***Extended Abstract***

*Extended Abstract should be in Times New Roman 11justified in italic font.*

The Extended Abstract should be a maximum of **4 pages**, including tables, figures, and references, and should not exceed **600 words**.

The text in the body of the paper will be in Times New Roman 12-point.

The extended abstract should be submitted in .doc or .docx format (Word 2007 or Higher).

## 1.1. Heading Level 2 (Times New Roman 12 Bold)

This template, complete with header and footer formats, will make it easy to lay out the Extended Abstract volume for the GSB National Seminar 2027.

Extended Abstract should contain an introduction, data, method, results, conclusion etc.).

## 1.2. Margins and page allowance

Set out the **paper on A4 size** the same as this, with margins as described in Table 1.

**Table 1.** Margins to use in this paper

| **Margin** | **Size** |
|---|---|
| Left | 25mm |
| Right | 25mm |
| Top and bottom | 25mm |

For Microsoft Word users the Page Setup Dialog should appear as shown in Figure 1. **Centre your Figures and Tables.**

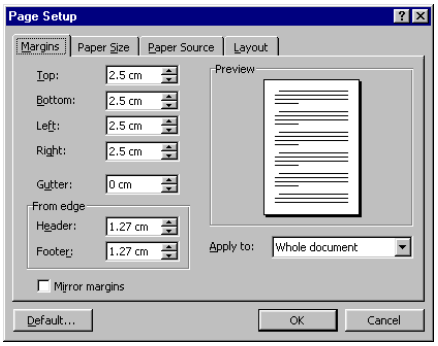

**Figure 1.** Page Setup Dialog Box (Margins) for formatting GSB National Seminar 2027 Extended Abstracts

**Page numbers** should be placed on the **outside bottom** of each page in the footer margin. Number your pages 1, 2, 3, … of 'the total number of pages'. See Footer below.

### 1.3. Tables and Figures

Tables should be labelled Table 1, Table 2, … at the top of each table. Figures should be labelled as Figure 1, Figure 2, … below the figures.

### 1.4. Units

Use S.I. system.

### 1.5. Footers and headers

The header in Times New Roman 9-point italics should state the paper title on the left (abbreviated if necessary), and the last name of first author of the paper. The header will be suppressed on the title page.

The footer in Times New Roman 9-point italics should follow the format shown in the footer.

## 2. EQUATIONS

Equations should be written as equation format rather a simple text as below:

$$Y_t = a + b_t + \varepsilon_t \quad (1)$$

The equation should be separated by a blank line above and below, and the equation number should be right aligned on the right margin. When you reference equations in the text, use the equation number, e.g. using Equation 3, it can be seen that they are correlated.

## ACKNOWLEDGMENTS

We acknowledge Mr X in Organisation Y.
