHE Chattogram warehouse guarantees that the process is smooth, timely, and compliant with all necessary regulations.

By ensuring proper clearance, safe transportation, and accurate inventory management, this operation directly contributes to enhancing public health safety in Bangladesh by making water purification tablets available for use in areas with water contamination risks.
