EXPORT PROMOTION BUREAU BANGLADESH

FOREWORD

In this publication we have presented a statistical analysis of the Bangladesh export structure and performance for the fiscal years 1985-86 and 1986-87. It contains comparative figures on export commodity composition, direction and the relative importance of each market in respect of the export products of Bangladesh. It has also been designed as a useful market research tool.

Constant endeavour is being made towards improvement of the book- "Bangladesh Export Statistics" in coverage and presentation of the data within the limitation of our resources. We hope the publication will be useful to all concerned.

We would welcome suggestions/comments from the users for improvements in the future editions of this publication.
