23	Brief Description of Services	The project entails a comprehensive survey and GIS mapping initiative to identify and locate gas pipelines situated adjacent (minimum distance 100 meters on both sides) to MRT Line 6. By employing advanced pipe locator technology, the precise underground trajectory of these pipelines will be determined. Subsequently, the gathered data will be integrated into a Geographic Information System (GIS) to generate detailed maps, providing a visual representation of the pipeline network in relation to the MRT line. This collaborative effort will play a pivotal role in ensuring the safe and seamless operation of both the MRT line and the existing gas infrastructure.
