Foreword

I am pleased that the Export Promotion Bureau is going to publish the Export Pocket Statistic 2022-23. It is a handy and concise collection of export data of commodities and services. This publication focuses on various aspects of exports from Bangladesh. Most of the data provided in it are annual, which will be further complemented by a comprehensive volume.

The Pocketbook disseminates data on export statistics to reflect on export performances, comparative statistics of import and export performances, major export goods and services, product and service wise export performances, destination-wise export and so on.

Data has become more important in the present global scenario as the world is passing through the most unpredictable time due to the post Covid 19 pandemic disruption in the global economy which is further aggravated by the Ukraine – Russia war challenging the strength and perception of global supply-chain management for trade. Therefore, data analysis has become crucial for predicting the future, strategizing planning and decision making for new as well as existing exporters to minimize negative impacts and enhance positive impacts for sustainable development and well-being of the people.

I acknowledge with thanks the generous support of all concerned stakeholders, especially the ASYCUDA World National Board of Revenue (NBR) for providing the core data for preparation of this publication.

I appreciate all of the officials of EPB, especially the Information and Publication Division team, for their relentless efforts behind the preparation of the concise version of yearly EPB export data.

I strongly believe this pocketbook will further drive the stakeholders to constructive discussions to contribute to the quality of the future edition.
