3.0 Government Equity- An Overview

Government Equity –An Overview

The Finace Division (FD) has taken up an initiative to develop an electronic database for effective management of information regarding fund invested as equity in the State Owned Enterprises (SOEs) in order to establish a reliable government equity management system enabling efficient decision making in equity investments.

After independence, all major industrial enterprises in the country were nationalized by the newly formed government in 1972. Since then, the government has been providing equity finance to the nationalized enterprises to meet their initial financial needs. From the very beginning, the records on equity investment has been kept manually by different FD branches as well as other offices as there was no guideline on recording relevant information in an uniform format. The procedure of recording was not appropriate. All the equity related records could not be found in one particular place. Because of this, it has always been difficult to ascertain the status of equity finance in various organizations on a particular point of time. This also made decision making process more time consuming.

Over the years the activities of Finance Division have increased manifold. Equity investment related decisions and records have also increased. It has increasingly become more difficult to keep track of every equity related work taking place at the division. The total amount of equity extended to any SOE was not readily available as enterprise-wise complete data was lacking.

Against this backdrop, the Finance Division took an initiative to collect data on equity and prepare a database. For this purpose, a format has been developed to collect data on equity finances. Several meetings were held with the SOEs (stakeholders) in phases to make them aware and seek support for the initiative. The SOEs were requested to send their latest audited financial statements along with equity data in the prescribed format. After receiving the information, the DSL Branch of the Finance Division carried necessary varification and analysis to ensure data reliability.

On the basis of data collected, an Access database has been developed. For equity data management the use of Access software was found convenient as it does not require huge calculation like DSL accounts management. Therefore, using Access, a database on equity finances in 132 organizations has been developed for the

first time by the Treasury and Debt Management (TDM) Wing of the Finance Division, Ministry of Finance.

The DSL Branch of TDM Wing again held meetings with the SOEs, the main stakeholders, to receive feedback and consent to the new system. The SOEs were asked to utilize government equity finances in a prudent manner, so that, they can make their organization profitable and service oriented.

To make the work sustainable, the database has been stored in the central server of the Finance Division. The officials having access and connectivity to the database will be able to utilize relevant information for formulating decisions. Moreover, detail records of equity have been posted on the Finance Division Website for wider use by different stakeholders.

After the database was developed, the DSL Branch took up the task of analysing equity position in different State Owned Enterprises (SOEs). The organization-wise balance of equity was reconciled against the total amount of equity provided by the government. The audited financial statements will serve as the main instruments to be analysed at regular intervals for assessing the financial position or profitability of any organization. This manual, the first of its kind, contains an official circular incorporating guidelines on the use of '13 digit classification codes' related to equity. It also provides information about the use of codes regarding dividend payments to the government. SOEs are requested to follow the guidelines for smooth and reliable management of equity. Organizations' profitability and regular payment of dividend will help increase the non-tax revenue earning of the government.

Types of government equity

01. Money extended as equity from the government's own fund;
02. Money extended as equity received from donor agencies;
03. Any government loan converted into equity to lessen loan burden.

Points to note while releasing equity or converting loans into equity:

01. The total amount of government equity with percentage of government ownership;
02. Whether equity is divided into shares. If so, the number of shares, the face value, types of share, the authorized capital and the paid up capital;
03. Debt-equity ratio;

04. How lumpsum equity extended earlier is shown in the audited financial statement of SOEs;
05. If dividend is paid regularly;
06. If the organization is enlisted in the stock exchange;
07. If audited financial statements are sent to the Finance Division on regular basis;
08. Information with proper justification for considering any proposal for conversion of any loan into equity.

Items to be included in the Government Order (GO) while releasing money as equity:

01. Name and address of the organization;
02. Amount allocated as equity;
03. Proper 13 digit code as per Classification Chart;
04. A clear mention in the order that the allotment is an equity;
05. Reference like name of credit-line, loan number, loan amount if it is a case of prior loan conversion into equity ; and
06. Any conditions, if required, for the use of money to be released as equity.

Others	--	--	--	Lending/Relending rates for State Owned Companies as well as terms on repayment period will be determined by the Government on a case-by-case basis. For that, Government will consider company's capital structure and its nature of business. Terms mentioned in loan agreements will also be considered to determine relending terms.

General Conditions:

- (1) For Aided Projects relending terms (rates of interest, repayment period, grace period etc.) will be as agreed in the negotiated Credit Agreement (if there is any).
- (2) Relending rates indicated here will not apply in case of Suppliers Credit where it could be arranged in more favourable terms and conditions. Concerned Institution/Corporation will bear foreign exchange risk to repay the loan as per Credit Agreement.
- (3) Grace period may be varied when the gestation period of a Project is longer with or without changing the repayment period. No principal or interest payment is to be made during grace period. But interest will accrue during the grace period and will be taken into consideration while fixing amortization schedule.

- (4) Feasibility studies should normally be undertaken by Autonomous Bodies and Public corporations out of their own resources. In appropriate cases Government may also direct such agencies to undertake feasibility studies for various projects. In the later case, funds will be provided by the Government as grant.
- (5) At present, the Lending & Relending terms are not applicable for Bangladesh Railway (BR) because it is considered as a Government Directorate and Foreign Loans are given to BR as grants from the Government. For possible future operation of BR as a Corporate Body, all Government investments will be at a constant rate of return at 2% according to the Railway Act. For foreign currency loan, the rate of interest and other terms and conditions stipulated in the Credit Agreements shall apply.
