

Capt. Mohammed Mohiuddin Chowdhury

Master Mariner | Tanker(Oil/chem) Specialist | Maritime Educator

Captain Mohammed Mohiuddin Chowdhury is a highly accomplished Master Mariner with extensive expertise in oil and chemical tanker operations, commanding vessels across the global maritime industry. Currently serving as Master on an oil/chemical tanker with STS Marine Management Ltd., Mumbai, India. Capt. Chowdhury has established himself as a skilled and reliable maritime professional, demonstrating exceptional competence in handling complex tanker operations with the highest standards of safety and professionalism. Beyond his distinguished seafaring career, Capt. Chowdhury is deeply committed to maritime education, serving as a Visiting Lecturer at the Marine Fisheries Academy, Chattogram, affiliated with Bangladesh Maritime University, where he conducts STCW Basic courses during his stays at home, sharing his vast practical knowledge and operational experience with aspiring maritime professionals.

Capt. Chowdhury's maritime foundation is built upon his Class-1 (Deck) Master Mariner Certificate of Competency, issued by the Department of Shipping, Bangladesh, valid until 19th April 2031, representing the highest qualification available to Bangladeshi seafarers. This prestigious certification, combined with his extensive training portfolio, has equipped him with the comprehensive knowledge, technical expertise, and leadership capabilities essential for commanding sophisticated oil and chemical tankers in today's demanding maritime environment. His recent command experience includes successful tenures as Master on MT ASHABI from May to November 2025 and MT ST ILHAAM from May to December 2024, both oil/chemical tankers managed by STS Marine Management Ltd, Mumbai, India. These assignments have showcased his exceptional ability to manage complex cargo operations, ensure compliance with stringent international regulations, and lead multinational crews effectively while maintaining the highest safety standards inherent to tanker operations.

Capt. Chowdhury's professional development is reinforced by an impressive array of STCW course certifications, reflecting his commitment to continuous learning and professional excellence. His qualifications include Advanced Oil Tanker Operations, Advanced Chemical Tanker Operations, Ship Simulator and Bridge Team Management, Radar Navigation (Management Level), ECDIS, GMDSS, and a comprehensive suite of safety courses including Advanced Fire Fighting, Medical Care, Personal Survival Techniques, and Proficiency in Survival Craft and Rescue Boats. This extensive training portfolio ensures he remains at the forefront of maritime safety and operational best practices.

His dedication to safety and operational excellence is further demonstrated through certifications in PSC & RB, Security Awareness, and Designated Security Duties, equipping him to address the multifaceted challenges of modern shipping, including security threats and regulatory compliance. The validity of these certifications through 2030-2031 underscores his proactive approach to maintaining professional currency.

Beyond his technical competencies, Capt. Chowdhury is recognized for his strong leadership qualities, sound decision-making abilities, and unwavering commitment to safety. His track record of successful command on oil and chemical tankers demonstrates his capability to manage complex maritime operations while ensuring the safety of crew, vessel, cargo, and the marine environment. His role as a Visiting Lecturer at Marine Fisheries Academy further highlights his commitment to giving back to the maritime community, bridging the gap between theoretical education and practical seafaring through STCW Basic courses that prepare cadets for successful careers at sea.

As he continues his distinguished career, Capt. Chowdhury remains dedicated to upholding the highest standards of maritime professionalism, contributing to the global shipping industry through his expertise and dedication, while simultaneously nurturing the next generation of maritime professionals through his teaching endeavors. His extensive experience on oil and chemical tankers, coupled with his leadership capabilities and commitment to education, positions him as a respected figure in both the international maritime community and the academic sector of Bangladesh.
