Report on

Aquaculture Skills Acquisition Through TVET and Practices in Fish Production Self-Employment

Team Leader: Dr. Md Anisur Rahman Mridha
Principal (In Charge)
Sheikh Kamal Technical School and College
Baliakandi, Rajbari

Team Member: Md. Nasirul Islam
Junior Chief Instructor (Fish culture)
Shahid Sheikh Rasel Technical School and College
Shanthia, Pabna

Consultant: Dr. Md. Sharif Uddin
Director (Marine)
Department of Fisheries.

June 2022

Index

	Subject	Page
	Executive Summary	1
1.0	Introduction	2
1.1	Statement of the problem	2
1.2	Importance and rational of the study	2
1.3	Scope of the study	4
1.4	Objectives of the study	4
1.5	Research questions	5
2.0	Materials and Methods	5
2.1	Study area and experimental design	5
2.2	Pre-stocking preparations	6
	2.2.1 Pond preparation	6
	2.2.2 Stocking of fish	6
2.3	Post stoking management and sampling	6
	2.3.1 Feed supply	6
	2.3.2 Growth measurement	6
	2.3.3 Harvesting of fish	7
	2.3.4 Economic analysis	7
3.0	Methods of Data Analysis and Presentation	7
4.0	Results and Discussion	7
4.1	Skill Measurement	7
	4.1.1 Aquatic weed control	7
	4.1.2 Removal of unwanted and predator fish	8
	4.1.3 Liming	8
	4.1.4 Pre-stocking fertilization	10
	4.1.5 Observation of natural food	11
	4.1.6 Fingerling stock management	12
	4.1.7 Supplementary food supply	14
	4.1.8 Sampling of fish and adjustment of feed	14
	4.1.9 Harvesting of fishes	16
	4.1.10 Overall skill scale through TVET education	16
	4.1.11 Benefit-cost analysis	17
4.2	Fish growth and yield parameters	17
4.3	Comparison of economic returns	18
5.0	Conclusion	19
6.0	References	20

List of Figures

Number	Subject	Page
Figure-1	Performance on aquatic weed control	7
Figure-2	Performance on removal of unwanted and predator fish	8
Figure-3	Performance on liming procedure	9
Figure-4	Performance on lime selection	9
Figure-5	Performance on liming time	10
Figure-6	Performance on pre-stocking fertilization	10
Figure-7	Performance on doses for pre-stocking fertilization	11
Figure-8	Performance on natural food observe	11
Figure-9	Performance on fingerling stock management	12
Figure-10	Performance on process to acclimating of fingerling	13
Figure-11	Performance on process to treatment of fingerling	13
Figure-12	Performance on process supplementary food supply	14
Figure-13	Performance on process sampling of fish and adjustment of feed	14
Figure-14	Performance on process calculate the required feed	15
Figure-15	Performance on process harvesting of fishes	16
Figure-16	Overall skill scale through TVET education	16
Figure-17	Fish growth patterns for different treatments	17

List of Tables

Table Number	Subject	Page
Table-1	Performance on aquatic weed control	18
Table-2	Performance on removal of unwanted and predator fish	18

Abbreviations

TVET	: Technical and Vocational Education and Training
BBS	: Bangladesh Bureau of Statistics
GDP	: Gross Domestic Product
UN	: United Nations
ILO	: International Labor Organization
DOF	: Department of Fisheries
NGO	: Nongovernment Organizations
SRT	: Sex reversed tilapia
CaO	: Calcium oxide
SPSS	: Statistical Package for Social Science
FAO	: Food and Agriculture Organization
<i>F_c</i>	: Fixed costs
<i>V_c</i>	: Variable costs
BDT	: Bangladesh Taka
BCA	: Benefit Cost Analysis
USD	: United States Dollar

Acknowledgements

The Research Team is glad and grateful to Directorate of Technical Education, Ministry of Technical and Madrasa Division, Bangladesh Secretariats, Dhaka, Bangladesh to select the research proposal and for funding the research to quantify the aquaculture-based knowledge and practical skills of students participating in Technical and Vocational Education and Training (TVET) and to enable them to find gainful employment in the private sector.

The Team would like to express their warmest gratitude, immense indebtedness, sincere appreciation, profound regard and deep sense of respect to Dr. Md. Omar Faruque, Director General (Additional Secretary), Directorate of Technical Education, Ministry of Technical and Madrasa Division, Bangladesh for his scholastic guidance and advice, constructive criticisms, untiring assistance, constant inspiration and continuous direction from the beginning to the completion of this work.

The Team Members express their indebtedness and deep sense of gratitude to Dr. Jakir Hossain, Institute of Bangladesh Studies, University of Rajshahi for his kind encouragement, critical and scientific reviews, invaluable suggestions and guidance during the finalization of the research proposal.

The members of the Team are grateful to Engr. Md. Akhtaruzzaman, Director, Planning and Development, Directorate of Technical Education and his team for the valuable advice, constructive criticisms, untiring assistance, valuable suggestions for successful completion of the research activities.

The team is indebted to express deep sense of gratitude to all the students and their parents and the farmers of the experimental ponds, for their valuable information and cordial assistance during the entire study period.

The Team
