EXECUTIVE SUMMARY

PDO-ICZMP project, as a process of coordination and integration, upholds the objective to reduce the vulnerabilities for different social groups and realizing the development opportunities. In this context the project is expected to deliver six outputs and have its own scope, achievements and ongoing/proposed activities. Three of the outputs together relate to key stages in coastal development: the Coastal Zone Policy (CZPo), Coastal Development Strategy (CDS) and Priority Investment Program (PIP). PIP includes investments both in physical and social infrastructure development and improvements. The PIP includes three major activities: inventory of projects (activity 3.1), development criteria for Concept Notes (activity 3.2) and series of concept notes (activity 3.3). Therefore, inventory of the projects demands for an updated inventory of the projects and initiatives in the coastal zone with the aim to support the formulation process of concept notes (CNs) and corresponding coordination procedures for their proper implementation.

Earlier, two inventories: a) pre-project inventory and b) inventory of projects and initiatives in CZ were made. However, under the present developed situation where most of the major outputs of the ICZMP, PIP and CDS in particular, necessitate an updated inventory of projects and initiatives. The methodological activities adopted in this connection are as follows:

- review of existing inventories and relevant project documents (both GO/NGO)
- agency correspondence by mail, telephone and sometimes by personal visit (interaction and communication with relevant professionals often through focal points)
- searching relevant agency websites
- using Annual Development Plan (ADP) 2003-2004.

In this inventory, attempt has been made to list the agency wise (sector wise) development projects/intervention/ activities of the GO and NGOs in coastal area. This also provides the essence of the aim of the development activities for the well being of coastal people and how GO and donor contributions are being made to reach out there at the grass root level. In this, efforts have also to reach selected NGOs who are somewhat concentrated on the typical coastal issues or have programs on selected coastal communities. NGO project inventory is based on the correspondence and review of the documents.

This inventory of GoB and NGO projects indicated that a total of 223 and 74 projects were identified being under implementation by 26 government agencies and 18 NGOs, respectively. These projects cover the fields of water management, infrastructure development, development of forest, fisheries, agriculture, public health and sanitation, environment, empowerment of women, etc. to create employment opportunities and to ensure human resources development. This inventory will help to judge the present trend of status and allocation of GO and NGO projects within a coastal District.

However, the inventory of projects and initiatives also has some limitations. In some cases it was difficult to get the relevant information. These drawbacks can be overcome if revisit can be made or the existing information sources can be reviewed again.

1 INTRODUCTION

1.1 Background

ICZMP as a process of harmonization and coordination upholds the objective to reduce the vulnerabilities for different social groups and realizing the development opportunities. In this context ICZMP is characterized by the newly formulated and officially adopted six outputs. For each of the six outputs has its own scope, achievements, ongoing and proposed activities. Three of the outputs together relate to key stages in coastal development: the Coastal Zone Policy (CZPo), Coastal Development Strategy (CDS) and Priority Investment Programme (PIP). The other three are the improvement of community capacities to enhance their livelihoods, an enabling institutional environment and knowledge base. Output three or the PIP includes investments both in physical and social infrastructure development and improvements. PIP will result in an overview of ongoing and planned activities/projects in the CZ.

In this context, PIP includes three major activities: inventory of projects (activity 3.1), development of criteria (activity 3.2) and series of concept notes (activity 3.3). Therefore, inventory of the projects or activity 3.1 suggests for an updated inventory of the projects and initiatives in the coastal zone with the aim to support the formulation of concept notes (CNs) and corresponding harmonization and coordination procedures for their prospective implementation. The inventories will also shows the involvement of different agencies in the coastal zone.

1.2 Scope of the Report

Earlier, two inventories: a) pre-project inventory and b) inventory of projects and initiatives in CZ (in November 2002) were made. However, under the present developed situation where most of the major outputs of the ICZMP, PIP and CDS in particular, necessitate an updated and more informatory inventory of projects and initiatives, primarily this situates the ground for present document.

The present document, therefore, is not just an update of the existing working paper (WP006: November 2002) rather it goes beyond that and presents more informatory updates and useful development of projects and initiatives (both GoB and NGO) that would facilitate upcoming development of PIP, CNs and CDS.

The major scopes of the present effort are, therefore, as follows:

- ◇ This document provides an usable inventory and information of ongoing, completed and recently developed projects both of GoB and NGO sector in the CZ
- ◇ The present effort as it is a wide collection and compilation of information regarding various projects this is also an ongoing process of information dissemination, which has applied usability in the future development of PIP, CNs and CDS for CZ.
- ◇ In the present context of the ICZM process where strengthening of integration and coordination of activities with line agencies (Position Paper: October 2003) is seen as a priority activity, the updated GoB inventory section of this document creates a scope for more integration and coordination among line agencies and PDO-ICZMP project. At the same time, the NGO inventory section of the document is another source where informed policy development is possible for non-government development initiatives at a community level.

1.3 Methodology and Approach

This document is an outcome of multiple methodological activities. As part of the agency correspondence, a request letter has been sent from PDO to the respective GOs and NGOs on September the 3rd 2003 to update the previous document. A total of sixty organizations for both the government and non-government sector were selected for the correspondence. A list of departments/organizations according to the previous version of the inventory was attached for the agencies utmost convenience to endow with closer feedback. Satisfactory responses received from both the GOs and NGOs. Moreover, further interaction and attempt was also made to these organizations as and when required. Therefore, the synopsis of the major methodological activities adopted can be described as the followings

- ◇ review of existing inventories (e.g. WP006: November 2002 etc.)
- ◇ review of relevant project documents (both GoB and NGO sector)
- ◇ agency correspondence (both: outreach and mail based)
- ◇ consultation, interaction and communication with relevant professionals (often through focal points or using existing ICZM networks etc.)
- ◇ searching relevant agency websites (e.g. CARE, ADB websites etc.)
- ◇ updating of formats for documentation (e.g. fact sheets etc.)

The Annual development program 2003-2004 of GoB has been used as a basic literature to update the GoB agencies initiatives/projects.

1.4 Structure of the Document

The document is structured in five chapters. Chapter one (present chapter) provides the background, scope and methodology of the Inventory. In Chapter two an overview of the GoB and NGO projects is outlined. The following two chapters (Chapter three and four) respectively the GoB and NGO project information is provided in a more elaborated format (fact-sheet). The final Chapter concludes with relevant experiences of development of the document and future possibilities. In Annex A a list of new unapproved investment projects without any allocations is shown.

Figure 1: Coastal zone map

2 LIST OF THE PROJECTS

This chapter deals with the projects of different line agencies and NGOs concentrated in the coastal area of Bangladesh. Briefing of the projects has presented under some basic parameters i.e., project and agency name, project duration, location or the geographical coverage, total cost/project aid and source of aid etc. Both the GO and NGO projects have been listed out in separate tables.

2.1 GoB Projects: an overview

The update of the GO projects is mainly based on the Annual Development Plan (ADP) 2003-2004. Sorting of the project list has taken place in terms of the project location. Total or partial concentration in the coastal districts was the basic selection criterion of the GO projects. In this regard, line agencies and their projects also visited and revisited to update the existing list and to incorporate the new projects. About 30 government agencies have been visited for the project information, which is higher than the previous document (Inventory) and 26 organizations has been listed below considering their projects location and duration. It should be mentioned here that only those projects initiated back in any year and tend to continue 2002 onward are listed below. Therefore projects ended by the year 2002 has been mentioned in a new list and attached as annexure at the end of this document. List of the specific government projects/initiatives of the coastal zone has been presented in Table 1.

Table 1: Overview - GoB Projects

2.2 NGO Projects: an overview

In recent days, Non Government Organizations (NGOs) are considered as the important development partner with their wide coverage and a multitude of activities. A clear estimation of both the local and regional NGOs operating in coastal zone is rather difficult to make as available data sources differs. According to the BBS survey nearly 329 NGOs are functioning in the greater coastal districts. On the other hand, the ADAB NGO directory shows a list of 409 NGOs active in coastal area. This document is a try out to address those NGOs who are somewhat concentrated on the typical coastal issues or have programs on selected coastal communities. As PDO-ICZMP is commenced to the NGO community since it's inception and some of the project activities done so far in support and cooperation of the NGOs, mostly known NGOs and their projects has been presented here. However, NGO project inventory is based on the correspondence and review of the documents. Here, a total number of 18 NGOs and their projects have been incorporated in the inventory. Some of the projects have been excluded as they have already phased out. This inventory (Table 2) is based on the information collected through correspondence, web site visit and literature review.

Table 2: Overview - NGO Projects

3 THE PROJECTS

3.1 Fact Sheets on GoB Projects

This chapter reflects on some major agencies projects. Fact sheets has been developed through review of the relevant documents i.e., project poforma, annual progress reports, project activity performance list etc. This can be updated further if new points of query emerge. This chapter refers to the brief description of the representative projects from the different sectors, namely, water resources, agriculture, fishery, forestry, transport, rural infrastructure development, power distribution etc.

3.1.1 Bangladesh Water Development Board (BWDB)

BWDB - 01

| | | |
|--|---|---------------|
| Title | | Status |
| Coastal Embankment Rehabilitation Project | | On-going |
| Location | | |
| Cox's Bazar, Chittagong, Feni, Noakhali, Lakshampur, Patuakhali, Barguna and Bagerhat districts with 84395 ha area coverage. (21 Coastal Polders of which 10 under Priority Works Program (PWP). The major rehabilitation is being done in 11 sea-facing CERP polders.) | | |
| Implementing Agency | | |
| Ministry of Water Resources (MoWR), Govt. of Bangladesh (GoB). | | |
| Executing Organization | | |
| Bangladesh Water Development Board (BWDB). | | |
| Funding Agency | Funds Allocated (optional) | |
| IDA, EC, GoB | IDA SDR 46.10 million EURO 15.00 million GoB 132.76 million | |
| Start Date | Completion Date (Expected) | |
| June 1995 | IDA financed: 31st December 2002. EC Grant: 30th June 2003. GoB funded: 30th June 2004. | |
| Contact Person with detailed address, telephone & others | | |
| Mr. Saeedur Rahman Project Director/ Chief Engineer Elite House (8 th Floor), 54, Motijheel C/A, Dhaka. Tel: 9565420, Fax: 9565420. E-mail: cerp@dotbd.com | | |
| General Objective | | |
| <ul style="list-style-type: none"> ◇ Cyclone protection including improvement of security of people living in the project areas reducing damage to houses and other infrastructure and minimizing the loss of crops and livestock. ◇ Improving agricultural production through preventing saline inundation during cyclone and astronomical tides. ◇ Introduction of improved technology in design and construction of protection works and improved method of embankment maintenance through afforestation in the embankment and foreshore by community participation. | | |
| Specific Objectives | | |
| To enhance the degree of safety of life and property including the livelihood along with the following objectives | | |

| |
|--|
| <ul style="list-style-type: none"> ◇ Engineering ◇ Rehabilitation of coastal embankment ◇ Rehabilitation of inland embankment, drainage canal and sluice gate ◇ Improved operation and infrastructure maintenance ◇ Afforestation ◇ Create tree cover in the slope of embankment. ◇ Coastal afforestation ◇ Society and environment ◇ Sanctioning appropriate fund for the economic development of the people of the project area. ◇ Analysis of measures for reducing adverse impact on the environment specially fisheries resources and making recommendations |
| <p>Activities Performed</p> <ul style="list-style-type: none"> ◇ Rehabilitation of embankment 119.50 Km; ◇ Drainage Sluice 43 Nos; ◇ Embankment Protective Works 13 Km; ◇ Minor civil works (Embankment) 22 Km; ◇ Canal excavation 115 Km; ◇ Social Development 1 item. |
| <p>On-going Activities</p> <p>A PCP prepared on a follow up project named “Rehabilitation of Coastal Polders most at Risk” which is now under examination at planning commission and the project is included in the current year’s ADP. The estimated cost is BDT 600 million.</p> |
| <p>Brief Description of findings/results</p> <p>The project has been satisfactorily implemented.</p> |
| <p>Technical Reports Prepared</p> <ul style="list-style-type: none"> • Feasibility Study Polder 61/1 Sitakunda Vol – 1: Main Report, Vol – Annexes (Map data, EIA, Agriculture & Fisheries, Engineering, Economic feasibility) Jaaco PoyryConsulting Oy.and other associated Consulting Farms. March, 2000 • Preparation Report for the Proposed Coastal Zone Water Management Programme <ul style="list-style-type: none"> ◇ Vol – 1 : Main Report ◇ Vol – 2 : Supporting Annexes ◇ Vol – 3 : Background Annexes ◇ Vol – 4 : PIMS (Project Information Monitoring System) ◇ Vol – 5 : Drawings ◇ Vol – 6 : Designs • By Jaako Poyry Consulting Oy. , DHV, Mott MacDonald – Dec, 2000 |
| <p>Technical Report</p> <ul style="list-style-type: none"> ◇ TR No. 1 Preliminary Environmental Guidelines – Nov. 1999 ◇ TR No. 2 Preliminary Screening of 21 CERP-2 Polders – Nov. 1999 ◇ TR No. 4 Interim Report on the CES Development Plan – March 2000 ◇ TR No. 5 Survey datum & Vertical Control in the Coastal Zone – July 2000 ◇ TR No. Agricultural Development – Nov. 1998 ◇ Interim Guidelines for Afforestation – May, 1997 ◇ Guidelines for O&M Planning and Budgeting – Aug, 2001 ◇ CERP Final report: Volume: I/II. ◇ CERP PMIS: Volume: I/II. ◇ Report on Land Acquisition & Compensation Payment. |

Status Date: October 2003

| General Objective | | |
| To bring about an improvement in the economic situation and in the living conditions of the population in the coastal areas of south eastern Bangladesh with special reference to the poorest segment of the population. | | |
| Specific Objectives | | |
| Three project purposes: | | |
| <ol style="list-style-type: none"> 1. promotion of an institutional environment that sustains CDSP II – and similar interventions 2. accumulation and dissemination of data and knowledge on the coastal areas 3. direct improvement of the economic and social situation of people in a number of coastal char areas in a sustainable way | | |
| Activities Performed | | |
| In CDSP I: empolderment of three chars: Char Bhatirtek, Char Majid and Char Baggar Dona II; construction of internal infrastructure; settlement of 4,700 households; community development in clustered villages; development of methodology for char development. In CDSP II to date: see below ongoing activities. | | |
| On-going Activities | | |
| The following activities are being undertaken (grouped under the purposes as mentioned above under Specific Objectives): | | |
| <u>Purpose no. 1:</u> | | |
| – contributing to ICZM framework | | |

- improvement of land settlement bureaucracy at District- and Upazila level (training; supply of equipment; modernization of land records and computerization of parts of land settlement process)
- strengthening of planning capacity at District-, Upazila- and Union level training; development of data bases; logistic support; technical support for developing area plans
- capacity building of local NGOs (through BRAC)
- establishment and strengthening of field level institutions (local area development committees, polder committees, water management committees, user groups of tubewells and latrines)

Purpose no. 2:

- feasibility studies of possible new project areas (catchment areas of Baggar Dona khal and Noakhali khal)
- studies on use and storage of fresh water in char areas
- water related measurements (salinity, water levels, ground water levels)
- soil related measurements (salinity, fertility)
- pilot activities in the area of land - and water management (hydro-morphological processes in rivers that function as drainage outlets for char areas; options for protection of low lying areas; options for polder design; hydraulic behavior of ponds)
- investigation with regard to possibilities and constraints for agriculture in coastal areas
- monitoring of developments in CDSP I areas (Char Majid, Char Bhatirtek and Char Baggar Dona II) in order to make it possible to assess efficacy of CDSP I interventions and of developments in areas added under CDSP II

Purpose no. 3:

- **Land settlement:** settlement of about 13,000 landless households on khas land in six specific areas in Chittagong-, Feni and Noakhali District
- **Infrastructure:** peripheral: embankments (32 km), sluices (9); internal water management related: khals (108 km), culverts (16); internal transport and settlement related: rural roads (90 km), bridges/culverts (48), cyclone shelters (27); internal water- and sanitation related: deep tube wells (607), latrines (6,900)
- **Agriculture:** testing, demonstration and dissemination of technologies suitable for the char areas aiming at increasing of yield and or area under cultivation; activities try to build on the improved agro-ecological conditions in specific project areas by introducing improved varieties and modern farming techniques; sequence of activities is: collection of baseline information (land levels, soil salinity and - fertility, cropping patterns) - land class zonation - agricultural extension (testing, demonstration, dissemination)

Brief Description of findings/results

Results of CDSP I: protection of three chars (total 5,200 ha) plus internal polder infrastructure (cyclone shelters, rural roads, deep tube wells, 990 houses in 34 clustered villages); settlement of 4,700 landless households; institutional and community development (a.o. six Water Management Committees, 23 male and 23 female NGO groups). Most important experiences in CDSP I are documented in Technical Report no. 29 and in the book "Out of the periphery". A post implementation cost benefit analysis indicated an IRR of around 12.5 % and an EIIR of 15% and concluded that out of an economic and financial point of view char development is a feasible exercise. Indirect effects on the whole economy matter much, but much attention has to be given to cost-effectiveness in the design of polders.

CDSP II just entered its second year. It is as yet too early to discuss findings and results.

| General Objective | | |
| To create conditions in which the reduction of poverty, development of sustainable livelihoods and the integration of the coastal zone into the national processes can take place. | | |
| Specific Objectives | | |
| <p>The core objective of ICZM is to strengthen horizontal integration encompassing various development policy initiatives in the field of poverty eradication, physical safety of people and reduction of vulnerabilities that limit the development of livelihoods in coastal communities. The rationale of this is rooted to the fact that in the coastal zone, a large number of people, particularly the poor depend directly on natural resources such as land and water for their livelihoods. This implies, for sustainable livelihoods natural resources must be sustained and this calls for:</p> <ul style="list-style-type: none"> ◇ Economic growths ◇ Equitable distribution and empowerment of local communities across social strata and gender ◇ Access to basic needs ◇ Reduction of vulnerabilities ◇ Sustainable resource management and ◇ Protection of critical ecosystem | | |

Brief Description of findings/results

Development of

- ◇ physical infrastructure including roads and growth centers;
- ◇ irrigated agricultural, drainage and minor flood control work; and
- ◇ production and employment program (PEP) for the rural poor.

Positive impacts observed:

- ◇ easier access to the farm and service facilities;
- ◇ easier to get agricultural inputs/outputs;
- ◇ stimulate to local industries/trades;
- ◇ increase the income generating activities and employment opportunities in rural area in this project;
- ◇ reduce transport cost.

| Md. Zahurul Islam Project Director Development of Bamboo, Cane and Murta plantation Ban Bhaban, Mohakhali, Dhaka | | |
| General Objectives: | | |
| <ul style="list-style-type: none"> ◇ To ensure industrial raw materials supply of pulp and paper, small and cottage industries. ◇ To meet up the rural development of construction, thatching, furniture and other household materials. ◇ To enhance multiple use of land and increasing soil productivity | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To raise plantation through participatory approach. ◇ To distribute the seedlings among the farmers. ◇ To make documentary films and publishing poster, leaflets etc. for motivation. ◇ To provide training to the people on raising Bamboo, Cane & Murta seedlings | | |
| On-going Activities | | |
| 1. Plantation, establishment and maintenance: | | |
| Bamboo | | 204.00 ha. |
| Cane | | 380.00 ha. |
| Murta | | 93.00 ha. |
| 2. Seedling, raising of Bamboo and Cane for Selling and Distribution. | | |
| | | 5.96 lakh |
| Activities Performed | | |
| The principal activities performed up to June 2003 are as follows: | | |
| 1. Woodlot Plantation | | 7604.60 ha. |
| 2. Agro-forestry | | 2510.35 ha. |
| 3. Distribution of seedlings for institution plantation | | 23.72 lakh |
| 4. Strip plantation | | 9786.60 km. |
| 5. Char plantation | | 150.00 ha. |
| 6. Barendragully | | 102.00 km. |
| 7. Reconstruction of ponds and dighi and plantation | | 19 Nos. |
| 8. Seedlings raising through FENTC and Thana nursery development for selling and distribution | | 313.30 lakh |
| 9. Sal coppice management | | 2500.00 ha. |

| | |
|---|-------------|
| 10. Conservation area management | 1277.50 ha. |
| 11. Natural hill forest plantation | 370.00 ha. |
| Brief Description of findings/results | |
| 49% of the total work has been achieved within June 2003 | |
| Constraints | |
| Inadequate ADP allocation compared to the approved PP target. | |

| Mr. Wahidunnabi Choudhury Project Director Patuakhali Barguna Aquaculture Extension Project College Road, Patuakhali Tel: 0441-62169/62098 | | |
| General Objective | | |
| To achieve a strengthened socio-economic position and physical well being of the target group of poor men and women belonging to landless and marginal households, thus enabling them to improve their participation in social and economic development. The intermediate objective is to achieve enhanced opportunities for productive employment of target group members through increased aquaculture production in the project area. | | |
| Specific Objectives | | |
| The project has two components - aquaculture and fisheries. | | |
| Aquaculture component | | |
| <ul style="list-style-type: none"> ◇ Increased production in closed water bodies (ponds and <i>jalmohals</i>) through application of improved aquaculture techniques ◇ Improved capacity for aquaculture promotion and extension at the upazila level and also training of secondary target group i.e. fingerling operators, fry traders, primary teachers etc. ◇ Improved possibilities for pond operators to obtain production loans from authorized credit institutions in the area. | | |
| Fisheries component | | |
| <ul style="list-style-type: none"> ◇ Community fisheries management model developed and tested in the area cage culture. ◇ Aiming at a sustainable exploitation of the resources. | | |

| General Objective Subproject 1 <ul style="list-style-type: none"> ◇ Create a platform for discussion regarding Commercial Sexual Exploitation and Non-Commercial Sexual Abuse of Children; ◇ Design and implement interventions to prevent abuse and exploitation ◇ Protect children from all forms of sexual exploitation, abuse and discrimination. Subproject 2 <ul style="list-style-type: none"> ◇ Develop capacity of the government officials and NGOs staff in child rights and gender equity ◇ Ensure that the government runs institutions applies protection and care standards Subproject 3 Focus on the discrimination of the adolescent girls policy makers, development partners and NGOs are knowledgeable about the rights of adolescent girls peer education and livelihood training in three districts piloted to generate lessons learned. | | |
| Specific Objectives | | |
| Activities Subproject 1 <ul style="list-style-type: none"> ◇ research on domestic violence and its impact on family members (children, in particular), harassment and ◇ discrimination within the workplace, protection rights of Chittagong hill Tracts, psychological impact of early marriage; | | |

- ◇ provide technical support to MoWCA and any other related ministries in implementing and coordinating the National Agenda for Action against sexual exploitation and abuse of children including trafficking;
- ◇ develop advocacy & communication materials on sexual exploitation, abuse and discrimination;
- ◇ develop, pretest and incorporate a module on Juvenile Justice and protection from violence including sexual exploitation, abuse and discrimination into the training curriculum of police officers, magistrates and judges;
- ◇ knowledge, Attitude and Practice (KAP) study and training on psycho-social care and protection for staff and social workers in government and NGO shelter and vagrant homes;
- ◇ training on participating mapping technique, peer education and life skills to protect the rights of most vulnerable population at risk of commercial and non commercial sexual exploitation and abuse;
- ◇ formulation and reform of national policies which includes measures to combat family abuse, harmful traditional practices and discrimination against the girl child;
- ◇ KAP study of UP members, police and local elite to understand the situation for women victims of violence including sexual exploitation and abuse in the locality. Sensitization of these key community members on gender based violence. Strengthen and/or build linkages between the service providers;
- ◇ analysis and review of existing laws including customary laws and its dissemination. Advocacy for law reform when necessary;
- ◇ financial report to Acid Survivors foundation to provide psycho-social care and protection for survivors of acid attacks

Subproject 2

- ◇ review relevant policies, legislation and State obligations to CRC and CEDAW through research, workshops and dialogue with government and NGOs;
- ◇ support for nation-wide observance of International Women's Day, Begum Rokeya's Day and Child Rights Week;
- ◇ interactive training on children's and women's rights including gender discrimination for UNOs and Ward Commissioners;
- ◇ orientation on human rights to government and NGOs working on children's and women's right;
- ◇ assessment on children deprived of family environment followed by implementation of the main recommendations.

Subproject 3

- ◇ regular meetings to the Kishori Sanghas to discuss critical issues related to gender discrimination and girl's and women's rights;
- ◇ identification of livelihood training, apprenticeship/ internship opportunities and livelihood training imparted by the NGOs;
- ◇ self-employment or direct employment and linkages established with formal credit and saving institutions for members who have undertaken livelihood training;
- ◇ girl's trained as peer educators on family life education, children's and women's rights (including discriminatory practices), and post literacy.
- ◇ village level campaigns undertaken by members of Kishori Sanghas to participate in social processes and raise issues on early marriage, violence and discrimination with mothers, fathers, boys, elected members, elite;
- ◇ national exchange programmes, workshops will be organize by and for the members of Kishori Sanghas as exposure to the best practices;
- ◇ gender and child rights training with UP members in intervention areas;
- ◇ advocacy and communication for behavioral change to enhance the rights of adolescents;
- ◇ formative research and develop advocacy materials for adolescents (boys in particular) to expose them to gender discrimination and violence. Materials will be used by the NGOs for discussions

| |
|--|
| and workshops; ◇ workshops with government and NGOs for creation of an adolescent policy ◇ intervention research on adolescent girls intervention areas for baseline, mid-term and follow up to generate lessons learned, to close gaps in information and for scaling up. |

| General objective | | |
| The main objective of the project is to provide 6000 solar home P. V. system to the remote and isolated rural areas having no access to national electricity grid. Solar home P. V. system will generate electricity into useable form by converting solar energy (sun light) and this electricity could be used for domestic lighting, security lighting, for pumping of drinking water, small scale irrigation purpose and also for refrigeration of heat responded vaccine and life saving drugs at different rural health centres. Objectives of the project includes also diffusion of alternate sources of energy and it's expansion to meet the increasing demand of electricity in context of energy crisis. This project will also help to improve the socio-economic condition of the people, deprived of the facilities of the national electricity grid system and will create job opportunity in the remote rural areas. | | |

| General Objective | | |
| The objective of the project is to ensure reliable and uninterrupted power supply to the existing 33/11 KV substations of different PBSs by connecting with grid substations of PDB directly by source lines. For this purpose a total of 2500 km. of 33 KV lines including 14 sets of river crossing tower will be constructed of different location of the country. It is expected the frequent power interruption and load shedding that has been occurring presently at different PHS will reduce in considerable amount when the project is implemented. Thus the project will create increased opportunities for income generation, agriculture production and other positive social benefits to the rural people in achieving improved socio economic condition of the rural people. | | |

3.2 Fact Sheets on NGO Projects

The role of NGOs with their development partner and people's mobilization activity are increasing in all over Bangladesh. Vulnerabilities and opportunities of coastal zone have already been endeavored by the NGO activities. From the developmental role, in many cases, NGOs has turned as service providers as well. This chapter describes some of the selected national and local NGOs project activities. The fact sheets can provide least essence of the difference of these two types of NGOs. It shows how the national NGOs can effectively participate as 'design partners' and local NGOs as implementing partners in the field. A total number of 17 NGOs and their projects has presented here.

| General Objective | |
| To promote nutritional intake, building income capacity based on household farming facilities and food security in promoting ecological agriculture, bio-diversity conservation, local seeds and plant preservation. | |
| Specific Objectives | |
| <p>NIFS comprises for four sub projects, namely</p> <ul style="list-style-type: none"> Poultry and livestock development Agriculture development Fisheries development Sustainable Agriculture Nutrition education and Alternative Health Care Sustainable use of natural resources <p>Project wise specific objectives are</p> <p>Poultry and livestock development</p> <p>To reduce mortality and morbidity rate of poultry and livestock population through ensuring vaccines and other vatenairy medicines</p> | |

Rearing of poultry and cattle through adopting appropriate technology

To increase household production as well as consumption of animal protein products

To increase household income and employment opportunity

To develop resource farmer in community level so that community people can avail respective skill and expertise at low cost whenever needed

Agriculture development

To promote cultivation of commercially and nutritionally valued vegetables at abandoned household space

To increase household production as well as consumption of vegetables

To increase productions of protein enrich cereal crops through out the year

Establishment of village nursery for seedling and sapling production

To develop resource farmer in community level so that community people can avail respective skill and expertise at low cost whenever needed

Fisheries development

To extend and popularize culture fisheries in coastal areas using the technologies which are feasible, affordable and acceptable to the poor and small scale aqua farmers to ensure maximum utilization of the household and income generation activities

To ensure maximum utilization of the household physical resources

To create diversified livelihood and income generation sources

To develop resource farmer in community level so that community people can avail respective skill and expertise at low cost whenever needed

Sustainable Agriculture

To practice and promote ecological farming through gradual replacement chemical fertilizers and pesticides and hybrids seeds to the environment, soil fertility and bio-diversity as well

To establish community seed store with local seed and plant species

To raise mass awareness on the devastating affects of chemical fertilizers pesticides and hybrid seeds to the environment, soil fertility and bio-diversity as well.

Sustainable use of natural resources

To reduce over exploitation of aquatic resources

To raise mass awareness against indiscriminate catching of shrimp juvenile and *jatka*

To advocate government official for enforcing fisheries sector on shrimp juvenile and *jatka* catching

Activities Performed

Farmers/beneficiaries training on poultry and livestock vaccination, goat rearing, cow rearing, duck rearing, village nursery, homestead gardening, cereal crop production, carp poly culture, rice cum fish culture, fish nursery

Campaign, networking seminar on "Long Term Affect of Juvenile Shrimp and *jatka* catching to the coastal bio diversity as well as to the livelihoods of poor people

Establishment of cool chain (with solar freeze) for smoothes functioning of vaccination at outreach islands of Bhola and Cox's Bazar district

Establishment of central nursery at thana based seedling, sapling and herbal plant nursery

Establishment of community based seedling and sapling nursery

Demonstration on Cooking procedure of naturally grown vegetable for family consumption

Establishment of medicinal resource center with herbal plants

Demonstration of ecological farming

Awareness, campaign and training on ecological agriculture

Promotion of compost as organic fertilizer through ensuring compost pit at household level

Farmers training on local seed preservation technologies

Publication of a booklet on herbal plants and their utilization as alternative health care

| |
|---|
| <p>Farmers training on the concept of Integrated Aquaculture Agriculture</p> <p>Annual review of NIFS program</p> |
| <p>On-going Activities</p> <p>Awareness, campaign and training on natural aquatic resource conservation</p> <p>Herbal sapling production for household preservation</p> <p>Community based herbal preservation and its utilization practice</p> <p>Farmers/beneficiaries training on poultry and livestock vaccination, goat rearing, cow rearing, duck rearing, village nursery, homestead gardening, cereal crop production, carp poyculture, rice cum fish culture, fish nursery</p> <p>Demonstration on cooking procedure of naturally grown vegetables fro family consumption</p> <p>Promotion of compost a organic fertilizer through ensuring compost pit at he level</p> <p>Demonstration of ecological farming</p> <p>Establishment of cool chain for smooth functioning of vaccination at out reach islands of Cox's Bazaar district</p> |
| <p>Brief Description of findings/results</p> <p>Developed 200 female poultry vaccinators who are provided with practical training, flask and syringe etc. They collect vaccines from our unit offices and apply it to her community poultry birds. Therefore the death rate of poultry have been reduced than before and vaccinator becomes self reliant</p> <p>People are aware on the necessity of bio diversity conservation</p> <p>Shrimp fry collectors became careful to preserve the aquatic resources</p> <p>Vaccinations are available in all islands</p> <p>Homestead land utilization increased</p> <p>Production of sapling ahs increased</p> <p>Awareness has increased</p> <p>Organic farming is becoming common to the farmers</p> <p>At least 5 varieties of herbal are commonly found in almost all the households of our beneficiaries</p> <p>Fish culture in rice field earned popularity and practicing widely</p> <p>Fish nursery has been treated as a good business to the traditional fish farmers</p> |

| April 2002 | Four years (2002-2005) project to be renewed in each year | |
| Contact Person with detailed address, telephone & others | | |
| Md. Shamsuddoha, Senior Coordinator Coastal Livelihood Security and In-charge Dhaka Liaison Office COAST Trust, Hs no: 9/4, Rd no: 2, Shyamoli, Dhaka Tel: 02-8125181; Fax: 02-9129395 E-mail: coastst@citech.net | | |
| General Objective | | |
| To increase the fish production through providing required technological and financial support to small-scale rural fish farmers and to improve the household income and enhance livelihood security of these resource limited people. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To extend and popularize culture fisheries in the coastal areas using the technologies which were feasible, affordable and acceptable to the poor and small scale aqua farmers ◇ To ensure maximum utilization of the household physical resources; ◇ To create diversified livelihood and income generation sources ◇ To develop resource farmer in community level so that community people can avail respective skill and expertise at low cost whenever needed; ◇ To reduce overexploitation of natural resources | | |
| Activities Performed | | |
| <ul style="list-style-type: none"> ◇ Staff recruitment (PC & FA); ◇ Pond preparation; ◇ Fingerling stocking and management; ◇ Training for the farmers and staffs; ◇ Field days and rally's; ◇ Farmer and demo plot selection | | |
| On-going Activities | | |
| <ul style="list-style-type: none"> ◇ Follow up training to farmers; ◇ Selection of rice field for Tilapia farming; ◇ Farmers training on tilapia farming; ◇ Strengthening of dike cropping (integration of aquaculture and agriculture) ◇ Farmers visit to other NGOs implementing the same | | |
| Brief Description of findings/results | | |

Developed d1050 demonstration plot in 7 upazilas, 150 from each of Bhola district among which 30% are female. There have several technology options like carp nursery, carp polyculture, carp golda mixed culture, carp pangus mixed culture, fish culture in rice field etc. But farmer's his/herself selects the technology type basing on his/herself selects the technology type basing on his/her physical resources and capacity. Such flexibility makes farmers spontaneous in all aspect of fish culture activities.

Through this demonstration project modern fish culture method has been extended in Bola district and out reach islands thus household based income has been increased significantly.

Technical Reports Prepared

Quarterly technical progress report and financial report to be submitted to Executing agency.

3.2.2 Centre for Coastal Environmental Conservation (CCEC)

CCEC -01

| | | |
|--|--------------------------------------|---------------------------|

3.2.3 Community Development Centre (CODEC)

CODEC – 01

| | | |
|--|---|---------------------------|
| Title Socio-economic Development of the Coastal and Riverine Fisherfolk Communities, Fourth Phase | | Status On-going |
| Location Chittagong/Lakshmipur/Noakhali/Patuakhali /Barguna Districts A total of 17 Upazillas including 92 Unions covering 752 villages. | | |
| Implementing Agency Community Development Centre (CODEC) | | |
| Executing Organisation | | |
| Funding Agency DANIDA | Funds Allocated (optional) DKK 48.2 million | |
| Start Date July 2001 | (Expected) Completion Date June 2006 | |
| Contact Person with detailed address, telephone & others Dr. Khurshid Alam, Executive Director, CODEC House 62/B, Road 3, Chandgao R/A, Chittagong, PO Box 1067 Tel: 031-670663/671405; Fax: 031-610774; e-mail: codec@spnetctg.com Ms. Mahal Aminuzzaman, DANIDA (Ph - 882 2499) | | |
| Development Objectives CODEC's development objective is to ensure that coastal and riverine communities participate in the mainstream development process and realize social, political and economic benefits. | | |
| Immediate Objectives The immediate objective of CODEC is: The target groups enabled to articulate and exercise their rights and to improve their earnings from better conserved fishing environment and non-traditional sources of income. | | |
| Activities Performed The main activities of CODEC is to organize the targeted villagers into the groups and to develop these groups through skill training, group based credit support, literacy training and awareness training, to the point where they are self-reliant with the active and democratic participation of their members. Hence, the key elements of CODEC program are as follows; <ul style="list-style-type: none"> a. Institution Building and Development (Village Organisations and Coordination Committees) b. Education (Children and Adult) c. Training (Human development and Skill development) d. Support Program (Health, Water and Sanitation, Plantation, etc) e. Policy advocacy, projects and consultancies f. Savings and Credit. | | |
| On-going Activities CODEC is currently working in 752 villages with 46,933 households and has organized 1969 Village Organisations with a total membership of 57,357 under various programmes of whom 22,222 are male and 35,135 are female. A total of 27 Coordination Committees of village organisations are formed. Under Children education programme in 2002, a total of 4846 students (2320 boys and 2526 girls) are continuing their education under 264 education shifts. A total of 270 children organisations are formed among the students of education centres. A total of 7405 adult members are graduated under Adult education programme. 563 Tube | | |

wells as well as 13,408 Latrines were distributed in the communities. In every rainy monsoon, a huge number of tree plants are collected and distributed among the household families. Under the Savings and Credit Programme, the group members deposit an amount of Tk. 62,849.5 as Savings fund.

Brief Description of findings/results

- Total 27 Apex Organizations – Coordination Committees are functioning in the coastal area towards claiming rights and status of coastal communities.
- Numbers of Boys and Girls graduated from CODEC non-formal schools accomplished SSC, HSC & University Degree.
- Adolescent boys and girls are exposing with different cultural events such as debate, wall painting, open-air theater etc.
- Small enterprise and business have been extended in the coastal area through skill training.
- VOs leadership and management functioning sufficiently through organization development training.
- GoB and NGOs health, sanitation, plantation and other social services are gradually channelized in the community through Coordination Committees.
- Coordination Committees developed a rapport and linkage with respective Union Parishad.
- Right-based issues such as sea piracy, khash land distribution, river erosion, women violence, dowry and early marriage have been addressing by the VOs and Coordination Committee.
- Regular Savings deposit habits are practicing individually and collectively.
- Family based income enhancement largely visualized through intervention of credit program.

Technical Reports Prepared

- CODEC Half-yearly and Annual Progress Report
- Minor Study Report on Program Impact conducted by internal and external resource persons.

| Title Community Development Centre (CODEC) | | Status SWD-1160185 |
| Location Chittagong, Lakshmipur, Noakhali, Patuakhali, Barguna | | |
| Implementing Agency CODEC, Chittagong | | |
| Executing Organisation CODEC | | |
| Funding Agency DANIDA | Funds Allocated (optional) | |
| Start Date February 1985 | Completion Date Open ended | |
| Contact Person with detailed address, telephone & others Executive Director, COCEC House 62/B, Road 3, Chandgaon R/A, Chittagong. Phone: 031-670663 | | |
| General Objective CODEC's development objective is to ensure that coastal and riverine communities participate in the mainstream development process and realise social, political and economic benefits. | | |
| Specific Objectives The immediate objective is to enable the target group to understand, articulate and exercise their right and to improve their earnings from better conserved fishing environment and non traditional savers of income. | | |
| Ultimate aim The ultimate aim of CODEC's intervention is to improve the socio-economic standing of the fisher-folk communities and to empower them through institution building, education and training and provision of savings and credit facilities. The VOs within an area, typically a Union, will form a Coordination Committee, which will be democratically elected by the VOs. The CC will act as spokesman for the member VOs and it will eventually take over the responsibilities and activities from CODEC. | | |

| Start Date July 1998 | Completion Date June 2004 | |
| Contact Person with detailed address, telephone & others | | |
| <u>Head Office: Khulna</u> Md. Mujibur Rahman, Coordinator Prodipan Shaheb Bari Road, Maheswarpasha, Khulna 9203 Tel: 041-774777; Fax: 041-774729 E-mail: ppnh@khulna.bangla.net | | <u>Liaison Office. Dhaka</u> Executive Director Prodipan 6/1-A, (Gr Floor) Block F, Lalmatia, Dhaka 1207 Tel: 02-8114847; Fax: 02-8117663/8115386 E-mail: prodipan@neksus.com |
| General Objective To initiate a sustainable natural resource management process by ensuring peoples participation through organizing the primary actors of the Sundarbans for regeneration of the forest and establishing their rights on the products and resources of the Sundarbans to secure their livelihood. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To create mass awareness for regeneration of the Sundarban ◇ To start a collective movement so that the primary actors of the forest can have community ownership on the forest and forest resources ◇ To involve the primary actors in regeneration process of the forest ◇ To provide the target families an alternative source of income so that the pressure on the forest is reduced ◇ To develop homestead forestry in order to reduce over-exploitation of forest resources | | |
| Activities Performed | | |
| On-going Activities | | |
| <ul style="list-style-type: none"> ◇ Institution Building; Baseline survey; Rapport Building; Group formation; Savings building; Group Activities; Workshop; Household Afforestation; Dialogue; Credit for IGA; Staff Training; Group Members training; Monitoring and Supervision; Reporting. | | |
| Brief Description of findings/results | | |
| <ul style="list-style-type: none"> ◇ The morality of opportunist group of government officials are being changed ◇ The forest officials honor the apex body leaders and in some cases seek help to identify the wood poachers ◇ Peoples are giving voluntary time while campaign continued by the apex leaders and Field Workers at the area ◇ Villagers promised to assist Peoples Vigilance Committee to protect and safeguard the forest ◇ Awareness increased among all level on the regeneration and conservation of Sundarbans resources | | |

- ◇ People perceive the apex body as their own institute to safe guard their interest;
- ◇ To a large extend values and dignity of women has been recognized;
- ◇ Homestead plantation become popular to the area;
- ◇ Resource users are extracting the Sundarbans resources scientifically and Eco-friendly;
- ◇ Self confidence on alternative livelihood activities has been increased;
- ◇ Alternative initiative to save the forest and water resources are being sensitized;
- ◇ Peoples' interest towards seasonal vegetable cultivation has been increased;
- ◇ Peoples knowledge has been increased on nutrition;
- ◇ The Sundarbans dependent people become much conscious to generate individual savings for self survival in the lean season;
- ◇ Upazila administration extends all co-operation to PRODIPAN for proper implementation of the Project

3.2.5 Patuakhali Mohila Unnayan Samity (PMUS)

PMUS - 01

| | | |
|---|--|---|
| Title CERP, Housing, Fish Culture Micro-credit, Child Literacy, Sewing, Tonga Making, Cage Culture, Prostitute Rehabilitation Program | | Status On-going |
| Location Patuakhali | | |
| Implementing Agency Patuakhali Mohila Unnaon Samity (PMUS) | | |
| Executing Organization Patuakhali Mohila Unnaon Samity (PMUS) | | |
| Funding Agency World Bank, Bangladesh Bank, Fisheries Dept., Southern NGO, Network, DANIDA, Forest Dept. and Self fund | | Funds Allocated (optional) BDT 1.04 Million |
| Start Date 1990 | | Completion Date |
| Contact Person with detailed address, telephone & others Mrs. Monowara Hakim Hs: 1, Rd: 1, Kaler Pukur Par, Patuakhali: 8600. Tel. 880-0441-62881 E-mail: pmus@blfb.net.bd | | |
| General Objective PMUS is to raise awareness and consciousness of women about their existing socio-economic condition and to alleviate miserable socio-economic condition through creating employment opportunities and earning extra personal and family income. | | |
| Specific Objectives <ul style="list-style-type: none"> ◇ Raise awareness and consciousness of women about their existing socio-economic condition ◇ Urge them in taking joint ventures against prevailing injustices of all kinds and abolish them from the society ◇ Helping the destitute women for development of the society so that they may meet their basic needs and can establish harmony of justice and pace in their families, society and country ◇ Alleviate miserable socio-economic condition through creating employment opportunities and earning extra personal and family income ◇ Come out of their veil, participate on socio-economic development activities and avail government facilities, which are meant for their development ◇ Rehabilitation of prostitute through different types of socio-economic works such as cage culture, fish culture, poultry, package preparation etc. | | |
| Activities Performed <ul style="list-style-type: none"> ◇ VGD: Two hundred women were trained up under this program. The women were skilled up under different types of training. The trainees received 30 Kg wheat per month. The program was conducted by fund of the Department of women affairs. ◇ Sewing: Fifty women were trained up under this program. PMUS have purchased 10 sewing machines and one embroidery machine for the training center. Fifty women were working under this program. ◇ Nursery development: Nursery and development of the environment is co-related in the context of Bangladesh. Women collected seeds from the locality and planted trees at their homestead area and PMUS own nursery. ◇ Adult education: Four thousands and fifty people were literate under this program at Galachipa thana. There were working 135 teachers and 10 supervisors. The Dept. of Non-formal Education funded this | | |

| |
|--|
| <p>programme. There were 30 people (40% male, 60% female) per class whose age limitation were 18-45 years. PMUS received the prize of Best Performer of Non – Formal education under International literacy day – 98.</p> <ul style="list-style-type: none"> ◇ Fish culture: PMUS has taken lease of a big pond named Kaler Pakur through tender call from Patuakhali Pourshava. This pond is used for developing the socio-economic condition of some poor beneficiaries through fish culture. Department of Fisheries (DoF) sanctioned some loan to PMUS for poverty alleviation of beneficiaries. PMUS has also sanctioned a large amount of credit from the own fund for this purpose. This program started in June 96. PMUS received the prize of the best fish farmer in 1998 from the Dept. of Fisheries. |
| <p>On-going Activities</p> <ul style="list-style-type: none"> ◇ Settlement of embankment settlers ◇ Formation FFG ◇ Plantation of sea-side embankment ◇ Plantation of mangrove foreshore ◇ Plantation of non-mangrove foreshore ◇ Utilization of community Development Fund (CDF) based on PRA/RRA ◇ Training of beneficiary groups and community members |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ Plantation has been completed in 67 hectars of embankments in Kuakata during July -August in the last year by the project of CERP and about 100 peoples have been benefited by the plantation project. ◇ Lands have been distributed among the landless people. ◇ Setting the tube well and sanitation have solved water and sanitation problem. ◇ Women have been trained up on the aquaculture and they are now financial benefited. ◇ The tailoring professions have provided women and creating various job opportunities has provided many prostitutes. <p>(All of the programmers are under Credit systems. But it is very tough to run the project smoothly due to proper communication and funding problem.)</p> |

3.2.6 Wetland Resource Development Society (WRDS)

WRDS - 01

| | | |
|---|--|--------------------------|
| Title Demonstration of Hydroponics in Wetland and Waterlogged Area for Scaling up to the Whole Southwest Region of Bangladesh. (An alternative food production system for the people living in wetland and waterlogged areas) | | Status Ongoing |
| Location Gopalganj, Barisal, Perojpur, Bagerhat and Khulna Districts. | | |
| Implementing Agency WRDS (Wetland Resource Development Society) | | |
| Executing Organization WRDS (Wetland Resource Development Society) | | |
| Funding Agency Prip Trust | Funds Allocated (optional) BDT 1.3 million | |
| Start Date 2000 | Completion Date 31 st December 2003 | |
| Contact Person with detailed address, telephone & others A.H.M. Rezaul Haq, Fellow Advocacy Institute and Ashoka 21, (old 24) Hazi Mohsin Road, Khulna-9100 Tel: 88-041-723425; Fax: 88 (041) 731876 E-mail: wetland@bdcom.com | | |
| General Objective Conservation and wise use of wetland for the benefit of wetland people. | | |
| Specific Objectives <ul style="list-style-type: none"> ◇ To prepare a regional map of wetlands and waterlogged areas with Geo-morphological features showing natural, manmade wetlands and waterlogged areas separately ◇ To collect data on indigenous techniques of hydroponics from secondary sources and up-dated scientific (research) information. ◇ To collect data and information on farming practices and food production through soil-less cultivation - hydroponics from the study areas. ◇ To collect data and information on socio-economic condition of wetland and waterlogged area people for designing and implementing an action plan for improving their livelihood and development of food production potentials in the study areas ◇ To identify the constraints and impediments of dissemination, replication and development of soil-less cultivation in the whole region of wetland and waterlogged areas. ◇ To generate economic analyses of soil-less-cultivation and explore the market potentiality of the same in home and abroad. ◇ To develop a database on wetland management. | | |
| Activities Performed <ul style="list-style-type: none"> ◇ Demonstration research on hydroponics through field study, followed by field experiments in two selected areas of the project to develop, and hence standardize the hydroponics practices in wetland and waterlogged areas scattered in the southwest region of the country, and integrate such approach with indigenous knowledge, modern agro-technology & provide forward linkage for marketing support. ◇ Transfer of technology from the developed region (where soil less farming practices) to waterlogged region (where it is unfamiliar) for scaling up the same in suitable areas in the wetland and waterlogged regions of Bangladesh. Thereby, uplift socio-economic condition of the wetland and the | | |

| |
|---|
| <p>waterlogged area people through introduction of soil-less cultivation of different crops/vegetables, etc.</p> <ul style="list-style-type: none"> ◇ Build awareness in the civil society about productivity and function of wetland and develop a strategy for conservation of wetland. |
| <p>On-going Activities</p> <ul style="list-style-type: none"> ◇ Establishment of demonstration sites one in wetland and waterlogged areas. ◇ Identify the constraints and impediments of soil-less cultivation in wetland and waterlogged area, ensure conservation and soil-less cultivation and prescribe remedial measures most conducive for proper utilization of wetlands and waterlogged areas in the country. ◇ Provide logistics to some selected beneficiaries for involving in hydroponics farming, inter-alia, organize training for the beneficiaries on adoption of hydroponics technology. ◇ Generate economic and marketing data on hydroponics products from pilot/action research projects to work as a base for future economic and financial planning to make Hydroponics project profitable and cost effective for replication in other areas. ◇ Study the scope for increased women employment in soil-less cultivation - hydroponics and utilization of other natural resources, which are apparently problematic in the project area. |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ The proposed project has been designed to assimilate appropriate knowledge on technology and management of hydroponics from the wetland areas of existing hydroponics practice and to explore potentiality, scope of operation and transfer of this technology especially in the water logging areas and for its scaling up to the whole region. ◇ The project further aims to identify the prevailing constraints or bottlenecks exploring their prospective solutions to make hydroponics profitable and cost effective for replication; flourishing open water fisheries; strengthening the resource base; opening large avenue for employment opportunity of rural unemployed people; to invigorate and rejuvenate the rural economy as well as to properly manage and conserve the wetland and waterlogged areas. ◇ The project will defrag indigenous knowledge and explore scope of utilization of indigenous technique for development of sustainable productive system. ◇ The project areas will be the wetlands of Gopalganj, Barisal and Perojpur districts where hydroponics is presently practiced and the vast waterlogged areas of Jessore and Khulna districts where water logging has adversely affected both the natural and social/human environment and hydroponics has not yet been practiced in spite of having its scope to mitigate the consequences. ◇ The methodology of the project will be assessing the existing knowledge base e. g. hydroponics farming system, appropriate technology & techniques, farming economics, management system etc. from the wetland areas and to make it practically adaptable in the waterlogged areas through its demonstration. ◇ The project will bring out with the outputs -assimilation of indigenous technology on hydroponics; employment generation; establishment of environmentally sound wetland conservation strategy; develop comprehensive database on hydroponics; advocating hydroponics to the relevant direct and indirect stake holders etc. ◇ The main project activities envisaged are; staff recruitment, staff orientation & training, field visit and site selection, beneficiary selection, logistic support to beneficiaries, group formation, updating database on ◇ Hydroponics, workshop arrangement, submission of half yearly reports and evaluation and impact assessment of the project. |

3.2.7 CARE International Bangladesh

CARE - 01

| | | |
|--|--|---------------------------|
| Title Livelihoods Monitoring Project (LMP) | | Status On-going |
| Location Cox's Bazar | | |
| Implementing Agency CARE Bangladesh | | |
| Executing Organization CARE Bangladesh | | |
| Funding Agency DFID | Funds Allocated (optional) BDT 12.84 million | |
| Start Date April 2000 | Completion Date March 2005 | |
| Contact Person with detailed address, telephone & others Livelihoods Coordinator 61, Road # 7/A, Dhanmondi, Dhaka 1209. Tel.: 9129209, 9115839, 9112315 Ext. 132 E-mail: arif@carebangladesh.org | | |
| General Objective To increase the effectiveness of CARE and DFID's current and future interventions for rural poor in Bangladesh. The ultimate goal is to identify processes and approaches, which will best capture the needs of a target community. This will allow management to strategize more efficiently as to what are the best interventions, which will mitigate the needs of this target community. Purpose: Livelihood lessons from SHABGE and GO-INTERFISH applied by DFID & CARE. At the effect level, it is important that DFID and CARE are actually applying the findings. This will depict a behavioral change in these organizations and will imply that the outputs from the LMP are being positively accepted as being useful. Initially starting with SHABGE and GO-INTERFISH, it is expected that this approach will eventually spread to other projects within these 2 organizations | | |
| Specific Objectives (Outputs) <ul style="list-style-type: none"> ◇ Quantify the livelihood changes in project participants. This output deals strictly with quantitative information of variations in different parameters surrounding a HH's livelihoods. This indices health security, educational security, food security, habitat security, economic security, and social capital. ◇ Understand the causes of livelihood changes of project participants; This Output will deal with qualitative issues surrounding a HH. ◇ Analyze the wider livelihood context of project areas; this will deal with broader issues affecting communities and villages. Activities will encapsulate regional shifts in livelihoods, from secondary data sources, and try to understand better how structures and processes at a regional and governmental level are affecting these communities. It will also try to better assess the degree to which the project contributes in encouraging policy level changes, prompting governments to establish resource centers and processes to benefit such communities. ◇ Develop the guidelines for livelihoods monitoring to equip CARE and DFID in institutionalizing livelihoods monitoring system within the participatory project M&E systems. | | |
| Activities Performed <ul style="list-style-type: none"> ◇ Methodologies for livelihoods monitoring developed; ◇ Staff recruitment completed; ◇ Staff received Livelihoods orientation; ◇ First round baseline done and data were analyzed; | | |

| |
|--|
| ◇ Strategies for baseline formulated; |
| On-going Activities ◇ Baseline for northwest; ◇ Collecting contextual information for southeast (Cox's Bazar & Chittagong). |
| Brief Description of findings/results |
| Technical Reports Prepared A case study on LMP has been developed and waiting for publication. |

| General Objective | | |
| To improve the household food security of poor women and men farmers in 5 districts. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ Capacity of poor women and men to innovatively manage their homestead resources improved. ◇ FFS groups have enhanced ability to access information, inputs and services for homestead production. ◇ Effective network of service providers established. | | |
| Activities Performed | | |
| <ul style="list-style-type: none"> ◇ Training needs assessment of project and PNGO staffs ◇ Identify/select NGOs ◇ Sign MoU with PNGOs ◇ Foundation training for PNGO and CARE staff ◇ Developed PPs and budgets of the PNGOs ◇ Conduct gender workshops and training for PNGO and CARE staff ◇ Identify new working areas ◇ Implement options for secondary adoption ◇ Continue school programming ◇ Develop mechanism for networking with service provider and FFS/LE ◇ Attend technical/coordination committee meeting of DAE and NGOs at district and upazila level | | |
| On-going Activities | | |
| <ul style="list-style-type: none"> ◇ Technology promotion through on farm trials/pair trials ◇ Continue School program ◇ Promote Secondary adoption (buddy system, union mela, upazila mela, district mela, field day, wall writing/promotional board) ◇ Support to Phase out Farmers Field School (FFS) group (Conduct co-facilitators' training, Group | | |

| |
|--|
| <p>mgt. & leadership training, networking training.)</p> <ul style="list-style-type: none"> ◇ Implement FFS to service providers linkage mechanism ◇ Jointly program implementation with Department of Agriculture Extension (DAE) ◇ Introduce phase out FFS group with local PNGOs, DAE (BS), seed, fertilizer vendors, credit institution and other GO, NGO, private impacts suppliers ◇ Piloting farmers federation ◇ Networking (DAE/Livestock/fisheries department, workshop, joint activities in the field) ◇ Coordination meeting/linkage (NGOs/CBOs) |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ Most of the women have gained positive changes in vegetable production, consumption and knowledge. Women are gaining incomes, which is either shared in the family or used by women "as they want". ◇ The project has great potential to support women to achieve changes in their social status. Many of the women are experiencing significant changes in their position in the HH and the community. The husbands were treating them with more respect and allowing them to participate in making decisions. Their mobility increased. ◇ The ability of poor women to benefit from this project is very dependent on the size of homestead. ◇ Overall the 'end result' of partnership has been graded in between 'medium to excellent. ◇ PNGOs are delivering services at a lower cost. PNGOs are taking on more responsibilities for the project work. Both parties are trying to develop more of a partnership relationship. ◇ A standard capacity building program for a unique set of organizations is unlikely to meet the needs of each PNGO and results in provision of unnecessary and expensive support. ◇ There is a need for a practical plan for shared leaning and programming development with PNGOs. ◇ The current project would be considered highly satisfactory by many development agencies, but if CARE and DFID expect SHABGE to have a significant impact on the formation of social capital there needs to be significant changes to how the Farmer Field School is organized and implemented. ◇ The SHABGE (DFID) project is resulting in the adoption of a wide-range of innovations that are undoubtedly beneficial, but they do not generate an understanding of underlying scientific principles, nor are they fostering systematic experimentation among the targeted women. FFS is these things that have provided the basis for self-sustaining learning groups in some other countries: groups that organize and conduct field trials and training of other farmers, group that negotiate services with government agencies and advocate their own issues and rights. All this is possible when farmers become experts. In SHABGE, the women are becoming adopters. A large number of them appear to be productive, healthy and happy adopters. ◇ The consultant found a contradiction between the technology development approach and the FFS extension approach. The FFS approach is based on experiential learning and participatory development; whereas the current technology development approach is a more didactic, one-way information flow. |
| <p>Technical Reports Prepared:</p> <ul style="list-style-type: none"> ◇ 2 output to purpose review (OPR) done by external consultants ◇ Partnership review ◇ Farmers Field school approach ◇ Monitoring & Evaluation ◇ Historical Review of the Homestead Program ◇ ANR Conference proceeding (internally produced) |

| General Objective Sustainable increase in the productivity of Rice-based farming system for Resource-poor farmers. | | |
| Specific Objectives Making available to Resource-poor farmers in the Southwest of Bangladesh a large range of appropriate Traditional and Modern Rice Varieties and technologies. | | |
| Activities performed <ul style="list-style-type: none"> ◇ 6 (six) sub-ecosystems identified in the fresh and seawater interface. ◇ 300 Resource-poor farm households from 20 villages in the 6 sub-ecosystems involved actively with the sub-project. ◇ 116 Modern and Traditional varieties of Transplanted Aman rice identified in 20 villages in 4 districts. ◇ Research and development capacity of Local NGOs and farmers enhanced for Mother and Baby Trial plot in the 6 sub-ecosystems during 2002 T-Aman season ◇ Established the need for farmer testing and evaluation of the collected germplasm. ◇ The organization of this project has unique characteristics. 16 local NGOs, working in specific sub-ecosystems are entitled to work with local farmers, who in future will themselves be extension workers. ◇ Conducted farmers' gatherings for Participatory Varietal Selection (PVS). ◇ Seed Multiplication of selected T.Aman and Aus varieties and establishment of on-farm trials with them to identify potential varieties ◇ Holding a Rice Fair (Dhan Mela) in Khulna. | | |
| On-going Activities <ul style="list-style-type: none"> ◇ Seed Multiplication of selected Aus varieties and establishment of on-farm trials to identify potential varieties ◇ Seed Multiplication of selected T-Aman varieties. | | |

Brief Description of findings/results

- ◇ Farmers in Southwest Bangladesh face particularly challenging environmental and socio-economic constraints in their production systems. This includes a recent and rapid degeneration of the resource base, shifts in basic environmental characteristics, and limited availability of improved rice technologies. This project intends to address these problems by assessing local rice diversity and facilitating communication between farmers in the southwest to solve these shared, important problems. In Phase-I
- ◇ Indigenous and Modern T-Aman Rice varieties were identified & collected; In Phase-II the farmers shared the varieties with best potential with other farmers, and now in Phase-III, T-Aman Seed multiplication and and Aus trials by farmers are on-going.

| General Objective Awareness Creation for Sustainable Extraction of Sundarban Resources. | | |
| Specific Objectives <ul style="list-style-type: none"> ◇ Awareness Creation among Sundarban Forest Resource Ext ractors. ◇ Publication of Newsletters, bulletins etc. | | |
| Activities performed <ul style="list-style-type: none"> ◇ Held local workshops and Focus Group Discussions among Forest Resource Extractors. ◇ Held Regional Workshop on March 27, 2003 (Number of Participants = 800 including minister, MPs, ADB representatives, Environmental Activists, Journalists, University Teachers & Students, Sundarban Resource collectors and Peoples' Representatives in Local Government Bodies in the Impact Zone). ◇ Observed World Mangrove Day ◇ Published Sundarban-related News in Fact Sheets in English and Bangla and Bulletin "Upakul Barta" in Bangla and "Coastal Newsletter" in English. | | |
| On going Activities <ul style="list-style-type: none"> ◇ Workshops and FGDs ◇ Opinion Sharing Discussions ◇ Collection of Case Studies. | | |
| Brief Descriptions of findings/Results <ul style="list-style-type: none"> ◇ The Sundarban reserve forest is the large mangrove eco-system that exists in the world today. Out of its total area of about 10,000 square Km Lies within Bangladesh and the rest is in India. The sundari trees which the forest derives its name have recently been affected by a diseases known as top- dying which has been attributed to excessive salinity. One reason for the excessive salinity is the total absence of fresh water flows from upstream during the dry months of the year. Secondly expansion of shrimp cultivation in the areas adjacent to the Sundarbans has resulted in increasing salinity as well as massive unemployment. The unemployment resort to extraction of forest resources and a massive degradation of the forest. ◇ Poaching of animals such as the world renowned Royal Bengal Tiger for its skin and of deer for meat | | |

are threats to sustain of bio- diversity in the forest. Shrimp cultivation has given birth to an ancillary industry that of collecting shrimp fries from the estuaries and creeks in and around the Sundarbans. But this practice kills of millions of fry scores of their varieties of fish and shrimp, causing great loss to aquatic bio-diversity as well as fish stock in the coastal waters.

- ◇ Unnayan Shahojogy (Coastal Development Partnership CDP) has been conducting advocacy for conservation of environment and bio- diversity in the coastal region for years. Now that a project titled Sundarban Bio-diversity conservation Project is under implementation by the forest department, a strong advocacy is necessary to persuade the project authorities to address the underlying
- ◇ Regions for the deterioration of the forest, such as stoppage of fresh water flow, shrimp cultivation etc. Hence the need for an advocacy program as detailed in this project.

| WFP/BWDB | | |
| Start Date | Completion Date | |
| October 1997 | June 2003 | |
| Contact Person with detailed address, telephone & others | | |
| Mr. S M Nazer Hossain, Executive Director, ISDE Hs: 485, Rd: 01, Block-B, Chandgaon R/A Chittagong-4212, Tel: 031-671727, 018389567 E-mail: isde@abnetbd.com | | |
| General Objectives | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To create employment generation opportunities for the coastal under privileged and vulnerable women for a fixed period of relatively longer duration. ◇ To integrate the hardcore poor women into the development program implemented by the local NGOs to eventually help the capacity building leading to a degree of self-reliance. ◇ To ensure proper maintenance of fixed length of embankment and to ensure sustainable maintenance management system. ◇ To enhance durability of infrastructure thus preventing major rehabilitation works. | | |
| Activities Performed | | |
| Embankment Maintenance: | | |
| <ul style="list-style-type: none"> ◇ To protect the coastal embankment from the disaster and to reduce the expenditure of periodic maintenance work of the BWDB polder at the coastal areas, ISDE engages the coastal women in regular maintenance activities. ◇ Women are selected from the polder areas, through providing necessary training and orientation to take care maintenance of the embankment. ◇ ISDE provides necessary tools to take care. It also provides training about earthwork and maintenance of embankment. | | |
| EMG Formation: | | |
| <ul style="list-style-type: none"> ◇ EMG is formed with the local distressed women. ◇ The EMG has a group leader to look after the group activities. ◇ ISDE field level staff supervises and monitors the EMG activities and provides necessary technical assistance to the EMG to maintenance the embankment. | | |
| Integrated With Normal Development Work: | | |
| <ul style="list-style-type: none"> ◇ To integrate with the normal development process and access in saving and credit facilities and continuation of the sustainable development of the under privileged and destitute women in coastal areas ISDE were initiated group formation activities with women. | | |

| |
|--|
| <ul style="list-style-type: none"> ◇ EMG worker was selected from the groups. The groups were provided different awareness raising, non-formal education, human and skill development training and credit support for income generation etc. |
| <p>Savings Accumulation:</p> <ul style="list-style-type: none"> ◇ The group members were under covered in savings facilities. Each member had to deposit Tk 5/week to raise capital for future investment for him or her selves. ◇ All the members are save two types of savings. ◇ They save a fixed amount in-groups and another fixed amount is deposited in bank account from their wages. |
| <p>Credit for Income Generation:</p> <ul style="list-style-type: none"> ◇ To create a sustainable development program for beneficiaries, ISDE try to create alternative source of income for the EMG members through providing credit and technical support to the EMG members. ◇ Each member was brought under credit support and they were provided technical support for undertaken IGAs and well managed their IGAs schemes. ◇ Each member is provided Tk. 2000- 5000 as loan for undertaking IGAs schemes. ◇ Teams are paid back the installment within one year through 50 equal installments. They are also provided follow up service and orientation of their IGAs. |
| <p>Human and Skill Development Training:</p> <ul style="list-style-type: none"> ◇ Training is most important to transfer the technology and skill. ◇ ISDE were conducted different training to develop human and professional skill of the EMG members. During the reporting period ISDE was arranged course for the members. ◇ The duration of the course is 3-6 days and each batch 20-30 participants. The training field based and training center based. The development classes were conducted in-group meeting based. ◇ ISDE's resources person in different skill and some outside resource person conducted the sessions. |
| <p>Ongoing Activities</p> <p>Same as above</p> |
| <p>Brief Description of findings/results</p> <p>It has include at least 240 women into the embankment maintenance group (EMG), a total of 23 lacs has been distributed as credit to EMG members and most of them are trained on various social awareness raising and human and skill development issues.</p> |

| August 1993 | | Ongoing |
| Contact Person with detailed address, telephone & others | | |
| Mr. S M Nazer Hossain, Executive Director Hs: 485, Rd: 01, Block-B, Chandgaon R/A Chittagong-4212, Tel: 031-671727, 018389567 E-mail: isde@ abnetbd.com | | |
| General Objectives | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To involve the disadvantaged & under privileged women in an institution building and development process for their socio economic improvement. ◇ To make easy access credit and capital support to undertake IGAs for the targeted people who have no access to institutional credit facilities. ◇ To create opportunities and field for the women in employment and income earning activities. ◇ To assist the women in building their own capital, savings and asset from surplus income. ◇ To release the beneficiaries from torture, deprivation and oppression from the moneylender, middleman etc. ◇ To make easy accessible to the women and their family members the facility of education, preventive health care services, safe water and sanitation etc and other governmental and non-governmental facilities. | | |
| Activities Performed | | |
| Organization Building and Development: | | |
| <ul style="list-style-type: none"> ◇ ISDE works through beneficiary's organization based concept and all the development activities are run through it. ◇ Landless and near landless household owning less than 1.5 acre of land and permanently living in the working areas are eligible to become a member of ISDE's organized group. ◇ A group is formed with 20-25 people by taking one member from each eligible family. Separate groups for male and female are formed. ◇ After formation of the group individual members make compulsory group savings at least of Tk.5 per week. Credit workers facilitate the group activities run properly. ◇ Senior staffs of ISDE observed the group activities. After six months the group activities were run properly and regularly then credit support was given to individual to undertake income and employment generation project. | | |
| Awareness Raising and Training: | | |
| <ul style="list-style-type: none"> ◇ The main causes of the poverty "not only less income, no expenditure plan is also the main cause of poverty". For this reason ISDE introduced 1year development education classes for the group | | |

| |
|--|
| <p>members.</p> <ul style="list-style-type: none"> ◇ The development education classes provide awareness and education to the beneficiaries in different issues such as the problems of illiteracy, cause of poverty, importance of savings, divorce, women violation and torture, gender, women participation in income earning activities etc. ISDE also conducted various training courses for the group members and the leaders. ◇ The group members and the beneficiaries are provided with two types of training <ul style="list-style-type: none"> - Human development and - Skill development training. ◇ These include human development, consciousness raising, leadership, group management, group record keeping, IGAs management, family law and women rights, weaving and handicrafts, poultry rearing, kitchen gardening, nursery development etc. ◇ Each course has 30 participants and course duration is 3 to 5 days. ISDE senior staff and trainers conducted the training course and some times resources people are hired from government and non-government sources. |
| <p>Credit Support for Income Generation:</p> <ul style="list-style-type: none"> ◇ Capital is the main problem to undertake any income and employment generation activities by the beneficiaries. ISDE provide credit support to create employment and income earning opportunities for the beneficiaries. ISDE does not introduce any new IGAs schemes; it is given emphasis to promote the existing field, which is locally available, marketable, and low technology. The current IGAs field are poultry rearing, cow fattening, goat rearing, small shop, rice husking, muri making, home gardening, bamboo and cane work, fish processing, weaving and handicrafts, betel leaf cultivation, agriculture, rickshaw van workshop etc. The credit is given with a 15% service charge and repayment is by 50 equal installments. The Credit Worker (CW) collects the installment at weekly group meetings and discusses about progress and strengths weakness of the group. After initial discussion for any individual loan application the CW helps to fill up the loan application and Unit Manager conduct a feasibility study and provides technical comments and recommend for approval. ◇ During the reporting period ISDE has distributed another two types of subsidiary credit support to the beneficiaries. These are disaster credit and sanitation loan. The flood has damaged those projects or cyclones are able to get another loan from ISDE with out service charge. When a beneficiary receive second time credit she able to another subsidiary loan for installing latrine in her house. |
| <p>Ongoing Activities</p> <p>Same as above</p> |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ ISDE is mainly involved in building organizations & development of the poorest of the poor people of rural, urban and hilly areas to make habituated with savings generation and provide credit support to undertake income and self-employment generation activities. Side by side it provides human and skill development training to the beneficiaries members as well as the clients to create awareness about various social issues, develop human and leadership quality and professional skills. ISDE has already 635 groups and group member size is 13276, a total Tk.5348, 948 has become emulated as savings and individual savings become Tk1500-10500. Tk.16, 486,500 has been distributed as credit for income generation to the 8372 group members and outstanding sizes are Tk.9, 703,115. ◇ The existing beneficiaries' IGAs schemes if affected by the flood or cyclone are able to get disaster credit support to rehabilitate their IGAs. The group members who already received two times credit support from ISDE and it they have no sanitation facilities in their household are able to get sanitation credit to install the latrine. ISDE also thinks to provide low cost housing credit for the beneficiaries. It also distributed Tk.123, 000 as grant from welfare fund to the group member's family, in case of any death. |

| General Objectives | | |
| To build a happy and healthy society and environment through ensuring safe drinking water supply and personal hygiene practice. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To reduce the water born disease and improve the community health status through providing health and hygiene related behavior change activities. ◇ To ensure the safe drinking water supply and access sanitation facilities by providing education, awareness and necessary support to the community. | | |
| Activities Performed | | |
| Access to the Safe Drinking Water: | | |
| <ul style="list-style-type: none"> ◇ Due to coastal areas, access to the safe drinking water is a major problem for the community people. The length of deep TW is high and most of the areas are very remote. As a result they are deprived from government facilities. It is very much costly to install any tube well or ring well in the hill areas. ◇ ISDE provide tube well materials with the help of NGO Forum and other individuals and organization. | | |
| School Video Show: | | |
| <ul style="list-style-type: none"> ◇ ISDE has introduced school based education program to increase awareness about personal hygiene practice amongst the school going children. ◇ Video show and discussion were arranged for the school children to educate them. Before starting the video show a simple survey was conducted about the use of sanitary latrine and knowledge of hygiene matters. ◇ The lecture about sanitation and health increase knowledge about the use safe water and sanitary latrines. After a few days it has arranged follow up survey to find out the result/impact. | | |
| Courtyard Meeting: | | |
| <ul style="list-style-type: none"> ◇ To improve and increase sanitation practice and knowledge amongst the group members special meetings were organized for sanitation education. ◇ ISDE field workers arranged special education and motivation classes for the group members using the flip charts, posters IEC materials etc. It is effective meeting for the rural women gathering in a | | |

| |
|--|
| <p>yard to discuss about sanitation and hygiene related practices.</p> <p>Local Discussion Forum:</p> <ul style="list-style-type: none"> ◇ Local Discussion Forum was arranged for the community peoples where all the people sit together discussing the water and sanitation related problems. ◇ Local UP Chairman, leaders, thana level governmental officials took part the discussion. A resource person also provided an important lecture. After the discussion a documentary video film show program was arranged for the participants. <p>Ring Slab Production:</p> <ul style="list-style-type: none"> ◇ From ISDE Ring Slab Production Center has produced 6470 ring slab during the year and distribute them to the beneficiaries and other community people with production cost. ◇ During the period ISDE has provided sanitation loan to 310 group members for installation of latrines. They repay the installment in their group meeting. |
| <p>Ongoing Activities:</p> <p>Same as above</p> |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ Due to coastal and hill areas hardship life, safe drinking water and sanitation is most difficult. ISDE promoted the safe drinking water supply, personal health and hygiene practices and improve the environmental health and sanitation status of the beneficiaries through providing hardware and software support for the community people. ◇ The hard ware packages are produced and distributed ring slab for installation of pit latrine, tube well and ring well, Pond Sand Filter (PSF), Rain Water Harvesting installation for safe drinking water. ◇ The personal health and hygiene education support provide through courtyard meeting, child-to-child school and community, adolescent workshop, school video film show, religious leader workshop, community meeting, mobile film show etc. ◇ It has installed 03 deep tube well with the support of individuals from UK. |

| General Objectives | | |
| To reduce the mortality and morbidity rate in the 5 union amongst the 5000 household of Chakaria thana of Cox's Bazar district through preventive health care and MCH service. . | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To provide primary preventive health, nutrition and personnel hygiene education services to the 5000 households ◇ To provide ANC and PNC service to 5000 household through developing TBAs and holding satellite clinics ◇ To increase the immunization rate from 68% to 80% through campaigning and motivation ◇ To reduce the morbidity and mortality rate especially for mother and children by providing adequate knowledge and services ◇ To increase the sanitation coverage from 21% to 40%. | | |
| Activities Performed | | |
| Health Education and Services: | | |
| <ul style="list-style-type: none"> ◇ Preventive is better than cure, this is the main aims of the project activities. ◇ ISDE grass root level health worker female health visitor (FHV) were provided health education and service by the door-to-door visits and satellite clinics by the paramedic. ◇ The paramedic at both base and satellite offers general treatment for common diseases and ANC, PNC, clients. There are worms, anemia, respiratory tract infections; skin diseases, diarrhea and peptic ulcers were the common diseases in the areas. ◇ Due to coastal areas is also endemic in the area. Especial health education sessions were conducted for the pregnant and new mothers at the satellite clinics level. For the health education session ISDE use the courtyard, tea stall, cluster meeting, child to community and school, imam workshop channel for delivery the massages. Individual counseling were offered in both satellite and based clinic. | | |
| Antenatal and Post Natal Care (ANC & PNC): | | |
| <ul style="list-style-type: none"> ◇ Safe and hygienic delivery is the important problem in the project areas. ISDE offer the safe delivery service for the pregnant mother through developing TBAs and FHV. ANC and PNC are provided by the TBAs and FHV through door-to-door services. During the house visit high-risk mother have been identified and follow up visits made by the FHV and TBAs and some cases paramedic. ◇ Create awareness, motivation and information along with quality services. | | |

| |
|--|
| <ul style="list-style-type: none"> ◇ The acceptance of TBAs by the community has increased as a result a significant number of mothers are having their babies delivered by a trained TBAs. ◇ The FHV's and TBAs took the initiative to monitor post partum services like FP method adoption, distribution of Vitamin A capsules, and clinical post partum checks. <p>Growth Monitoring:</p> <ul style="list-style-type: none"> ◇ Malnutrition is major problem in the project areas, ISDE has arranged for nutritional status screening using MUAC the Mid Upper Arm Circumference. The coverage of MUAC monitoring is 80%. People are more curious to know the weight of their children and most of the mothers now know how to use the MUAC tape and so are able to monitor the status of their children by using MUAC tape. ◇ Almost all of the mothers know how to prepare ORS and produce a balanced diet. <p>Immunization:</p> <ul style="list-style-type: none"> ◇ Due to remote coastal backward areas EPI coverage still is not satisfactory in the project areas. The project staff and volunteers have continuously motivated and encourage the mothers about the importance of immunizing their children against six fatal diseases. ◇ As a result the community is strongly motivated to seek immunization and immunization levels have increased significantly. The irregular supply of vaccine and EPI camp is hampering the achievement. <p>Contraceptives Distribution:</p> <ul style="list-style-type: none"> ◇ The areas are very low priority areas of CPR in the country. Only 6% CPR coverage at the beginning of the project. Now it has increased to 41.10% amongst the eligible couples. ◇ The major methods used are the pill and condom. Due to bad and long distance communication IUDs and other clinical users check up have been slow. ◇ Ligations are inserted at the Thana health complex, which is far from the project areas. Currently all the FP education and motivation was mainly focused towards women, it is really true that women were interested in using FP methods, but their husbands were often resistant for religious reasons. ◇ For this reason ISDE has arranged a special training courses for the Imam, the religious leader in and attempt to overcome the resistance and educate the community people. ◇ Male Supervisors also arranged evening IEC classes for the husbands. As a result the use of condom is increase in during the time. <p>Nutrition Education:</p> <ul style="list-style-type: none"> ◇ Due to lack of awareness malnutrition is the important child health problems in the project areas. People are produce lot of item vegetable and fish and nutritious food is available but they do not consume it. Generally they sale it in near market. As a result the malnourished and sickness is high. ISDE has regularly arranged health education for mothers including nutrition education, cooking demonstration and promotion of the kitchen gardening activities to reduce the malnourished child rate. ◇ The community people are well aware about the importance of kitchen gardening. Most of them have chosen kitchen gardening to supplement family income as well as providing nutritious food for the family. <p>Sanitation coverage:</p> <ul style="list-style-type: none"> ◇ People are not aware about the importance of the personal hygiene practices. In the areas most of them are use tube well water for drinking purpose not only every homework. People are not interest to expend money in installing pit latrine. ◇ ISDE has arranged motivation, education, and awareness raising and counseling activities at households. In the coastal areas many families must walk a long way to collect the tube well water, ISDE has been installing tube well with the cooperation of NGO forum. |

Village level campaigns undertaken by members of Kishori Sanghas to participate in social processes and raise issues on early marriage, violence and discrimination with mothers, fathers, boys, elected members, elite; | | |
| On-going Activities | | |
| <ul style="list-style-type: none"> Regular meetings to the Kishori Sanghas to discuss critical issues related to gender discrimination and girl's and women's rights; Identification of livelihood training, apprenticeship/ internship opportunities and livelihood training imparted by the NGOs; National exchange programmes, workshops will be organize by and for the members of Kishori Sanghas as exposure to the best practices; Gender and child rights training with UP members in intervention areas; Advocacy and communication for behavioral change to enhance the rights of adolescents; Workshops with government and NGOs for creation of an adolescent policy. | | |
| Brief Description of findings/results | | |
| <ul style="list-style-type: none"> ◇ Kishori/adolscnt girls are becoming familiar with the peer education ◇ Awareness raised on girls deprivation through attending the regular meetings of the Kishori Sanghas; | | |

- ◇ Formative research and develop advocacy materials for adolescents (boys in particular) to expose them to gender discrimination and violence. Materials will be used by the NGOs for discussions and workshops;
- ◇ Intervention research on adolescent girls intervention areas for baseline, mid-term and follow up to generate lessons learned, to close gaps in information and for scaling up.

Technical Reports Prepared

4 DISTRIBUTION OF GO-NGO PROJECTS: AN ANALYSIS

| Administrative Area/Zila | Project number |
|--------------------------|---|
| Whole of Bangladesh | BWDB 26*; DoE 01, DoE 04, DoE 06; DoF 05, DoF 07, & DoF 14; DWA 01, DWA 04. |

5 CONCLUSION

This document attempt to list the agency wise (sector wise) development projects/intervention/activities of the GO and NGOs in coastal area. This also provides the essence of the aim of the development activities for the well being of coastal people and how GO and donor contributions are being made to reach out there at the grass root level. This can also be suggestive for the GO-NGO collaboration and partnership, which is essential in means of reducing vulnerabilities to enhance human capacity.

The GoB has finalize the ADP 2003 - 2004 with the aims to increase the income of the poor people, to create employment opportunities and to ensure human resources development by providing education, health and nutrition. Which is very much in line with the objectives of the ICZMP project. The ADP 2003-2004 is prepared as the first year of Three Years Rolling Investment Program (2003-2006) of the Government.

However, the inventory of projects and initiatives also has some limitations. In some cases it was difficult to get the information on fund source or allocation. These drawbacks can be overcome if revisit can be made or the existing information sources can be reviewed again.

| Start Date | (Expected) Completion Date | |
| 1993 | 2002 | |
| Contact Person with detailed address, telephone & others | | |
| Superintending Engineer, Jessore O&M Circle, BWDB, Khulna. Tel:041-763514 | | |
| General Objective | | |
| Environmental improvement and poverty reduction by reducing drainage congestion and increased agricultural production and creation of on-farm employment through Tidal River Management (TRM). | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ mobilizing beneficiary participation in design, implementation and subsequent O&M of the project facilities; ◇ rehabilitating the existing drainage infrastructure to reduce drainage congestion and protect the project area from tidal and seasonal flooding; ◇ providing support for the expansion of agricultural extension services that will be necessary; ◇ improving management of fisheries in polder areas. | | |
| Activities Performed | | |
| <ul style="list-style-type: none"> ◇ River dredging-28 km ◇ Drainage channel-404 km ◇ Closure-1 no. Embankment-24.5 km ◇ Hydraulic structure-7 no. ◇ Rehabilitation of hydraulic structure-8 no. ◇ Outlet structure-12 no. ◇ Tidal basin perimeter - 9.5 km ◇ Culvert/bridge-24 no. ◇ River dredging-2 km, ◇ Drainage channel-150.70 km, ◇ Embankment-8.86 km, ◇ Rehabilitation of hydraulic structure-11 no | | |

| |
|---|
| ◇ Outlet structure-8 no. Tidal basin perimeter-0.5 km, Culvert -bridge-14 no. |
| On-going Activities |
| Not applicable |
| Brief Description of findings/results |
| <ul style="list-style-type: none"> ◇ The ELA/SIA study which was executed between mid 1997 and mid 1998, identified and studied Tidal River Management (TRM) as an alternative solution to major regulators proposed by the project. TRM has operated in <i>beel</i> kederia to solve the drainage problem of the region by generating tidal flows in the main river system, which will prevent them from siltation. ◇ In addition, sediments will be brought in the beel areas as requested by the local people. ◇ Supported by the public opinion, the decision has been taken to implement a tidal basin in the upstream part of one of the main river systems. ◇ A stepwise, learning by doing approach will be followed, based on an extensive monitoring, which should build up experience with the performance and management of these tidal basins. Water Management Groups and Associations play an important role in the implementation. |

| Title | | Status |
| Gorai River Restoration Project (GRRP) | | Completed |
| Location | | |
| Southwest Region of Bangladesh covering 10 Districts. Bangladesh's Southwest Region (SWR) covers approximately 40,450 square kilometers (27 percent of the total area of the country). In 1991 it had a population of about 26 million (23 percent of the country total). The region is bounded by the Indian border in the West, by the Ganges-Padma and Lower Meghna rivers in the North and East, and by the Bay of Bengal in the South. It is estimated that about 10 percent of the area is covered with coastal mangrove forests known as Sundarban; about 13 percent is covered by surface water, including rivers and beels (natural depressions); and the remaining 77 percent is cultivated. In the Study area for this Project approximately 9 million people and communities, according to the 1991 census, depend directly or indirectly on the Gorai River. | | |

| Start Date | | Completion Date |
| September 2001 | | January 2002 (Pre -contact phase) |
| Contact Person with detailed address, telephone & others | | |
| Mr. Fortunato Carvajal M Team Leader Pre-contract Consultant Gorai River Restoration Project (GRRP) Hs: 10 A, Rd: 103, Gulshan, Dhaka 1212, Bangladesh Tel: 8821963, Fax: +880 2 8823783, E-mail – grrpmc@dhaka.agni.com | | |
| General Objective | | |
| The overall objective is to prevent environmental degradation specifically around Khulna, the coastal belt and in the Sundarbans, by undertaking restoration of the Gorai River and hence ensuring fresh water flows in the wet season and augmenting these flows during the dry season. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To enhance the Gorai river flow to restore the ecological and environmental services previously supported by the river. ◇ The focus of the specific environmental objective is not therefore, the re-establishment of the flow of fresh water but rather the services and attributes provided by the water conveyed within the river system prior to the closure of the off take. These services are many and varied and are manifest on differing scales in both time and space. | | |
| Activities Performed | | |
| <ul style="list-style-type: none"> ◇ The Feasibility Study, detail design and tender documents of the project have been already completed by the Main Consultant (DHV – HASKONING Consortium & Associates). The Main Consultants submitted their final report of the study in July 2001. ◇ The activities performed by the Main Consultant included preparation of detailed design, social impact assessment, economic and financial evaluation, Operation & Maintenance (O & M) evaluation, detail design and tender documents. ◇ IWM and RRI, Faridpur carried out mathematical modeling and physical modeling activities respectively to support to the Main Consultant activities. ◇ CEGIS executed Environmental Impact Assessment (EIA) & Environmental Management Plan (EMP), Social Impact & Resettlement Action Plan for the project independently, as the project | | |

| |
|---|
| <p>is a “Category A - Environmental Project”.</p> <p>Pre-contract activities of the project have been done as follows:</p> <ul style="list-style-type: none"> ◇ updating and detailing of the design of the proposed project interventions; ◇ preparation of Project Implementation Plan (PIP), general and individual procurement notices, tender documents, detailed project cost estimate etc.; ◇ to complete pre-qualification formalities including evaluation of tenders; ◇ to prepare ToR and draft contract for supervision consultant; ◇ to upgrade O&M report integrating BWDB’s organization framework. <p>More over, Resettlement Action Plan (RAP) for the project has been done by CEGIS.</p> |
| <p>On-going Activities</p> <p>At present the next stage of the project i.e. long-term restoration activity including off-take intervention and riverbank protection are under consideration of the Government.</p> |
| <p>Brief Description of findings/results</p> <ul style="list-style-type: none"> ◇ The Feasibility Study for the GRRP identified significant ecological and environmental benefits from providing a minimum flow of 60 m³/s and ensuring the monsoon flow at the Sundarban Mangrove Forest. Primary to these benefits is restoration, throughout the year, of the fresh water hydrological system to the Sundarban and the related impacts on ecological productivity and functions. Successful protection of the Sundri (<i>Heritiera fomes</i>) a fresh water mangrove is probably dependent on the GRRP. ◇ Additional benefits arising from retention of flora and fauna have been described along with potentially major losses to the coastal fishery in the Bay of Bengal. ◇ Other benefits arise from reduced salinization, increased access to fresh water and in-stream values such aquatic biodiversity; fisheries, agriculture and navigation result in a very strong economic justification for the project. ◇ The engineering option A1 (river training works in combination with occasional maintenance dredging) is reliable, uncomplicated and provides a significant recurrent cost saving over recurrent dredging options. ◇ The Project is considered to be technically and economically justifiable. ◇ Based on the risk analysis carried out, the EIRR of the project ranges from 11.1 to 22%, with a 91% certainty that the EIRR is 14% or higher. |
| <p>Technical Reports Prepared</p> <ul style="list-style-type: none"> • Feasibility Study Report of the Main Consultants • Tender Documents • Final Report on Mathematical Modeling by IWM • Final Report on Physical Modeling by RRI/ Faridpur • Environmental and Social Impact Assessment for the project by CEGIS |

| General Objective The long-term objective of MES was to improve the physical safety and social security of the people living in the coastal areas and on the islands in the Estuary. To retain and increase the operational knowledge of the hydraulic and morphological processes in Meghna Estuary and to Develop appropriate approaches and techniques for efficient land reclamation as well as effective riverbank protection measures. | | |
| Specific Objectives Major specific objectives were as follows <ul style="list-style-type: none"> ◇ Planning the development of the project area, giving due attention to carrying out a systematic programme of surveys to build up a reliable database for assessing estuarine behavior. Enhancing the optimum exploitation of the potentials of the areas in terms of land reclamation and land use, thus providing new land to landless people. A Master Plan is expected, in due course, to lead to an enhanced morphological stability and eventually to a shortened coastline. It thus aims at a safer environment for sustained human habitation. Mitigating the destructive forces of storm surges (cyclones), thus providing a higher degree of safety to the population and property, and improving the productivity of the coastal islands by introducing better system for drainage, salinity control and water management in the Development Plan. This would include those areas, which are at present not protected, and which are not covered by FAP-7. ◇ Enhancing understanding of natural forces that shape the physical properties of the area and which largely determine the potential for settlement and development. To the extent that information is available for other FAP studies, of the possible impact of flood protection works along the major rivers on hydraulic and morphological conditions in the rivers, relate consequences for the Meghna Estuary should be assessed. ◇ An early start to implementation of priority projects and programmes those are compatible with the phased long term and / or development plan. Implementations of works are the stage of practical experiments is not included in MES. ◇ Practical solutions for an effective continuation of surveys and studies, aimed at sustained and co-coordinated actions to update and progressively implement the long-term plan. ◇ Reinforce the capacity of the concerned institutions to survey, investigation, plan, design and implement MES its projects and long-term plan. | | |

| General Objective Create sustainable increase in agricultural production and incomes of marginal and small farms holders. Establishment of sustainable O&M systems for small-scale water resources project through beneficiary participation. | | |
| Specific Objectives Flood Control, Drainage Improvement and Command Area Development | | |
| Activities Performed <ul style="list-style-type: none"> ◇ construction of cyclone shelter ◇ construction/reconstruction of roads ◇ construction of bridge and box/pipe culvert ◇ re-excavation of pond ◇ tree plantation and care taking ◇ mobilization of beneficiary participation ◇ community based infrastructure development ◇ water resource oriented support programme ◇ development of effective operation system ◇ support for institutional strengthening ◇ capacity building for sustainable water management | | |
| On-going Activities Sub-project Implementation | | |

Brief Description of findings/results

In completed sub-projects farmers have already started adopting new cropping pattern taking advantage of new environment generated by sub-projects. Benefit monitoring and evaluation of 32 completed sub-projects in 1999 indicate that major impacts on crop production resulted from flood protection and drainage during monsoon. During 1999 Kharif II and 1999-2000 Rabi season, cereal and non-cereal production increased by 39% and 10% respectively.

| General Objective | | |
| The objective of the CGP project is to protect and improve the coastal environment by augmenting tree cover in the coastal region and to help in reducing poverty of the local population by generating supplementary income opportunities through the use of state owned fallow land. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ To raise plantation along the embankment, roadsides and rail sides, in homestead and foreshore areas. ◇ To help to increase the stability of the coastal embankments. ◇ To impart training to the youths and elders regarding raising nurseries, tree growth and management leading towards income generation and self-reliance. ◇ To create awareness to the people of the country regarding the importance of tree planting and afforestation. ◇ To create shelterbelt along the coast. | | |
| Activities Performed | | |
| 1. Embankment Plantation | | 1126 km. |
| 2. Roads and Highway plantation | | 624 km. |
| 3. Railway plantation | | 37 km. |
| 4. Feeder road plantation | | 5052 km. |
| 5. Foreshore plantation | | 450 ha. |
| 6. Distribution of seedlings for homestead plantation | | 8.58 million |
| 7. Distribution of seedlings for institution plantation | | 3.98 million |
| 8. Distribution of seedlings at raising cost | | 12.51 million |
| 9. Social forestry training | | 33481 Persons |
| 10. Departmental training | | 515 Persons |
| 11. Temporary Nursery establishment | | 111 nos. |
| 12. Non-residential building construction | | 4 nos. |
| 13. Residential building construction | | 4 nos. |

| | |
|--|--|
| On-going Activities | |
| 1. Embankment Plantation | 277 km. |
| 2. Roads and Highway plantation | 152 km. |
| 3. Railway plantation | - |
| 4. Feeder road plantation | 1520 km. |
| 5. Foreshore plantation | 250 ha. |
| 6. Distribution of seedlings at raising cost | 4.54 million |
| 7. Social forestry training | 70030 Persons |
| 8. Departmental training | 171 Persons |
| 9. Temporary Nursery establishment | 68 nos. |
| 10. Residential building construction | 2 nos. |
| Brief Description of findings/results | |
| 54.87% of the total work has been achieved by June 2000. | |
| Constraints | |
| ◇ | Delay in signing the benefit sharing agreement by land owning agency like BWDB Roads & Highways. Railway department LGED & other stakeholders. |
| ◇ | Grazing problems. |
| ◇ | Settler problems in the Embankment area. |

| 2000 | | 2002 (piloting phase of the project) |
| Contact Person with detailed address, telephone & others | | |
| Dr. Zahedul Karim Ahmed Project Director Multi Sectoral Programme for violence Against Women (4 th floor) Directorate of Women's Affairs, 37/3 Eskaton Garden, Dhaka. | | |
| Objective | | |
| The overall objective of the project is to protect and prevent the violence against women as the programme believes that one of the solution of violence against women is to support the health system in a way that it can provide emergency services, medication, legal aid, forensic test and counseling service to the victims. | | |
| Intermediate objectives | | |
| <ul style="list-style-type: none"> ◇ Improved handling of violence cases by the health services. ◇ Improved handling and investigation of violence cases by the police. ◇ Improved women's access, especially of poor women, to the criminal justice system. ◇ Increased public awareness, condemnation and resistance to all forms of violence. | | |
| Immediate objectives | | |
| <ul style="list-style-type: none"> ◇ Established and functioning multisectoral management structure for dealing with violence against women. ◇ Completed pilot activities whose assessment forms the basis of the following five-year phase. ◇ Five-year phase proposal prepared and preparatory activities has done. | | |
| Target group | | |
| Victimized women | | |
| Beneficiary Selection Criteria | | |
| Not applicable | | |
| Population Coverage | | |
| 282 cases till May 2003. (Domestic Violence: 142, Sexual abuse: 108, Burn: 32) | | |

Activities

- ◇ one of the major solutions of violence against women is to provide support to the health service system;
- ◇ established one-stop crisis center for immediate action in DMCH and RMCH;
- ◇ completed the burn unit development in DMCH;
- ◇ established forensic laboratory for DNA profiling;
- ◇ public awareness campaign;
- ◇ established the management structure of the multi sectoral activities of this project;
- ◇ coordination with the related agencies;
- ◇ inter ministerial steering committee has been formed to coordinate all the activities under this pilot project.

|---|--|-----------------------------------|
| Title | | Status |
| Holocene Sedimentation and Geomorphological Characterization of the Coastal Areas of Bangladesh for Cyclone Hazard Assessment and Zonation | | Completed |
| Location | | |
| All coastal districts of Bangladesh | | |
| Implementing Agency | | |
| Geological Survey of Bangladesh | | |
| Executing Organisation | | |
| Geological Survey of Bangladesh | | |
| Funding Agency | | Funds Allocated (optional) |
| Ministry of Science and Information & Communication Technology | | BDT 1 million |
| Start Date | | Completion Date (Expected) |
| March 1997 | | June 2002 |
| Contact Person with detail address: | | |
| Sirajur Rahman Khan Chief of Coastal and Marine Geology Branch, Geological Survey of Bangladesh, 153 Pioneer Road, Segunbagicha, Dhaka-1000. Tel: 9330639; Fax: 9339309; E-mail: romu@bdonline.com | | |
| General Objectives | | |
| <ul style="list-style-type: none"> ◇ Figure out the rate of Holocene (last 10 thousand years) sedimentation in the coastal and offshore areas of Bangladesh. ◇ Investigation of the record of cyclones in the deposits of the coast ◇ Determination of the rate of subsidence of the coastal areas during the Holocene time ◇ Documentation of the geomorphological characteristics of the coastal areas of Bangladesh for the classification of the coastal belt into cyclone surge susceptibility zones at Regional scale and cyclone surge hazard zones at Detailed or Large scale. ◇ Development of a data base on the past cyclones with tidal conditions at the time of landfall. Database will also be developed on the effects of those cyclones on coastal sedimentation as well as coastal erosions for data analysis within a GIS for the execution of the methods of hazard zonations to formulate storm surge models for both the scales. | | |
| Specific Objectives | | |
| <ul style="list-style-type: none"> ◇ Coastal hazard assessment in relation to tectonic subsidence, sea level rise and cyclone surge activity. ◇ Quantification of coastal land aggradations and degradation (coastal erosion and deposition) ◇ Coastal environmental impact assessment. ◇ Data base development on the geology, geomorphology, environment and hazard of the coastal districts of Bangladesh. | | |
| Activities Performed | | |
| <p>The project work has been executed by the scientists specialized in this field of the Geological Survey of Bangladesh and mostly with the facilities existing in the organization.</p> <p>Coastal areas of Bangladesh can be divided into three parts on the basis tidal amplitudes and sedimentary processes viz., (i) Satkhira-Barguna zone (zone-I), (ii) Patuakhali-Noakhali zone (zone-2) and (iii) Chittagong-Cox's Bazar zone (zone-3). Every year research work and report writing for each zone were presumed to be done simultaneously in the following way:</p> <p>I. Pre-survey:</p> | | |

Gathering of Materials and Relevant Information: LANDSAT -TM and SPOT imageries (hard and soft copies) of different years, especially before and after cyclones; aerial photographs, topographic maps and landuse maps are to be gathered. Also climatological and the tide gauge data are to be gathered to know the climate and the tidal phases in the study area and the history of cyclones hitting the coast of Bangladesh. Data on Holocene sedimentation in Bangladesh published so far will be collected.

Imagery-interpretation and Preparation of Preliminary Maps of the study area: This phase started by delineation of the tentative geomorphological boundaries on the available imageries of LANDSAT TM and SPOT at a regional scale (1:250,000) for the entire coast of Bangladesh and at a detailed scale (1: 50,000) Thana wise for each zone. The geomorphological maps on both scales were digitized and the preliminary attributes for the geomorphologic units were collected from different sources. Imageries of both pre and post cyclone were interpreted, digitized and overlaid to see the impact of cyclone on the coastal land at the detailed scale of the coastal Thanas of Bangladesh with the help of GIS.

The preliminary geological, geomorphological and landuse association maps both at regional scale and at detailed scale were delineated by interpreting the above mentioned imageries, the geological map of Bangladesh (1991) and the landuse map of the entire coastal belt of Bangladesh (1971).

II. Field Survey

Fieldworks were carried out consecutively during the field seasons of 1998-99, 1999-2000 and 2000-2001 to collect information about the recent cyclones hitting Bangladesh coast and about the Holocene sedimentation, geomorphology as well as geology of the coastal areas of the country.

III. Post Survey

- ◇ Final Geomorphological, Geological and Land Association Maps were prepared at Regional by compiling the final geomorphological, geological and land association interpretations. These maps were then digitized, polygonized, and rasterised.
- ◇ The Cyclone Surge Susceptibility Map at Regional scale for each zone were prepared. Statistical analysis of the cyclone surge and landfall analysis of cyclones were carried out to prepare a surge susceptibility map. A cyclone surge model was also developed to prepare cyclone surge hazard maps based on the geomorphological characteristics, frictions of the surface forms and cyclone frequency.
- ◇ Report writing.

In the 4th year (last year of the project) all data were supposed to be integrated in one report and published.

During the project period a preliminary report on the Ganges-Brahmaputra deltaic part (zone-I) has been prepared and was submitted to the concerned ministry and also in the data center of the GSB for official use only. Integrated report on the project could not prepared due to financial and time constraints.

On-Going Activities

Research papers are in preparation out of the field and desk-top data gathered during the project period.

Brief Description of findings/results

The preliminary outcomes of the project are briefly given below:

- ◇ The thickness of the Holocene deltaic sediments increases in both directions from west to east and north to south with a general trend in the southeast direction.
- ◇ The rate of sedimentation as well as subsidence increases by a factor of 2 from the northwestern part of the lower delta plain to the southeastern part. On the contrary very low sedimentation rates resulted from very slow subsidence and low sediment input are found in the central-western and southwestern parts of the lower delta plain.
- ◇ The analysis at regional scale shows that the eastern deltaic coast is the most susceptible area in terms of cyclone frequency and surge height. The analysis also shows that the deltaic part Khulna-Patuakhali coastal region is under low to moderate susceptibility compared to other parts of the coast.

Technical Reports Prepared

- ◇ A preliminary report on the Holocene sedimentation and geomorphological characterization of the coastal areas of Bangladesh for cyclone hazard assessment and zonation (Part-I), Data Centre, Geological Survey of Bangladesh, Dhaka, 2000 (for official use only).
- ◇ Holocene sedimentation of the lower Ganges-Brahmaputra river delta, Bangladesh, Final Report of Sonne-126 cruise, The Federal Institute of Geosciences and Natural Resources (BGR), Stilleweg

2, D-30655, Hannover, Germany, 1999.

- ◇ Impacts of sea level changes on different coastal parts of Bangladesh, Bangladesh Journal of Geology, Bangladesh Geological Society, v. 20, pp. 17-32,2001.
- ◇ Holocene coastal plains of Bangladesh and assessment of neotectonic activities in the Bengal delta, submitted to the 5th International Conference on Asian Marine Geology going to be held from 13-18 January 2004 in Bangkok, Thailand.
- ◇ Holocene Stratigraphy of the Lower Ganges-Brahmaputra River Delta in Bangladesh submitted to the 5th International Conference on Asian Marine Geology going to be held from 13- 18 January 2004 in Bangkok, Thailand.
