

Operation and Maintenance Expenditure of Mobile Water Treatment Plant

ACTIVITY REPORT

Support for operation & Maintenance of Mobile Water Treatment Plant (MWTP): The payment was made for a total of four skilled operators and three dedicated drivers has been disbursed for the duration spanning November to December 2024. This allocation was covered a two-month period and underscores the commitment to compensating the skilled workforce responsible for the operation and transportation of MWTP during this specified timeframe. The skilled operators, adept in their respective roles, play a pivotal role in the efficient functioning of various processes, ensuring the smooth operation of machinery, equipment, or systems within the timeframe. Their expertise was instrumental in maintaining a high level of productivity and contributing to the overall success of the program. Similarly, the three drivers, integral members of the team, fulfill a crucial role in the logistics and transportation operations as well as doing the supplementary role of the operators when needed. Whether transporting personnel, equipment, or goods, their skills and dedication contribute significantly to the seamless functioning of the MWTP operation activities, ensuring timely and safe deliveries.
